Every act of government flows from his authority although he acts on the advice of Parliament and the Cabinet. The appointment of a Prime Minister lies within his discretion, and he has the right to refuse to dissolve Parliament even against the advice of the Prime Minister. He appoints the Judges of the Federal Court and the High Courts on the advice of the Prime Minister. He is the Supreme Commander of the Armed Forces. The Yang di-Pertuan Agong is elected by the Conference of Rulers, and to qualify for election he must be one of the nine hereditary Rulers. He holds office for five years or until his earlier resignation or death. Election is by secret ballot on each Ruler in turn, starting with the Ruler next in precedence after the late or former Yang di-Pertuan Agong. The first Ruler to obtain not fewer than five votes is declared elected. A Deputy Supreme Head of State (the Timbalan Yang di-Pertuan Agong) is elected by a similar process. On election the Yang di-Pertuan Agong relinquishes, for his tenure of office, all his functions as Ruler of his own State and may appoint a Regent. The Timbalan Yang di-Pertuan Agong exercises no powers in the ordinary course, but is immediately available to fill the post of Yang di-Pertuan Agong and carry out his functions in the latter's absence or disability. In the event of the Yang di-Pertuan Agong's death or resignation he takes over the exercise of sovereignty until the Conference of Rulers has elected a successor.

CONFERENCE OF RULERS

The Conference of Rulers consists of the Rulers and the heads of the other States. Its prime duty is the election by the Rulers only of the Yang di-Pertuan Agong and his deputy. The Conference must be consulted in the appointment of judges, the Auditor-General, the Election Commission and the Services Commissions. It must also be consulted and concur in the alteration of State boundaries, the extension to the federation as a whole, of Islamic religious acts and observances, and in any bill to amend the Constitution. Consultation is mandatory in matters affecting public policy or the special position of the Malays and natives of Sabah and Sarawak. The Conference also considers matters affecting the rights, prerogatives and privileges of the Rulers themselves.

FEDERAL PARLIAMENT

Parliament has two Houses—the Dewan Negara (Senate) and the Dewan Rakyat (House of Representatives). The Senate has a membership of 58, made up of 26 elected and 32 appointed members. Each State Legislature, acting as an electoral college, elects two Senators; these may be members of the State Legislative Assembly or otherwise. The Yang di-Pertuan Agong appoints the other 32 members of the Senate. Members of the Senate must be at least 30 years old. The Senate elects a President and a Deputy President from among its members. It may initiate legislation, but all money bills must be introduced in the first instance in the House of Representatives. All bills must be passed by both Houses of Parliament before being presented to the Yang di-Pertuan Agong for the Royal Assent in order to become law. A bill originating in the Senate cannot receive Royal Assent until it has been agreed to by the House of Representatives, but the Senate has delaying powers only over a bill originating from and approved by the House of Representatives. Senators serve for a period of six years, but the Senate is not subject to dissolution. Parliament can, by statute, increase the number of Senators elected from each State to three. The House of Representatives consists of 154 elected members. Of these, 114 are from Peninsular Malaysia, 24 from Sarawak and 16 from Sabah. Members are returned from single-member constituencies on the basis of universal adult franchise. The life of the House of Representatives is limited to five years, after which time a fresh general election must be held. The Yang di-Pertuan Agong may dissolve Parliament before then if the Prime Minister so advises.

THE CABINET

The Yang di-Pertuan Agong appoints a Cabinet to advise him in the exercise of his functions, consisting of the Prime Minister and

an unspecified number of Ministers who must all be Members of Parliament. The Prime Minister must be a citizen born in Malaysia and a member of the House of Representatives who, in the opinion of the Yang di-Pertuan Agong, commands the confidence of that House. Ministers are appointed on the advice of the Prime Minister. A number of Deputy Ministers (who are not members of the Cabinet) are also appointed from among Members of Parliament. The Cabinet meets regularly under the chairmanship of the Prime Minister to formulate policy.

PUBLIC SERVICES

The Public Services, civilian and military, are non-political and owe their loyalty not to the party in power but to the Yang di-Pertuan Agong and the Rulers. They serve whichever government may be in power, irrespective of the latter's political affiliation. To ensure the impartiality of the service, and to protect it from political interference, a number of Services Commissions are established under the Constitution to select and appoint officers, to place them on the pensionable establishment, to decide as to promotion, and to maintain discipline.

THE STATES

The heads of nine of the 13 States are hereditary Rulers. The Ruler of Perlis has the title of Raja and that of Negri Sembilan, Yang di-Pertuan Besar. The rest of the Rulers are Sultans. The heads of the States of Malacca, Penang, Sabah and Sarawak are each designated Yang di-Pertua Negeri and do not participate in the election of the Yang di-Pertuan Agong. Each of the 13 States has its own written Constitution, and a single Legislative Assembly. Every State Legislature has powers to legislate on matters not reserved for the Federal Parliament. Each State Legislative Assembly has the right to order its own procedure, and the members enjoy parliamentary privilege. All members of the Legislative Assemblies are directly elected from single-member constituencies. The head of the State acts on the advice of the State Government, which advice is tendered by the State Executive Council or Cabinet in precisely the same manner as the Federal Cabinet tenders advice to the Yang di-Pertuan Agong.

The Legislative authority of the State is vested in the head of the State in the State Legislative Assembly. The executive authority of the State is vested in the head of the State but executive functions may be conferred on other persons by law. Every State has an Executive Council or Cabinet to advise the head of the State, headed by a Chief Minister (in Malacca, Penang, Sabah and Sarawak) or Menteri Besar (in other States), and collectively responsible to the State legislature. Each State in Peninsular Malaysia is divided into administrative districts under a District Officer. Sabah is divided into four residencies: West Coast, Interior, Sandakan and Tawau with headquarters at Kota Kinabalu, Keningua, Sandakan and Tawau respectively. Sarawak is divided into five Divisions, each in charge of a Resident—the First Division, with headquarters at Kuching; the Second Division, with headquarters at Simanggang; the Third Division, with headquarters at Sibu; the Fourth Division, with headquarters at Miri; the Fifth Division, with headquarters at Limbang.

AMENDMENTS

From 1 February 1974, the city of Kuala Lumpur, formerly the seat of the Federal Government and capital of Selangor State, is designated the Federal Territory of Kuala Lumpur. It is administered directly by the Federal Government and returns five members to the Dewan Rakyat.

An amendment passed in April 1981 empowers the Yang di-Pertuan Agong to declare a state of emergency on the grounds of imminent danger of a breakdown in law and order or a threat to national security.

Amendments passed in August 1983 empowered the Prime Minister, instead of the Yang di-Pertuan Agong, to declare a state of emergency, and the number of seats in the House of Representatives was increased to 176 (to take effect at the next general election), among other changes.

The island of Labuan, formerly part of Sabah State, was designated a Federal Territory as from 16 April 1984.

The Government

SUPREME HEAD OF STATE
(HM the Yang di-Pertuan Agong)

HM Tunku Mahmood Iskandar ibni Al-Marhum (Sultan of Johore) (elected 9 February 1984; succeeded 25 April 1984).

Deputy Supreme Head of State
(Timbalan Yang di-Pertuan Agong)

HRH Paduka Sri Sultan Azlan Muhibbuddin Shah ibni Al-Marhum Sultan Yussuff Izzuddin Shah (Sultan of Perak).

Judicial System

The two High Courts, one in Peninsular Malaysia and the other in Sabah and Sarawak, have original, appellate and revisional jurisdiction as the federal law provides. Above these two High Courts is the Supreme Court (formerly the Federal Court) which has, to the exclusion of any other court, jurisdiction in any dispute between States or between the Federation and any State; and has special jurisdiction as to the interpretation of the Constitution. The Supreme Court is the highest court of appeal, replacing the right of appeal to the Privy Council in the United Kingdom. There is also a right of appeal from the High Courts to the Supreme Court and limited right of appeal from the Supreme Court to the Yang di-Pertuan Agong. The High Courts each consist of the Chief Justice and a number of Judges. The Supreme Court consists of the Lord President together with the two Chief Justices of the High Courts and six Federal Judges. The Lord President and Judges of the Supreme Court, and the Chief Justices and Judges of the High Courts, are appointed by the Yang di-Pertuan Agong on the advice of the Prime Minister, after consulting the Conference of Rulers.

The Sessions Courts, which are situated in the principal urban and rural centres, are presided over by a President, who is a member of the Federation Legal and Judicial Service and is a qualified barrister or a Bachelor of Law from any of the recognized universities. Their criminal jurisdiction covers the less serious indictable offences, excluding those which carry penalties of death or life imprisonment. Civil cases are heard without a jury. Civil jurisdiction of a President's Sessions Court is up to M $25,000. The Presidents are appointed by the Yang di-Pertuan Agong.

The Magistrates' Courts are also found in the main urban and rural centres and have both civil and criminal jurisdiction, although of a more restricted nature than that of the Sessions Courts. The Magistrates consist of officers from either the Federation Legal and Judicial Service or are seconded from the administration to the Judicial Department for varying periods up to three years. They are appointed by the heads of the States in which they officiate on the recommendation of the Chief Justice.

Lord President of the Supreme Court of Malaysia: Tan Sri Dato' Haji MOHD SALLEH BIN ABAS.

Chief Justice of the High Court in Peninsular Malaysia: Tan Sri ABDUL HAMID OMAR.

Chief Justice of the High Court in Sabah and Sarawak: Tan Sri Datuk LEE HUN HOE.

Attorney-General: Tan Sri Datuk ABU TALIB BIN OTHMAN.

Religion

Islam is the established religion but freedom of religious practice is guaranteed. All Malays are Muslims, representing 53% of the total population in 1982. In Peninsular Malaysia 19% followed Buddhism (19% in Sarawak and 8% in Sabah), and 7% were Christians (29% in Sarawak and 24% in Sabah). A small minority of Chinese are Christians but most Chinese follow Buddhism, Confucianism or Daoism. Of the Indian community, about 70% are Hindu, 20% Muslim, 5% Christian and 2% Sikh. In Sabah and Sarawak, many follow animist beliefs.

ISLAM

President of the Majlis Islam: Datuk Haji MOHD FAUZI BIN Haji ABDUL HAMID, Kuching, Sarawak.

Transport

RAILWAYS

Peninsular Malaysia

The total length of the network was 2,215 track km in 1982. The main railway line, 787 km long, follows the west coast and extends from Singapore in the south to Butterworth (opposite Penang Island) to the north.

From Bukit Mertajam, close to Butterworth, the line branches off to the Thai border at Padang Besar where connection is made with the State Railway of Thailand. The East Coast Line, 526 km long, runs from Gemas to Tumpat (near Kota Bahru). A 21-km branch line from Pasir Mas (27 km south of Tumpat) connects with the State Railway of Thailand at the border station of Sungei Golok. Branch lines serve railway-operated ports at Port Dickson and Telok Anson as well as Port Kelang and Jurong (Singapore).

Express Rakyat rail services are operated between Butterworth and Singapore in addition to the normal express services between Butterworth, Kuala Lumpur and Singapore. In March 1980 the Express KMT began operating between Singapore–Kuala Lumpur and Kuala Lumpur–Butterworth. Work began at the end of 1984 on a light rapid transport system in Kuala Lumpur. The first stage is expected to be completed in 1988. A second phase is planned to involve an 'aerobus' running on an electric monorail system.

Malayan Railways (KTM) (Pentadbiran Keretapi Tanah Melayu): Jalan Sultan Hishamuddin, POB 1, Kuala Lumpur; tel. (03) 209422; telex 32925; f. 1885; Gen. Man. Dato' Ahmad Badri bin Mohamed Basir.

Sabah

Sabah State Railways: Kota Kinabalu; tel. 54611; the length of the railway was 140 km in 1984. The line is of 1-m gauge and runs from Tanjung Aru to Tenom, serving part of the west coast and the interior; diesel trains are used; Gen. Man. Daniel Wong Thien Sung.

ROADS

Peninsular Malaysia

In 1983 there were 25,637 km of roads in Peninsular Malaysia, of which 18,622 km were concrete and 1,057 km had earth surfaces. A main trunk road runs from the Thai border in the north to Singapore in the south. The Federal highway links Kuala Lumpur with Poh Kelang. The east–west highway linking Jeli in Kelantan with Grik in Perah was opened in 1982. Work commenced in 1982 on a 928-km inter-urban toll expressway, including the 14-km Penang bridge, linking Penang Island and Peninsular Malaysia, and forming the last link of the east–west highway, which is due for completion in 1988.

Sabah

Public Works Department: Kota Kinabalu, Sabah; tel. (088) 50333; telex 80339; maintains a network totalling 8,151 km (5,065 miles), of which 1,679 km (1,043 miles) were trunk roads in 1983; the total included 2,808 km (1,745 miles) of sealed roads; in 1983 expenditure on maintenance was M $47.1m.; Dir Yap Pak Khi.

Sarawak

Public Works Department: Jalan Simpang Tiga, Kuching, Sarawak; tel. 51011; telex 70112; total length of roads (Dec. 1983) 5,423 km, including 1,023 km of trunk roads, 1,607 km of feeder/development roads and 680 km of rural roads; M $19m. was spent on road maintenance in 1983; Dir Datuk Chai Boon Poh; Deputy Dir Fung Chee Ping.

SHIPPING

The ports in Malaysia are categorized into Federal ports, under the jurisdiction of the Federal Ministry of Transport, and State ports, responsible to the State ministries of Sabah and Sarawak.

In 1983 the Malaysian fleet totalled 620 vessels with 1.7m. grt. There is an ambitious programme to develop the merchant fleet and the shipping industry.

Peninsular Malaysia

The four Federal ports in Peninsular Malaysia are Kelang (the principal port), Penang, Johore and Kuantan. Malaysia's largest port, at Tanjung Berhasa, is currently under construction and was to be completed in early 1984. It will specialize in the handling of petroleum and petroleum products. At Pasir Gudang port, Johore, three new wharves are under construction. On completion the port will become a free trade zone.

Sabah

The chief ports are Kota Kinabalu, Sandakan, Tawau, Lahad Datu, Kudat, Semporna and Kunak and are administered by the Sabah Ports Authority. Many international shipping lines serve Sabah. Local services are maintained by smaller vessels.

Sabah Port Authority: POB 1430 Kota Kinabalu, Sabah; tel. (088) 56155; telex 08874.

Sarawak

Bintulu port, a Federal port, is the country's first LNG port, opened in 1983. Kuching Port Authority controls three ports in Sarawak, while Rajang Port Authority controls the four other ports.

Kuching Port Authority: POB 530, Kuching, Sarawak; tel. (082) 33122; telex 70420; f. 1961.

Rajang Port Authority: Sibu, Sarawak; tel. (084) 32685.

Principal Shipping Companies

Achipelego Shipping (Sarawak) Sdn Bhd: Lot 184, Padungan Rd, POB 2998, Kuching, Sarawak; tel. (082) 35123; telex 70294.

Haj Shipping Sdn Bhd: 33–35 Jalan Cunggah, Port Kelung, Kuala Lumpur; tel. 380966; telex 39646; 2 vessels; Chair. H. bin Abdul Jamil; Gen. Man. T. J. Toong.

Trans-Asia Shipping Corpn Sdn Bhd: 11th Floor, Yee Song Bldg, 15 Jalan Raja Chulan, Kuala Lumpur; tel. 209177; telex 30655.

CIVIL AVIATION

Malaysia has international airports at Kuala Lumpur, Kota Kinabalu, Penang, Johore Bahru and Kuching. In addition there are airports catering for domestic services at Alor Star, Ipoh, Kota Bahru, Kota Trengganu, Kuantan and Malacca in Peninsular Malaysia, Sibu and Miri in Sarawak and Sandakan, Tawau and Labuan in Sabah. There are also numerous smaller airstrips all over Malaysia.

Under the Fourth Malaysia Plan, about M $820m. has been allocated for the further development of a number of airports, including Kuala Lumpur, Kota Bahru and Kuala Trengganu, to cater for heavier air traffic and larger aircraft. New airports are also planned, including a second airport near Kuala Lumpur.

Department of Civil Aviation: Terminal 2 Bldg, Lapangan Terbang Antarabangsa, Kuala Lumpur; tel. (03) 760844; telex 37960.

Sabah Tourist Association: POB 946, Kota Kinabalu; tel. 211474; f. 1962; 52 mems; parastatal promotional org.; Chair. Datuk George Chin; Exec. Sec. Agnes Ho.

Sarawak Tourist Association: 1–3 Temple St, Ground Floor, POB 887, Kuching; tel. 20620; f. 1964; Chair. Encik Ahmad Haji Ebon; Hon. Sec. Encik Abdul Murat Abdullah.

MALDIVES

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of Maldives, lying about 675 km (420 miles) south-west of Sri Lanka, consists of 1,196 small coral islands (of which about 200 are inhabited), grouped in 19 atolls, in the Indian Ocean. The climate is hot and humid. The average annual temperature is 27°C (80°F), with little daily or seasonal variation, while annual rainfall is generally between 2,540 mm and 3,800 mm (100 to 150 in). The national language is Dhivehi (Maldivian), related to Sinhala. Islam is the state religion, and most Maldivians are Sunni Muslims. The national flag (proportions 3 by 2) is red, with a green rectangle, containing a white crescent, in the centre. The capital is Malé.

Recent History

Maldives, called the Maldive Islands until April 1969, formerly had an elected Sultan as head of state. The islands were placed under British protection, with internal self-government, in 1887. They became a republic in January 1953 but the sultanate was restored in February 1954. Maldives became fully independent, outside the Commonwealth, on 26 July 1965. Following a referendum, the country became a republic again in November 1968, with Ibrahim Nasir, Prime Minister since 1954, as President. The islands have been a member of the Colombo Plan since 1963, of the UN since 1965, of the IMF and the World Bank since 1978 and of the Commonwealth since 1982. Maldives is a member of 31 international organizations, and by 1984 had diplomatic relations with 58 countries.

In 1956 the Maldivian and United Kingdom Governments agreed to the establishment of a Royal Air Force staging post on Gan, an island in the southernmost atoll, Addu. In 1975 the British Government's decision to close the base and to evacuate British forces created a large commercial and military gap. In October 1977 President Nasir rejected an offer of US $1m. from the USSR to lease the former base on Gan, saying that he would not lease the island for military purposes, nor lease it to a superpower. In 1981 the President announced plans to set up an international business complex on Gan. By 1982 two garment factories were operational, and a third was under construction. Approximately £1.5m. would be needed to make the airport on Gan fully operational.

In March 1975 President Nasir dismissed the Prime Minister, Ahmed Zaki, and the post of Prime Minister was abolished. Unexpectedly, President Nasir announced that he would not stand for re-election at the end of his second term in 1978. To succeed him, the legislature chose Maumoon Abdul Gayoom, Minister of Transport under Nasir, who was approved by referendum in July 1978 and took office in November. President Gayoom announced that his main priority would be the development of the poor rural regions, while in foreign affairs the existing policy of non-alignment would continue. Maldives seeks to maintain and develop strong and varied foreign relations, in order to obtain more aid and to ensure that the Indian Ocean region remains peaceful.

Ex-President Nasir left the country after his resignation, but the authorities subsequently sought his return to Maldives, where he was required to answer charges of misappropriating government funds. In 1980 President Gayoom confirmed an attempted coup against the Government and implicated Nasir in the alleged plot. Nasir was to stand trial, in his absence, on these and other charges. In April 1981 Ahmed Naseem, former Deputy Fisheries Minister and brother-in-law of Nasir, was sentenced to life imprisonment for plotting to overthrow the President. Nasir himself categorically denied any involvement in the coup, and attempts to extradite him from Singapore have been unsuccessful. In 1983 rumours of an attempted coup against President Gayoom proved to be unfounded, and in September he was re-elected as President, for a further five years, by a national referendum.

Government

Legislative power is held by the unicameral Citizens' Council (Majilis), with 48 members, including 40 elected for five years by universal adult suffrage (two by the National Capital Island and two from each of the 19 atolls) and eight appointed by the President. Executive power is vested in the President, elected by popular vote (on nomination by the Majilis) for five years. He governs with the assistance of an appointed Cabinet, responsible to the Majilis. The country has 20 administrative districts: the capital is under direct central administration while the 19 atolls are each under an atoll chief (verin) who is appointed by the President, under the general guidance of the Minister of Atolls Administration. There are no political parties.

Economic Affairs

During the 1970s the growth rate of the Maldivian economy failed to keep pace with the increase in the country's population, which averaged 3% annually. In 1979, according to estimates by the World Bank, Maldives' GNP per head was US $220 (at average 1978–80 prices), having declined by 0.7% per year, in real terms, since 1970. However, despite the handicaps imposed by geography, sparse agricultural resources and a narrowly-based economy, Maldives achieved an average annual economic growth of 9.5% between 1978 and 1982. By 1982 the country's GNP per head had risen to $470 (at average 1980–82 prices), and GNP was expected to grow at a rate of 10% annually, but there is an increasing disparity of wealth between the islands.

Most of the country's population live on tiny coral islands in scattered atolls. These islanders are generally outside a money economy, subsisting by fishing and collecting coconuts. A large proportion of the coconut crop is regularly destroyed by rats, and a programme to eradicate the rats is under way. Malé has traditionally maintained a higher standard of living than the national average by levying an indirect tax on fish and coconuts. The soil is generally sandy, and arable land is minimal. Small quantities of coconuts, millet, sorghum, maize and yams are grown, but virtually all of the principal staple foods have to be imported. Only about 10% of the labour force are farmers, producing just 4% of the GDP.

Fishing is the mainstay of the economy, and about 90% of the catch was traditionally exported to Sri Lanka in dried form, known as 'Maldive fish'. From 1972, however, Sri Lanka gradually reduced its quota, and by 1978 had ceased importing altogether. This caused the Maldivian fishing industry to change its main product from dried fish to wet fish, and to invite foreign companies to buy fresh fish for freezing and export. Maldivian exports of fish to Sri Lanka were resumed in 1979, though at a much reduced level. The Maldive Nippon Corporation, a joint venture with Japanese interests, opened a fish-canning factory near Malé in 1978, but the enterprise proved to be unprofitable and the partnership ceased in 1982. In 1983 fishing employed 45% of the labour force and provided 20% of total GNP. The fleet of fishing vessels is gradually being mechanized, with the unfortunate side-effect of increasing the import bill for fuel to the equivalent of 30% of export earnings. In 1983 Norway made a grant of $4.1m. to finance the construction of a refrigeration complex, as part of a $12.6m. project to be completed with the help of various international organizations, in order to improve productivity in the fishing industry.

The second largest commercial activity is shipping, which began in 1958. In 1980 it accounted for 9% of government revenue, and in June 1981 the ADB approved a loan of US $1m. to assist in providing the country's first reliable shipping service between Malé and the outer atolls. Tourism also provides considerable foreign exchange. The significant development in tourism since 1972 has been financed by a local private enterprise.

The economy as a whole has been badly affected by the world recession, with the main sources of foreign exchange—fishing,

shipping and tourism—experiencing major declines in their markets. Tourism, in particular, has been seriously affected by the civil disturbances in Sri Lanka, the normal embarkation point for Maldives. The Government has attempted to reduce its budget deficit and the current deficit on the country's balance of payments, but Maldives is expected to require a greater volume of external support from the World Bank, amounting to some $25m. in 1984 and 1985.

The harvesting of coconuts, some of which are used for the extraction of coconut oil, is the fourth largest commercial industry in Maldives. Weaving coir yarn and collecting cowrie shells, in which women only are engaged, are also important to the economy.

In 1981 the country's first central bank, the Maldives Monetary Authority, was set up. The national currency, the Maldivian rupee, was renamed the rufiyaa. In 1982 Maldives' first commercial bank, a joint venture between the Government and the International Finance and Investment Company of Bangladesh, was opened. Import controls were introduced, and foreign traders were obliged to use banking facilities in Maldives.

Transport and Communications

Frequent shipping services link Maldives with Sri Lanka, India and Singapore. Smaller vessels provide services between the islands on an irregular basis. Maldives International Airlines, the national carrier, operates daily flights to Colombo, in Sri Lanka, and three flights per week to Trivandrum, in southern India, as well as two weekly internal flights between Malé and Gan. The airport on Hululé island has been expanded and improved to international standard, with financial assistance from Kuwait, Abu Dhabi, Saudi Arabia and OPEC. As Malé International Airport, it was opened in November 1981.

Social Welfare

The country's main hospital, in Malé, has 53 beds. However, three regional hospitals are now in operation: one in the north and two in the south. The Government has launched a national public health education programme. In 1977 only nine physicians were working in Maldives.

Education

There are three types of formal education: traditional Koranic schools (Makthab), Dhivehi-medium primary schools (Madhrasa) and English-medium primary and secondary schools. The latter are the only ones equipped to teach a standard curriculum. In 1979 it was estimated that less than 50% of the school-age population attended school. The Government is looking into the possibilities of educational broadcasting to overcome this problem, and by 1983 schemes to employ temporary teachers were under way. The first school outside Malé was opened in 1978. In 1975, with the assistance of the UNDP and the ILO, a full-time vocational training centre was opened in Malé, and in 1979 the Science Education Centre was opened with the help of UNESCO, the UNDP and the Kuwait Fund for Arab Economic Development. In 1980 a Basic Education Programme was launched, and an estimated 10,000 adults attended classes.

Tourism

The tourist industry brings considerable foreign exchange to Maldives, and receipts from tourism provided an estimated 17.4% of national revenue in 1983. The islands' attractions include white sandy beaches and multi-coloured coral formations. Earnings from tourism are equivalent to four-fifths of visible export revenue, and constitute more than one-seventh of the country's GDP. By 1984 there were 52 resort hotels, with 5,395 beds. The number of foreign visitors rose from 1,799 in 1972/73 to 74,163 in 1983. The Government is trying to improve the infrastructure. Telephones were installed on several resort islands in 1977. A Tourist Advisory Board was set up in 1981 to expand the industry still further.

Public Holidays

1985: 20 June (Id-ul-Fitr), 26 July (Independence Day), 27 August (Id-ul-Adha), 16 September (Islamic New Year), 11 November (Republic Day), 25 November (Birth of the Prophet Muhammad), 10 December (Fisheries Day).

1986: 7 January (National Day).

Currency and Exchange Rates

100 laari = 1 rufiyaa (Maldivian rupee).

Exchange rates (31 December 1984):

£1 sterling = 8.17 rufiyaa;

US $1 = 7.05 rufiyaa.

Statistical Survey

Source (unless otherwise stated): Department of Information and Broadcasting, Malé.

AREA AND POPULATION

Area: 298 sq km (115 sq miles).

Population: 142,832 (males 75,224, females 67,608) at census of 31 December 1977; 167,900 (official estimate for mid-1983).

Density: 563 per sq km (mid-1983).

Principal Town: Malé (capital), population 36,593 (mid-1983).

Births and Deaths: (1983): Live births 7,236 (birth rate 43.1 per 1,000); Deaths 1,750 (death rate 10.4 per 1,000).

Economically Active Population: 67,384 (Males 42,310, Females 25,074) at 1977 census.

AGRICULTURE, ETC.

Principal Crops (1981, metric tons): Coconuts (number of nuts) 11,173,176, Finger millet 55.06, Arica nuts 4.99, Maize 7.85, Italian millet 37.45, Cassava 19.59, Sweet potatoes 10.88, Onions 2.96, Chillies 34.24.

Sea Fishing (1983, '000 metric tons): Skipjack tuna (Oceanic skipjack) 19.7, Yellowfin tuna 6.2, Other tuna-related species 5.6, Other marine fishes 7.0, Total catch 38.5.

FINANCE

Currency and Exchange Rates: 100 laari (larees) = 1 rufiyaa (Maldivian rupee). *Notes:* 2, 5, 10, 20, 50 and 100 rufiyaa. *Sterling and Dollar Equivalents* (31 December 1984): £1 sterling = 8.17 rufiyaa; US $1 = 7.05 rufiyaa; 1,000 rufiyaa = £122.38 = $141.84. *Exchange Rate:* Fixed at US $1 = 7.05 rufiyaa since March 1982.

Budget (million rufiyaa, 1983): Revenue 137.5; Expenditure 154.7.

EXTERNAL TRADE

Principal Commodities (1981, '000 US dollars): *Imports* (c.i.f.): Food items 8,659, Beverages and tobacco 904, Manufactured goods 5,502, Petroleum products 4,682, Machinery and transport equipment 5,117, Crude materials, inedible, except fuel 475, Chemicals 1,196, Total, including others, 27,854. *Exports:* Maldive fish 23, Fresh skipjack 5,240, Dry salted skipjack 674, Dry shark fins 226, Dry salted reef fish 692, Black ambergris 39, Cowrie shells 24, Live tropical fish 54, Shark oil 88, Fabricated mica 211, Total, including others, 8,649.

TRANSPORT

Shipping (1983/84): Freight loaded 1,154 metric tons; freight unloaded 96,037 metric tons.

TOURISM

Tourist arrivals (1983): 74,000; number of hotel beds 5,395; number of resorts 50; receipts from tourism (1981) US $18.3m.

COMMUNICATIONS

There were 15,123 radio sets and 2,270 TV sets in 1983.

EDUCATION

Primary (1983): 254 schools, 38,302 pupils, 990 teachers.

Secondary (1983): 3 schools, 1,623 pupils, 329 teachers.

Vocational (1983): 1 school, 135 pupils, 17 teachers.

Directory

The Constitution

Following a referendum in March 1968, the Maldive Islands (renamed Maldives in April 1969) became a republic on 11 November 1968. The main provisions of the 1968 Constitution are:

The President is Head of State and is vested with full executive powers.

The President is elected by direct popular vote every five years.

The President appoints a Cabinet.

The members of the Cabinet are individually responsible to the Majilis, or Citizens' Council.

The Majilis has 48 members, including 40 elected for five years by universal adult suffrage (two by the National Capital Island and two from each of the 19 atolls) and eight appointed by the President.

The powers of the President, the Cabinet and the legislature are laid down in the Constitution.

Within the provisions of Islam, freedom of 'life movement', speech and development are guaranteed as basic rights of the people.

The Government

President and Head of State: Maumoon Abdul Gayoom (took office 11 November 1978; re-elected 30 September 1983).

THE CABINET
(February 1985)

President and Minister of Defence and National Security: Maumoon Abdul Gayoom.

Minister of Fisheries: Abdul Sattar Moosa Didi.

Minister of Foreign Affairs: Fathhulla Jameel.

Minister of Agriculture: (vacant).

Minister of Education: Mohamed Zahir Hussain.

Minister of Atolls Administration: Abdulla Hameed.

Minister of Transport and Shipping: Ahmed Mujuthaba.

Minister of Trade and Industries: Ilyas Ibrahim.

Minister of Health: Abdulla Jameel.

Minister of Home Affairs and Social Services: Umar Zahir.

MINISTRIES

Office of the President: Marine Drive (North), Malé 20-05; tel. 3701; telex 66013.

Ministry of Atolls Administration: Faashana Bldg, Malé 20-05; tel. 2826.

Ministry of Defence and National Security: Badeyrige, Malé 20-05; tel. 2118; telex 66065.

Ministry of Education: Ghaazee Bldg, Malé 20-05; tel. 3261.

Ministry of Fisheries: Ghaazee Bldg, Malé 20-05; tel. 2622.

Ministry of Foreign Affairs: Marine Drive (North), Malé 20-05; tel. 3405; telex 66008.

Ministry of Health: Ghaazee Bldg, Malé 20-05; tel. 3216.

Ministry of Home Affairs and Social Services: Faashana Bldg, Malé 20-05; tel. 3427.

Ministry of Trade and Industries: Ghaazee Bldg, Malé 20-05; tel. 3668.

Legislature

MAJILIS

The Majilis (Citizens' Assembly) comprises 48 members, of whom eight are nominated by the President, two elected by the people of Malé and two elected from each of the 19 atolls.

Speaker: Ibrahim Shihab.

Political Organizations

There are no political parties in Maldives.

Diplomatic Representation

EMBASSIES AND HIGH COMMISSIONS IN MALDIVES

India: Maafannuaage, Malé; High Commissioner: Sujan Singh.

Pakistan: 2 Moonimaage, Galolhu, Malé; Ambassador: Azuharul Anwar Chowdhury.

Sri Lanka: Muraka, Maafannu, Malé; High Commissioner: P. M. D. Fernando.

Judicial System

The administration of justice is carried out according to the Sharia, the sacred law of Islam, through a body appointed by the President. In 1980 the Maldives High Court was established. There is a Police Court and eight other courts in Malé and 201 Island Courts, one in every inhabited island. All are under the control of the Ministry of Justice.

HIGH COURT

Chief Justice: Moosa Fathy.

Judges: Ibrahim Naseer, Ahmed Hameed Fahmy.

CITIZENS' SPECIAL MAJILIS

This is a special council set up to deal with matters concerning the Constitution, financial activities and the protection of citizens' rights and includes any law changing the administrative structure or related to the leasing of land to foreigners. It is composed of all the members of the Citizens' Majilis, the Cabinet and 48 elected members (two from each atoll, two from Malé and eight nominated by the President).

Chairman: Ibrahim Shibab.

Religion

Islam is the state religion. The Maldivians are mostly Sunni Muslims.

The Press

Aafathis: Malé; daily; Dhivehi and English; Editor Abdul Sattar.

Faiythoora: National Centre for Linguistic and Historical Research, Billoorijehige, Malé 20-04; tel. 3206; f. 1979; monthly magazine; Dhivehi; Maldivian history, culture and language; Editor Uz Mohamed Jameel Didi.

Hafthaa: Malé; weekly; Dhivehi and English; Editor Ahmed Zahir.

Haveeru: Malé; daily; Dhivehi and English; Editor Ahmed Aslam; circ. 1,000.

NEWS AGENCY

Haveeru News Agency (HANA): Zamaahee Aakula, Galolhu, Malé 20-04; tel. 3055.

Radio and Television

In 1983 there were 15,123 radio and 2,270 television receivers.

Department of Information and Broadcasting: Ghaazee Bldg, Orchid Magu, Malé; tel. 3424; telex 66085; f. 1978; Dir Mohamed Waheed.

Voice of Maldives: Moonlight Higun, Malé; tel. 2841; radio broadcasting began in 1962; home service in Dhivehi and English; broadcasts 3,926 hrs. annually; Dep. Dir Ibrahim Manik.

TV Maldives: Buruzu Magu, Malé; tel. 3106; telex 66085; television broadcasting began in 1978; Dir Hussain Shihab.

Finance

CENTRAL BANK

Maldives Monetary Authority (MMA): Majeedee Bldg, Marine Drive, Malé; tel. 2290; telex 66055; f. 1981; issues currency and fixes the exchange rate of the rufiyaa; advises the govt on banking and monetary matters; Gov. Maumoon Abdul Gayoom; Vice-Gov. Ismail Fathy; Gen. Man. Adam Maniku.

COMMERCIAL BANK

Bank of Maldives: 11 Marine Drive, Malé; tel. 3091; telex 77030; f. 1982; 40% owned by International Finance Investment and Commerce Bank Ltd, Bangladesh; Chair. Ahmed Mujuthaba; Dirs Moosa Ismail, Ahmed Adam, Ali Shareef, Agha Yusuf, Masihur Rahman, Fazihur Rahman.; Chief Exec. Abbas Uddin Ahmed.

FOREIGN BANKS

The State Bank of India, the Bank of Ceylon, Habib Bank Ltd (Pakistan) and Bank of Credit and Commerce International Ltd (Luxembourg) have offices in Malé.

Trade and Industry

State Trading Organization (STO): Malé; state-sponsored commercial and financial organization; imports staple foods and other consumer items; handles two-thirds of the country's imports; Man. Dir Ilyas Ibrahim; Asst Dir Moosa Ismail. Operates the following subsidiaries:

Felivaru Canning Factory: Malé.

JSM/STO Maldives Ltd: Malé.

Silverline Garments (Maldives) Ltd: c/o STO, 2nd Floor, Metropolis, Malé; tel. 3276; telex 66023.

INDUSTRIAL ORGANIZATIONS

Insulectra Maldives Ltd: Malé; a subsidiary of Insulectra Ltd of Hong Kong; manufactures and exports electronic components; Man. Dir Kisto Kumar Saha.

Maldives Fisheries Corporation: Malé; f. 1979; state-owned commercial enterprise engaged in fishing, fish purchasing, processing, export and import and dealing with marine fishery resources; took over Faadhippolhu fish canning factory in 1982; Dir Ahmed Nazeer.

Malé Aerated Water Co Ltd: Dirs Mohamed Umar Manik, Dr Ibrahim Umar Manik.

Transport

In 1984 there were 686 motorcycles, 107 lorries and 310 cars, all in Malé, and 10,365 registered bicycles throughout the islands.

Maldives Transport and Contracting Company Ltd: Ship Plaza, Orchid Magu, Malé; tel. 3522; telex 77038; f. 1981; 60% state-owned; Man. Dir Ahmed Adam; Operations Dir Adam Saleem.

SHIPPING

Vessels operate between Maldives and Sri Lanka at frequent intervals. They also call at places in India, Pakistan, Burma, Singapore, Malaysia, Bangladesh, Thailand, Indonesia and the Middle East.

Maldives Shipping Ltd: MSL Bldg, Orchid Magu, Malé; tel. 2021; telex 66001; f. 1965; 100% state-owned; sole shipping operator; fleet of 26 vessels; 22 general cargo ships (11 of 10,000–16,000 dwt, 11 of 1,000–9,000 dwt), two tugs, two tankers (1,000 dwt); also manages four general cargo ships (two of 20,000 dwt and others 2,000–5,000 dwt); brs in Bombay, Bangkok, London, Karachi, Colombo and Singapore; Man. Dir Ali Umar Maniku; Dir Ahmed Mujuthaba.

CIVIL AVIATION

The Department of Civil Aviation, set up in 1979, handles all activities connected with air transport. The existing airport on Hululé island was expanded and improved to international standard with financial assistance from Kuwait, Abu Dhabi, Saudi Arabia and OPEC and, as Malé International Airport, was officially opened

in November 1981. Charter flights from Europe have subsequently begun operation.

Maldives International Airlines (MIA): Malé International Airport, Marine Drive, Malé; tel. 3507; telex 66034; f. 1977 jointly by Maldives govt and Indian Airlines; services to India and Sri Lanka; 1 Boeing 737-200; operates four flights a week between Malé and Colombo and Trivandrum in southern India and a twice-weekly internal air service between Malé and Gan; Man. Mohan Rao.

Tourism

Department of Tourism: Ghazee Bldg, 20 Orchid Magu, Malé; tel. 3224; telex 66019; Dir Ahmed Zahir.

Tourism Advisory Board: Malé; tel. 3224; telex 66019; f. 1981 to establish standards of service in tourist resorts and hotels, formulate uniform prices and to expand the tourist industry; Chair. Fatullah Jameel.

MALI

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of Mali is a land-locked country in West Africa, with Algeria to the north, Mauritania and Senegal to the west, Guinea and the Ivory Coast to the south, and Burkina Faso and Niger to the east. The climate is hot throughout the country. The northern region of Mali is part of the Sahara, an arid desert. It is wetter in the south, where the rainy season is from June to October. Temperatures in Bamako are generally between 16°C (61°F) and 39°C (103°F). The official language is French but a number of other languages, including Bambara, Fulfulde, Sonrai, Tamashek, Soninke and Dogon, are widely spoken. About 65% of the population are Muslims and more than 30% follow traditional beliefs, the remainder being Christians. The national flag (proportions 3 by 2) has three equal vertical stripes, of green, gold and red. The capital is Bamako.

Recent History

Mali was formerly French Sudan (Soudan), a part of French West Africa. In April 1959 it merged with Senegal to form the Federation of Mali, which became independent on 20 June 1960. Senegal seceded two months later, and the remnant of the Federation was proclaimed the Republic of Mali on 22 September 1960. The first President, Modibo Keita, adopted authoritarian socialist policies and broke away from the French political and financial bloc. Despite communist aid, rapid inflation forced Keita to return to the Franc Zone in 1967, at the price of a 50% currency devaluation. The elected National Assembly was dissolved in January 1968. President Keita was overthrown in November 1968 by a group of junior army officers, who assumed power as the Military Committee for National Liberation (CMLN). The Constitution was abrogated and political parties banned.

Lieutenant (later Gen.) Moussa Traoré emerged as the dominant figure in the new regime, with the posts of Head of State and President of the CMLN, and in September 1969 he replaced Capt. Yoro Diakité as President of the Government (Prime Minister). Diakité died in prison in 1973. The regime maintained military rule and quashed opposition, promising a return to civilian rule when Mali's severe economic problems, created by the drought in the Sahel region, had been overcome and when new political institutions had been created.

In April 1974 the CMLN published a proposed new constitution, providing for the establishment of a one-party state, with the military regime remaining in power for a transitional period of five years. The constitution was approved by a referendum in June 1974. The formation of a new ruling party, the Union Démocratique du Peuple Malien (UDPM), was announced in September 1976. There was persistent opposition from politicians who had been active before the 1968 coup, and were barred from political activity, and from those, particularly students, who would prefer a multi-party democracy. There was also reported to be resistance to civilian rule from within the army. In February 1978 the four members of the CMLN who were most closely associated with the repressive machinery of military rule, together with 32 senior members of the military and police, were arrested. In June 1980 two former ministers were sentenced to death on corruption charges. President Traoré's success against these 'hard-liners' removed differences among the military as an obstacle to the return of civilian rule, and in May 1978 six civilians were appointed to the Council of Ministers, bringing its number to 15, including nine civilians. The UDPM was officially constituted in March 1979. In the presidential and legislative elections on 19 June, President Traoré was almost unanimously re-elected for a five-year term, while the single list of UDPM candidates for the National Assembly received equally overwhelming support. Mali thus came under 'constitutional' rule, although the role of the armed forces remains significant in the administrative élite.

In November 1979 students in secondary and higher education boycotted their classes, following a dispute over examinations and grants, and the Government closed the institutions. Following talks between students and authorities in December, schools were reopened in January 1980. The Students' Union was dissolved because it refused to join the youth section of the UDPM; in its place, committees of the Party's youth movement were formed in educational establishments. The death in custody of the student union leader in March resulted in further violent protests by students. Classes resumed when the President announced the release of several hundred detained students, but there were again difficulties later in the year, when teachers at primary schools went on strike. All educational establishments were closed for the 1980/81 academic year. In July 1981 the President released those teachers, pupils and students who had been imprisoned following the boycott of school examinations and strikes.

In December 1980 a plot to overthrow the Government was discovered, and several junior police officers were arrested. At a subsequent trial, three people were condemned to death for their part in the planned coup.

At an election in June 1982 for the 82-member National Assembly, candidates of the UDPM obtained 99.8% of the votes cast. In a major government reshuffle in July, structural changes were made to improve the effectiveness of departments responsible for economic policy, and the Council of Ministers was increased from 15 to 18 members. With the abolition in April 1983 of the Ministry for Energy and Mines, the Council was reduced to 17 members. A further reshuffle was carried out in December 1984.

Following Gen. Traoré's visit to Guinea in March 1983, it was decided to create a permanent secretariat with a view to political and economic integration of the two countries. The continuing frontier dispute between Mali and Burkina Faso (formerly Upper Volta) was submitted to the International Court of Justice, and in September 1983 the Presidents of the two countries agreed to set up a joint co-operation commission to strengthen understanding. A boundary agreement over the Algerian-Mali frontier was signed in May 1983 by Gen. Traoré and President Chadli, and border demarcation was completed in April 1984.

Severe drought in 1983 and 1984 was aggravated by an outbreak of cholera in the Gao region, which resulted in more than 350 deaths during November and December 1984. An estimated 100,000 people fled from the famine-stricken north during 1984, towards southern Mali and neighbouring Burkina Faso.

Government

A new Constitution was approved by referendum in June 1974 and adopted in June 1979. The President, elected for a six-year term by universal adult suffrage, is Head of State and Head of Government. Legislative power is held by the National Assembly, with 82 members, directly elected from a list of candidates chosen by the single political party, the Union Démocratique du Peuple Malien (UDPM). The Constitution was amended in September 1981, reducing the term of office of the National Assembly to three years. President Traoré is establishing local branches of the party, which was created in 1976. Mali has seven administrative regions, and a district government in Bamako.

Defence

In July 1984 the armed forces totalled 4,950 men. There was an army of 4,600, a navy of 50 (with three patrol boats on the River Niger) and 300 men in the Soviet-equipped air force. The gendarmerie numbers 5,000. Estimated defence expenditure in 1982 was US $40m.

Economic Affairs

Mali is poor in natural resources. A large part of the country lies in the Sahara, an arid desert which is capable of supporting only a sparse nomadic population who depend on livestock herding. In the south, where most of Mali's inhabitants live, the Niger and Senegal rivers form a relatively fertile basin. Nevertheless, the country remains severely underdeveloped. In 1982, according to estimates by the World Bank, Mali's gross national product (GNP) per head, measured at average 1980–82 prices, was US $180, among the five lowest in Africa and one of the 12 lowest in the world. Between 1960 and 1982, it was estimated, Mali's GNP per head increased, in real terms, by 1.6% per year. During the 1970–80 decade alone, the average annual growth of GNP per head, in constant prices, was 2.3%. The increase in overall gross domestic product (GDP), in real terms, averaged 3.3% per year in 1960–70, rising to 4.3% per year in 1970–82.

Almost 90% of the working population are engaged in agriculture. The severe drought of 1968–74 drastically reduced the size of livestock herds. There was some improvement between 1976 and 1978, but by 1980 herds were again affected by drought conditions, and Mali appealed for international aid to save its livestock. In 1983 and 1984 urgent international appeals were again issued, as severe drought extended to normally unaffected areas. Livestock rearing accounted for 20% of the GDP in 1981. Only about 20% of the land is suitable for cultivation, the principal crops being rice, cotton, millet, cassava and groundnuts. Agricultural production has declined since 1980, and fell sharply in the 1983/84 season, as drought affected almost all parts of the country. The shortfall in the output of cereals was estimated at 300,000 tons in 1984 and was expected to reach 481,000 tons in the following year. Cotton production, however, remained largely unaffected: production of seed (unginned) cotton totalled 127,601 metric tons in 1982/83, an increase of 31,140 tons over the previous season, and rose to 140,000 tons in 1983/84, owing to an increase in the area cultivated and an improvement in the average yield. However, total revenue from cotton in 1982/83 was 14,400m. Mali francs, a decrease of 1,900m. compared with 1981/82. Cotton accounted for 39% of Mali's export revenue in 1982. In June 1983 Mali joined other cotton-producing developing countries to form the International Cotton Producers' Association. Mali's food shortages have been aggravated by the long-standing problem of crop smuggling across the country's borders to the more lucrative markets of Burkina Faso, the Ivory Coast and Senegal. In 1983 smuggling to Senegal amounted to an estimated US $19.5m., compared with $6.1m. for official trade. There is extensive river fishing, and dried and smoked fish are exported.

Industrial activity occupies a minor position in the economy, contributing about 18% of GDP. Manufacturing is mainly based on the processing of food, cotton, hides, skins and wool. State enterprises in trade and industry account for around 90% of the total, although private enterprise has recently been encouraged. Apart from old-established salt mines, small quantities of phosphates, gold and uranium are mined. Phosphate production began in 1976 at Tilemsi, with estimated reserves of 20m.–30m. tons. Present output is 1,500–2,000 tons per year and there are plans for a processing plant. There has been extensive prospecting for lithium, diamonds and petroleum, and deposits of iron ore have been discovered at Kalana and Bala. Gold reserves at Kalana are estimated at 30,000 kg, and are currently being mined at a rate of 400 kg per year by the state mining company and the USSR. There are considerable deposits of bauxite and manganese. A geological and mining survey was to begin in 1985, with financial assistance from the EEC. The survey was to cover western Mali, where deposits of copper, gold, iron and tin have been identified.

The increasing trade deficit is giving rise to concern. For every year between 1978 and 1982 the cost of imports was more than double the value of exports. The foreign trade deficit totalled 122,600m. Mali francs in 1982 and 135,200m. Mali francs in 1983.

Radical economic reforms have been implemented by Gen. Traoré, as agreed with the IMF in May 1982. These include efforts to restore the country's finances by encouraging private enterprise and by eliminating loss-making corporations. The State Marketing Board was dismantled in 1983 and replaced by private companies, in an attempt to encourage price rises and thus increase production, and to discourage smuggling. As a result of this policy, however, a greater share of the market was taken by private traders, instead of by village co-operatives as envisaged.

In October 1983 the countries of the West African Monetary Union (UMOA) finally decided to accept Mali as a full member. Mali's admission to the UMOA had been blocked since 1974 because of a veto by Upper Volta (now Burkina Faso), although Mali had been a *de facto* participant in the Franc Zone since 1967. Mali formally joined the UMOA in February 1984, and in August the Mali franc was replaced by the CFA franc (worth 2 Mali francs) as legal tender. It is hoped that a return to the CFA franc will reduce smuggling (particularly of agricultural products), boost trade and encourage a greater flow of foreign capital into the country.

The aims of the 1974–78 Development Plan were not all achieved, although 67% of the projects were completed. An important aspect of this Plan was the restructuring of the banking and financial system. The 1981–85 Plan was intended to stimulate production, to improve the efficiency of economic management and to increase domestic savings. In December 1983 the IMF approved a 17-month stand-by arrangement, authorizing purchases up to the equivalent of 40.5m. SDRs in support of the Government's programme for economic and financial adjustment. Among the Plan's projects were the establishment of a fund to develop underground water resources and the exploitation of fossil fuels as well as hydroelectric and renewable forms of energy. Three dams are already supplying power, and work has begun on the Manantali dam, part of the Senegal river development project which is being undertaken with Senegal and Mauritania. The project is scheduled for completion in 1988. Mali has 30 solar pumps, supplying power to villages, and a 75 kW solar centre at Dire.

Transport and Communications

The River Senegal and the River Niger, which is navigable for its total length in Mali of 1,782 km, form the principal arteries of transport. The only railway runs from Koulikoro, via Bamako, to the Senegal border (640 km) and then to Dakar (Senegal). Roads are being improved, and about 7,500 km of the 18,000 km of roads and tracks are open all the year. Mali was due to receive an EDF grant of 1.57m. ECU to improve road traffic conditions and ferry services. The construction of a 556-km Saharan road, linking Gao in Mali with North Africa, which will serve as an important trade route, began in 1979. In 1983 Mali opened a warehouse in the port of Lomé (Togo), an important commercial outlet for the land-locked country. There are several airports, the main one being at Bamako. Mali is served by several foreign airlines.

Social Welfare

The Government maintains anti-yellow fever services, and there are 14 state hospitals and 367 medical centres. In 1978 Mali had 287 physicians and four medical training schools. In 1983 the IDA granted Mali a loan of US $16.7m. for the improvement of health care services. A minimum wage is in force.

Education

Education is free and, in theory, compulsory for all children between six and 15 years of age. There is a nine-year basic course and three years of secondary education. In 1978 enrolment at primary schools was equivalent to 27% of children aged six to 11 (35% of boys, 20% of girls). Secondary enrolment was only 9% of those aged 12 to 17 (13% of boys, 5% of girls). There were six schools of higher education in 1976 but many students receive higher education abroad, mainly in France and Senegal. In 1976 adult illiteracy averaged 90.6% (males 86.5%, females 94.3%). To combat this, a national literacy programme is being carried out. In 1978 there were 30,000 students at 1,321 literacy centres. A basic education programme, launched in 1984, aimed to expand functional education programmes over a period of five years.

Tourism

Tourism is being developed, based on hunting and fishing and the celebrated city of Timbuktu. New hotels are being built at Mopti and Timbuktu. There were 706 hotel rooms in 1982 but, under the 1981–85 Plan, it was hoped to increase the number

to 1,000. The Palais de la Culture in Bamako, with a 3,000-seat theatre and conference hall, was built with North Korean help and inaugurated in July 1983. In 1979 about 22,000 tourists visited Mali. In 1980 estimated tourist receipts amounted to US $9m.

Public Holidays

1985: 1 May (Labour Day), 25 May (Africa Day), 20 June (Id ul Fitr, end of Ramadan), 14 July (National Day), 27 August (Id ul Adha, Feast of the Sacrifice), 16 September (Muslim New Year), 22 September (Independence Day), 19 November (Anniversary of 1968 coup d'état), 25 November (Mouloud, Birth of the Prophet), 25 December (Christmas).

1986: 1 January (New Year's Day), 20 January (Armed Forces Day), 31 March (Easter Monday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (31 December 1984):
1 franc CFA = 2 French centimes;
£1 sterling = 558.5 francs CFA;
US $1 = 482.25 francs CFA.

Statistical Survey

Area and Population

AREA, POPULATION AND DENSITY

Area (sq km)	1,240,000*
Population (census of 16 December 1976)	
Males	3,123,733
Females	3,271,185
Total	6,394,918
Population (official estimates at mid-year)	
1981	7,160,000
1982	7,342,000
1983	7,528,000
Density (per sq km) at mid-1983	6.1

*478,767 sq miles.

PRINCIPAL ETHNIC GROUPS (estimates, 1963)

Bambara	1,000,000	Malinké	200,000
Fulani	450,000	Touareg	240,000
Marka	280,000	Sénoufo	375,000
Songhai	230,000	Dogon	130,000

BIRTHS AND DEATHS

Average annual birth rate 49.0 per 1,000 in 1970–75, 49.4 per 1,000 in 1975–80; death rate 23.2 per 1,000 in 1970–75, 22.2 per 1,000 in 1975–80 (UN estimates).

PRINCIPAL TOWNS (population at 1976 census)

Bamako (capital)	404,000	Sikasso	47,000
Ségou	65,000	Kayes	45,000
Mopti	54,000		

ECONOMICALLY ACTIVE POPULATION
(ISIC Major Divisions, 1976 census)

	Males	Females	Total

Finance

CURRENCY AND EXCHANGE RATES

Monetary Units

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Denominations

Coins: 1, 2, 5, 10, 25, 50 and 100 francs CFA.
Notes: 100, 500, 1,000, 5,000 and 10,000 francs CFA.

French Franc, Sterling and Dollar Equivalents (31 December 1984)

1 French franc = 50 francs CFA;
£1 sterling = 558.5 francs CFA;
US $1 = 482.25 francs CFA;
1,000 francs CFA = £1.7905 = $2.0736.

Average Exchange Rate (francs CFA per US $)

1981	271.7
1982	328.6
1983	381.1

Note: The franc CFA, whose value is fixed at 2 French centimes, circulated in Mali prior to July 1962, when it was replaced (at par) by the Mali franc. In May 1967 the Mali franc was devalued by 50% to 1 French centime or 50 centimes CFA. This valuation remained in force until August 1984, when the Mali franc was abolished, and the franc CFA (worth 2 Mali francs) was reintroduced. Figures in this Survey may still be expressed in terms of Mali francs.

Directory

The Constitution

The Military Committee for National Liberation (CMLN) published a new Constitution on 26 April 1974, and it was approved by referendum on 2 June 1974. Following a five-year transition period, during which the CMLN continued to rule the country, this Constitution was adopted in June 1979. It was amended in September 1981. The Constitution provides that the President, who is Head of State and Head of Government, shall be elected by universal suffrage for a six-year term. Legislative power is held by the National Assembly, with 82 members elected for a three-year period. Mali is a single-party state.

The Government

HEAD OF STATE

President: Gen. Moussa Traoré (assumed power 19 November 1968; elected President 19 June 1979).

COUNCIL OF MINISTERS

(February 1985)

Head of Government and Minister of Defence: Gen. Moussa Traoré.

Minister of State for Planning: Gen. Amadou Baba Diarra.

Minister of State for Industrial Development and Tourism: Djibril Diallo.

Minister of State for State Companies and Enterprises: Oumar Coulibaly.

Minister of Finance and Trade: Dianka-Kaba Diakité.

Minister of Foreign Affairs and International Co-operation: Alioune Blondin Beye.

Minister of Agriculture: Lt-Col Issa Ongoiba.

Minister of Natural Resources and Animal Husbandry: Mady Diallo.

Minister of Energy and Mines: Robert Tieble N'Daw.

Minister of Transport and Public Works: Mamadou Haidara.

Minister of the Interior: Lt-Col Abdouramane Maiga.

Minister of Justice: Diango Sissoko.

Minister of Information and Telecommunications: Gaskou Fatou Niang.

Minister of National Education: Gen. Sekou Ly.

Minister of Public Health and Social Affairs: Dr Mamadou Dembele.

Minister of Labour and Civil Service: Modibo Keita.

Minister of Sports, Arts and Culture: Ahmed Mohamed Aghamani.

MINISTRIES

All Ministries are in Bamako.

Legislature

ASSEMBLÉE NATIONALE

In accordance with the 1974 Constitution, a National Assembly comprising 82 deputies was elected on 19 June 1979, for a four-year term. The single-party list of candidates was drawn up from nominations by each UDPM local branch committee. An amendment to the Constitution of September 1981 reduced the term of office to three years. A new 82-member National Assembly was elected on 12 June 1982.

Political Organizations

Union démocratique du peuple malien (UDPM): Bamako; single party provided for in 1974 constitution; f. 1979; the party's supreme organ is the congress and, between congress sessions, the national council of 137 mems; a central exec. bureau of 19 mems directs party policy; party structure is based on 'democratic centralism'; Sec.-Gen. Gen. Moussa Traoré; Political Sec. Djibril Diallo.

Union des jeunes du Mali (UNJM): Bamako; national youth movement; Sec.-Gen. Mahamadou Baba Diallo.

Union nationale des femmes du Mali (UNFM): BP 310, Bamako; f. 1968; 350,000 mems; Pres. Mme Soro Satouko; Sec.-Gen. Massaran Konaté Dicko.

Diplomatic Representation

EMBASSIES IN MALI

Algeria: Derrière le Fleuve, Badalabougou; Ambassador: Ahmed Amrani.

China, People's Republic: BP 112, Bamako; Ambassador: Zhou Haiping.

Cuba: BP 40, Korofina; Ambassador: Eduardo Balbim.

Egypt: BP 44, Badalabougou; tel. 22-35-03; telex 407; Ambassador: Fathi Draz Mustapha.

France: square Patrice Lumumba, BP 17, Bamako; tel. 22-29-51; telex 569; Ambassador: G. Pavret de la Rochefordière.

German Democratic Republic: BP 102, Bamako; Ambassador: Erich Meske.

Germany, Federal Rebublic: BP 100, Badalabougou; Ambassador: Heinrich Seeman.

Guinea: BP 118, Bamako; Ambassador: Mahmoud Mass Diallo.

Iraq: BP 2512, Badalabougou; Ambassador: Abdul Karim Mohamed Najim.

Korea, Democratic People's Republic: route de Koulikoro, Bamako; Ambassador: Hong Il-ho.

Libya: quartier de l'Hippodrome; Ambassador: Abdelsalam Saad Baaiu.

Malaysia: Bamako; Ambassador: Zainal Haji Lembang.

Mauritania: BP 135, Bamako; Ambassador: Sass Ould Guig.

Morocco: BP 2013, Bamako; Chargé d'affaires: Larbi Roudies.

Nigeria: BP 57, rue du Général Combes, Bamako; tel. 22-57-71; Chargé d'affaires: F. F. Adegunloye.

Poland: BP 343, route de la Pyrotechnie; Ambassador: (vacant).

Saudi Arabia: BP 81, Badalabougou; Chargé d'affaires a.i.: Aziz Ahmed Zaki.

USSR: BP 300, Bamako; Ambassador: Malik Fazylov.

USA: BP 34, ave Mohamed V, Bamako; Ambassador: Robert J. Ryan Jr.

Yugoslavia: BP 207, Bamako; Ambassador: Dusan Grubor.

Judicial System

Supreme Court: Bamako; f. September 1969; 19 mems; judicial section comprising three civil chambers and one criminal chamber; administrative section dealing with appeals and fundamental rulings; mems are nominated for five years and may not be mems of the government nor practise law privately during that time; Pres. Bekaye N'Diaye.

Special Court of State Security: Bamako; f. 1976, dissolved February 1978; new court sworn in September 1978; composed of four civilian magistrates, 22 army officers and NCOs and three regional governors; to judge crimes against state property, especially embezzlement.

Court of Appeal: Bamako.

There are two Tribunaux de première instance (Magistrate's Courts) and also courts for labour disputes.

Religion

It is estimated that 65% of the population are Muslims, about 30% follow traditional beliefs and 5% are Christians, with Roman Catholics comprising 1% of the total population.

ISLAM

Chief Mosque: Bagadadji, Place de la République, Bamako.

CHRISTIANITY

The Roman Catholic Church

Archbishop of Bamako: Mgr. Luc Auguste Sangare, BP 298, Bamako; tel. 22-51-87.

There are numerous Protestant mission centres run by US societies, with a total personnel of about 370.

The Press

Barakela: Bamako; monthly; organ of the Union nationale des travailleurs du Mali.

Bulletin Quotidien de la Chambre de Commerce et d'Industrie du Mali: BP 46, Bamako; f. 1936; Editor G. Drabo.

Bulletin de Statistiques: Direction Nationale de la Statistique et de l'Informatique, BP 12, Bamako; monthly.

L'Essor—La Voix du Peuple: BP 141, Bamako; tel. 247-97; organ of the UDPM; daily; Editor Gaousso Drabo; circ. 40,000.

L'Informateur: Bamako; monthly review publ. by Ministry of Information.

Kibaru: BP 1463, Bamako; monthly; Bambara and three other languages; for rural areas; circ. 5,000.

Journal Officiel de la République du Mali: BP 1463, Bamako; publ. by the government printers.

Podium: BP 141, Bamako; weekly; culture and sports.

Sunjata: BP 141, Bamako; monthly; social, economic and political affairs; Editor Soumeylou Maïga; circ. 3,000.

NEWS AGENCIES

Agence malienne de presse et de publicité (AMPA): Bamako; tel. 22-26-47; telex 421; f. 1977 as merger of state publicity and news agencies under aegis of Ministry of Information.

Foreign Bureaux

Agence France-Presse (AFP): BP 778, Bamako; Correspondent Chouaïbou Bonkane.

Agentstvo Pechati Novosti (APN) (USSR): Bamako; Correspondent Viktor Y. Martynov.

Reuters (UK), TASS (USSR) and Xinhua (People's Republic of China) also maintain bureaux in Mali.

Publishers

Editions-Imprimeries du Mali (EDIM): BP 21, Bamako; tel. 22-40-41; f. 1972; printing and publishing; Dir Ibrahima Berthe.

Librairie Populaire du Mali: BP 28, Bamako; tel. 22-34-03; school books, history, sociology, folk-tales; Man. Dir Dibo Fanta.

Government Publishing House

Imprimerie Nationale: BP 21, Bamako.

Radio and Television

In 1983 there were an estimated 102,000 radio receivers in use. In September 1983 a national colour television network, built with financial aid from Libya, was inaugurated.

Radiodiffusion Nationale du Mali: BP 171, Bamako; tel. 22-24-74; f. 1957; govt station; regional stations are being installed; programmes in French, English, Bambara, Peulh, Sarakolé, Tamachek, Sonrai, Moorish, Ouolof; Man. Dir YOUNOUS HAMAYE DICKO.

Finance

(cap. = capital; res = reserves; dep. = deposits; m. = million; br. = branch; amounts in Mali francs)

BANKING

Central Bank

Banque Centrale des Etats de l'Afrique de l'Ouest (BCEAO): BP 206, Bamako; tel. 22-37-56; telex 1674; headquarters in Dakar, Senegal; bank of issue and central bank for the seven states of Union monétaire ouest-africaine (UMOA); Gov. ABDOULAYE FADIGA; Man. in Mali YOUNOUSSI TOURÉ.

Commercial Banks

Bank of Africa-Mali (BAM): Bamako; f. 1982; cap. 1,300m.; privately-owned; Pres. MOHAMED DIAWARA; Man. Dir PAUL DERREUMAUX.

Banque Malienne de Crédit et de Dépôts (BMCD): ave Modibo Keita, BP 45, Bamako; tel. 22-53-36; telex 572; f. 1961 to take over brs of Crédit Lyonnais; cap. 1,200m., res 436m., dep. 23,898m. (1981); 50.02% state-owned, 49.98% Crédit Lyonnais; Pres. and Gen. Man. D. DIAKITÉ.

Banque mixte arabe libyo-malienne pour le commerce et le développement (Balima): Bamako; f. 1981; cap. 500m.; Man. Dir KHALIFA TALLOU.

Development Banks

Banque de Développement du Mali (BDM): BP 94, Bamako; tel. 22-20-50; telex 522; f. 1968; cap. 5,000m.; Man. Dir IBRAHIM BOCAR BA; Asst Man. Dir ABDOUL KARIM DIARRA; 8 brs.

Banque Internationale pour l'Afrique Occidentale (BIAO-MALI): ave de l'Indépendance, BP 15, Bamako; tel. 22-50-66; telex 501; f. 1981; cap. 1,950m.; Dir PAUL SICARD; 4 brs.

Banque Nationale de Développement Agricole (BNDA): c/o BDM, BP 94, ave de la Nation, Bamako; tel. 22-64-64; f. 1981; cap. 2,000m.; 55% state-owned; Man. Dir MARTIAL COUTANT.

Caisse Centrale de Coopération Economique: BP 32, quartier Quinzambougou, route de Sotuba, Bamako; tel. 22-28-42; telex 502; Dir PHILIPPE RENARD.

INSURANCE

Agence Malienne d'Assurances: BP 190, Bamako; tel. 22-28-18; f. 1961; cap. 1m.; Dir JEAN-LOUIS SANSOT.

Caisse Nationale d'Assurance et de Réassurance (CNAR): BP 568, rue Combes, Bamako; tel. 22-53-69; telex 549; cap. 100m.; Man. Dir MAMADOU SANOGO.

Trade and Industry

CHAMBER OF COMMERCE

Chambre de Commerce et d'Industrie du Mali: BP 46, Bamako; f. 1908; 90 mems; Pres. El Haj DOSSOLO TRAORÉ; Sec.-Gen. HAMA AG MUHAMMAD.

DEVELOPMENT ORGANIZATIONS

Bureau pour le Développement de la Production Agricole: BP 72, Bamako; offers training programmes in agricultural sciences and farm management, undertakes agricultural studies; Dir JACQUES VAYSSIE; Asst Dir BAGOURO MOUMAZANA.

Mission Française de coopération: BP 84, Bamako; tel. 22-33-28; telex 569; office for supervision of bilateral aid from France; Dir JEAN BOULOGNE.

Office du Niger: BP 160, Ségou; tel. 32-01-43; f. 1932; taken over from the French govt in 1958; the French project involved a major dam, begun in 1935, 72 km above Ségou, to direct water into extensive irrigation networks covering 1m. ha to be devoted to rice and cotton on the left bank of the Niger. By 1980 only 57,510 ha had been irrigated. Since independence the irrigated area has been extended by 4,000 ha each year. The office also operates a number of research stations, four rice-processing plants, a cotton-ginning factory and two sugar refineries and a distillery; Man. Dir MAMADOU FOFANA.

Société de Crédit Agricole et d'Equipement Rural (SCAER): BP 787, rue Karamoko Diaby, Bamako; tel. 22-31-43; telex 578; cap. 1,650m. FM; state-owned; promotion of agricultural development; Man. Dir YAYA COULIBALY.

TRADE UNION

Union nationale des travailleurs du Mali (UNTM): Bamako; Sec.-Gen. BAKARY KARAMBÉ.

Transport

RAILWAYS

Régie du Chemin de Fer du Mali: BP 260, Bamako; tel. 229-67; 1,287 km of track linking Dakar (Senegal) with Bamako and Koulikoro, of which 642 km are in Mali; Man. Dir N. SAVANE.

ROADS

In 1981 there were 18,000 km of classified roads, of which only 7,500 km were passable in all seasons. Of the 6,500 km of main roads, only 1,500 km were bitumenized. A new asphalt road from Mopti is planned to run via Ouagadougou (Burkina Faso) to the coast at Tema (Ghana). The 556-km road linking Sévaré and Gao was due for completion in 1984.

Compagnie Malienne de Transports Routiers: BP 208, rue du Commandant-Riault, Bamako; f. 1970; state-owned; cap. 1,086m. FM; Chair. Minister of State for State Companies and Enterprises; Dir-Gen. MAMADOU LAMINE TOURÉ.

INLAND WATERWAYS

The River Niger is navigable throughout its course through Mali (1,782 km) from July to January. The River Senegal is navigable from Kayes to Saint-Louis (Senegal).

Compagnie Malienne de Navigation (COMANAV): BP 10, Koulikoro; cap. 1,181m. FM; Man. Dir LAMINE TOURÉ.

CIVIL AVIATION

The principal airport is at Bamako. The other major airports are at Bamako-Senou, Bourem, Gao, Goudam, Kayes, Kidal, Mopti, Nioro, Ségou, Tessalit and Timbuktu. There are about 40 small airstrips.

Air Mali: BP 27, Bamako; tel. 22-35-36; telex 568; f. 1960; state airline; daily services to west African destinations, weekly services to Paris; local services; fleet: 1 Boeing 727, 1 Boeing 737, 1 Ilyushin 18, 1 Antonov 24B, 2 Twin Otter, 1 BAe 146; 577 employees; Gen. Man. BOUBACAR COULIBALY. Note: Following heavy financial losses, Air Mali was liquidated by Presidential decree in Janauary 1985. It was expected that a new company, open to private shareholders, would be established.

Société des Transports Aériens (STA): Bamako; f. 1984; privately-owned; weekly service to Abidjan (Ivory Coast); local services; Man. Dir MELHEM ELIE SABBAGUE; fleet: 5 BAe 146.

Tourism

Société Malienne d'Exploitation des Ressources Touristiques (SMERT): BP 222, place de la République, Bamako; tel. 22-59-42; telex 316; f. 1975; Dir HAMADY SOW.

Société des Hôtelleries du Mali (SHM): BP 104, Bamako; telex 483; state-owned; Dir FALÉ KEITA.

MAURITANIA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Islamic Republic of Mauritania lies in north-west Africa, with the Atlantic Ocean to the west, Algeria and the disputed territory of Western Sahara (occupied by Morocco) to the north, Mali to the east and south, and Senegal to the south. The climate is hot and dry, particularly in the north, which is mainly desert. The official languages are French and Arabic. The Moorish majority speak Arabic or Hassaniya, while the large negro population in the south is mainly French-speaking. Islam is the state religion, and the inhabitants are almost all Muslims. The national flag (proportions 3 by 2) is emerald green, with a five-pointed gold star and a horizontal gold crescent moon in the centre. The capital is Nouakchott.

Recent History

Mauritania, formerly part of French West Africa, became a self-governing member of the French Community on 28 November 1958 and achieved full independence on 28 November 1960. Moktar Ould Daddah, leader of the Parti du peuple mauritanien (PPM), became Prime Minister in June 1959 and Head of State at independence. He was elected President in August 1961. Mauritania became a one-party state, under the PPM, in 1964. After independence, Mauritania moved away from the French sphere of influence and towards closer relations with Arab nations.

Under a tripartite agreement of November 1975, Spain ceded Spanish (now Western) Sahara to Mauritania and Morocco, to be apportioned between them. The agreement took effect in February 1976, when Mauritania occupied the southern portion of the territory, which it named Tiris el Gharbia, despite international calls for a referendum to allow the Saharan people to decide their future. Guerrilla fighting ensued, with Moroccan and Mauritanian troops in action against the forces of the Frente Popular para la Liberación de Sakiet el Hamra y Río de Oro (the Polisario Front), a national liberation movement, supported by Algeria, which seeks independence for Western Sahara. Attacks by Polisario forces on villages and, particularly, the railway line, essential for the transport of iron ore from Zouérate, were highly damaging to the economy.

Relations with Algeria, which refused to stop supporting the Polisario base-camps at Tindouf inside its borders, were broken off in 1976. Relations with Morocco, which had been poor until the renunciation of its claims to a 'greater Morocco' (including Mauritania), improved, and in June 1977 a joint defence pact was formed. The kidnapping of French technicians in the mining areas brought open French military aid for Mauritania.

By 1977 Mauritania was spending two-thirds of its budget on defending territory which promised no economic benefits. The disruption of iron ore exports by the war, combined with the effects of drought, had brought the country almost to bankruptcy. In July 1978 President Daddah was deposed in a bloodless coup, led by the army chief of staff, Col Moustapha Ould Mohamed Salek, who took power as Chairman of the Military Committee for National Recovery (CMRN). The new regime published a Constitutional Charter, under which the Chairman of the CMRN would exercise executive authority. Polisario immediately declared a cease-fire with Mauritania, but further progress was thwarted by the intransigence of Morocco, which still had several thousand troops stationed in Mauritania. The deadlock led to internal political instability, and on 6 April 1979 the CMRN was replaced by the Military Committee for National Salvation (CMSN), also led by Salek, but he relinquished the post of Prime Minister to Lt-Col Ahmed Ould Bouceif, formerly Minister of Fisheries. On 11 April the CMSN adopted a new Constitutional Charter, assuming legislative power for itself and separating the roles of Head of State and Head of Government. Bouceif was killed in an air crash in May, after only seven weeks as Prime Minister, and the CMSN replaced him by Lt-Col Mohamed Khouna Ould Haidalla, formerly Minister of Defence. Both Bouceif and Haidalla were apparently in favour of adhering to the Moroccan alliance, although emphasizing the need for peace. Salek, then only titular Head of State, resigned in June and was replaced by Lt-Col Mohamed Mahmoud Ould Ahmed Louly, hitherto Minister of Public Affairs. Renewed attempts to bring about a settlement were interrupted in July by the announcement that Polisario had broken the year-old cease-fire. Later that month the OAU called for a referendum to be held, to grant self-determination to all the people of Western Sahara. These events provided the impetus for Mauritania's final withdrawal from the war: Haidalla declared that Mauritania had no territorial claims in the area, and a peace treaty was signed with Polisario on 5 August. Ten days later, Mauritania formally withdrew from Tiris el Gharbia, although Morocco had previously announced its annexation of the territory (in addition to the northern part of Western Sahara, which it already held). At the same time, diplomatic relations between Mauritania and Algeria were re-established.

In January 1980 there was yet another change of power: Haidalla took over from Louly as Head of State, while remaining Prime Minister, and dismissed members of the CMSN who were, he alleged, impeding national recovery. In December, after a period of increasing tension within the CMSN, Haidalla relinquished the posts of Prime Minister and Minister of Defence. An almost entirely civilian Council of Ministers was formed, with Sid Ahmed Ould Bneijara as Prime Minister. Also in December, the CMSN published a draft constitution for Mauritania, which envisaged a multi-party democracy. The constitution was to be submitted to a national referendum at an unspecified future date. Meanwhile, the Council of Ministers was to be responsible for drawing up charters for new democratic institutions.

In 1981 relations with Morocco deteriorated after an attempted coup in March, in which the Mauritanian Government believed Morocco to be involved. A ministerial reshuffle in April ended the brief period of civilian rule. The new Prime Minister, Col Maawiya Ould Sid'Ahmed Taya (formerly Minister of Mines and Energy), also took over the Defence portfolio, while the draft constitution was abandoned. In October Morocco claimed that Polisario had bases in Mauritania, and that Mauritanian soldiers had been involved in recent attacks on Moroccan territory. These accusations were, however, strenuously denied. Another attempted coup was foiled in February 1982, and the ringleaders, including ex-President Salek and Ahmed Ould Bneijara (the former Prime Minister), were imprisoned.

Another problem for successive governments in recent years has been unrest among the negro population in the south, who complain of discrimination, objecting particularly to the imposition of the Arabic language in educational and official spheres. Slavery was formally abolished in July 1980, although difficulties were experienced in enforcing this law.

During 1983 Mauritania played an active part in attempting to improve relations between the Maghreb countries (Algeria, Morocco, Mauritania, Tunisia and Libya). In December Mauritania signed the Maghreb Fraternity and Co-operation Treaty, which had originally been drawn up between Algeria and Tunisia in March. The treaty had been left open for other Maghreb states to sign, in the hope that it would eventually form the basis of a Greater Maghreb Union. However, relations with Morocco deteriorated further in February 1984, when Mauritania announced its recognition of the Sahrawi Arab Democratic Republic, the Western Saharan state which was proclaimed in 1976 by the Polisario Front. In August 1984 President Haidalla again denied Morocco's renewed claims that Mauritania was providing bases for Polisario guerrilla attacks across the border with Western Sahara.

In March 1984 widespread student unrest was denounced by

the Government as a Libyan-backed 'destabilization plot', and resulted in several arrests. A major government reshuffle followed, in which President Haidalla assumed the posts of Prime Minister and Minister of Defence. Col Maawiya Ould Taya, hitherto Prime Minister, was returned to his former position of Chief of General Staff of the army. In December 1984 President Haidalla was overthrown in a bloodless coup while attending the Franco-African summit in Burundi. Col Taya assumed the presidency, and announced a new 17-member Council of Ministers, which included eight members of the former government. Col Taya also assumed the posts of Prime Minister and Minister of Defence. The new President reaffirmed his support for Polisario and maintained that the Maghreb Fraternity and Co-operation Treaty, signed with Algeria and Tunisia, would be respected. A general amnesty for political prisoners and exiles was announced; 132 prisoners were subsequently released, including ex-President Salek and Ahmed Ould Bneijara. Exiled political parties were expected to return to Mauritania.

Government

After the coup in July 1978, the National Assembly was suspended, together with the sole political party. The Constitution was replaced by a Charter which granted legislative and executive power to the Military Committee for National Recovery (CMRN), known since April 1979 as the Military Committee for National Salvation (CMSN). The CMSN is headed by the President of the Republic, and had 24 members in February 1985. A draft constitution was published in December 1980 but was abandoned in the following year. The President is assisted by an appointed Council of Ministers. Mauritania is divided into 12 regions, each with an appointed Governor.

Defence

The armed forces expanded rapidly between 1975 and 1978, with Moroccan and French assistance. In July 1984 the total armed forces numbered 8,470 men: the army 8,000, the navy 320 and the air force 150. Paramilitary forces totalled 2,500. Military service for two years is compulsory. Defence expenditure amounted to US $62m. in 1982.

Economic Affairs

Nomadic Moors, living by herding cattle and sheep, made up some 80% of the population before the persistent drought which began in the early 1970s. By the 1980s, about 80% of former pasture lands had been lost to desert, resulting in heavy losses of livestock. In 1983 alone, the loss of livestock as a result of drought was estimated at between 25% and 30% of total stock. This loss of livelihood has driven many nomads to the towns in search of food and work: by 1983 only about 25% of the population were still leading a nomadic life. Settled agriculture is restricted to black farmers in the valley of the Senegal river, who grow dates, millet, sorghum and rice with the aid of irrigation. Cereal production has been seriously affected by drought: in the 1960s Mauritania produced approximately 90,000 metric tons of cereals annually, but by the 1983/84 season annual production had fallen to 15,000 tons, and the cereal shortfall was estimated at 138,000 tons. Mauritania produces only around 10% of its total food requirements, with at least 65% being supplied by international aid organizations. Agriculture accounted for only 27% of the gross domestic product in 1980, compared with about 60% in the 1960s. According to World Bank estimates, Mauritania's gross national product per head in 1982 was US $470 (at 1980–82 prices), showing an average real growth rate of 1.4% per year since 1960.

Mauritania's 900-km long coastline is considered one of the richest fishing grounds in Africa. The waters were exploited mainly by foreign vessels until 1980, when an exclusive economic zone, extending for 200 nautical miles (370 km) offshore, was established. Mauritania has had difficulties in enforcing its authority over this zone; nevertheless, fishing receipts have since risen considerably, and in 1983 exports of fish were valued at 8,773m. ouguiya, exceeding the revenue from sales of iron ore. The freezing and processing of fish at Nouadhibou is a significant industry. Plans for industrial development have been hampered by financial difficulties; however, an electrical steel-works was opened at Nouadhibou in 1981, and a previously unused sugar refinery at Nouakchott was being reactivated, with Algerian help, in 1982. A petroleum refinery at Nouadhibou, with annual capacity of 1m. tons, began operations in 1983, but was subsequently forced to close down, as the country's currency reserves were insufficient to pay for imports of crude petroleum.

Mauritania has large deposits of iron ore in the Kedia region, near Zouérate, and about 40 km north of Kedia (the Guelbs deposit). Production of high-grade ore (about 65% iron) began at Kedia in 1963. The mining operations were nationalized in 1974, when Mauritania's output of iron ore reached its peak level of 11.7m. metric tons (containing about 7.65m. tons of iron). Iron ore accounted for 90% of Mauritania's export earnings in 1979, but the proportion fell to 65% in 1981. Production has been disrupted by the war with Polisario and by shrinking world demand. After sinking to 6.5m. tons in 1978, it recovered to 8.9m. tons by 1981 but fell to an estimated 7m. tons in 1982. For many years, iron ore was Mauritania's major export, but it fell to second place (behind fish) in 1983. Production from El-Rhein, in the Guelbs region, began in July 1984. The region has vast reserves of workable ores, estimated at between 5,000m. and 6,000m. tons, but the ore is of a lower grade than the Kedia deposits (about 37% iron), and a special treatment plant has been constructed. The first phase of the Guelbs project, costing US $320m., provides for an annual output of 6m. tons of concentrate. Under the second phase, due to begin in 1995 (when the reserves at Kedia will have been exhausted), annual production is planned to increase to 15m. tons. Studies for the reactivation of copper mining at Akjoujt, suspended since 1978, were carried out in 1982, and drilling for petroleum and uranium was continued. The discovery of phosphate deposits in the Aleg-Kaédi region was announced in 1984: reserves are estimated at 95m. tons of ore, with a 20% phosphate content. Mauritania has considerable reserves of gypsum, estimated at 4,000m. tons, and in November 1984 a gypsum quarry and plaster works were inaugurated.

Mauritania is dependent on large sums of foreign aid, the chief donors being Arab countries, especially Kuwait and Iraq. As a member of the Senegal River Development Organization, Mauritania is participating in the construction of dams at Manantali, begun in May 1982, and at Diama in Senegal. The Gorgol Noir is another large irrigation project.

In 1980 the Government modified its economic policy, switching resources from prestigious industrial schemes to the neglected rural sector, in an attempt to achieve self-sufficiency in food crops. Austerity measures were introduced in order to eliminate by 1985 the current deficit on the balance of payments ($148m. in 1981, $262m. in 1982 and $196m. in 1983) and to reorganize the repayment of Mauritania's foreign debt ($714m. in 1980). The Fourth National Development Plan reflected these priorities, and projected total investment of 89,200m. ouguiya.

Transport and Communications

The River Senegal is an important artery of transport. A 652-km railway runs from Zouérate to Nouadhibou for the transport of iron ore. The port of Nouadhibou has been extended to handle mineral exports and to accommodate the fishing industry, and a deep-water port, financed by the People's Republic of China, is due to be completed at Nouakchott by 1987. The main international airport is at Nouakchott, with a second at Nouadhibou. There are about 8,900 km of roads and tracks, and the first section (607 km) of the 1,100-km Trans-Mauritanian highway, linking Nouakchott and Néma, was opened in June 1978. Work began on the second section in October 1979, and was due to be completed in the early 1980s.

Social Welfare

The National Social Insurance Fund administers family allowances, industrial accident benefits, insurance against occupational diseases, and old-age benefits. Nouakchott has a hospital with 450 beds, and there are 11 regional hospitals. In 1978 there were 87 physicians working in Mauritania.

Education

Despite expansion in education facilities since 1960, including provisions for nomadic families, illiteracy among the population over six years of age averaged 82.6% (63.1% in urban areas;

88.5% in rural areas) in 1976. Total enrolment at primary schools in 1980 was equivalent to only 33% of children aged six to 11 (43% of boys; 23% of girls). Secondary enrolment in 1980 was only 10% of those aged 12 to 17 (16% of boys; 4% of girls). Implementation of a plan to make Arabic the compulsory first language in all schools was postponed for six years in 1979, following protests from the French-speaking south. Degree courses began in 1982 at the Ecole Nationale d'Administration and the Ecole Nationale des Sciences in Nouakchott, and the University of Nouakchott opened in 1983, with 974 students enrolling.

Tourism

Owing to the hot climate, the best months for visiting Mauritania are from November to May. There are hotels in the principal towns. Hunting, visiting the oases, and touring the Berber villages are the chief attractions. In 1980 receipts from tourism totalled US $6m.

Public Holidays

1985: 1 May (Labour Day), 25 May (African Liberation Day, founding of OAU), 20 June (Korité—Id ul Fitr, end of Ramadan), 27 August (Tabaski—Id ul Adha), 16 September (Islamic New Year), 25 November (Mouloud—Birth of Muhammad), 28 November (National Day).

1986: 1 January (New Year's Day), 7 April (Leilat al Meiraj—Ascension of Muhammad).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

5 khoums = 1 ouguiya.

Exchange rates (31 December 1984):
£1 sterling = 77.99 ouguiya.
US $1 = 67.29 ouguiya.

Statistical Survey

Unless otherwise indicated, the figures exclude Mauritania's section of Western Sahara, annexed in 1976 and relinquished in 1979.

Area and Population

AREA

1,030,700 sq km (397,950 sq miles).

POPULATION

1,407,000 (census of 22 December 1976), including an estimate of 513,000 for the nomad population.

PRINCIPAL TOWNS

(population at census of December 1976)

Nouakchott (capital)	134,986*	Zouérate	17,474
Nouadhibou (Port-Etienne)	21,961	Rosso	16,466
Kaédi	20,848	Atar	16,326

*Estimated at 140,000 in 1979.

BIRTHS AND DEATHS

Average annual birth rate 49.9 per 1,000 in 1970–75, 50.2 per 1,000 in 1975–80; death rate 23.3 per 1,000 in 1970–75, 22.3 per 1,000 in 1975–80 (UN estimates).

Directory

The Constitution

The republican Constitution that had been promulgated in 1961 was suspended in July 1978. A provisional Constitution, to be endorsed by referendum, was published on 19 December 1980 but was abandoned in the following year.

The Government

HEAD OF STATE

President of the Republic, Chairman of the Military Committee for National Salvation and Prime Minister: Col Maawiya Ould Sid'Ahmed Taya (took office 12 December 1984).

MILITARY COMMITTEE FOR NATIONAL SALVATION
(February 1985)

Col Maawiya Ould Sid'Ahmed Taya (Chairman).
Col Cheikh Ould Boyda (Permanent Secretary).
Commdt Cheikh Sid'Ahmed Ould Babamine.
Col Ahmedou Ould Abdallah.
Lt-Col Yall Abdoulaye Allasane.
Lt-Col Moulaye Ould Boukhreiss.
Lt-Col Brahim Ould Moalim Ndiaye.
Lt-Col Sidina Ouir.
Lt-Col Anne Amadou Babaly.
Lt-Col Gabriel Cimper.
Lt-Col Diallo Mohamed.
Commdt Ahmed Ould Minnih.
Commdt Sidi Ould Mohamed Lemine.
Commdt Sidi Ahmed Ould Boylil.
Commdt Sidibe Toumani.
Commdt Mohamed Mahmoud Ould Deh.
Commdt Ahmed Ould Aïda.
Commdt Sidiya Ould Mohamed Yehya.
Capt. Mohamed Lemine Ould N'Diayane.
Capt. Mohamed Ould Lekhal.
Capt. Jiddou Ould Haki.
Capt. Niang Arouna.
Capt. Diop Djibril Mamadou.
Capt. Ely Ould Mohamed Fall.

COUNCIL OF MINISTERS
(February 1985)

Prime Minister and Minister of Defence: Col Maawiya Ould Sid'Ahmed Taya.
Minister of the Interior: Lt-Col Gabriel Cimper.
Minister of Foreign Affairs and Co-operation: Commdt Ahmed Ould Minnih.
Minister of Justice and Islamic Affairs: Mafudh Ould Murabit.
Minister of Finance and Trade: Lt-Col Anne Amadou Babaly.
Minister of Fisheries and Marine Economy: Isselmou Ould Baba.
Minister of Equipment and Transport: Capt. Mohamed Lemine Ould N'Diayane.
Minister of Rural Development: Messmoud Ould Belkhair.
Minister of Education: Ḥasny Ould Didi.
Minister of Health and Social Affairs: Djibo Tafsirou.
Minister of Youth, Sports and Culture: Ba Mahmoud.
Minister of Mines and Industry: Commdt Mohamed Mahmoud Ould Deh.
Minister of Water and Energy: Mohamed Fadel Ould Dah.
Minister of Information and Telecommunications: Ahmed Ould Ghanahallah.
Minister of Planning and Land Development: Tarkhit Ould Sidi.
Minister of Higher Education and the Civil Service: Camara Ali Gueladio.
Deputy Minister of Foreign Affairs and Co-operation: Abdelkader Ould Diddih.
Deputy Minister of the Interior: N'Gam Lirwane.
Secretary-General of the Government: Selmouh Ould Mohamed Wane.

MINISTRIES

All Ministries are in Nouakchott.

Legislature

ASSEMBLÉE NATIONALE

The Assembly was dissolved following the military coup in July 1978, when the Military Committee for National Recovery (renamed the Military Committee for National Salvation in April 1979) announced that it was assuming all powers pending the establishment of 'democratic institutions'.

Political Organizations

Following the coup in July 1978, the sole political party, the **Parti du peuple mauritanien** (PPM), was suspended. Exiled supporters of the PPM have formed an **Alliance pour une Mauritanie démocratique** (AMD), based in Paris, France. A further opposition movement, the **Organisation des nationalistes mauritaniens** (based in Dakar, Senegal), was formed in 1984.

Diplomatic Representation

EMBASSIES IN MAURITANIA

Algeria: Nouakchott; Ambassador: Zerguine Mohamed.
China, People's Republic: BP 196, Nouakchott; Ambassador: Sun Mao.

Egypt: BP 176, Nouakchott.

France: BP 231, rue Ahmed Ould M'Hamed, Nouakchott; Ambassador: Bernard Lopinot.

Gabon: BP 38, Nouakchott; telex 1125; Ambassador: R. Nkassa-Nzogho.

Germany, Federal Republic: BP 372, Nouakchott; tel. 510-32; telex 555; Ambassador: Dr Wilhelm Schuermann.

Korea, Democratic People's Republic: Nouakchott; Ambassador: Pak Ui-Chun.

Korea, Republic: BP 324, Nouakchott; tel. 523-86; Ambassador: Lee Doo-bok.

Nigeria: Ilot P9, BP 367, Nouakchott; Chargé d'affaires: Fatai Bolaji Kosoko.

Saudi Arabia: Nouakchott; Ambassador: Mohamed Al Fadh El Issa.

Senegal: BP 611, Nouakchott; tel. 52106.

Spain: BP 232, Nouakchott; Ambassador: Gumersindo Rico.

USSR: BP 251, Nouakchott; Ambassador: Ivan Stepanovich Spitsky.

USA: BP 222, Nouakchott; Ambassador: Edward L. Peck.

Zaire: BP 437, Nouakchott; Ambassador: Ngyese Mi Soma.

Judicial System

The Code of Law was founded in 1961 and subsequently modified to integrate modern law with Islamic institutions and practices. The main courts comprise a tribunal de première instance (magistrate's court) with six regional sections, 42 tribunaux de cadis (departmental civil courts), labour courts, military courts and the Court of State Security. In October 1978 a special court with 13 judges was set up to investigate offences against the security of the state.

Islamic law was introduced in February 1980, as the government felt that modern law was incapable of curbing crime. A special Islamic court was to be established, presided over by a magistrate of Islamic law, assisted by two counsellors and two *ulemas* (Muslim jurists and interpreters of the Koran).

Supreme Court: Nouakchott; f. 1961; intended to ensure the independence of the judiciary; the court is competent in juridical, administrative and electoral matters; Pres. Lt-Col Othmane Ould Mohamed; Vice-Pres. (Islamic Law) Mohamed Salem Ould Addoud; Vice-Pres. (Modern Law) Bâ Mohamed el Ghali.

Special Court of Justice: consists of a president, who is a stipendiary magistrate, and 11 other judges, six of whom are elected by the National Assembly from among its members, and five of whom are elected by the Assembly from a list of Islamic lawyers; Pres. Lt-Col Othmane Ould Mohamed.

Religion

ISLAM

Islam is the official religion of Mauritania. The population are almost entirely Muslims of the Malekite rite. The most important of the religious groups are the Tijaniya and the Qadiriya (Leader M. Ould Sheikh Sidya). Chinguetti, in the district of Adrar, is the seventh Holy Place in Islam.

CHRISTIANITY

The 5,000 Roman Catholics, who are mainly non-nationals, come under the jurisdiction of the Diocese of Nouakchott.

Bishop of Nouakchott: Mgr Robert de Chevigny, BP 353, Nouakchott; tel. 51515.

The Press

Chaab: BP 371-618 Nouakchott; daily; French and Arabic; govt-owned; Dir (vacant).

Journal Officiel: Ministry of Justice, Nouakchott; fortnightly.

Le Peuple: BP 371, Nouakchott; 6 a year; French and Arabic.

NEWS AGENCY

Agence Mauritanienne de Presse (AMP): BP 371, Nouakchott; Dir Rachid Ould Saleh.

Publishers

Imprimerie Commerciale et Administrative de Mauritanie: BP 164, Nouakchott; education, textbooks.

Société Mauritanienne de Presse et d'Impression: BP 371, Nouakchott; state-owned; Pres. Yeslem Ould Ebnon Abdem; Man. Mohamed Habiboullah Ould Abdou.

Government Publishing House

Imprimerie Nationale: BP 618, Nouakchott; Pres. Moustapha Saleck Ould Ahmed Brihim.

Radio and Television

RADIO

There were an estimated 95,000 radio receivers in 1983.

Radiodiffusion Nationale de la République Islamique de Mauritanie: BP 200, Nouakchott; tel. 52164; telex 515; f. 1958; govt-owned; five transmitters, one of 100 kW; broadcasts in French, Arabic, Wolof, Toucouleur and Sarakolé; advertising is accepted; Dir Sidi Ould Cheikh.

TELEVISION

A government-owned colour television station, based in Nouakchott, was inaugurated in 1984.

Finance

(cap. = capital; res = reserves; dep. = deposits; br. = branch; m. = million; amounts in ouguiya)

BANKING

Central Bank

Société Nationale de Développement Rural (SONADER): BP 321, Nouakchott; Dir Youba Ould Cheikh Benani.

TRADE ORGANIZATIONS

Bureau d'Achats pour la République Islamique de Mauritanie (BARIM): BP 272, ave du Président J. F. Kennedy, Nouakchott; import and export organization (textile fabrics, clothing, glues, photocopying machines); Dir-Gen. D. Diabira.

Mauritanian Fish Marketing Corporation (SMCP): blvd Median, Nouadhibou; tel. 2281; f. 1984; state regulatory body; marketing of fish and fish products; cap. 500m. ouguiya; Chair. Mohamad Salim Ould Lakhal; Man. Dir Mohamad Lamine Chébih.

Société Nationale d'Importation et d'Exportation (SONIMEX): BP 290, ave Bourghiba, Nouakchott; f. 1966; holds a monopoly of imports of consumer goods such as rice, tea, sugar, and exports of gum-arabic; cap. 101.6m. ouguiya (61% state-owned); Pres. Dewahi Mohamed Saleck; Dir-Gen. Dieng Oumar Harouna.

EMPLOYERS' ORGANIZATION

Confédération Générale des Employeurs de Mauritanie (CGEM): BP 383, Nouakchott; f. 1974; professional assen for all employers active in Mauritania; Sec.-Gen. Mohamed Lemine Ould Moulaye Zeine.

TRADE UNION

Union des Travailleurs de Mauritanie (UTM): BP 63, Bourse du Travail, Nouakchott; f. 1961; 10,000 mems; affiliated to ICFTU; Sec.-Gen. Cheikh Malainine Robert.

Transport

RAILWAYS

A 652-km railway connects Nouadhibou with Tazadit and the iron ore fields at F'Derik. It is used primarily for transporting iron ore to the coast. Motive power is all diesel. The railway was the principal target of Polisario attacks until the cease-fire in July 1978, when passenger traffic was restored.

SNIM—Département Mouvement-Traction, Chemin de Fer: BP 42, Nouadhibou; tel. 1701; telex 426; nationalized 1974; Mauritanian railways operated by Société Nationale Industrielle et Minière; Gen. Man. Baba Ould Sidi Abdallah.

ROADS

There are about 8,900 km of roads and tracks, of which 1,514 km are tarred. There are seven routes nationales, with a total of 4,600 km. A programme of tarring and improvement started in 1983 with international aid, and was expected to have rehabilitated 3,500 km of road by 1986. The 1,100-km Trans-Mauritanian highway, completed in 1982, links Nouakchott with Néma in the east of the country.

Société des Transports Publics de Nouakchott: BP 342, Nouakchott; f. 1975; Pres. Cheikh Malainine Robert; Dir-Gen. Sidi Ould Ahmed.

Société Nouvelle des Etablissements Lacombe: BP 204, Nouakchott; tel. 52752; telex 556; road transport; Chair. Dr Ba Bocar Alpha.

INLAND WATERWAYS

The River Senegal is navigable in the wet season by small coastal vessels as far as Kayes (Mali) and by river vessels as far as Kaédi; in the dry season as far as Rosso and Boghe, respectively.

SHIPPING

The leading port is at Point-Central, 10 km south of Nouadhibou. In service since 1963, it is almost wholly devoted to mineral exports. There is a commercial and fishing port at Nouadhibou which is being enlarged. The port of Nouakchott, which handled 209,680 metric tons in 1980, is undergoing expansion, and a deep-water port is being built with assistance from the People's Republic of China. In 1983 Mauritania's fleet totalled 26 vessels, of which 24 were fishing vessels.

Port Autonome de Nouadhibou: BP 236, Nouadhibou; tel. 2134; telex 441; Pres. Habib Ely; Dir Gaye Sidaty.

Friendship Port of Nouakchott: BP 267, Nouakchott; tel. 51453; telex 538; to begin operations 1987; projected capacity 500,000 tons; Man. Dir Kebe Abdoulaye Hachim.

Shipping Companies

Compagnie Mauritanienne de Navigation Maritime (COMAUNAM): BP 799, ave G. Abdel Nasser, Nouakchott; tel. 53505; telex 862; f. 1973; national shipping co; owned 51% by Mauritania, 49% by Algeria; Pres. Mohamed Gendouz; Dir-Gen. Lazhar Hani.

Société Générale de Consignation et d'Entreprises Maritimes (Mauritanie): BP 371, Nouakchott; f. 1973; Chair. and Man. Dir Ismail Abeidna.

Several shipping companies serve Nouadhibou and Nouakchott, the most important being **La Compagnie Medline** and **La Compagnie Maurel-Prom.**

CIVIL AVIATION

There are two international airfields, at Nouadhibou and Nouakchott, and 23 smaller airstrips. A new airport was opened at Néma in November 1981.

Air Mauritanie: BP 41, Nouakchott; telex 573; f. 1974; 60% state-owned, 20% owned by Air Afrique, 20% by UTA; scheduled domestic passenger and cargo services from Nouakchott and Nouadhibou and international services to Las Palmas (Canary Islands), Dakar (Senegal), Casablanca and Rabat (Morocco); fleet of 2 F-27A, 1 Fairchild FH-227B, 2 Fokker F28 Fellowship and 1 Navajo; Dir-Gen. Sidi Ould Zein.

Air Afrique: Mauritania has a 7% share in Air Afrique; see under Ivory Coast.

Tourism

Société Mauritanienne de Tourisme et d'Hôtellerie: BP 552, Nouakchott; f. 1969; promotes tourism in Mauritania, manages hotels etc., organizes tourist trips; Man. Dir Moustapha Teffahi.

Direction Artisanat et Tourisme: BP 246, Nouakchott; f. 1981; Dir Nehma Ould Cheikh.

MAURITIUS

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

Mauritius lies in the Indian Ocean. The principal island, from which the country takes its name, lies about 800 km (500 miles) east of Madagascar. The other main islands are Rodrigues, the Agalega Islands and the Cargados Carajos Shoals (St Brandon Islands). The climate is sub-tropical and generally humid. The average annual temperature is 23°C (73°F) at sea-level, falling to 19°C (66°F) at an altitude of 600m (about 2,000 ft). Average annual rainfall varies from 890 mm (35 in) at sea-level to 5,080 mm (200 in) on the highest parts. Tropical cyclones, which may be severe, occur between September and May. Most of the islands' inhabitants are of Indian descent. On the island of Mauritius the most widely spoken languages in 1972 were Hindi (38.8%), Creole (32.9%), Urdu (8.7%), Tamil (6.9%) and French (4.4%). Almost all of the population of Rodrigues speak Creole. English is the country's official language, and Creole (derived from French) the lingua franca. In 1972 the principal religious groups on the island of Mauritius were Hindus (51.0%), Christians (31.3%) and Muslims (16.6%). Almost all of Rodrigues' inhabitants profess Christianity. The national flag (proportions 3 by 2) has four equal horizontal stripes, of red, blue, gold and green. The capital is Port Louis.

Recent History

The islands of Mauritius and Rodrigues, formerly French possessions, were captured by British forces in 1810. France formally ceded the islands to the United Kingdom in 1814. Settlement came mainly from East Africa and India (Mauritius had no indigenous human inhabitants), and the European population is largely French-speaking.

A ministerial form of government was introduced in July 1957. The first elections under universal adult suffrage, held in March 1959, were won by the Labour Party, whose leader, Dr (later Sir) Seewoosagur Ramgoolam, became Chief Minister in September 1961. He was restyled Premier in March 1964. In November 1965 the United Kingdom transferred the Chagos Archipelago (including the atoll of Diego Garcia), a Mauritian dependency about 2,000 km (1,250 miles) north-east of the main island, to the newly-created British Indian Ocean Territory. Mauritius has campaigned for the return of the islands, particularly since the development of Diego Garcia as a major US military base in 1980. Mauritius also claims the French-held island of Tromelin, about 550 km (340 miles) north.

In August 1967 the ruling coalition won elections to the Legislative Assembly and, under a new constitution, Mauritius achieved self-government, with the Premier as Prime Minister. Following communal riots, a state of emergency was declared in January 1968. Nevertheless, Mauritius became independent, within the Commonwealth, on 12 March 1968, with Ramgoolam as Prime Minister.

Political opposition to Ramgoolam's coalition governments during the 1970s came mainly from the left-wing Mouvement Militant Mauricien (MMM), organized by its Secretary-General, Paul Bérenger. With the growth of this party and a general strike in 1971, elections to the Legislative Assembly, scheduled for 1972, were postponed. The coalition of the Labour Party and the Parti Mauricien Social-Démocrate (PMSD) broke down in December 1973 after disagreement over foreign policy and increases in taxation, but the Labour Party continued in office in coalition with the Comité d'Action Musulman (CAM). At the delayed general elections, held in December 1976, the MMM became the largest single party in the Legislative Assembly, but Sir Seewoosagur Ramgoolam formed a new, though fragile, coalition government incorporating the Independence Party (an electoral alliance of the Labour Party and the CAM) and the PMSD.

Industrial unrest involving sugar workers (which became particularly severe in 1979), worsening unemployment and an increasingly youthful population led to widespread disenchantment with the Government. At general elections in June 1982 the MMM, in alliance with the Parti Socialiste Mauricien (PSM), won all 60 contested seats on the main island. Aneerood Jugnauth became Prime Minister, with the influential Paul Bérenger as Minister of Finance.

Within a short time, however, there were signs of strains in the alliance, culminating in October 1982, when Bérenger tendered his resignation, apparently as a result of a lack of support from the PSM for his economic policies. However, some days later, Bérenger withdrew his resignation, and in November both the MMM and the PSM declared their full support for his economic policies. None the less, tension persisted, and in March 1983 12 MMM ministers, including Bérenger, resigned, expressing a lack of confidence in Jugnauth. Their resignation was thought to have been caused by differences within the Cabinet concerning economic policy and the status of the Creole language in Mauritius. Bérenger's supporters sought to make Creole the national language.

Following the resignations, Jugnauth appointed a new Cabinet comprising 16 members, and the coalition between the MMM and the PSM was dissolved after Jugnauth and 13 other members were expelled from the MMM. At the end of March the opposition leader, Sir Gaëtan Duval, resigned his seat, and Bérenger was officially designated leader of the opposition. In April Jugnauth formed a new political party, the Mouvement Socialiste Militant (MSM), and in May the PSM was dissolved and incorporated into the new party, which was renamed the Mouvement Socialiste Mauricien (still MSM). However, the new Government secured the support of only 29 of the 66 members of the Legislative Assembly, and in June Jugnauth dissolved the Assembly. Sir Dayendranath Burrenchobay, then Governor-General, announced that general elections would be held on 21 August 1983.

An electoral alliance was formed between the MSM (comprising the majority of the PSM), the Labour Party (led by Sir Seewoosagur Ramgoolam) and the PMSD (led by Sir Gaëtan Duval). This alliance defeated the MMM in the elections, gaining 41 of the 62 elective seats in the Assembly. Jugnauth retained his position as Prime Minister, while Duval was appointed Deputy Prime Minister. The MMM won 19 seats and the Organisation du Peuple Rodriguais (OPR) secured the two remaining seats. Bérenger was defeated in his home constituency, but was awarded a seat in the Assembly by the Electoral Supervisory Commission under the 'additional' members' allocation system (see Government). A total of eight 'additional' members were appointed, three from the MMM and five from the MSM/PMSD/Labour alliance. It was estimated that 85% of the electorate voted. The new Cabinet was sworn in at the end of August.

The priorities in the MMM/PSM Government's programme were to extend its role in vital areas of the economy, to make Mauritius a republic within the Commonwealth, to introduce mandatory elections every five years and to follow a policy of non-alignment in foreign affairs. The present Government remains committed to the closure of US military bases on Diego Garcia (in July 1982 the MMM/PSM Government had introduced legislation to declare the Chagos Archipelago part of Mauritius). In January 1983 Mauritius, Madagascar and Seychelles reached agreement on the terms of a constitution for the Indian Ocean Commission (IOC), formed to promote regional co-operation. In January 1984 the three countries signed the IOC's first regional co-operation agreement.

The new Government has initiated measures aimed at making Mauritius a republic, and in October 1983 draft constitutional amendments to this effect gained the approval of the Cabinet. In December, however, the draft legislation enabling Mauritius to become a republic failed to gain the support of the required three-quarters majority in the Legislative Assembly. There is

some dispute between the Government and the opposition over the nature of the powers to be accorded to the President in the proposed republic. One of the conditions of the MSM/PMSD/Labour alliance was that Sir Seewoosagur Ramgoolam would take office as the first President if Mauritius became a republic. Following the failure of the Government's legislative proposals, however, he was appointed Governor-General of Mauritius in December 1983 when Sir Dayendranath Burrenchobay retired. During 1983 relations between the Labour Party and the MSM became increasingly strained, culminating in the Prime Minister's dismissal of Sir Satcam Boolell (who had succeeded Ramgoolam as leader of the Labour Party) from his position as Minister of Planning and Development in February 1984. In response, the Labour Party officially withdrew from the ruling coalition. However, 11 Labour Party deputies elected to remain loyal to the Government, thus dividing the party into two factions. In March 1984 the Government introduced legislation (due to take effect in July) which prohibited 'unbecoming' press reports on parliamentary affairs, and required all newspapers to deposit Rs250,000 as security in case of libel suits. This legislation was generally viewed as an attack on the freedom of the press, and it provoked a storm of protest, particularly after the arrest of 43 journalists at a demonstration outside Government House. Eventually it was decided to set up a joint commission of the Government and the press, and, following the commission's recommendation, the legislation was abandoned in July.

Government

Executive power is vested in the British monarch, as Head of State, represented by an appointed Governor-General who is guided by the advice of the Council of Ministers. Legislative power is vested in the unicameral Legislative Assembly, with up to 71 members: the Speaker, 62 members elected by universal adult suffrage for five years and up to eight 'additional' members (the most successful candidates of each community). The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers. The Council of Ministers is responsible to the Assembly. The Government of the Mouvement Socialiste Mauricien/Parti Mauricien Social-Démocrate/Labour Party, elected in August 1983, pledged to make Mauritius a republic within the Commonwealth, and to replace the Governor-General with a non-executive President.

Defence

The country has no standing defence forces, although there is a special police mobile unit to ensure internal security.

Economic Affairs

The island of Mauritius is an extreme example of a one-crop economy, with sugar production accounting for about 60% of export earnings. Sugar cane is grown on more than 90% of the island's total cultivable land, and the sugar industry employs about 25% of the labour force. The sugar crop is vulnerable to international commodity prices, disease and the weather. Output of raw sugar was 688,383 metric tons in 1979 but, after four severe cyclones, fell to 475,494 tons in 1980, below the quota of 500,000 tons for Mauritian exports to the EEC under the provisions of the Lomé Convention. Production recovered in 1982/83 to 700,000 tons, but declined again in 1983/84, to approximately 590,000 tons, because of drought and hurricanes. The export tax which is levied on sugar is a valuable source of government revenue, providing Rs410m. in 1982/83. In the 1982/83 budget the Government reduced this tax from 75% to 50%, but in June 1983 there were plans to raise the tax to the original level of 75%, in the hope of providing a further Rs57m. in government revenue. These plans were opposed by trade unions in the sugar industry and by the Mauritius Sugar Producers' Association (MSPA), which considers the tax to be partly responsible for the industry's decline. In 1982/83 the sugar industry paid Rs339m. in export levies. The industry recorded a financial loss of Rs268m. in 1982, with a loss of about Rs405m. expected in 1983. The MSPA has campaigned for the abolition of the export tax, and a commission was set up to inquire into the sugar industry. In 1984 the commission reported that the sector was suffering from outdated plant and too many mills. It recommended that some mills should be allowed to close and that the export tax on sugar should be abolished. However, it seemed unlikely that the Government would impose these measures. In May 1984 a National Sugar Authority was set up to co-ordinate the restructuring of the industry. The Authority was to be responsible for drafting national policy on sugar, monitoring research and directing all parastatal and private organizations linked to the industry.

Since 1959 the Government has been expanding the production of tea, and this crop now constitutes a valuable export, although South Africa's decision to cut its buying quota in 1978 has curbed the prospects for growth. In 1982 production of manufactured tea reached nearly 5,000 tons, and exports of tea earned Rs69m., a 41% increase over 1981. Production of tea continued to rise, reaching 6,142 tons in 1983, while earnings from exports increased by 30% in the same year. In 1983 there were plans to restructure the Tea Development Authority in the hope of reducing its annual deficit from Rs62m. in 1982 to Rs24m. in 1985.

Subsistence farming is on a very small scale, and food imports (mainly rice, dairy produce and flour) account for about 20%–25% of import expenditure. In 1983, however, imports of food declined, in spite of the drought. It is hoped that Mauritius will be able to produce one-half of its annual food requirement by 1990, and the Government planned to allocate funds from the 1983/84 budget for food production schemes. Technical assistance from Japan and the USSR is regenerating the fishing industry.

The cost of petroleum imports almost doubled between 1978 and 1979, and accounted for 18% of total imports in 1981. In 1982, however, the volume of imports of refined petroleum products fell by 9.4%. Power is also provided by hydroelectric sources and by the recycling of sugar by-products, particularly of bagasse. In 1982 electricity output was 362m. kWh, with production from bagasse reaching 45m. kWh. The Champagne hydroelectric plant began operating in August 1984, with an annual output of about 40m. kWh.

The Mauritius Exporting Processing Zone has, since 1971, successfully attracted foreign investment in manufacturing, particularly in import substitution industries. In 1980 these accounted for 25% of total exports and 97% of all manufactured exports. The zone accounted for 32% of all exports in 1982, and for 31% in 1983. It is hoped that 5,000 jobs per year can be created in the zone until the year 1990. Textiles, electronics, plastic and leather goods, and synthetic gemstones are important in the industrial sector. Tourism is the country's third-ranking earner of foreign exchange and has expanded rapidly since 1967, earning an estimated Rs501m. in 1983.

The balance of trade has been improving in recent years: the trade deficit fell from Rs2,052m. in 1981 to Rs1,150m. in 1982, and to Rs933m. in 1983. In February 1983 the rupee was linked to a trade-weighted 'basket' of currencies, instead of to the IMF's special drawing right (SDR), in an attempt to reduce its fluctuations relative to the currencies of Mauritius' main trading partners. By the end of October 1984 the rupee had depreciated by 20.3% against the SDR and by 27.3% against the US dollar.

The MMM/PSM Government committed itself to priorities of creating employment, diversifying the economy (to reduce the country's dependence on sugar) and effecting a gradual transition to socialism. However, partly in order to satisfy the required terms of the IMF, the Government introduced an austerity budget for 1982/83, imposing controls on public spending and reducing subsidies on rice and flour. Even after these measures, the budget deficit was expected to increase to Rs870m. from Rs699m. in 1981/82, and revenue was to require a further Rs350m. from external sources to keep the deficit within the IMF's limit of 10% of gross domestic product. The current deficit on the balance of payments fell from Rs398m. in 1981/82 to Rs265m. in 1982/83, and this improvement enabled the new MSM/PMSD/Labour Government to present a less austere budget for 1983/84, in which the budget deficit was permitted to increase slightly. However, the balance-of-payments deficit rose again in 1983, to Rs550m. The 1984/85 budget provided for expenditure of Rs4,230m. and revenue of Rs3,575m., resulting in a budget deficit of Rs655m.—well below the Rs.1,000m. limit stipulated by the IMF. The budget imposed a 10% surcharge on imports, and introduced a special tax incentive to aid companies producing manufactured goods for export. Gross national product (GNP) grew in real terms by 0.7% in 1983, but was expected to grow by 4% in 1984. The

annual rate of inflation fell from 14.5% in 1981 to 11.4% in 1982, and to 5.6% in 1983.

Since 1979 Mauritius has received financial assistance from IMF stand-by arrangements, and in May 1983 the IMF approved a new 15-month stand-by facility of SDR49.5m., which was designed to cover the second half of the 1982/83 fiscal year and the whole of the 1983/84 fiscal year. The first tranche of the arrangement was expected to be made available by the end of the year 1982/83. The arrangement provides for the implementation of economic policies which are similar to those pursued by the previous government. A US $40m. Euro-dollar loan, to be used as balance-of-payments support, was agreed in September 1984, while negotiations for a further IMF stand-by facility of SDR 49m. were under way in February 1985.

Mauritius is a member of OCAM (see p. 183), which it joined in 1971. In 1972 the country became an associate member of the EEC, and exports to EEC countries benefit from a reduction in tariffs. In 1974 Mauritius was allotted an annual quota of 500,000 metric tons of raw sugar by the EEC as part of an attempt to ensure some stability in what is often a highly volatile market. The price paid by the EEC to Mauritius is reviewed annually.

Transport and Communications

Port Louis is served by several cargo shipping lines crossing the Indian Ocean, as well as coastal shipping services, and there is an international airport. Modernization of the harbour at Port Louis was completed in 1980, and work on a new fishing port at Trou Fanfaron was due to begin in November 1983. Work on upgrading the airport at Plaisance started in 1984. The improvements are to be carried out in three stages over the years 1984–97, and four projects are due to be effected during the period 1984–87. The People's Republic of China has agreed to redirect a loan, originally intended for the construction of a new airport at Plaine-des-Roches, to finance some of the work on Plaisance airport. The road network is good, considering the mountainous terrain, and there are 33 km of motorways and 840 km of other main roads. Over 90% of the roads are asphalted. In 1983 the World Bank approved a loan of US $15.2m. for a programme of road maintenance and repairs, which was due to begin early in 1984 and to continue for about two years.

Social Welfare

The social infrastructure includes a well developed public health service, with 12 hospitals and 53 dispensaries. In the private sector there are 19 hospitals and 55 child and maternity clinics. In 1983 there were 690 physicians, 82 dentists and 2,268 nurses working in Mauritius. There is a system of relief work for the unemployed, and a monthly allowance is paid to families with three children under 14 years of age. In June 1978 a national pension scheme was introduced.

Education

Educational standards are high, and in 1983 about 90% of the adult population were literate, although education is not compulsory. Primary and secondary education are free, and over 95% of primary school-age children attended schools in 1983, making a total of 133,255 primary school pupils. The large private sector in secondary education was indirectly taken over by the Government in 1977. In 1983 total enrolment at secondary schools was 75,963. Two Industrial Trade Training Centres cater for nearly 300 students. Community Schools provide vocational training for pupils who have failed to obtain the Primary School Leaving Certificate. In addition, a Lycée Polytechnique opened in 1982 and provides courses for some 200 students in craftsmanship, mechanics and building construction. The University of Mauritius had 404 students in 1983/84, and a large number of students study abroad. In 1982/83 government expenditure on education reached an estimated Rs510m., and in 1983 the World Bank approved credits of Rs197m. for a project to construct five new primary schools and four teacher-training centres.

Tourism

Major attractions include the superb beaches, the fine mountain scenery, the pleasant climate and the blend of cultures. Distance from major centres of population has so far limited the industry's development to the luxury trade, but growth in recent years has been remarkable. Tourism is now the country's third largest earner of foreign exchange and provides work for over 10,000 people. It was hoped that the number of visitors would rise to 200,000 by 1985. Arrivals increased from 15,000 in 1968 to 128,360 in 1979, but high air fares restricted numbers to 118,360 in 1982 and to 123,800 in 1983. Total receipts were Rs450m. and Rs501m. in 1982 and 1983 respectively.

Public Holidays

1985: 1 May (Labour Day), 20 June* (Id ul Fitr, end of Ramadan), 15 August (Assumption), 1 November (All Saints' Day), 25 December (Christmas).

1986: 1, 2 January (New Year), 12 March (National Day), 28–31 March (Easter).

* Islamic religious holidays are subject to the sighting of the moon and may vary by one or two days from the date given.

The Hindu festivals of Cavadee, Maha Shivratri, Ougadi, Ganesh Chaturti and Divali are also celebrated.

Weights and Measures

The metric system is in standard use.

Currency and Exchange Rates

100 cents = 1 Mauritian rupee (R).

Exchange rates (31 December 1984):
£1 sterling = 18.084 rupees;
US $1 = 15.603 rupees.

Directory

The Constitution

The Mauritius Independence Order, 1968, as amended by the Constitution of Mauritius (Amendment) Act No. 39 of 1969, provides for a Council of Ministers consisting of the Prime Minister and not more than 20 other Ministers. The Prime Minister, appointed by the Governor-General, is the member of the Legislative Assembly who appears to the Governor-General best able to command the support of the majority of members of the Assembly. Other Ministers are appointed by the Governor-General acting in accordance with the advice of the Prime Minister.

The Legislative Assembly, which has a normal term of five years, consists of a Speaker, 62 elected members, eight additional members, and the Attorney-General if not an elected member. For the purpose of electing members of the Legislative Assembly, the island of Mauritius is divided into 20 three-member constituencies. Rodrigues returns two members, one of whom is Minister for the island. The official language of the Legislative Assembly is English but any member may address the Chair in French.

The Government

Head of State: HM Queen Elizabeth II.

Governor-General: Sir Seewoosagur Ramgoolam (appointed December 1983).

COUNCIL OF MINISTERS
(February 1985)

Coalition of Mouvement Socialiste Mauricien (MSM), Parti Mauricien Social-Démocrate (PMSD), and Mauritius Labour Party (MLP). The Organisation du Peuple Rodriguais (OPR) is also represented.

Prime Minister, Minister of Defence and Internal Security and Reform Institutions: Aneerood Jugnauth (MSM).

In 1983 123,800 tourists visited Mauritius.

Mauritius Government Tourist Office: Registrar General Bldg, Sir Seewoosagur Ramgoolam St, Port Louis; tel. 011703; Gen. Man. CYRIL VADAMOOTOO.

MEXICO

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The United Mexican States is, by far, the largest country in Central America. It is bordered to the north by the USA, and to the south by Guatemala and Belize. The Gulf of Mexico and the Caribbean Sea lie to the east, and the Pacific Ocean and Gulf of California to the west. The climate varies with altitude. The tropical southern region and the coastal lowlands are hot and wet, with an average annual temperature of 18°C (64°F), while the highlands of the central plateau are temperate. Much of the north and west is arid desert. In Mexico City, which lies at about 2,250 m (nearly 7,400 ft) above sea-level, temperatures are generally between 5°C (42°F) and 25°C (78°F). The country's highest recorded temperature is 58°C (136°F). The principal language is Spanish, spoken by about 90% of the population in 1970, while about 8% speak indigenous languages. Almost all of Mexico's inhabitants profess Christianity, and about 96% are adherents of the Roman Catholic Church. The national flag (proportions 7 by 4) has three equal vertical stripes, of green, white and red, with the state emblem (a brown eagle, holding a snake in its beak, on a green cactus, with a wreath of oak and laurel beneath) in the centre of the white stripe. The capital is Mexico City.

Recent History

Conquered by Hernán Cortés in the 16th century, Mexico was ruled by Spain until the wars of independence of 1810–21. After the war of 1846, Mexico ceded about one-half of its territory to the USA. Attempts at political and social reform led to civil war in the 1860s, and repudiation of debts led to war with Britain, the USA and France. The Austrian Archduke Maximilian, whom France tried to install as Emperor of Mexico, was shot in 1867. Order was restored during the dictatorship of Porfirio Díaz, which lasted from 1876 until the Revolution of 1910. The Constitution of 1917 embodied the aims of the Revolution by revising land ownership, by drafting a labour code and by curtailing the power of the Roman Catholic Church.

Since 1929 the country has been dominated by the Partido Revolucionario Institucional (PRI) in an effective one-party system, while maintaining a democratic form of election. The President from 1934 until 1940, Lázaro Cárdenas, speeded up the land reform which had been initiated under the 1917 constitution, and nationalized the petroleum sector. He was succeeded by Gen. Manuel Avila Camacho, who embarked on a programme of industrialization. Avila's successor, President Miguel Alemán Valdés (1946–52), concentrated on expanding educational services. President Adolfo Ruiz Cortines held office from 1952 to 1958, and President Adolfo López Mateos from 1958 to 1964, when Lic. Gustavo Díaz Ordaz was elected President. Lic. Luis Echeverría Alvarez won the presidential election of 1970 and pledged to extend the benefits of Mexico's prosperity to all sectors of the population. President Echeverría strengthened diplomatic links with countries of all political persuasions. In 1975 the Government signed trade and co-operation agreements with the EEC and the CMEA.

In the July 1976 elections, the PRI candidate, José López Portillo, was elected President with almost 95% of the votes cast. The Government's mismanagement of the economy, combined with the President's reluctance to make politically difficult decisions, brought the country to the verge of bankruptcy in 1982. In 1977 President López Portillo initiated reforms to improve minority party representation in Congress and to increase democratic participation. The presidential election of July 1982 was the most open in Mexican history, with left-wing groups taking part for the first time. Elections to the Chamber of Deputies, held at the same time, were also open but, as three-quarters of the seats in the Chamber were contested by the single-member constituency system, the PRI achieved another overwhelming victory. The new President, Miguel de la Madrid Hurtado (a former Planning and Budget Secretary), on taking office in December, embarked on a programme of major economic reforms and began taking positive steps to reduce institutionalized corruption in public services.

In January 1983 the Government introduced legislation to prevent the misuse of public funds by politicians. In August the former head of Pemex (the state oil agency), Jorge Díaz Serrano, was arrested on a charge of fraud. Attempts were made to locate the former chief of police of Mexico City, Arturo Durazo Moreno, who was suspected of fraud and drug smuggling. Durazo Moreno was arrested in Puerto Rico in July 1984. The Government was criticized for failing to extend its 'moral renovation' campaign to include an investigation into the activities of ex-President López Portillo and the powerful trade unions of the petroleum industry.

The Government's economic programme gave precedence to the repayment of Mexico's debts, a policy which imposed severe financial constraints upon the middle and lower classes and which led to growing disaffection among traditional PRI supporters, including the influential trade union, the Confederación de Trabajadores de México (CTM). Opposition to the Government was demonstrated by the important gains which were made by the Partido Acción Nacional (PAN) at municipal elections in Durango and Chihuahua during July 1983. Following these successes, the PAN controlled five of the 31 state capitals. As a result of its losses to the PAN, the PRI acted swiftly to ensure success at the remaining elections, and there followed allegations of widespread electoral fraud. Violent confrontations between the PRI and left-wing opposition groups occurred at Juchitán, Oaxaca, in December.

In early 1985 the PRI was suspected of electoral malpractice at mayoral elections in the state of Coahuila. During the ensuing public protests, violent clashes broke out between PAN supporters and the police, in which two people were killed. The ruling party's increasingly flagrant use of electoral fraud was regarded as evidence of its concern at the erosion of its traditional support. Throughout 1984 the PRI and the private sector had been in conflict over the sector's increasing support of the PAN. In addition, public acceptance of the Government's severe austerity programme (the effects of which had been tempered by the initial success of the Government's anti-corruption campaign) was diminished in 1984 by the campaign's apparent loss of momentum. Further criticism of the Government's policies was expressed by the Roman Catholic Church and the trade union movement. The gubernatorial and congressional elections that were planned for July 1985 were regarded by some as a decisive test of the Government's popularity, and the PAN was expected to make significant gains in the more prosperous northern states. It was thought unlikely, however, that the PRI would permit any reduction in its powers.

Mexico's foreign policy has been determined largely by relations with the USA. The rapid expansion of petroleum production since the mid-1970s has given Mexico a new independence and, under President López Portillo, the country assumed the role of a Third World leader and hosted the North-South summit of 1981. In Central American foreign policy, Mexico has favoured the left-wing regimes in Cuba and Nicaragua, and in 1981 called for negotiations with the left-wing factions in El Salvador. Relations with the USA deteriorated in 1982 after the US Government rejected López Portillo's peace plan, which offered Mexican mediation between the USA, Cuba and Nicaragua. As a member of the Contadora group (with Colombia, Panama and Venezuela), Mexico advocated a negotiated settlement to the conflicts in Central America, and called for the withdrawal of all foreign advisers in the region. The US Government continued to oppose these recommendations. The visit of President de la Madrid to the USA in May 1984 ended in discord after the Mexican President was strongly critical of US policy in Central America. In late 1984, however,

there was some indication that the Government was reconsidering its traditional support of left-wing regimes in Central America, while maintaining its commitment to the Contadora group.

In 1980 a Mexican Commission for Refugees was set up to deal with the influx of refugees from El Salvador, estimated at 70,000 by 1982. About 40,000 Guatemalan refugees entered Mexico in 1982, and incursions by Guatemalan troops resulted in the deaths of several Mexicans. A formal protest was made to the Guatemalan Government but Mexican troops were careful to avoid border clashes. The Mexican army was believed to maintain a policy of close co-operation with the Guatemalan armed forces. The Mexican Government still refused to confer legal status upon refugees, and there were reports of forced repatriation of hundreds of peasants in 1983. In April 1984 a raid by the Guatemalan army on a refugee camp in Mexican territory resulted in the murder of six people. In response to mounting tension along the border, the Government announced the relocation of 46,000 refugees to camps in the state of Campeche. In July reports of harassment and maltreatment of refugees by the Mexican army were denied by the Government.

Government

Mexico is a federal republic comprising 31 states and a Federal District (around the capital). Under the 1917 constitution, legislative power is vested in the bicameral National Congress, elected by universal adult suffrage. The Senate has 64 members (two from each state and the Federal District), serving a six-year term. The Chamber of Deputies, directly elected for three years, has 400 seats, of which 300 are filled from single-member constituencies. The remaining 100 seats, allocated by proportional representation, are filled from minority parties' lists. Executive power is held by the President, directly elected for six years at the same time as the Senate. He governs with the assistance of an appointed Cabinet. Each state has its own constitution and is administered by a Governor (elected for six years) and an elected Chamber of Deputies.

Defence

Military service, on a part-time basis, is compulsory. In July 1984 the armed forces totalled 120,000: 94,500 in the army, 20,000 in the navy (including naval air force and marines) and 5,500 in the air force. Defence expenditure for 1983 was 72,000m. pesos.

Economic Affairs

Agriculture suffers from inefficient exploitation of small, non-irrigated plots, and in 1983 contributed only 9% of the GDP, although it employed about 32% of the labour force. The principal food crops are maize, wheat, rice and kidney beans, while the major export crops are cotton, coffee, fruit and vegetables. Sugar was exported until 1979. An annual population growth rate of about 3% and the fact that only about 8% of the total land area is cultivated (out of a potential of only 15%), and that an average of 18% of the harvest is destroyed by adverse weather each year, forced Mexico to become a grain importer in the 1970s. Programmes to collectivize ejidos (state-owned smallholdings), aimed at increasing farm production, began under the administration of President López Portillo, and the average annual growth rate in agricultural production between 1977 and 1980 was 4.5%.

In 1981 the output of the agricultural sector increased by 6%, and a record harvest was reported. The sugar crop, however, suffered badly because of increased rainfall. Production of raw sugar in 1981 was 18% less than in 1979. The annual domestic demand for sugar has been estimated at 3m. tons. Unfavourable weather in 1982 destroyed up to 40% of the harvest, subsidies were reduced, and the agricultural assistance programme of the Sistema Alimentario Mexicano (SAM), introduced in March 1980 to encourage development within the sector, was suspended. Agricultural production declined by 0.4% in 1982. Low prices reduced the area planted with cotton in 1982, and the 1983 crop was expected to be only 800,000–850,000 bales (each of 217 kg), compared with 1.4m. bales in 1982. Food imports in 1983 reached 10m. metric tons, including maize, and were expected to increase to 14m. tons in 1984, as a result of shortages caused by severe drought. Following growth of 4.2% in 1983, the agricultural sector was expected to grow by 6% in 1984. The 1984 grain harvest was 29.4m. tons, 10m. tons short of self-sufficiency. Pronal, a new agricultural scheme, was begun in 1983 with the aim of bringing more land under cultivation. Improved irrigation resulted in increased output of fruit and vegetables, which expanded by 6.4% and 7.3% respectively. Mexico's forests provide a variety of hard and soft woods but are under-utilized. In an attempt to exploit the fishing industry's estimated annual potential of 9m. tons, the Government has announced a development programme to increase production by 100% by 1988.

Mexico produces more than 40 different minerals. It is the world's leading supplier of silver, celestite and fluorite, and a major producer of mercury, antimony, cadmium, manganese and zinc. The mining sector expanded at an average rate of 3% per year between 1970 and 1980. Refined metals account for almost 20% of all non-petroleum exports. Mexico's output of silver was expected to increase after 1983, following the opening of the world's largest silver mine at Real de Angeles in Zacatecas. Mexico's first phosphate mine, at San Juan de la Costa, began production in 1980. A second, at Santo Domingo in Baja California, was due to open in 1983, and was expected to produce sufficient for export. The first uranium mining and processing operation, at Los Amoles in Sonora, was due to begin in 1983, but has been delayed. Proven reserves were 15,000 metric tons, and potential reserves 150,000 tons. Mexico's reserves of hard coal are estimated at 5,448m. tons. Under the 1984–88 Mining Development Plan, 322,000m. pesos were to be invested in the sector between 1984 and 1986.

Mexico was the world's leading petroleum producer in 1921 but by 1938, when the industry was nationalized, production had fallen dramatically. The discovery of extensive petroleum reserves in Tabasco and Chiapas enabled output to increase significantly in the 1970s. Mexico's average daily production of petroleum rose to 2.4m. barrels in October 1980, and in 1982 Mexico was the world's fourth largest producer. The state oil agency, Petróleos Mexicanos (Pemex), has declared that the Bay of Campeche is the richest offshore oilfield in the world, producing 560,000 barrels per day (b/d) in 1981, when a further deposit of 34,000m. barrels was found. In December 1984 Mexico's proven reserves of petroleum and natural gas stood at 72,500m. barrels, and potential reserves at 250,000m. barrels, placing Mexico fifth in the world in its documented reserves. In 1984, 26 new oil and gas fields were discovered. Pemex is the largest single employer (with about 100,000 employees) and the largest single industrial investor in Mexico. Oil and gas account for 70% of electricity production. Mexico has the eleventh largest refining capacity in the world. In 1982 oil exports were valued at $15,600m., or 75% of total merchandise exports. Prices were undercut in order to increase production, and a further $650m. in revenue were lost. Pemex had debts of $19,860m. at the end of 1982, although these fell to $16,500m. in 1984. In 1983 oil production averaged 2.75m. b/d. Oil exports rose from 1.29m. b/d in January 1983 to 1.74m. b/d in January 1984. A loss in export earnings of $3,300m. was anticipated for 1983. Mexico is the largest single supplier of petroleum to the USA, which increased its share of Mexico's oil exports to 43% in 1982 in return for credits. Production of natural gas in 1983 averaged 265,000 b/d. In 1983 the USA reduced its imports of Mexican gas from 300m. cu ft per day to 180m. cu ft per day. The rate of growth in the oil and gas sector declined from 32.7% in 1980 to 14.5% in 1982. In 1983 the sector declined by 0.6%. Vast petroleum and gas reserves have made the petrochemicals industry one of the fastest-growing sectors of the economy. Production reached 9m. metric tons in 1981, and it was hoped to increase output to 23m. tons by 1990. In October 1984 Pemex announced its intention to cut oil production by 10% for three months in an attempt to protect oil prices. This decision, coupled with the suspension of exports of gas to the USA, was expected to result in the sector losing earnings amounting to $1,200m. in 1985. In 1984 Pemex announced plans to drill 1,000 new wells as part of its efforts to increase production of crude petroleum to 4.35m. b/d by 1990.

Mexico has yet to make use of nuclear energy, although the Laguna Verde reactors were to be activated by 1988, with initial capacity of 654 MW. Expansion of the sector was suspended in 1982 because of government spending cuts. Hydroelectricity accounted for 30% of generation in 1982, with an installed

capacity of 5,200 MW. A 540 MW plant at El Caracol was due to open in 1984.

Mexico has one of the most advanced manufacturing sectors in the developing world. Industrial production increased by 8.1% annually from 1977 to 1980, and by 7.4% in 1981. These figures, however, include the petroleum and petrochemicals sector, which grew by 22% in 1979. Development was also strong in the steel and motor sectors. A new steelworks is under construction at Lázaro Cárdenas. By 1982, however, the flight of capital, the depreciation of the peso, the shortage of foreign exchange and the collapse of the domestic market had halted industrial growth, and the output of the manufacturing sector fell by 2.4%. Output fell again in 1983, by 7.3%. Car production, which had increased by 20% per annum between 1977 and 1981, fell by up to 15% in 1982. Between July 1982 and February 1983 an estimated 60,000 jobs were lost. However, the industry's prospects have improved following the decision of Renault, Nissan and Ford to build new factories in Mexico, which are due to become operational by 1986. Textile production fell by 20% in 1982, with the industry working at only 60% of capacity.

The annual real growth of Mexico's GDP averaged 8.5% between 1977 and 1980, as a result of rapid expansion in the petroleum industry. Between 1978 and 1981 about 3m. jobs were created. The Government was able to borrow from abroad for capital investment projects, but the world oil surplus and lower prices resulted in a shortfall in anticipated revenue in 1981, when GDP grew by about 7.5%. About US $22,000m. was borrowed in 1981, a record for any one country, and Mexico's evident inability to make future repayments of loan principal brought fears of a financial crash. Fear of a currency devaluation prompted capital outflow of $7,000m. in six months. Reserves reached dangerously low levels. The foreign debt of the public sector reached $53,000m. by the end of 1981, in which year the cost of servicing public debt was equivalent to 85% of the Mexican Government's revenue from petroleum. At the same time the private sector's foreign debt reached $20,000m. In 1981 the budget deficit exceeded $20,000m.

Despite the expansion of petroleum exports, the current deficit on Mexico's balance of payments steadily increased, from $1,854m. in 1977 to $13,899m. in 1981. The depletion of foreign reserves forced the Government to impose currency controls in April, and the foreign exchange market was closed altogether in August. The peso dropped from 26 to 130 per US dollar between February and September 1982. Inflation had risen to 98.9% by December 1982.

In order to prevent Mexico from defaulting on debt payments, a group of international banks launched a rescue operation in August 1982. Mexico and the banks agreed a moratorium on repayments of public debt principal. A three-year loan of $3,840m. from the IMF was agreed in October, allowing further credit from commercial banks to be negotiated. All private banks were nationalized in September 1982, increasing the state's control of the economy to 70%. President de la Madrid introduced drastic deflationary measures and requested a radical restructuring of the public sector foreign debt (which had reached $69,000m.) up to 1984. In 1982 successive devaluations and controls on foreign exchange halved the private sector's profits and prevented debt servicing. About 1m. jobs were lost in 1982, and unemployment and under-employment were estimated to affect over 50% of the population. Real wages declined by 40% between 1982 and 1984. However, the severe measures were effective in curbing the worsening trend in Mexico's balance of payments. As a result of a drastic cut in imports, the current deficit was reduced to $5,753m. in 1982, and a current surplus of $5,208m. was recorded in 1983.

Meanwhile, the majority of companies in the private sector had been brought to the verge of bankruptcy by Mexico's severe liquidity crisis. In January 1983 the Government introduced four labour-intensive programmes to create 700,000 new jobs. The 1983–88 National Development Plan, presented in March, gave priority to improving growth and to developing new sources of financing. In 1983 GDP declined by 4.5%. Inflation failed to meet the IMF target of 55%, and stood at 80.8% in December, although this was a reduction from the peak of 117% in April. Imports fell by 47% in 1983, and a public sector deficit of $1,500m. was anticipated.

In 1984 unemployment was estimated at between 37% and 45% of the labour force. Inflation fell to 59.2% but was still in excess of the target of 40% that had been established by the IMF. In 1984 the budget deficit represented 6.9% of GNP. GDP grew by 3.5% during 1984. The trade surplus for the year to November 1984 was $7,900m. In February 1985 the Government announced a series of austerity measures, which were to include cuts in public spending and a programme of tax reforms.

In 1983 the Government successfully rescheduled $14,000m. of private sector debt, in addition to $22,500m. of public sector debt. In September Mexico began a gradual devaluation of the free-market peso, which was to decline to 162.10 pesos per US dollar by December 1983. In December 1984 the daily rate of devaluation was accelerated, to allow the peso to decline annually by 38% against the US dollar. By the end of 1983 Mexico's standing with the international banking community had improved considerably, and a $3,800m. loan for 1984 was agreed on favourable terms. In September 1984 the Government succeeded in rescheduling $48,700m. of foreign debt over a period of 14 years, at reduced interest rates. In 1984 about 80% of Mexico's foreign debt of $90,000m. was owed to private and public financial agencies in the USA.

Transport and Communications

Road transport accounts for about 70% of all public passenger traffic and for about 60% of freight traffic. In 1984 there were 15,667 km of railways and 214,073 km of roads, including three sections of the Pan-American Highway. The underground railway network in Mexico City was extended in 1979–80 but is still extremely overcrowded, and it is planned to build 13 new lines by the year 2010. Mexico's difficult terrain encourages air transport, and there are 28 international and 20 national airports, plus 1,300 landing fields and feeder airports. International air transport is provided by a large number of national and foreign airlines. Between 1984 and 1988 the Government planned to develop the main industrial ports of Tampico, Coatzacoalcos, Lázaro Cárdenas, Altamira, Laguna de Ostión and Salina Cruz in an attempt to redirect growth and to facilitate exports. The port at Dos Bocas, on the Gulf of Mexico, will be the largest in Latin America when it is opened. A 300-km railway link across the isthmus of Tehuantepec connects the Caribbean port of Coatzacoalcos with the Pacific port of Salina Cruz.

Social Welfare

Social welfare is administered by the Mexican Social Security Institute and financed by contributions from employers, employees and the Government. In May 1970 a new Labour Law was instituted to replace the existing law of 1931. It provided for longer holidays, overtime rates and restrictions, increased bonuses and trade union surveillance of company tax returns. Of particular note was the innovation of compulsory profit-sharing, and the law's demand that employers provide housing for their employees. By the end of 1979 about 38m. people were covered by the obligatory social security system. There is no unemployment benefit. In 1974 Mexico had 31,571 physicians. In 1980 there were 5,945 hospitals, of which 2,666 belonged to the Social Security Institute. Some 1,500 medical units and 22 clinic hospitals were being constructed in rural areas.

Education

State education is free and compulsory. It covers six years of primary education but in 1979 it was proposed to increase the period to 10 years, including three years of secondary education. As a proportion of children between six and 17 years of age, the total enrolment at primary and secondary schools was 89% in 1981. Much is being done in the field of adult education, and the illiteracy rate declined from 29% in 1960 to 15% in 1980. In 1982 there were 3,738 institutes of higher education, of which 85 were universities. In January 1985 the Government announced plans to reorganize the state education system. Special emphasis was placed on a campaign to promote literacy. In the 1985 federal budget 1,400,000m. pesos were allocated to education.

Tourism

Tourism remains Mexico's second largest net earner of foreign exchange, after the petroleum industry, and recorded a surplus of $1,185m. in 1983, compared with $618m. in 1982. A surplus

of $1,200m. was expected in 1984. Mexico received 4,749,000 visitors in 1983, and the figure was expected to reach 5m. in 1984. More than 80% of visitors come from the USA and Canada. The country is famous for volcanoes, coastal scenery and the great Sierra Nevada (Sierra Madre). The relics of the Mayan and Aztec civilizations and of Spanish Colonial Mexico are of historic and artistic interest. Zihuatanejo, on the Pacific coast, and Cancún, on the Caribbean, are being developed as tourist resorts by the Government, using funds supplied by the World Bank and the Inter-American Development Bank. There are plans to develop a major resort on the Bay of Huatulco, on the Pacific coast. The government tourism agency, FONATUR, is encouraging the renovation and expansion of old hotels, and is providing credit for the industry at less than commercial rates of interest.

Public Holidays

1985: 1 May (Labour Day), 5 May (Anniversary of the Battle of Puebla), 1 September (President's Annual Message), 16 September (Independence Day), 12 October (Discovery of America), 2 November (All Souls' Day)*, 20 November (Anniversary of the Revolution), 12 December (Day of Our Lady of Guadalupe)*, 24, 25 December (Christmas).

1986: 1 January (New Year's Day), 5 February (Constitution Day), 21 March (Birthday of Benito Juárez), 27, 28, 29 March (Easter).

* All Souls' Day and Our Lady of Guadalupe are not official holidays, but are widely celebrated.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centavos = 1 Mexican peso.

Exchange rates (31 December 1984):
£1 sterling = 223.18 pesos;
US $1 = 192.56 pesos.

Directory

The Constitution

The present Mexican Constitution was proclaimed on 5 February 1917, at the end of the revolution which began in 1910 against the regime of Porfirio Díaz. Its provisions regarding religion, education and the ownership and exploitation of mineral wealth reflect the long revolutionary struggle against the concentration of power in the hands of the Church and the large landowners, and the struggle which culminated in the 1930s in the expropriation of the properties of the foreign oil companies. It has been amended from time to time.

GOVERNMENT

The President and Congress.

The President of the Republic, in agreement with the Council of Ministers and with the approval of Congress or of the Permanent Committee when Congress is not in session, may suspend constitutional guarantees in case of foreign invasion, serious disturbance, or any other emergency endangering the people.

The exercise of supreme executive authority is vested in the President, who is elected for six years and enters upon his office on 1 December of the year of his election. The presidential powers include the right to appoint and remove members of his cabinet, the Attorney-General and the governor of the Federal District; to appoint, with the approval of the Senate, diplomatic officials, the higher officers of the army, and ministers of the supreme and higher courts of justice. He is also empowered to dispose of the armed forces for the internal and external security of the federation.

Congress is composed of a Chamber of Deputies elected every three years, and a Senate whose members hold office for six years. There is one deputy for every 250,000 people and for every fraction of over 125,000 people. The Senate is composed of two members for each state and two for the Federal District. Regular sessions of Congress begin on 1 September and may not continue beyond 31 December of the same year. Extraordinary sessions may be convened by the Permanent Committee.

The powers of Congress include the right to pass laws and regulations; impose taxes; specify the bases on which the Executive may negotiate loans; declare war; raise, maintain and regulate the organization of the armed forces; establish and maintain schools of various types throughout the country; approve or reject the budget; sanction appointments submitted by the President of ministers of the Supreme Court and magistrates of the superior court of the Federal District; approve or reject treaties and conventions made with foreign powers; and ratify diplomatic appointments.

The Permanent Committee, consisting of 29 members of Congress (15 of whom are deputies and 14 senators), officiates when Congress is in recess, and is responsible for the convening of extraordinary sessions of Congress.

The States

Governors are elected by popular vote in a general election every six years. The local legislature is formed by deputies, who are changed every three years. The judicature is specially appointed under the Constitution by the competent authority (it is never subject to the popular vote).

Each state is a separate unit, with the right to levy taxes and to legislate in certain matters. The states are not allowed to levy inter-state customs duties.

The Federal District

Consists of Mexico City and several neighbouring small towns and villages. The Governor is appointed by the President.

EDUCATION

According to the Constitution, the providing of educational facilities is the joint responsibility of the federation, the states and the municipalities. Education shall be democratic, and shall be directed to developing all the faculties of the individual, at the same time imbuing him with a love of his country and a consciousness of international solidarity and justice. Religious bodies may not provide education, except training for the priesthood. Private educational institutions must conform to the requirements of the Constitution with regard to the nature of the teaching given. The education provided by the states shall be free of charge.

RELIGION

Religious bodies of whatever denomination shall not have the capacity to possess or administer real estate or capital invested therein. Churches are the property of the nation; the headquarters of bishops, seminaries, convents and other property used for the propagation of a religious creed shall pass into the hands of the State, to be dedicated to the public service of the federation or of the respective state. Institutions of charity, provided they are not connected with a religious body, may hold real property. The establishment of monastic orders is prohibited. Ministers of religion must be Mexican; they may not criticize the fundamental laws of the country in a public or private meeting; they may not vote or form associations for political purposes. Political meetings may not be held in places of worship.

LAND AND MINERAL OWNERSHIP

Article 27 of the Constitution vests direct ownership of minerals and other products of the subsoil, including petroleum and water, in the nation, and reserves to the federal government alone the right to grant concessions in accordance with the laws to individuals and companies, on the condition that they establish regular work for the exploitation of the materials. At the same time, the right to acquire ownership of lands and waters belonging to the nation, or concessions for their exploitation, is limited to Mexican individuals and companies, although the State may concede similar rights to foreigners who agree not to invoke the protection of their governments to enforce such rights. No alien may acquire direct ownership over lands and waters within an area 100 kilometres wide along the frontiers or 50 kilometres along the coast.

The same article declares null all alienations of lands, waters and forests belonging to towns or communities made by political chiefs or other local authorities in violation of the provisions of the law of 25 June 1856,* and all concessions or sales of communally-held lands, waters and forests made by the federal authorities after 1 December 1876. The population settlements which lack ejidos (state-owned smallholdings), or cannot obtain restitution of lands previously held, shall be granted lands in proportion to the needs of the population. The area of land granted to the individual may not be less than 10 hectares of irrigated or watered land, or the equivalent in other kinds of land.

The owners affected by decisions to divide and redistribute land (with the exception of the owners of farming or cattle-rearing properties) shall not have any right of redress, nor may they invoke the right of amparo† in protection of their interests. They may, however, apply to the Government for indemnification. Small properties, the areas of which are defined in the Constitution, will not be subject to expropriation. The Constitution leaves to Congress the duty of determining the maximum size of rural properties.

Monopolies and measures to restrict competition in industry, commerce or public services are prohibited.

A section of the Constitution deals with work and social security.

On 30 December 1977 a Federal Law on Political Organizations and Electoral Procedure was promulgated. It includes the following provisions:

Legislative power lies in a General Congress which comprises a Chamber of Deputies and a Senate. The Chamber of Deputies shall comprise 300 deputies elected by majority vote within single-member electoral districts and up to 100 deputies elected by a system of proportional representation from regional lists within multi-member constituencies. The Senate comprises two members for each state and two for the Federal District, elected by majority vote.

Executive power is held by the President of the Republic of the United Mexican States, elected by majority vote.

Ordinary elections will be held every three years for the federal deputies and every six years for the senators and the President of the Republic on the first Sunday of July of the year in question. When a vacancy occurs among members of the Congress elected by

* The Lerdo Law against ecclesiastical privilege, which became the basis of the Liberal Constitution of 1857.

† The constitution provides for the procedure known as juicio de amparo, a wider form of habeas corpus, which the individual may invoke in protection of his constitutional rights.

majority vote, the Chamber in question shall call extraordinary elections, and when a vacancy occurs among members of the Chamber of Deputies elected by proportional representation it shall be filled by the candidate of the same party who received the next highest number of votes at the last ordinary election.

Voting is the right and duty of every citizen, male or female, over the age of 18 years.

A political party shall be registered if it has at least 3,000 members in each one of at least half the states in Mexico or at least 300 members in each one of at least half of the single-member constituencies. In either case the total number of members must be no less than 65,000. A party can also obtain conditional registration if it has been active for at least four years. Registration is confirmed if the party obtains at least 1.5% of the popular vote. All political parties shall have free access to the media.

The Government

HEAD OF STATE

President: Miguel de la Madrid Hurtado (took office 1 December 1982).

THE CABINET

(March 1985)

Secretary of the Interior: Lic. Manuel Bartlett Díaz.

Secretary of Foreign Affairs: Lic. Bernardo Sepúlveda Amor.

Secretary of National Defence: Gen. Juan Arévalo Gardoqui.

Secretary of the Navy: Adm. Miguel Gómez Ortega.

Secretary of Finance and Public Credit: Lic. Jesús Silva Herzog.

Secretary of Energy, Mines and Federal Industry: Lic. Francisco Labastida Ochoa.

Secretary of Commerce and Industrial Development: Lic. Héctor Hernández Cervantes.

Secretary of Agriculture and Water Resources: Eduardo Pesquiera Olea.

Secretary of Communications and Transport: Fernando de Garay y Arenas.

Secretary of Urban Development and Ecology: Lic. Marcelo Javelly Girard.

Secretary of Public Education: Lic. Jesús Reyes Heroles.

Secretary of Health and Welfare: Dr Guillermo Soberón Acevedo.

Secretary of Labour and Social Security: Lic. Arsenio Farell Cubillas.

Secretary of Planning and Federal Budget: Lic. Carlos Salinas de Gortari.

Comptroller-General: Francisco Rojas Gutiérrez.

Secretary of Agrarian Reform: Ing. Luis Martínez Villicaña.

Secretary of Tourism: Lic. Antonio Enríquez Savignac.

Secretary of Fisheries: Lic. Pedro Ojeda Paullada.

Governor of Federal District: Ramón Aguirre Velázquez.

Attorney-General: Lic. Sergio García Ramírez.

Attorney-General of Federal District: Lic. Victoria Adato de Ibarra.

MINISTRIES

All Ministries are in Mexico City, DF.

State Governors

Federal District: Ramón Aguirre Velázquez.
Aguascalientes: Rodolfo Landeros Gallegos.
Baja California Norte: Lic. Xicotencatl Leyva Mortera.
Baja California Sur: Alberto Alvarado Arámburo.
Campeche: Ing. Eugenio Echeverría Castellot.
Chiapas: Gen. Absalón Castellanos Domínguez.
Chihuahua: Lic. Oscar Ornelas Kuchle.
Coahuila: Lic. José de la Fuente Rodríguez.
Colima: Lic. Griselda Alvarez Ponce de León.
Durango: Lic. Armando del Castillo Franco.
Guanajuato: Lic. Agustín Téllez Cruces.
Guerrero: Lic. Alejandro Cervantes Delgado.
Hidalgo: Arq. Guillermo Rossell de la Lama.
Jalisco: Lic. Enrique Alvarez del Castillo.
México: Lic. Alfredo del Mazo González.
Michoacán: Ing. Cuauhtémoc Cárdenas Solórzano.
Morelos: Dr Lauro Ortega Martínez.
Nayarit: Lic. Emilio González Parra.
Nuevo León: Lic. Alfonso Martínez Domínguez.
Oaxaca: Lic. Pedro Vázquez Colmenares.
Puebla: Lic. Guillermo Jiménez Morales.
Querétaro: Lic. Rafael Camacho Guzmán.
Quintana Roo: Lic. Pedro Joaquín Coldwell.
San Luis Potosí: Prof. Carlos Jonguitud Barrios.
Sinaloa: Ing. Antonio Toledo Corro.
Sonora: Dr Samuel Ocaña García.
Tabasco: Lic. Enrique González Pedrero.
Tamaulipas: Dr Emilio Martínez Manaoutou.
Tlaxcala: Lic. Tulio Hernández Gómez.
Veracruz: Lic. Agustín Acosta Lagunes.
Yucatán: Lic. Víctor Cervera Pacheco.
Zacatecas: Lic. José Guadalupe Cervantes Corona.

Note: Elections were due to be held in July 1985 in the following States: Campeche, Colima, Guanajuato, Nuevo León, Querétaro, San Luis Potosí and Sonora.

President and Legislature

PRESIDENT

Election, 4 July 1982

Candidate	Percentage of votes
Miguel de la Madrid Hurtado (PRI)	74.4*
Pablo Emilio Madero (PAN)	16.4
Arnaldo Martínez Verdugo (PSUM)	3.7
Rosario Ibarra de la Piedra (PRT)	1.9
Ignacio González Gollaz (PMD)	1.9
Candido Díaz Cerecedo (PST)	1.5
Manuel Moreno Sánchez (PSD)	0.2

* Includes 1.6% derived from the PPS and 1.1% from the PARM.

CONGRESO DE LA UNIÓN

Senate

Leader of the Senate: Miguel González Avelar.

Elections, 4 July 1982
The Partido Revolucionario Institucional won all 64 seats.

Federal Chamber of Deputies

Elections, 4 July 1982

Party	Seats
Partido Revolucionario Institucional	299
Partido Acción Nacional	55
Partido Socialista Unificado de México	17
Partido Popular Socialista	11
Partido Socialista de los Trabajadores	10
Partido Demócrata Mexicano	8
Total	400

Political Organizations

The electoral reform of 1977 permitted new political parties and associations to be registered. (For details of conditions of registration, see the Constitution, above.) Although the electoral system is predominantly based on single-member constituencies, an element of proportional representation ensures that the opposition parties obtain at least 100 of the 400 seats in the Chamber of Deputies.

Partido Revolucionario Institucional (PRI): Insurgentes Norte 61, 06350 México, DF; f. 1929 as the Partido Nacional Revolucionario, but is regarded as the natural successor to the victorious parties of the revolutionary period; broadly based and moderately left-wing government party; Pres. Adolfo Lugo Verduzco; Sec.-Gen. Irma Cue de Duarte.

Acción Comunitaria (Acomac): registered as a political party in 1978.

Acción Democrática de Rescate Electoral (ADRE): f. January 1983 as tactical alliance by the following two parties:

Partido Acción Nacional (PAN): Angel Urraza 812, Col. del Valle, 03109 México, DF; tel. 5590777; telex 1764164; f. 1939; conservative party; 500,000 mems; Pres. Pablo Emilio Madero; Gen. Sec. Bernardo Bátiz Vázquez.

Partido Demócrata Mexicano (PDM): Edison 89, Col. Tabacalera, México 1, DF; f. 1971; conservative party; 450,000 mems; Pres. Gumersindo Magaña Negrete; Sec. Roberto Picón Robledo.

In February 1985 the following left-wing parties announced the formation of an electoral alliance to contest the elections to the Federal Chamber of Deputies which were planned for July 1985:

Partido Mexicano de los Trabajadores (PMT): Bucareli 20, 6° y 8°, México 1, DF; f. 1977; 20,000 mems; officially registered as a political party in 1984; Pres. Herberto Castillo; Sec. José Alvarez Icaza.

Partido Popular Socialista (PPS): Avda Alvaro Obregón 185, Col. Roma, 06977 México, DF; tel. 5330816; f. 1948; left-wing party; Sec.-Gen. Jorge Cruickshank García.

Partido Revolucionario de los Trabajadores (PRT): Trotskyist; Leader Rosario Ibarra de la Piedra.

Partido Socialista de los Trabajadores (PST): Avda México 199, Col. Hipódromo Condesa, 06170 México, DF; f. 1973; Marxist-Leninist, but works with PRI; 132,000 mems; Pres. Rafael Aguilar Talamantes; Sec.-Gen. Graco Ramírez Abreu.

Partido Socialista Unificado de México (PSUM): Calle Monterrey 159, Col. Roma, 06700 México, DF; tel. 5841972; telex 1772925; f. 1981; Gen. Sec. Pablo Gómez; absorbed the Partido Comunista Mexicano (PCM) in 1981; 600,000 mems; coalition of the left comprising the following parties:

Movimiento de Acción Popular (MAP): f. 1981.

Movimiento de Acción y Unidad Socialista (MAUS): f. 1969; Pres. Miguel Angel Velasco.

Partido Comunista Mexicano: f. 1919.

Partido del Pueblo Mexicano (PPM): f. 1976; Pres. Alejandro Gascón Mercado.

Partido Socialista Revolucionario (PSR): Pres. Roberto Jaramillo Flores.

Unificación y Progreso (UPAC): officially registered as a political party in 1978; liberal.

The following parties are not legally recognized:

Partido Auténtico de la Revolución Mexicana (PARM): Río Nazas 168, Col. Cuauhtémoc, México 5, DF; f. 1954 to sustain the ideology of the Mexican Political Constitution of 1917; lost its registration after the 1982 elections; 191,500 mems; Pres. Jesús Guzmán Rubio; Sec.-Gen. Rubén Rodríguez Lozano.

Partido Social Demócrata (PSD): lost its registration after the 1982 elections; Leader Manuel Moreno Sánchez.

Unidad de Izquierda Comunista (UIC): f. 1973; supports Soviet Communism.

The following terrorist organization is active:

Los Tecos: based at the University of Guadalajara; extreme right-wing.

Yugoslavia: Prado Sur 225, Col. Lomas, México, DF; Ambassador: Redzai Suroi.

Judicial System

The principle of the separation of the judiciary from the legislative and executive powers is embodied in the 1917 constitution. The judicial system is divided into two areas: the federal, dealing with federal law, and the state, dealing only with state law within each state.

The federal judicial system has both ordinary and constitutional jurisdiction and judicial power is exercised by the Supreme Court of Justice, Circuit Courts (Tribunales de Circuito) and District Courts (Juzgados de Distrito). The Supreme Court comprises 21 numerary ministers and five supernumeraries and may meet in joint session or in its separate chambers: Penal Affairs, Administrative Affairs, Civil Affairs and Labour Affairs.

The Circuit Courts may be collegiate, when dealing with the derecho de amparo (protection of constitutional rights of an individual), or unitary, when dealing with appeal cases. The Collegiate Circuit Courts comprise three magistrates and there are 12 circuits with residence in the cities of Mexico, Toluca, Guadalajara, Monterrey, Hermosillo, Puebla, Veracruz, Torreón, San Luis Potosí, Villahermosa, Morelia and Mazatlán. The Unitary Circuit Courts comprise one magistrate and there are nine circuits with residence in the cities of Mexico, Toluca, Guadalajara, Monterrey, Hermosillo, Puebla, Mérida, Torreón and Mazatlán.

There are 68 District Courts.

SUPREME COURT

President: Jorge Iñarritu y Ramírez de Aguilar.

First Chamber—Penal Affairs

President: Minister Luis Fernández Doblado. Four other judges.

Second Chamber—Administrative Affairs

President: Minister Eduardo Langle Martínez. Four other judges.

Third Chamber—Civil Affairs

President: Minister J. Ramón Palacios Vargas. Two other judges.

Fourth Chamber—Labour Affairs

President: Minister David Franco Rodríguez. Four other judges.

Auxiliary Chamber

President: Minister Tarsicio Márquez Padilla. Four other judges.

Religion

CHRISTIANITY

The Roman Catholic Church

The prevailing religion is Roman Catholicism, but the Church, disestablished in 1857, is, under the Constitution of 1917, subject to State control. In 1976 there were over 51m. adherents to Roman Catholicism.

Archbishop of Acapulco: Rafael Bello Ruiz.

Archbishop of Antequera/Oaxaca: Bartolomé Carrasco.

Archbishop of Chihuahua: Adalberto Almeida Merino.

Finance

(cap. = capital; p.u. = paid up; dep. = deposits; m. = million; res = reserves; amounts in pesos unless otherwise stated)

BANKING

Mexico is closed to foreign banks. The one exception is Citibank, which established its resident branch in Mexico before a law, providing for representative offices only, was promulgated. All private banks were nationalized in September 1982. In August 1983 the Government authorized up to 34% of shares to be returned to the private sector. In a move to streamline the banking system, the Government merged 50 banks into 29 national credit institutions and eliminated 11 other banks. One bank, the Banco Obrero, is allowed to operate as a private bank.

Supervisory Authority

Comisión Nacional Bancaria y de Seguros (National Banking and Insurance Commission): República de El Salvador 47, 06080 México, DF; tel. 5214080; f. 1924; government commission controlling all financial and insurance institutions in Mexico; 6 mems; Pres. Alfredo A. Luengas Garibay.

Confederación Patronal de la República Mexicana (COPARMEX) (Employers' Federation): Liverpool 48, 6°, Apdo 6959, México 6, DF; tel. 5668800; f. 1929; national syndicate of free affiliated businessmen organized to promote economic development; studies questions concerning relations between employers and workers with a view to the adoption by employers of common policies; plays a formal part in the negotiation of wage and conditions of employment through the Minimum Salaries Wage Commission; Pres. Lic. Alfredo Sandóval González; Dir Lic. Gustavo Serrano Limón; 20,000 mems.

Consejo Coordinador Empresarial (CCE): Homero 527, 6°, Col. Chapultepec Morales, 11570 México, DF; tel. 2506977; telex 1772948; co-ordinating body of private sector; Pres. Jorge A. Chapa; Dir Francisco Calderón.

TRADE UNIONS

Congreso del Trabajo: Ricardo Flores Magón 44, Col. Guerrero, México 13, DF; f. 1966; part of PRI (government party); trade union congress which is made up of trades union federations, confederations, etc.; supervised establishment of welfare organization FONACOT; Pres. Napoleón Gómez Sada.

Confederación de Trabajadores de México—CTM (Confederation of Mexican Workers): Vallarta 8, México, DF; f. 1936; admitted to ICFTU; Sec.-Gen. Fidel Velázquez; 3.5m. mems.

Federación Obrera de Organizaciones Femeniles—FOOF (Workers' Federation of Women's Organizations): Vallarta 8, México, DF; f. 1950; a women workers' union within CTM; Sec.-Gen. Hilda Anderson Nevárez; 400,000 mems.

Confederación Obrera Mexicana (Confederation of Mexican Workers): República de Cuba 60, México, DF; f. 1918; Sec.-Gen. Agustín Pérez Caballero; 120,000 mems, 900 affiliated syndicates.

Confederación Revolucionaria de Obreros y Campesinos—CROC (Revolutionary Confederation of Mexican Workers and Farmers): San Juan de Letrán 80, 6°, México, DF; Pres. Alberto Juárez Blancas; Sec. Eleazar Ruiz Cerda; 120,000 mems in 22 state federations and 8 national unions.

Confederación Revolucionaria de Trabajadores—CRT (Revolutionary Confederation of Workers): Niño Perdido 16-3, México, DF; f. 1954; Sec.-Gen. Mario Suárez García; 10,000 mems; 10 federations and 192 syndicates.

Federación Nacional de Sindicatos Independientes (National Federation of Independent Trade Unions): Isaac Garza 311, Oriente, Monterrey, NL; f. 1936; Sec.-Gen. Isaac Treviño Frías; 1,760,000 mems; 960 unions.

Federación de Sindicatos de Trabajadores al Servicio del Estado—FSTSE (Federation of Unions of Government Workers): Antonio Caso 35, México 4, DF; f. 1938; Sec.-Gen. (vacant); 800,000 mems; 44 affiliated unions.

Unión General de Obreros y Campesinos de México—UGOCM (General Union of Workers and Farmers of Mexico): México, DF; f. 1949; admitted to WFTU/CSTAL; Sec.-Gen. Juan Rodríguez Gómez; 7,500 mems, over 2,500 syndicates.

A number of major unions are non-affiliated; they include:

Pacto de Unidad Sindical Solidaridad (PAUSS): comprises 10 independent trade unions.

Sindicato Industrial de Trabajadores Mineros, Metalúrgicos y Similares de la República Mexicana (Industrial Union of Mine, Metallurgical and Related Workers of the Republic of Mexico): Dr Vértiz 668, Col. Narvarte, México 12, DF; f. 1933; Sec.-Gen. Senator Napoleón Gómez Sada; 86,000 mems.

Sindicato Nacional de Trabajadores de la Educación (SNTE): México, DF; teachers' union.

Sindicato de Trabajadores Ferrocarrileros de la República Mexicana (Union of Railroad Workers of the Republic of Mexico): Calz. Nonoalco 206, México 3, DF; f. 1933; Sec.-Gen. Senator Faustino Alva Zavala; 100,000 mems.

Sindicato de Trabajadores Petroleros de la República Mexicana (STPRM) (Union of Petroleum Workers of the Republic of Mexico): close links with Pemex; Leader Joaquín Hernández Galicia; Sec.-Gen. Salvador Barragán Camacho; includes:

Movimiento Nacional Petrolero: reformist faction; Leader Hebraícaz Vásquez.

Sindicato Unico de Trabajadores Electricistas de la República Mexicana (Sole Union of Electricity Workers of the Republic of Mexico): México, DF; Sec.-Gen. Leonardo Rodríguez Alcaíne.

Sindicato Unico de Trabajadores de la Industria Nuclear (SUTIN): Leader Antonio Ponce.

Unión Obrera Independiente (UOI): non-aligned.

The major agricultural unions are:

Central Campesina Independiente: Dr E. González Martínez 101, México, DF; Leader Senator Alfonso Garzón.

Confederación Nacional de Campesinos: Mariano Azuela 121, México, DF; affiliated to Partido Socialista de los Trabajadores; Leader Víctor Cervera Pacheco.

Confederación Nacional Ganadera: Calzada Mariano Escobedo 714, México 5, DF; Pres. M. V. Z. Arcadio León Estrada; 300,000 mems.

Consejo Agrarista Mexicano: Calle Medellín 12, Col. Roma, México, DF; Sec.-Gen. Humberto Serrano.

Unión Nacional de Trabajadores Agriculturas (UNTA): connected with Partido Socialista de los Trabajadores.

Transport

Secretaría de Comunicaciones y Transportes: Avda Universidad y Xola, Cuerpo B, 2°, Col. Navarate, 03028 México, DF; tel. 5309203.

Cámara Nacional de Transportes y Comunicaciones: Turín 48, Col. Júarez, 06600 México, DF; tel. 5910088; national Chamber for transport and communications; Pres. Isidoro Rodríguez Ruiz; Man. Oscar Aguirre López.

STATE RAILWAYS

In 1984 there were 15,667 km of railways. The first phase of a 570-km electrification scheme, linking Mexico City with San Luis Potosí and Irapuato, is under construction.

Ferrocarriles Nacionales de México (National Railways of Mexico): Centro Administrativo, Avda Central 140, Buenavista, 06358 México, DF; tel. 5479060; telex 1773999; f. 1873; government-owned since 1937; 14,217 km open (1978); system extends from the US border at Ciudad Juárez (El Paso), Piedras Negras (Eagle Pass), Nuevo Laredo (Laredo), and Matamoros (Brownsville) to Guatemalan frontier; Gen. Dir Eduardo A. Cota.

In 1977 the following three companies were merged for administrative purposes, with Ferrocarriles Nacionales de México forming the controlling body:

Ferrocarril Chihuahua al Pacífico, SA de CV (Chihuahua–Pacific Railway): Méndez y 24a, Apdo 46, Chihuahua, Chih.; tel. 20752; 1,512 km open; Ojinaga (Chih.)–Topolobampo (Sin.) and Ciudad Juárez–La Junta (Chih.); Gen. Man. Alfredo Suárez Rábago.

Ferrocarril del Pacífico, SA de CV: Avda Tolsa 336, Guadalajara, Jal., Apdo 1-15-M; tel. 256664; f. 1909; 2,310 km open (1978); Nogales–Guadalajara, with branches in Sonora and Sinaloa, connects with Southern Pacific of the USA at Nogales, Naco and Agua Prieta, with the Sonora–Baja California Railway at San Blas, with the National Railways of Mexico at Guadalajara; Asst Gen. Man. Ing. Luis García Barrientos.

Ferrocarril Sonora–Baja California, SA de CV: Final Ulíses Irigoyen, Apdo 3182, Mexicali, Baja California; tel. 72102; 523 km open; first section opened 1940; Gen. Dir Eduardo A. Cota.

Sistema de Transporte Colectivo: Delicias 67, México 1, DF; tel. 5218620; telex 1774267; f. 1967; the first stage of a combined underground and surface railway system in Mexico City was opened in 1969; seven lines, covering 105 km, were operating in 1984, and 12 new lines, bringing the total distance to 444 km, are to be completed by the year 2010; the system is wholly state-owned and the fares are heavily subsidized; Dir Ing. Gerardo Ferrando Bravo.

ROADS

In 1984 there were 214,073 km of roads, of which 98,474 km were paved or in the process of being paved and of which 42,104 km were toll roads. It is estimated that there were 7.2m. motor vehicles on Mexican roads in 1982.

Long-distance buses form one of the principal methods of transport in Mexico, and there are some 600 lines operating services throughout the country.

Dirección General de Autotransporte Federal: Calz. de las Bombas No 411, 11°, Col. San Bartolo Coapa, 04800 México, DF; tel. 6840757; co-ordinates long distance bus services.

SHIPPING

In 1984 Mexico's merchant navy had a total gross registered tonnage of 3.24m. The Government operates the facilities of seaports.

Comisión Nacional Coordinadora de Puertos: Insurgentes Sur 617, 3°, Col. Nápoles, 03810 México, DF; tel. 6877207; telex 1160079; f. 1970; government agency to co-ordinate all maritime port operations; Exec. Dir Ing. Jaime Luna Traill.

Petróleos Mexicanos: Avda Marina Nacional 329, Edif. 1917, 2°, México 17, DF; tel. 5316053; telex 1773986; Transport Man. Ing. Enrique Vázquez Domínguez; 29 tankers, 29 seagoing and river tugs and 48 other small craft.

Transportación Marítima Mexicana, SA: Calle de la Cuspide 4761, Col. Parques del Pedregal, Del. Tlalpan, 14010 México, DF; tel. 6524111; telex 1771153; f. 1955; cargo services to Europe, the Mediterranean, Scandinavia, the USA, South and Central America, the Caribbean and the Far East; Pres. Francisco López Barredo; Man. Dir Alejandro Rojas.

Many foreign shipping lines call at Mexican ports.

CIVIL AVIATION

Aeroméxico: Paseo de la Reforma, 445-PH, Col. Cuauhtémoc, 06500 México, DF; tel. 5254299; telex 1772724; f. 1934 as Aeronaves de México, nationalized 1959; services between most principal cities of Mexico and the USA, Colombia, Panama, Bolivia, Peru, Venezuela, Federal Republic of Germany, France and Spain; Pres. Sigfrido Paz Paredes; fleet 3 DC-10-30, 2 DC-10-15, 5 DC-8-50, 4 MD-80, 8 DC-9-15, 17 DC-9-30.

Mexicana (Compañía Mexicana de Aviación, SA): Balderas 36, 6°, Apdo 901, 06050 México, DF; tel. 5853148; telex 1773865; f. 1921; operated as private company until July 1982, when the Government took a 58% stake; in 1981 its routes covered 79,991 km; international services between Mexico City and the USA, Central America and Caribbean; domestic services; Pres. Manuel Sosa de la Vega; Chair. Ing. Rodolfo Félix Valdéz; fleet: 38 Boeing 727-200, 5 DC-10-15.

Tourism

Secretaría de Turismo (Secretariat for Tourism): Avda Pdte Masaryk 172, 3°, 11587 México, DF; tel. 2508555; telex 1777566; Dir-Gen. Arturo Alcocer Lujambio.

Consejo Nacional de Turismo: Mariano Escobedo 726, 11590 México, DF; tel. 5330540; telex 1773606; Pres. Lic. Antonio Enríquez Savignac.

Fondo Nacional de Fomento al Turismo (FONATUR): México, DF; Dir-Gen. Lic. Mario Moya Palencia.

Atomic Energy

Instituto Nacional de Investigaciones Nucleares (ININ): Agricultura 21, Col. Escandón, Apdo 18-1027, 11800 México, DF; tel. 2715732; telex 1773637; f. 1979 to plan research and development of nuclear science and technology, as well as the peaceful uses of nuclear energy, for the social, scientific and technological development of the country; runs the Centro de Información y Documentación Nuclear, which also serves CNSNS; the US $10m. reactor which came into operation in 1967 is estimated to supply all Mexico's requirements for radio-active isotopes; Mexico's first nuclear power plant at Laguna Verde is due to begin operations in 1986 and another plant is planned for 1988; Dir-Gen. Rubén Bello Rivera.

Comisión Nacional de Seguridad Nuclear y Salvaguardias (CNSNS): Insurgentes Sur 1806, 01030 México, DF; f. 1979 to establish standards for the development of the nuclear industry and guarantee its safety; Dir-Gen. Ing. Roberto Treviño Arizpe.

MONGOLIA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Mongolian People's Republic is a land-locked country in central Asia, with the USSR to the north and the People's Republic of China to the south, east and west. The climate is dry, with generally mild summers but very cold winters. Temperatures in Ulan Bator are usually between −32°C (−26°F) and 22°C (71°F). The principal language is Khalkha Mongolian. Kazakh is spoken in the province of Bayan-ölgiy. There is no state religion but traces of Buddhist Lamaism and Shamanism still survive. The national flag (proportions 2 by 1) has three equal vertical stripes, of red, blue and red, with the 'soyombo' symbol (a combination of abstract devices) in gold, surmounted by a five-pointed gold star, on the red stripe at the hoist. The capital is Ulan Bator.

Recent History

The country was formerly the Chinese province of Outer Mongolia. In 1911, following the republican revolution in China, Mongolian nationalists declared the province's independence. With backing from Tsarist Russia, Outer Mongolia gained autonomy, as a feudal Buddhist monarchy, but accepted Chinese suzerainty in 1915. Following the Russian revolution of 1917, China began to re-establish control in Mongolia in 1919. Mongol leaders appealed to the new Soviet regime for help in 1920. In March 1921 Mongolian communists met in the USSR to found the Mongolian People's Party, called the Mongolian People's Revolutionary Party (MPRP) since 1924, and established a Provisional People's Government. After nationalist forces, with Soviet help, overthrew Chinese rule in the Mongolian capital, independence was proclaimed, and the monarchy restored, on 11 July 1921. The USSR recognized the People's Government in November.

In May 1924 the USSR acknowledged Chinese authority in Mongolia but in November, after the death of Bogd Haan (King) Javdzandamba Hutagt VIII, the Mongolian People's Republic (MPR) was proclaimed. Soviet troops left in 1925 but the MPR continued to be dependent on the USSR's support. The Government mounted campaigns to collectivize the economy and to destroy the power of the nobility and Buddhist priests. In 1932 an armed uprising was suppressed with Soviet help. Following a purge of the MPRP and army leadership in 1936–39, power was concentrated in the hands of Marshal Horloogiyn Choybalsan as Prime Minister and Party leader. In 1939 a Japanese invasion from Manchuria was repelled by Soviet and Mongolian forces at Halhyn-gol (Nomonhan). The resultant truce lasted until war was declared on Japan in August 1945, four days before the Japanese surrender, and northern China was invaded. A plebiscite in October 1945 voted 100% for independence, and this was recognized by China in January 1946.

Choybalsan died in January 1952 and was succeeded as Prime Minister by Yumjaagiyn Tsedenbal. Dashiyn Damba became First Secretary of the MPRP in April 1954. During the 1950s Mongolia, previously recognized only by other communist countries, established relations with non-aligned states. Tsedenbal replaced Damba as First Secretary of the MPRP in November 1958, and a new constitution was adopted in July 1960. Mongolia has not been recognized by the USA, which blocked its membership of the UN until October 1961.

For many years, Mongolia has depended on economic, military and political support from the USSR, and the Mongolian leadership loyally endorses Soviet policies. Relations with the People's Republic of China are poor. Mongolia accuses the Chinese Government of ill-treating the Mongol population in China and of wishing to expand its territory at Mongolia's expense. Several border incidents were reported in the early 1970s. In 1983 it was reported that 2,000 ethnic Chinese immigrants had been expelled from Mongolia, and there were signs that the Mongolian Government wished to eject almost the entire resident Chinese community (estimated at 7,000), despite protests from Beijing.

Jamsrangiyn Sambuu, Head of State since July 1954, died in May 1972. He was replaced in June 1974 by Tsedenbal, who retained the MPRP leadership but relinquished the post of Chairman of the Council of Ministers to Jambyn Batmönh. In August 1984 Tsedenbal was removed from the Party leadership and state presidency, apparently owing to ill health, and Batmönh replaced him as General Secretary of the MPRP. In December Batmönh also became Head of State, while Dumaagiyn Sodnom, hitherto a Vice-Chairman of the Council of Ministers and the Chairman of the State Planning Commission, was appointed Chairman of the Council of Ministers.

Government

Under the 1960 Constitution, the supreme organ of state power is the People's Great Hural (Assembly). The Tenth Assembly, elected in June 1981, had 370 deputies, elected (unopposed) by universal adult suffrage for five years. The Assembly usually meets only twice a year but elects a Presidium (a Chairman, two Vice-Chairmen, a Secretary and five other members) to be its permanent organ. The Chairman of the Presidium is Head of State. The highest executive body is the Council of Ministers, appointed by (and responsible to) the Assembly. In December 1983 the Assembly approved the establishment of a Presidium of the Council of Ministers.

Political power is held by the communist Mongolian People's Revolutionary Party (MPRP), the only legal party. For elections to representative bodies, a single list of candidates is presented jointly by the MPRP and the 'non-party bloc'. The MPRP's highest authority is the Party Congress, which elects the Central Committee (91 full members and 71 candidate members were elected in 1981) to supervise Party work. The Committee elects a Political Bureau (eight full members and two candidate members at the end of 1984) to direct its policy, and a Secretariat (seven members, including the General Secretary).

For local administration, Mongolia is divided into 18 provinces and three municipalities.

Defence

In July 1984, according to Western estimates, defence forces comprised an army of 25,000 men, about 100 air force personnel and some Soviet technical advisers. Military service is for three years. Weapons, ammunition and vehicles are supplied by the USSR. Estimated defence expenditure for 1984 was 763.8m. tögrög, about 14% of total budgetary expenditure.

Economic Affairs

Animal herding is the main economic activity and is practised throughout the country. About 24.4m. horses, cattle, sheep, goats and camels were kept in 1984. The herdsmen are organized in collectives, of which there were 255 in 1984. State farms, of which there were 51 in 1984, practise agriculture on a large scale. The principal crops are cereals, potatoes and vegetables. There are 14 fodder farms. Between 1970 and 1980 the contribution of agriculture and forestry to Mongolia's net material product (NMP) declined from 25.3% to 15.4%.

Industrial activity, which provided 29.3% of NMP in 1980, is mainly devoted to the processing of food and livestock products such as hides and wool, textile manufacturing and light engineering. In 1984 industry was reported to account for 46% of Mongolia's gross output (excluding non-material services) and for one-third of NMP. The industrial co-operatives, nationalized in 1972, have formed the basis of the new Ministry of Communal Economy and Services. The country's industrialization has been greatly assisted by foreign aid from other CMEA member countries, particularly the USSR. The major industrial centres are at Ulan Bator (which accounts for more than 50% of gross industrial production), Darhan and Choy-

balsan, near supplies of coal. Other important minerals include fluorspar (for the Soviet iron and steel industry), tungsten, tin, gold and lead. Large-scale copper mining and concentrating began in 1978 at Erdenet, 330 km north-west of Ulan Bator, where a combined copper-molybdenum works reached full capacity in 1983. Other new developing industrial towns include Baga nuur (coal) and Bor-öndör (fluorspar).

The deterioration of relations between Mongolia and the People's Republic of China led to the loss of Chinese labour and consumer goods, and of income from freight traffic between China and the USSR. There have been frequent complaints of inefficiency and poor workmanship in industry. As in the USSR, a new management system is being introduced, involving greater flexibility in planning and the use of economic incentives.

In 1983 about 80% of Mongolia's trade was with the USSR, and over 18% with other members of the CMEA (see p. 128). Most of the remainder was with China, Viet-Nam and other communist countries. In 1983 Mongolian-Soviet trade (exports plus imports) was worth 1,344.3m. roubles. In the period 1980–83, Mongolia had a total deficit of 2,254.6m. roubles in its trade with the USSR.

In the Sixth Five-Year Plan period (1976–80), Mongolia's net material product increased by 30.9% (Plan 37–41%), gross industrial production by 58% (Plan 60–65%), average annual gross agricultural production by 6.3% (Plan 26–30%) and the volume of foreign trade by 50% (Plan 40–45%). The draft percentage increases for the Seventh Five-Year Plan period (1981–85) were, respectively, 38–41, 52–58, 22–26 and 50–55. It was reported that Mongolia's gross industrial production in 1983 had increased by an estimated 8.1% over 1982 (compared with a planned increase of 10.3%). In 1984 the volume of gross industrial production was planned to rise by 7.8%.

Transport and Communications

In 1983 the Mongolian railway system had 1,710 km of track in use. There are more than 1,500 km of surfaced roads but much traffic is cross-country by motor vehicle and along the caravan routes. Steamer services operate on Lake Hövsgöl and on the Selenge and Orhon rivers. The length of navigable inland waterways totals 397 km. Air transport operates to Irkutsk and Moscow, in the USSR, and throughout the country (38,100 km of routes). Construction of a new air terminal is under way in Ulan Bator, and a new airport is planned at Buyant-Uhaa.

Social Welfare

In 1983 there were 112 hospitals, with 15,300 beds and 4,234 physicians, with ratios of 109.3 hospital beds and 23.3 doctors per 10,000 of the population (in Ulan Bator the ratios were 145 and 44 respectively). There are also a number of clinics and medical stations.

Education

Elementary education is compulsory. The curriculum varies between four, seven and 10 years. Primary education begins at eight years of age and lasts for three years. Secondary education, beginning at the age of 11, lasts for up to seven years. In 1979 the estimated enrolment at primary schools was 98% of the relevant age-group, while secondary enrolment was 84%. In 1983/84 enrolment in general schools was 397,400. There is one university, as well as seven other institutions of higher education, 25 special secondary schools and 37 technical schools, with a total enrolment of 71,000.

Tourism

A foreign tourist service bureau, managed by the Ministry of Foreign Trade, was established in 1960, but tourism is not very developed. Mongolia had 170,000 foreign visitors in 1983. There are two hotels for foreign tourists in Ulan Bator. The country's main attractions are its scenery, wildlife and historical relics.

Public Holidays

1985: 1 May (Labour Day), 11 July (National Day), 7 November (USSR's October Revolution).

1986: 1 January (New Year), 8 March (International Women's Day).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 möngö = 1 tögrög (tughrik).

Exchange rates (31 December 1984):
£1 sterling = 4.393 tögrög;
US $1 = 3.790 tögrög.

Statistical Survey

Revised by A. J. K. Sanders.

Area and Population

AREA, POPULATION AND DENSITY

Area (sq km)	1,565,000*
Population (census results)	
10 January 1969	1,197,600

Directory

The Constitution

A new constitution was adopted on 6 July 1960. The following is a summary of its main provisions:

The Mongolian People's Republic is a sovereign democratic state of working people. All land, natural resources, factories, transport and banking organizations are state property. In addition to state ownership the people have co-operative ownership of public enterprises, especially in livestock herding. A limited degree of private ownership is also permitted.

The supreme state power is the People's Great Hural (Assembly), which was formerly elected every four years by universal, direct and secret suffrage of all citizens over the age of 18. The term was extended to five years after the June 1981 elections. It has the power to amend the Constitution (by a two-thirds majority), to adopt laws, to formulate the basic principles of policy and to approve the budget and economic plans. Its Presidium consists of a Chairman (who is Head of State), two Vice-Chairmen, a Secretary and five members. The functions of the Presidium are to interpret legislation and issue decrees, ratify treaties and appoint or dismiss (with the approval of the People's Great Hural) the members of the Council of Ministers.

The Council of Ministers is the highest executive power and consists of the Chairman, First Vice-Chairmen, Vice-Chairmen, Ministers and Chairmen of State Commissions.

Local government is exercised by Hurals and their executive committees at Aymag (province) and Somon (county) levels.

The Government

HEAD OF STATE

Chairman of the Presidium of the People's Great Hural: Jambyn Batmönh (elected 12 December 1984).

COUNCIL OF MINISTERS

(February 1985)

Chairman: Dumaagiyn Sodnom.

First Deputy Chairman: Tümenbayaryn Ragchaa.

Vice-Chairmen:

Chairman, State Planning Commission Puntsagiyn Jasray.

Chairman, Commission for CMEA Affairs Myatavyn Peljee.

Chairman, State Committee for Construction Architecture and Technical Control Sonomyn Luvsangombo.

Dondogiyn Tsevegmid.

Choynoryn Süren.

Minister of Agriculture: Sürenhoriyn Sodnomdorj.

Minister of Fuel and Power Industry: Sodovyn Bathuyag.

Minister of Geology and Mining Industry: Uthany Mavlyet.

Minister of Light and Food Industries: Gombojavyn Naydan.

Minister of Construction and Building Materials Industry: Lhamyn Tserendondog.

Minister of Forestry and Woodworking Industry: Damdingiyn Tseden.

Minister of Transport: Dogoyn Yondonsüren.

Minister of Water Supply: Bavuudorjiyn Bars.

Minister of Communications: Irvüüdziyn Norovjav.

Minister of Trade and Procurement: Badarchiyn Sharavsambuu.

Minister of Foreign Trade: Jamsrangiyn Dulmaa.

Minister of Finance: Demchigjavyn Molomjamts.

Minister of Foreign Affairs: Mangalyn Dügersüren.

Minister of Defence: Col-Gen. Jamsrangiyn Yondon.

Minister of Public Security: Lt-Gen. Agvaanjantsangiyn Jamsranjav.

Minister of Education: Chimidiyn Sereeter.

Minister of Health: Dar'sürengiyn Nyam-osor.

Minister of Communal Economy and Services: Tümengiyn Demchigdorj.

Minister of Justice: Origiyn Jambaldorj.

Minister of Culture: Budyn Sum'yaa.

Head, Central Statistical Directorate: Damiranjavyn Dzagasbaldan.

Chairman of Board of State Bank: Gochoogiyn Hüderchuluun.

President, Academy of Sciences: Choydogiyn Tseren.

Chairman, State Committee for Physical Culture and Sport: Davaagiyn Dashdovdon.

Chairman, State Committee for Labour and Social Security: Ravjaagiyn Dagvadorj.

Chairman, State Committee for Information, Radio and Television: Lhagvajavyn Dzantav.

Chairman, State Committee for Prices and Standards: Erdeniyn Byambajav.

Director of Administration, Council of Ministers: Baldangiyn Badarch.

Chairman, State Committee for Material and Technical Supply: Byambyn Rinchinpeljee.

Chairman, State Committee for Foreign Economic Relations (Minister): Punsalmaagiyn Ochirbat.

First Deputy Chairman, State Planning Commission (Minister): Tomoriyn Namjim.

Chairman, People's Control Committee: Chuvaandorjiyn Molom.

First Deputy Chairman, People's Control Committee (Minister): Öldziyhutagiyn Ganhuyag.

MINISTRIES

All Ministries are in Ulan Bator.

Ministry of Foreign Affairs: tel. 21870.

Legislature

PEOPLE'S GREAT HURAL

At the June 1981 elections, 370 deputies were elected to serve a five-year term. Every deputy was elected unopposed.

Presidium

Chairman: Jambyn Batmönh.

Deputy Chairman: Nyamyn Jagvaral.

Secretary: Tsedendambyn Gotov.

Members: Tserendashiyn Namsray, Bat-ochiryn Luvsantseren, Lodongiyn Tüdev, Bandzragchiyn Lamjav, Luvsanchültemiyn Pagmadulam.

Chairman of the People's Great Hural: Bat-ochiryn Altangerel.

Chairman of the Executive Committee of the Parliamentary Group: Nyamyn Luvsanchültem.

Political Organization

Mongolian People's Revolutionary Party (MPRP): Ulan Bator; f. 1921; 76,240 mems (1981).

Central Committee

At the 18th MPRP Congress, in May 1981, 91 members and 71 candidate members were elected to the Central Committee.

General Secretary: Jambyn Batmönh.

Secretaries of the Central Committee:

Tserenpiliyn Balhaajav
Damdiny Gombojav
Paavangiyn Damdin
Demchigiyn Molomjamts
Mangaljavyn Dash
Tserendashiyn Namsray

Political Bureau

Members:

Bat-ochiryn Altangerel
Demchigiyn Molomjamts
Jambyn Batmönh
Tserendashiyn Namsray
Bugyn Dejid
Tümenbayaryn Ragchaa
Damdiny Gombojav
Dumaagiyn Sodnom

Candidate Members: Nyamyn Jagvaral, Sonomyn Luvsangombo.

Other MPRP Officials

Chairman of the MPRP Control Committee: Bugyn Dejid.

First Secretary, Mongolian Revolutionary Youth League: Tserendorjiyn Narangerel. The League has over 200,000 mems.

Director of the Higher Party School: Gombyn Miyeegombo.

Director of the Institute of Social Sciences: Badamtaryn Baldoo.

Diplomatic Representation

EMBASSIES IN MONGOLIA

Afghanistan: Ulan Bator; Ambassador: Assadullah Sarwari.

Bulgaria: Ulan Bator; Ambassador: Kristyn Yevtimov.

China, People's Republic: Ulan Bator; Ambassador: Li Juqing.

Cuba: Ulan Bator; tel. 27008; Ambassador: R. Fernández Sardiñas.

Czechoslovakia: Ulan Bator; Ambassador: Valentin Ruzič.

German Democratic Republic: Ulan Bator; Ambassador: Heinz Bauer.

Hungary: Ulan Bator; tel. 27323; Ambassador: László Kádár.

India: Ulan Bator; tel. 53122; Ambassador: M. L. Trivedi.

Japan: Ulan Bator; Ambassador: Yusuhiko Ota.

Kampuchea: Ulan Bator; Ambassador: Hao Nam Hong.

Korea, Democratic People's Republic: Ulan Bator; Ambassador: Pak Si-Kwon.

Poland: Ulan Bator; Ambassador: Józef Urbanowicz.

Romania: Ulan Bator; Ambassador: Gheorghe Manta.

USSR: Ulan Bator; Ambassador: Sergey Pavlov.

United Kingdom: 30 Enh Tayvny Gudamj (GPO Box 703), Ulan Bator; tel. 51033; Ambassador: Allan Butler.

Viet-Nam: Ulan Bator; Ambassador: Tran Chung.

Yugoslavia: Ulan Bator; Ambassador: Radovan Smiljanić.

Judicial System

Justice is administered by the Supreme Court, the City Court of Ulan Bator, 18 Aymag (provincial) courts and local Somon (county) courts. The Chairman and members of the Supreme Court are elected by the People's Great Hural for a term of five years; other judges are elected by local Hurals for terms of three years. The Procurator of the Republic is also appointed by the People's Great Hural for a term of five years.

Chairman of the Supreme Court: Byaraagiyn Chimid.

Procurator of the Republic: Sonombaljiryn Büdragchaa.

FOREIGN LANGUAGE PUBLICATIONS

Foreign Trade of Mongolia: Nayramdlyn Gudamj 24, Ulan Bator; annual; publ. by the Ministry of Foreign Trade; English and Russian; Editor-in-Chief N. BAVUU.

Menggu Xiaozibao (News of Mongolia): Ulan Bator; Chinese; weekly; Editor-in-Chief TUMUR.

Mongolia: Ulan Bator; publ. by State Cttee for Information, Radio and Television; English; 6 a year; Editor-in-Chief SH. NEMEHBAYAR.

Mongoliya (Mongolia): Ulan Bator; publ. by State Cttee for Information, Radio and Television; Russian; monthly; Editor-in-Chief L. LHAGVADULAM.

News from Mongolia: Sühbaataryn Talbay 9, Ulan Bator; information bulletin publ. weekly by Montsame's foreign service; also French edn.

Novosti Mongolii (News of Mongolia): Sühbaataryn Talbay 15, Ulan Bator; f. 1942; Russian; publ. by Montsame; 2 a week.

NEWS AGENCIES

Montsame (Mongol Tsahilgaan Medeeniy Agentlag) (Mongolian Telegraph Agency): Sühbaataryn Talbay 9, Ulan Bator; tel. 23801; f. 1957; state-owned; Gen. Dir LHAGVAJAVYN DZANTAV.

Foreign Bureaux

Agentstvo Pechati Novosti (APN) (USSR): Ulan Bator; Bureau Chief G. G. KHARCHENKO.

Allgemeiner Deutscher Nachrichtendienst (ADN) (German Democratic Republic): POB 709, Ulan Bator; Correspondent ANDRÉ GROSS.

Telegrafnoye Agentstvo Sovietskogo Soyuza (TASS) (USSR): October 4, Rm 323, Ulan Bator; Correspondent ALEXANDER DENISOVICH.

Publishers

Government Publishing House

State Publishing Committee: Ulan Bator; f. 1921; in overall charge of all publishing; Editor-in-Chief T. SODNOMDARJAA.

There are also publishing houses in each province, and other publishing organs in Ulan Bator.

Radio and Television

There were 169,700 loudspeakers, 186,600 radio sets and 70,700 television sets in 1983. A 1,900-km radio relay line from Ulan Bator to Altay and Ölgiy also provides direct-dialling telephone links as well as television services for western Mongolia. A new radio relay line is under construction from Ulan Bator to Choybalsan.

RADIO

Ulan Bator Radio: State Committee for Information, Radio and Television, POB 365, Ulan Bator; tel. 23801; programmes in Mongolian (two), Russian, Chinese, English, French and Kazakh; Chair. of the State Cttee Lhagvajavyn Dzantav; Head of Foreign Relations Dept B. Dagva.

TELEVISION

Mongoltelevidz: Ulan Bator; f. 1967; daily transmissions, comprising locally-originated material and/or relays of Soviet programmes via the Molniya satellite and the Orbita ground station; Soviet television is received in 100 settlements via the Ekran satellite system; Dir of Television M. Choyjil.

Finance

BANKING

Central Bank

State Bank of the Mongolian People's Republic: Oktyabriyn Gudamj 6, Ulan Bator; f. 1924; 65 brs; Chair. of Board Gochoogiyn Hüderchuluun.

INSURANCE

Mongol Daatgal (State Directorate for Insurance of the Ministry of Finance): Ulan Bator; national insurance and reinsurance enterprise; Head Ts. Tsend.

Trade and Industry

All trade and industry is vested in the state, either through co-operatives or direct state ownership.

Ministry of Trade and Procurement: Ulan Bator; Minister Badarchiyn Sharavsambuu.

CO-OPERATIVES

Industrial co-operatives have been absorbed into the state industrial structure. Industrial production associations are gradually being established under various ministries; they are not co-operatives but groupings of allied enterprises (flour milling, leather processing, etc.).

Federation of Agricultural Production Associations (Co-operatives): Ulan Bator; body administering the 255 agricultural co-operatives throughout the country; Chair. of Council: Minister of Agriculture (ex officio); Sec. D. Rinchinsangi.

FOREIGN TRADE

The Mongolian People's Republic has trading relations with over 20 countries. The Ministry of Foreign Trade is responsible for the foreign trade monopoly and controls the operations of several importing and exporting companies. There are seven specialized import and export organizations dealing in trade with foreign countries:

Chamber of Commerce of the Mongolian People's Republic: Nayramdlyn Gudamj 24, Ulan Bator; f. 1960; responsible for establishing economic and trading relations, contacts between trade and industrial organizations both at home and abroad and for assisting foreign countries; organizes commodity inspection, press information and international exhbns and fairs at home and abroad; Pres. Ö. Dorj; Gen. Sec. S. Tömör.

Avtonefteimport: Ministry of Foreign Trade, Ulan Bator; import of motor vehicles, fuels and lubricants.

Kompleksimport: Ulan Bator; imports sets of equipment for the mining industry and power stations, and production lines for light and food industry enterprises; Dir D. Sanchin.

Mongoleksport: Ulan Bator; export of Mongolian goods.

Mongolilgeemj: Ulan Bator; foreign parcel trade.

Mongolnom: Ulan Bator; tel. 21512; export of Mongolian publications.

Mongolraznoimport: Ministry of Foreign Trade, Ulan Bator; tel. 715639; import of consumer goods, postage stamps and medicines, export of postage stamps.

Mongoltekhnoimport: Nayramdlyn Gudamj 24, Ulan Bator; import of industrial machinery and equipment, raw materials, chemicals and dyestuffs, other than motor vehicles, agricultural machinery, fuels and lubricants.

TRADE UNIONS

Central Council of Mongolian Trade Unions: Ulan Bator; brs throughout the country; Chair. Bat-Ochiryn Luvsantseren; Head of Foreign Dept Dz. Dejee; 425,000 mems (1982); affiliated to WFTU.

Transport

RAILWAYS

In 1984 Mongolia's railways accounted for more than 70% of total freight turnover.

Ulan Bator Railway: Ulan Bator; Dir S. I. Solovyev; Dep. Dir N. Tserennorov.

External Lines: from the USSR frontier at Naushki/Sühbaatar (connecting with the Trans-Siberian Railway) to Ulan Bator on to the Chinese frontier at Dzamyn-üüd/Erhlien and connecting with Beijing (total length 1,115 km).

Branches: from Darhan to Sharyn Gol coalfield (length 68 km); branch from Salhit near Darhan westwards to Erdenet (Erdenetiyn-ovoo open-cast copper mine) in Bulgan Province (length c. 170 km); from Maan't to Baga nuur coal-mine south-east of Ulan Bator (c. 120 km); from Har-ayrag to Bor-öndör fluorspar mines (100 km).

Eastern Railway: Choybalsan; from the USSR frontier at Borzya/Ereentsav to Choybalsan (length 237 km).

ROADS

Main roads link Ulan Bator with the Chinese frontier at Dzamyn üüd/Erhlien and with the Soviet frontier at Altanbulag/Kyakhta. A road from Chita in the USSR crosses the frontier in the east at Mangut/Onon (Öldziy) and branches for Choybalsan and Öndörhaan. In the west and north-west, roads from Biysk and Irkutsk in the USSR go to Tsagaannuur, Bayan-ölgiy Aymag, and Hanh, on Lake Hövsgöl, respectively. The total length of these and other main roads is about 8,600 km. The length of asphalted roads now approaches 900 km, almost entirely in towns. The first section of a hard-surfaced road between Ulan Bator and Bayanhongor was completed in 1975. The road from Darhan to Erdenet is also to be surfaced. Inter- and intra-provincial traffic goes across country in most cases.

There are bus services in Ulan Bator and other large towns, and lorry services throughout the country on the basis of motor transport depots, mostly situated in provincial centres.

INLAND WATERWAYS

Water transport plies Lake Hövsgöl and the River Selenge (397 km navigable) in the northern part of the country. Tugs and barges on Lake Hövsgöl transport goods brought in by road to Hanh from the USSR to Hatgal on the southern shore.

CIVIL AVIATION

Mongolian Civil Air Transport (MIAT): Ulan Bator; tel. 20221; f. 1956; internal services to most provincial centres and many county centres; service from Ulan Bator (Buyant-Uhaa) to Irkutsk; total route length 38,000 km; fleet of 20 An-24, 3 Il-14, and also several An-2, Mil-4 and Yak-12; Dir of Civil Aviation Lhagvasürengiyn Lhagvaa.

Tourism

There were 170,000 foreign tourists in 1983.

Juulchin: Ulan Bator; tel. 22884; telex 232; f. 1960; the official foreign tourist service bureau, managed by the Ministry for Foreign Trade; Dir B. Delgersüren.

MOROCCO

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Morocco is situated in the extreme north-west of Africa. It has a long coastline on the shores of the Atlantic Ocean and, east of the Strait of Gibraltar, on the Mediterranean Sea, facing southern Spain. Morocco's eastern frontier is with Algeria, while to the south lies the disputed territory of Western Sahara (under Moroccan occupation), which has a lengthy Atlantic coastline and borders Mauritania to the east and south. Morocco's climate is semi-tropical. It is warm and sunny on the coast, while the plains of the interior are intensely hot in summer. Average temperatures are 27°C (81°F) in summer and 7°C (45°F) in winter for Rabat, and 38°C (101°F) and 4°C (40°F) respectively for Marrakesh. The rainy season in the north is from November to April. The official language is Arabic, but a large minority speak Berber. Spanish is widely spoken in the northern regions, and French in the rest of Morocco. The established religion is Islam, and most of the country's inhabitants are Muslims. There are Christian and Jewish minorities. The national flag (proportions 3 by 2) is red, with a green pentagram (intersecting lines in the form of a five-pointed star), known as 'Solomon's Seal', in the centre. The capital is Rabat.

Recent History

Except for the disputed former Spanish Sahara (see below), Morocco was divided in 1912 into a French protectorate and a smaller Spanish protectorate in the north. Tangier became an international zone in 1923. The French protectorate became the independent Sultanate of Morocco on 2 March 1956. The new nation's first Head of State was Sultan Mohammed V, who had reigned since 1927, except when removed from office by the French authorities in 1953–55. The Spanish protectorate joined independent Morocco in April 1956, and the Tangier zone was abolished in October. The Sultan was restyled King of Morocco in August 1957. The northern strip of Spanish Sahara was ceded to Morocco in April 1958. King Mohammed V took charge as Prime Minister in May 1960 but died in February 1961 and was succeeded by his son, Moulay Hassan, who had been Crown Prince since 1957 and Vice-Premier since 1960. The new King took the title of Hassan II.

During the turbulent reign of Hassan, Morocco has had a succession of Prime Ministers, but the King (who has sometimes held the premiership himself) remains the central figure in the country's political life. King Hassan holds extensive executive powers and has maintained his personal rule despite attempts to depose or assassinate him.

For the first 13 years of his reign, King Hassan's position was unstable. Successive constitutions attempted to establish royal power while satisfying demands for greater political freedom. In June 1961 Hassan formed a coalition of all major political parties except the left-wing Union Nationale des Forces Populaires (UNFP). A new Constitution, providing for a bicameral legislature, was promulgated in December 1962. A general election for Morocco's first House of Representatives took place in May 1963, and the King relinquished the post of Prime Minister in November. Dissatisfaction with economic conditions led to riots by students and workers in Casablanca in March 1965. After attempts to form an all-party Cabinet failed, King Hassan declared a 'state of exception' in June, when he assumed full legislative and executive powers. He relinquished the premiership in June 1967, but the emergency provisions remained in force until July 1970, when another Constitution was approved. The Constitution provided for a strengthening of royal powers and a partial resumption of parliamentary government. Despite the opposition of political parties and trade unions, a general election in August 1970 resulted in a pro-government majority in the new Chamber of Representatives. Meanwhile, the Spanish enclave of Ifni was ceded to Morocco in June 1969.

An abortive military rebellion took place in July 1971, when a force of army cadets attacked the royal palace while King Hassan was there, celebrating his birthday. This attempted coup, crushed by forces loyal to the King, was reportedly supported by Col Gaddafi of Libya and by senior Moroccan military officers, including the commander of the Royal Household. Many people were subsequently arrested, including numerous members of the UNFP, of whom five were sentenced to death in September 1971.

A revised Constitution, approved by a national referendum in March 1972, provided for a unicameral legislature: two-thirds of the seats in the Chamber of Representatives would be filled by direct election, while the remaining one-third of the members would be indirectly elected by local government councils, professional bodies and labour organizations. However, no date was set for the elections. A further attempt to assassinate King Hassan was made in August 1972, when air force personnel tried to shoot down the royal aircraft as it returned from Paris. The plot involved Gen. Mohammed Oufkir, the Minister of Defence, who was reputed to be a loyal supporter of the King. When the coup failed, Gen. Oufkir committed suicide, and King Hassan took personal control of the army.

These attempted revolts dramatically illustrated King Hassan's failure to secure general support for his leadership. Later in the 1970s, however, the King focused attention on an issue which united political opinion in the country: the continuing occupation by Spain of areas which were considered to be historically parts of Moroccan territory. At that time, those areas comprised Spanish Sahara (apart from the strip which was ceded to Morocco in 1958) and Spanish North Africa (q.v.), comprising a number of small enclaves on Morocco's Mediterranean coast.

A campaign to annex Spanish Sahara, initiated in July 1974, received active support from all shades of political opinion in Morocco, including opposition parties. Both the International Court of Justice and the UN Committee on Colonialism favoured self-determination for the territory. In November 1975 Hassan ordered a 'Green March' by more than 300,000 unarmed Moroccan volunteers to occupy the territory. The marchers barely crossed the border before they were stopped, but on 14 November Spain agreed to cede the territory to Morocco and Mauritania, to be apportioned between them. Spain formally relinquished control of Spanish Sahara on 28 February 1976. Moroccan troops moved into the territory to confront a guerrilla uprising led by the Frente Popular para la Liberación de Sakiet el Hamra y Río de Oro (the Polisario Front), a national liberation movement, supported by Algeria and (later) Libya, which seeks independence for Western (formerly Spanish) Sahara and which formed the government-in-exile of the 'Sahrawi Arab Democratic Republic' (SADR) in Algeria in March 1976. Morocco broke off diplomatic relations with Algeria, but the possibility of full-scale war receded, since Algeria limited itself to providing support and refuge for guerrilla forces of the Polisario Front. In April Morocco and Mauritania agreed on a division of Western Sahara. The Moroccan sector, which included large deposits of phosphates, was annexed as three new provinces centred on El Aaiún, Essmara (formerly Samara) and Boujdour (Bojador). The Mauritanian sector was named Tiris el-Gharbia.

Meanwhile, after numerous delays, elections to communal and municipal councils were held in November 1976, followed by elections to provincial and prefectural assemblies in January 1977. Finally, in June 1977, a new Chamber of Representatives was elected, marking a return to parliamentary democracy after 12 years of direct rule. Supporters of King Hassan's policies won a majority of seats in the Chamber, and a Government of National Unity was formed, including representatives of the two strongest political parties, Istiqlal and the Mouvement Populaire, in addition to the pro-monarchist Independents.

Guerrilla warfare in Western Sahara continued sporadically from 1976 onwards. Moroccan troops were able to inflict heavy

casualties and to ensure the security of the major towns but, even with French military aid, they could not prevent constant infiltration, harassment and sabotage by Polisario forces, especially attacks on the important conveyor belt linking the Bou Craa phosphate mines with the coast. King Hassan rejected OAU proposals in 1978 for a referendum in the region, leading to some form of federal rule or even complete independence for the Moroccan-held portion of Western Sahara. Within Morocco, the almost universal approval of King Hassan's attitude meant that any concessions on his part would endanger his popularity, even though increased expenditure on defence, necessary to maintain Morocco's control of its Saharan provinces, was seriously affecting the economy.

In August 1979 Mauritania finally renounced its claim to Saharan territory and signed a peace treaty with the Polisario Front. King Hassan immediately announced Morocco's annexation of the former Mauritanian share of Western Sahara, designating it a Moroccan province (renamed Oued Eddahab) and arranging for it to send three deputies to the Chamber of Representatives. Polisario forces retaliated by stepping up raids into Morocco itself. In response to what was apparently seen as a threat to the stability of a moderate pro-Western regime, the USA agreed to increase its supply of arms to Morocco. However, the inconclusive fighting continued. In July 1980 the SADR applied to join the OAU as a sovereign state: although a majority of members (26 out of 50) recognized the Polisario Front as the rightful government of Western Sahara, Morocco insisted that a two-thirds majority was needed to confer membership. A working committee was set up, and in September proposed a peace plan, to include a cease-fire supervised by a UN peace-keeping force, and a referendum in the territory, organized by the OAU and the UN. While Morocco agreed in principle to these proposals, it refused to negotiate directly with Polisario or to withdraw its troops from the disputed territory. In October 1981 heavy fighting resumed, with Morocco claiming that Mauritania was actively supporting Polisario. No progress was made on setting a date for a cease-fire or for a referendum. Military aid from the USA increased considerably after Morocco agreed in 1982 to grant that country access to Moroccan air force bases.

A crisis was precipitated at a meeting of the OAU Council of Ministers in February 1982, when the SADR delegation was seated, after 26 states voted in favour. The Moroccan delegation left the meeting in protest, followed by the representatives of 18 other countries. It was feared that the future of the OAU was in jeopardy, as subsequent meetings, including a planned conference of heads of state in Libya in August, had to be abandoned because no quorum could be reached. Polisario announced that it would not attend the rescheduled OAU summit meeting in November, thus enabling the conference to take place, but the meeting broke up over the Chad issue.

In June 1983 an OAU summit conference, held in Addis Ababa, passed a resolution on the conflict in Western Sahara. The resolution called for an immediate cease-fire, for direct negotiations to be held between Morocco and Polisario, and for a referendum on the issue of self-determination to be held in Western Sahara before the end of the year. Morocco still refused to hold talks with Polisario, but agreed in principle to the idea of a referendum, although King Hassan stated that he would not necessarily consider Morocco to be bound by its result. However, Morocco and Polisario still disputed who should be allowed to vote in the proposed referendum: Morocco favoured the use of voting lists based on the 1974 Spanish census, while Polisario insisted that Sahrawi refugees in neighbouring countries should also be included. The referendum was due to be held in December 1983, but by February 1985 it had still not taken place.

Within Morocco itself, drastic rises in the prices of staple foods had sparked off strikes and rioting in June 1981, and several trade union and political leaders were arrested for opposing government policy. Further protests were made in October, when the term of office of the Chamber of Representatives was extended from four to six years, in accordance with a constitutional amendment which had been approved by referendum in May 1980. All 14 deputies belonging to the Union Socialiste des Forces Populaires (USFP) withdrew from the Chamber. In a Cabinet reshuffle in November, all members of the Rassemblement National des Indépendants lost their portfolios. The offices of the Confédération Démocratique du Travail (CDT) and of the USFP were allowed to reopen in April 1982, but the leader of the CDT remained in prison and the ban on USFP newspapers was not lifted.

Municipal elections in June 1983 were won by pro-government centre-right parties, who took 58% of the seats. Elections to the Chamber of Representatives were due to take place in September 1983, but were postponed until after the proposed referendum on Western Sahara. The existing Cabinet reached the end of its six-year mandate in November and was replaced, until the general election, by a caretaker 'Government of National Unity', formed by King Hassan. The new Cabinet was headed by Mohamed Karim Lamrani, an administrator chosen for his lack of party affiliation (who had also been Prime Minister in 1971–72), and included representatives of the six most important political parties. It was to be responsible for organizing the general election and for drawing up an economic programme for 1984.

In January 1984 rumours of imminent increases in food prices and education fees triggered serious street riots in several northern towns. Troops were called in to quell the disturbances and, on several occasions, opened fire on demonstrators. Unofficial estimates put the number of people killed in the riots as high as 110. The rioting subsided after King Hassan announced the suspension of the planned price increases.

On 15 August 1984 King Hassan and Col Gaddafi of Libya signed the Arab-African Federation Treaty, establishing a 'union of states' as the first step towards a Maghreb union. The treaty provided for close economic and political co-operation between Morocco and Libya, and for mutual defence in the event of attack. The treaty was to take effect only after being approved by the peoples of each country. A referendum was therefore held in Morocco on 31 August, and the treaty was approved by 99.97% of voters. Libya's General People's Congress backed the agreement unanimously. With the alliance of Algeria, Tunisia and Mauritania through the Maghreb Fraternity and Co-operation Treaty and Mauritania's recognition of the SADR in July 1984, Morocco had found itself isolated in the Maghreb. By signing the treaty on union with Libya, Morocco not only provided itself with an ally, but also persuaded Col Gaddafi to cut off Libyan aid to the Polisario Front. Polisario responded in October by launching the 'Greater Maghreb Offensive', a major military effort involving widespread fighting in southern Morocco. At the same time, Mohammed Abdelaziz, President of the SADR, undertook an extensive African tour to gather support prior to the November summit of the OAU in Addis Ababa. This proved fruitful, as the SADR delegation was seated at the summit with little protest from other states. However, Morocco resigned from the OAU in protest, thus becoming the first state to leave the organization.

Legislative elections were held in September 1984, and there was a turn-out of 67.3%. Despite widespread gains by the USFP, a centre-left party which won 36 seats, it seemed probable that the Chamber of Representatives would again be dominated by the centre-right parties, which between them held 206 of the 306 seats. In October King Hassan invited the leaders of the six main parties to submit their planned programmes to enable him to choose a coalition government. However, by February 1985 a new government had still not been selected, and the previous 'Government of National Unity' remained in office.

Government

The 1972 Constitution provides for a modified constitutional monarchy, with an hereditary King as Head of State. Legislative power is vested in the unicameral Chamber of Representatives, with 306 members who are elected for six years. Of the total membership, 206 are directly elected, on the basis of universal adult suffrage, while the remaining 100 are chosen by an electoral college. Executive power is vested in the King, who appoints (and may dismiss) the Prime Minister and other members of the Cabinet. The King may also dissolve the Chamber.

Defence

In July 1984 Morocco's armed forces numbered 144,000, consisting of an army of 125,000, a navy of 6,000 and an air force of 13,000 men. There is obligatory military service of 18 months.

The estimated defence expenditure for 1983 was 7,800m. dirhams.

Economic Affairs

Agriculture and mining are the mainstays of the economy. Agriculture employs around two-thirds of the working population, and accounted for 28% of export revenue in 1982. The principal crops are wheat, barley, maize, citrus fruits and vegetables. Although citrus fruits and tomatoes form a major source of export earnings, the country is not self-sufficient in cereals, sugar and other foodstuffs. Agriculture and fishing were major priorities in the economic development plan for 1981–85, and livestock-raising is also important. Fish is the country's third most important export: in 1981 fish exports totalled 143,111 metric tons, earning 994.5m. dirhams or 8.3% of total export earnings. In 1983 earnings from fish exports rose to 1,374m. dirhams, or 9.3% of the total. Severe drought in 1981 destroyed one-third of Morocco's grain crop, and much of the livestock was lost. Production of cereals continued to be adversely affected by drought in 1982–84. Total production fell to 5,512,000 metric tons in 1982/83, compared with 7,054,000 tons in 1981/82.

The most important mineral extracted is phosphate rock, of which Morocco is by far the world's leading exporter. In 1983 Morocco's exports accounted for 32% of the world market in raw phosphates and 34% of the world market in phosphoric acid. The 1981–85 development plan aimed to boost annual phosphate production from 20m. metric tons to 35m. tons, of which 9m. tons would be processed into phosphoric acid. Extraction of uranium as a by-product was expected to begin by 1984. In 1983 Morocco exported 14.7m. tons of phosphate rock and 85,680 tons of phosphoric acid. Phosphate sales totalled 6,600m. dirhams, or 45% of total exports. Other mineral deposits include iron ore, coal, lead, zinc, cobalt, copper and manganese. A major discovery of natural gas was announced in January 1982, and all other energy sources, such as shale oil, were to be developed. However, Morocco still imports a large proportion of its domestic energy requirement, and this absorbs around 48% of export earnings each year.

Manufacturing is still on a small scale but production was expected to increase by 8.5% annually in 1981–85. A new investment code, introduced in 1982, permits full foreign ownership of Moroccan companies. Food-processing, textiles and leather goods are the principal sectors of manufacturing.

There are still great inequalities of wealth in Moroccan society. There is a serious problem of unemployment, especially in rural areas, resulting in a drift of population to the towns. The emigration of workers is encouraged, and the remittances which they send home (5,200m. dirhams in 1981) constitute an important source of income for Morocco. Tourism is also a valuable sector of the economy, providing revenue of 2,200m. dirhams in 1981. The rate of inflation fell from 12.5% in 1981 to 10.5% in 1982, and to 6.2% in 1983.

There has been a considerable increase in the price of imported capital goods and energy. Morocco's imports of fuel accounted for 27% of total import costs in 1981, far outvaluing phosphate exports. Revenue from the export of phosphates has been affected by the decline in world demand and prices: in 1982 sales of raw phosphates fell by 6.5%, to 17.9m. metric tons. Morocco's exports of vegetables and clothing have fallen as a result of restrictions imposed by the EEC. National security and defence are absorbing an increasing proportion of the national income as the war in Western Sahara continues. As a result of these extra demands on the economy, a three-year 'stabilization' plan was launched in 1978. Much excess spending was curbed, and GDP rose by an annual average of 4% in 1978–80. The 1981–85 plan aimed for an annual increase of 6.5%. However, GDP fell by 1.5% in 1981, but grew by 5.6% in 1982 and by 0.6% in 1983. The 1981–85 plan, involving investment of 111,000m. dirhams, aimed to curb imports and to boost exports and industrial investment. Total exports rose by 18.4% in 1983, mostly owing to increased phosphate production.

The 1985 budget provided for revenue of 38,055m. dirhams and expenditure of 44,313m. dirhams, leaving a budget deficit of 6,258m. dirhams. The budget increased defence expenditure by nearly 10% and increased the retail price of petroleum products. The agricultural sector was exempted from all taxes until the year 2000, in an attempt to boost production and to aid the poorest sectors of society, who are largely dependent on agriculture.

In April 1982 the IMF granted a loan of US $579m. to support Morocco's economic and financial recovery programmes. In 1983 Morocco was granted a loan of $530m. by the World Bank, to ease its current account deficit (which was 1,700m. dirhams in 1982), and rescheduled $600m. of its official debt. However, Morocco's external debt has continued to rise, from 11,400m. dirhams in 1983 to an estimated 13,000m. in 1984. Morocco receives aid from Saudi Arabia and other Middle Eastern countries, and also from the USA and members of the EEC, especially France. In spite of its pro-Western stance, it has important commercial links with the USSR.

Transport and Communications

There are 1,779 km of railways, of which 709 km are electrified. In 1983 Morocco had 57,533 km of roads, of which about 46% were surfaced. The principal ports are Casablanca, Safi and Mohammedia. Work on Morocco's first deep-water port was begun at Mohammedia in 1980. There are nine international airports and about 30 airfields.

Social Welfare

All employees are required to contribute to a Social Welfare Fund, which operates a system of benefits in the event of illness, occupational accidents and old age. In 1978 Morocco had 161 hospitals, with a total of 31,900 beds, and there were 3,868 physicians working in the country.

Education

Morocco has state-run primary, secondary and technical schools, and there are also private schools. Teachers at all primary schools and at most secondary schools are Moroccan. In 1983 there were still about 3,000 French teachers in secondary schools, but the Government aimed to have an entirely Moroccan teaching staff by 1988. Teacher-training is expanding, with 23,853 trainees in 1982/83. Education for children of both sexes between seven and 13 years old has been officially compulsory since 1963. In 1982 the estimated enrolment ratio at primary schools was 71%. Girls generally leave school at a younger age than boys. They make up a minority of secondary school pupils and about 35% of students in higher education. There are six universities, with a total of 100,566 students in 1983/84, and several other institutions for higher education. In 1971 adult illiteracy averaged 78.6% (males 66.4%, females 90.2%).

Tourism

Morocco has many attractions for tourists, including a hot and sunny climate, ancient walled towns and spectacular scenery in the desert and mountains. There are holiday resorts on the Atlantic and Mediterranean coasts. In 1981 Morocco received 1,646,610 visitors, and in 1983 there were 61,000 hotel beds.

Public Holidays

1985: 1 May (Labour Day), 21 May* (Beginning of Ramadan), 20 June* (Eid el Seghir—Id ul Fitr, end of Ramadan), 14 August (Oued Eddahab Day, anniversary of 1979 annexation), 27 August* (Eid el Kebir—Id ul adha, Feast of the Sacrifice), 16 September* (Muslim New year), 25 September* (Ashoura), 6 November (Anniversary of the Green March), 18 November (Independence Day), 25 November* (Mouloud, Birth of the Prophet).

1986: 1 January (New Year), 3 March (Festival of the Throne, anniversary of King Hassan's accession).

* Islamic religious holidays are subject to lunar sightings, and may vary by one or two days from the dates given.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 Moroccan francs (centimes) = 1 Moroccan dirham.

Exchange rates (31 December 1984):
£1 sterling = 11.070 dirhams;
US $1 = 9.551 dirhams.

Statistical Survey

Source (unless otherwise stated): Secrétariat d'Etat au Plan et au Développement Régional, Direction de la Statistique, BP 178, Rabat; tel. 73606.

Note: Unless otherwise indicated, the data exclude Western (formerly Spanish) Sahara, a disputed territory under Moroccan occupation.

Area and Population

AREA, POPULATION AND DENSITY

Area (sq km)	458,730*
Population (census results)	
20 July 1971	
Males	7,669,957
Females	7,651,253
Total	15,321,210
3–21 September 1982	20,419,555
Density (per sq km) at September 1982	44.5

* 177,117 sq miles.

PRINCIPAL TOWNS (population at 1971 census)

Rabat (capital)*	435,510	Tanger (Tangier)	185,850
Casablanca	1,371,330	Oujda	155,800
Marrakech (Marrakesh)	330,400	Tétouan	137,080
Fès (Fez)	321,460	Kénitra	135,960
Meknès	244,520	Safi	129,100

* Including Salé.

BIRTHS AND DEATHS

Average annual birth rate 47.0 per 1,000 in 1970–75, 45.4 per 1,000 in 1975–80; death rate 15.8 per 1,000 in 1970–75, 13.6 per 1,000 in 1975–80 (UN estimates).

ECONOMICALLY ACTIVE POPULATION (1971 census)*

Agriculture, hunting, forestry and fishing	1,988,060
Mining and quarrying	44,540
Manufacturing	369,264
Electricity, gas and water	10,810
Construction	171,695
Trade, restaurants and hotels	289,082
Transport, storage and communications	100,425
Financing, insurance, real estate and business services	5,602
Community, social and personal services	501,728
Activities not adequately described	155,412
Total employed	3,636,618
Unemployed	343,900
Total labour force	3,980,518
Males	3,375,363
Females	605,155

* Figures are based on a 10% sample tabulation of census returns. The figure for females excludes unreported family helpers in agriculture.

ADMINISTRATIVE DISTRICTS (1 July 1979)*

	Area (sq km)	Population (estimates)	Density (per sq km)

Prefectures:			
Casablanca†	1,615	2,357,200	1,459.6
Rabat-Salé	1,275	865,100	678.5
Total	659,970	19,470,000	42.4

* Area figures include 201,240 sq km for the three provinces in Western Sahara (Boujdour, El Aaiún and Essmara) which Morocco occupied, following Spain's withdrawal, in 1976. The Mauritanian portion of Western Sahara, with an area of about 104,000 sq km, was annexed by Morocco, as the province of Oued Eddahab, in August 1979. Population figures exclude the new Saharan provinces and have not been adjusted to accord with the results of the 1982 census. The estimated population of Western Sahara (including the then Mauritanian-held portion) was 165,000 at 1 July 1979.

† It was announced in July 1981 that Casablanca was to be divided into five prefectures: Casablanca-Anfa (1,600,000 inhabitants), Hay-Mohamed-Aïn-Sebaa (600,000), Aïn-Chock-Hay-Hassani (500,000), Ben-Msik-Sidi-Othmane (800,000) and Mohamedia (250,000).

Directory

The Constitution

A new Constitution was promulgated on 10 March 1972, after being approved by a national referendum on 1 March.

PREAMBLE

The Kingdom of Morocco, a sovereign Islamic State, shall be a part of the Great Maghreb. As an African State, one of its aims shall be the realization of African unity. It will adhere to the principles, rights and obligations of those international organizations of which it is a member and will work for the preservation of peace and security in the world.

GENERAL PRINCIPLES

Morocco shall be a constitutional, democratic and social monarchy. Sovereignty shall pertain to the nation and be exercised directly by means of the referendum and indirectly by the constitutional institutions. All Moroccans shall be equal before the law, and all adults shall enjoy equal political rights including the franchise. Freedoms of movement, opinion and speech and the right of assembly shall be guaranteed. Islam shall be the state religion.

THE MONARCHY

The Crown of Morocco and its attendant constitutional rights shall be hereditary in the line of HM King Hassan II, and shall be transmitted to the oldest son, unless during his lifetime the King has appointed as his successor another of his sons. The King is the symbol of unity, guarantees the continuity of the state, and safeguards respect for Islam and the Constitution. The King shall have the power to appoint and dismiss the Prime Minister and Cabinet Ministers and shall preside over the Cabinet. He shall promulgate legislation passed by the Chamber of Representatives and have the power to dissolve the Chamber; is empowered to declare a state of emergency and to initiate revisions to the Constitution. The Sovereign is the Commander-in-Chief of the Armed Forces; makes appointments to civil and military posts; appoints Ambassadors; signs and ratifies treaties; presides over the Council for National Development Planning and the Supreme Judiciary Council; and exercises the right of pardon.

LEGISLATURE

This shall consist of a single assembly, the Chamber of Representatives, whose members are to be elected for a six-year term. Two-thirds of the members shall be elected by direct universal suffrage, and one-third by an electoral college composed of councillors in local government and employers' and employees' representatives. The Chamber shall pass legislation, which may be initiated by its members or by the Prime Minister; authorize any declaration of war; and approve any extension beyond 30 days of a state of emergency.

GOVERNMENT

The Government shall be responsible to the King and the Chamber of Representatives and shall ensure the execution of laws. The Prime Minister shall be empowered to initiate legislation and to exercise statutory powers except where these are reserved to the King. He shall put before the Chamber the Government's intended programme and shall be responsible for co-ordinating ministerial work. In May 1980 a national referendum approved a constitutional amendment allowing the duration of the Chamber's term to be extended from four to six years.

RELATIONS BETWEEN THE AUTHORITIES

The King may request further consideration of legislation by the Chamber of Representatives before giving his assent; submit proposed legislation to a referendum by decree; and dissolve the Chamber if a Bill rejected by it is approved by referendum. He may also dissolve the Chamber by decree, but the succeeding Chamber may not be dissolved within a year of its election. The Chamber of Representatives may defeat the Government either by refusing a vote of confidence moved by the Prime Minister or by passing a censure motion; either eventuality shall involve the Government's collective resignation.

JUDICIARY

The Judiciary shall be independent. Judges shall be appointed on the recommendation of the Supreme Council of the Judiciary presided over by the King.

The Government

HEAD OF STATE

HM King Hassan II (acceded 3 March 1961).

CABINET

(February 1985)

Interim cabinet appointed in November 1983.

Judicial System

The **Supreme Court** (Majlis et Aala) is responsible for the interpretation of the law and regulates the jurisprudence of the courts and tribunals of the Kingdom. The Supreme Court sits at Rabat and is divided into five Chambers.

First President: Mohamed Larbi Majboub.

Attorney-General: Ahmed Zeghari.

The nine **Courts of Appeal** hear appeals from lower courts and also comprise a criminal division.

The **Sadad Tribunals** pass judgment, without possibility of appeal, in personal, civil and commercial cases involving up to 300 dirhams. These tribunals also pass judgment, subject to appeal before the Regional Tribunals, in the same cases up to 900 dirhams, in disputes related to the personal and successional statutes of Moroccan Muslims and Jews, and in penal cases involving misdemeanours or infringements of the law.

The **Regional Tribunals** deal with appeals against judgments made by the Sadad Tribunals; and pass judgment in the first and last resort in cases of personal property of 900 dirhams to 1,200 dirhams or property producing a yield of up to 80 dirhams. The Regional Tribunals also pass judgment, subject to appeal before the Court of Appeal, in actions brought against public administrations in administrative affairs, and in cases of minor offences in penal matters.

Labour Tribunals settle, by means of conciliation, disputes arising from rental contracts or services between employers and employees engaged in private industry. There are 14 labour tribunals in the Kingdom.

A special court was created in 1965 in Rabat to deal with corruption among public officials.

Religion

ISLAM

Most Moroccans are Muslims and Islam is the state religion.

CHRISTIANITY

There are about 60,000 Christians, mostly Roman Catholics.

for passenger services. Casablanca is the principal freight port, handling 70% of Morocco's trade. New ports have recently been completed at Nador and Jorf Lasfar.

Agence Gibmar SA: 3 rue Henri Regnault, Tangier; tel. 35875; telex 33091; also at Casablanca; regular sea services from Tangier to Gibraltar; Chair. JAWAD BEN BRAHIM; Gen. Man. S. ABECASIS.

Atlas SA, Société Marocaine de Navigation: 81 ave Houmane Elfatouaki, Casablanca; tel. 22-41-90; telex 23067; f. 1976; Chair. H. CHAMI.

Compagnie Chérifienne d'Armement: 5 blvd Abdallah Ben Yacine, Casablanca; tel. 30-94-55; telex 27030; f. 1929; regular lines to North France and Europe; Chair. M. BENNANI-SMIRES; Dir MAX KADOCH.

Compagnie Marocaine d'Agences Maritimes (COMARINE): 65 ave des Forces Armées Royales, BP 60, Casablanca; tel. 31-19-41; telex 21851; f. 1969; Pres. AHMED EL OUALI EL ALAMI; Dir-Gen. MOHAMED EL OUALI EL ALAMI.

Compagnie Marocaine de Navigation (COMANAV): 7 blvd de la Résistance, BP 628, Casablanca; tel. 30-30-12; telex 26093; f. 1946; regular lines to Mediterranean, North-west European, Middle Eastern and West African ports; tramping; Pres. A. BOUAYAD.

Limadet-ferry: 3 rue Henri Regnault, Tangier; f. 1966; operates between Algeciras and Tangier; Dir-Gen. AZIZ BOUZOUBAA.

Messageries Marocaines: BP 69, 65 ave des Forces Armées Royales, Casablanca; Dir-Gen. ABDELKRIM MOUTAOUKIL.

Société Marocaine de Navigation Fruitière: 27 ave de l'Armée Royale, Casablanca; tel. 31-00-03; telex 21890; f. 1962; Man. Dir ABDELLAH LAHLOU; Gen. Man. HAMID KHAMMAL.

Société de Navigation Maghrebine: BP 746, 15 rue de Foucauld, Casablanca; tel. 26-65-95; telex 22996; f. 1974; oil and chemicals; Dir-Gen. ABDELWAHAB BENKIRANE.

Transmediterranea SA (Intercona): 31 rue Quévédo, Tangier; tel. 34101; telex 33005; f. 1943; daily services from Algeciras to Tangier.

Voyages Paquet: 65 ave des Forces Armées Royales, Casablanca, BP 60; tel. 31-10-65; telex 21019; f. 1970; Pres. AHMED EL OUALI EL ALAMI; Man. Dir MOHAMED EL OUALI EL ALAMI.

CIVIL AVIATION

The main international airports are at Casablanca (King Mohammed V), Rabat, Tangier, Marrakesh, Agadir, Ouja, Al Hoceima and Fez.

Royal Air Maroc: Aéroport International Casablanca-Anfa; telex 21880; f. 1953; 90% owned by the government; domestic flights and services to Western Europe, the USA, Canada, South America, North and West Africa, the Canary Islands and the Middle East; fleet of 8 Boeing 737, 8 Boeing 727, 2 Boeing 707, 1 Boeing 747; Chair. MOHAMED MEKOUAR; Man. Dir SAID BEN ALI YAALA.

Tourism

Office National Marocain de Tourisme: BP 19, 22 ave d'Alger, Rabat; f. 1946; Dir ABDELLATIF AMOR.

MOZAMBIQUE

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Mozambique lies on the east coast of Africa, bordered to the north by Tanzania, to the west by Malawi, Zambia and Zimbabwe, and to the south by South Africa and Swaziland. The country has a coastline of about 2,470 km (1,535 miles) on the shores of the Indian Ocean, and is separated from Madagascar, to the east, by the Mozambique Channel. Except in a few upland areas, the climate varies from tropical to sub-tropical. Rainfall is irregular but the rainy season is usually from November to March, when average temperatures in Maputo are between 26°C (79°F) and 30°C (86°F). In the cooler dry season, the average temperatures are 18°C (64°F) to 20°C (68°F) in June and July. Portuguese is the official language, while numerous African languages, including Ronga, Shangaan and Muchope, are widely spoken. Most of the population follow traditional beliefs, although there are about 2m. Christians, the majority of whom are Roman Catholics, and 2m. Muslims. The national flag, introduced in 1983, has three equal horizontal stripes, of green, black and yellow, separated by narrow white stripes. At the hoist is a red triangle containing a five-pointed yellow star, on which are superimposed an open book, a hoe and a rifle. The capital is Maputo (formerly called Lourenço Marques).

Recent History

Mozambique became a Portuguese colony in the 19th century and an overseas province in 1951. Nationalist groups began to form in the 1960s. Frelimo (Frente de Libertação de Moçambique—Mozambique Liberation Front) was formed in 1962 by the merger of three existing nationalist groups. Its military campaign was launched in 1964 and continued until the cease-fire in September 1974. After the coup in Portugal in April 1974, negotiations on Mozambique's independence were held between Frelimo and the new Portuguese Government. Agreement was reached in September, and Mozambique was administered by a transitional government, composed of representatives of Portugal and Frelimo, until independence on 25 June 1975. Samora Machel, leader of Frelimo since the murder of its founding leader, Eduardo Mondlane, in 1969, became the first President of Mozambique.

In December 1975 a revolt by dissident elements of the armed forces and police was suppressed. Mozambique's economic difficulties have caused discontent, and Frelimo has made concerted efforts to secure a political power base outside the areas which were liberated during Portuguese rule. At its third congress, in February 1977, Frelimo was reconstituted as the Frelimo Party, a 'Marxist-Leninist vanguard party', with restricted membership. Subsequently, People's Assemblies were elected from village to national level. In 1982 Frelimo's first national conference decided to broaden the membership of the party. Frelimo's fourth congress, held in April 1983, resulted in significant changes in the party's economic policies (see Economic Affairs), and in its Central Committee, which was expanded from 55 to 130 members. The new committee is dominated by peasants, workers, and veterans of the guerrilla war, instead of by ministers, governors and military commanders, who held a majority in the previous committee. The membership of Frelimo's political bureau remained unchanged, except for the addition of one new member.

Mozambique has suffered from security problems since 1976, when in March the border with Rhodesia (now Zimbabwe) was closed, economic sanctions applied and all Rhodesian assets in Mozambique were seized. The country was put on a war footing. In January 1977 President Machel joined the Presidents of the other 'front-line' states in declaring exclusive support for the Patriotic Front. Mozambique was the principal base for Rhodesian guerrillas, and large parts of western Mozambique were devastated, with many casualties, by Rhodesian forces' raids on the guerrilla training and refugee camps. The border was reopened in January 1980, following the cease-fire in the guerrilla war, and a plan to repatriate the Rhodesian refugees, thought to number about 50,000, was put into effect.

After Zimbabwean independence in April 1980, South Africa inherited Rhodesia's role as supporter of the opposition guerrilla group, Resistência Nacional Moçambicana (Renamo), also known as the Movimento Nacional da Resistência de Moçambique (MNR). During 1981–82 the activities of this national resistance group greatly increased, and in 1983–84 continued to cause persistent disruption to road, rail and oil pipeline links from Mozambican ports, which are vital to the economic independence of southern African nations from South Africa.

Mozambique's security problems were exacerbated in 1983 by two raids by South African forces, launched in May and October, which were aimed at destroying alleged bases in Maputo of the African National Congress (ANC), a banned South African group opposed to the white-dominated regime. Mozambique accepts ANC refugees, but claims that there are no ANC bases in its territory. In spite of the tension caused by the raids, relations between Mozambique and South Africa improved in early 1984. In January representatives from the two countries held talks, aimed at reaching agreement over security problems and at developing economic relations, and in March, following further talks, the Mozambican and South African Governments signed a formal joint non-aggression pact. Under the terms of the pact, known as the Nkomati accord, each Government undertook to prevent opposition forces in its territory from launching attacks against the other. Although no specific forces were cited in the accord, it effectively implied that South Africa was to withdraw its covert support for the MNR in return for a guarantee by Mozambique that it would prevent any further use of its territory by the ANC. The accord also established a joint security commission to supervise the implementation of the pact.

Although Mozambique stated that it would continue to give 'diplomatic, moral and political' support to the ANC, during 1984 the Frelimo Government demonstrated its determination to adhere to the terms of the accord. Almost immediately after the signing of the accord, government troops made a number of raids on houses of ANC supporters, and in April the Government delivered an ultimatum to ANC members, either to live in controlled refugee camps in Mozambique, or to leave the country. The ANC presence was to be restricted to some 10 members of staff at the organization's office in Maputo, which was upgraded to the status of a diplomatic mission. By October 1984 it was estimated that up to 800 ANC members had left the country, and there had been a marked reduction in ANC guerrilla activity in South Africa. By contrast, however, MNR activity intensified following the signing of the Nkomati accord, in spite of South Africa's pledge to withdraw its support for the rebels. It was thought that up to 1,000 heavily armed MNR guerrillas had been infiltrated into Mozambique from South Africa during the period immediately preceding the signing of the accord, and, although South Africa reaffirmed its commitment to the terms of the accord in May, MNR activity in Mozambique persisted. In spite of a number of major government military offensives against the rebels between March and July, by August it was thought that MNR forces were active in all of Mozambique's 10 provinces, and the capital came increasingly under threat. The Government's offer of an amnesty to rebels who surrendered met with only a limited response. The Pretoria Government continued to deny that it was supporting the MNR, and it was thought that the rebels were possibly receiving support from South African sources independently of the Pretoria Government, and from anti-Frelimo sources in Portugal.

The escalating internal conflict led the Frelimo Government

to warn South Africa in August 1984 that both the accord and associated plans for economic co-operation were under threat unless MNR activity was halted. In a bid to resolve the situation, Pretoria held a number of separate but parallel talks with MNR and Frelimo Government representatives during August and September, which culminated in the so-called 'Pretoria Declaration' of early October, in which a cease-fire was agreed in principle between the Frelimo Government and the rebels, and a tripartite commission, comprising Frelimo, MNR and South African representatives, was established to implement the truce. However, no date was set for the cease-fire, and in November the MNR withdrew from the peace negotiations altogether, ostensibly because of the Frelimo Government's continued refusal to recognize the MNR's legitimacy. The rebel movement also announced the launching of a major offensive by its forces throughout Mozambique. In December 1984 President Machel reportedly accused Pretoria of dishonouring its part in the Nkomati accord by continuing to support the MNR. Pretoria denied this, and made further, unsuccessful attempts in early 1985 to persuade the MNR to negotiate with the Frelimo Government. During early 1985 the joint security commission, established between South Africa and Mozambique under the Nkomati accord, continued to meet to review the situation, but MNR activity in Mozambique continued.

Since 1982 the worsening security situation has led the Frelimo Government to introduce measures to improve the country's defences. Provincial military commanders were appointed in 1982, and locally-based 'people's militia' groups were established. In a government reshuffle in May 1983, President Machel assumed direct responsibility for the country's defence, and in August 1983 and January 1984 he made a number of new ministerial and military appointments, designed to strengthen the Government's defence campaign. In April 1984 the Frelimo Central Committee ordered the reorganization of the militia forces, and the implementation of economic measures designed to 'release the country's productive forces'. A campaign against abuse of power by the police and the army was also launched, and was thought partly to have accounted for the dismissal of three government ministers in June 1984. A minor reshuffle followed the dismissals. In 1984 it was announced that general elections would be held in 1985.

Relations with Portugal deteriorated in 1976, and almost all of the 250,000 Portuguese who had remained in Mozambique after independence had left by June 1977. There was some improvement in relations between 1981 and 1983, but suspicion that sources in Portugal were providing support for the MNR undermined relations again in 1984. Mozambique's other strong international links are with the USSR and other East European countries, and with neighbouring African states, an increasing amount of whose trade is expected to pass through the developing ports of Mozambique. In October 1983 relations with Western Europe were strengthened when President Machel visited six European countries, including France, Portugal and the United Kingdom. In spite of the signing of the Nkomati accord in 1984, diplomatic relations have still not been established with South Africa. Relations with the USA have improved since 1983, when diplomatic links between the two countries were upgraded to ambassadorial level, and further economic links between the two countries were established in 1984. In that year Mozambique also established diplomatic relations with Afghanistan and with Mauritius.

Government

The 1975 Constitution proclaims that Frelimo is the directing power of the state and of society. Legislative power is vested in the People's Assembly, with a maximum of 210 members, mostly Frelimo Party officials. The President of the Republic, who is Head of State, is the President of Frelimo, holds executive power and governs with the assistance of an appointed Council of Ministers. The Permanent Commission of the Assembly, chaired by the President, carries out the functions of the Council of Ministers between meetings. A body consisting of four party and state officials was to be appointed within each provincial government, to carry out provincial government functions between meetings. District and city councils were also to be established.

Defence

Military service, which lasts two years, is compulsory for all men and women over 18 years of age. In July 1984 the National Defence Force totalled an estimated 15,650, with 14,000 in the army, 650 in the navy and 1,000 in the air force. There was also a paramilitary force of 6,000, and people's militia in villages. Another organization, the Serviço Nacional de Segurança Popular (National Service of People's Security), has been established to work with the Government and the armed forces on matters of national security. Military advisers from Cuba, the German Democratic Republic and the USSR have been reported in the country. In 1982 estimated defence expenditure totalled 6,128m. meticais.

Economic Affairs

The economy is based on agriculture, which involved 80%–90% of the working population, mainly in subsistence farming, in 1984. The major cash crops are cashew nuts, sugar cane, cotton, tea and sisal. Maize, bananas, rice and coconuts are also grown, and the main subsistence crop is cassava. In the two years following independence, production of both cereal and cash crops fell drastically, and attempts to improve agricultural production, including a government scheme to resettle peasants in communal villages, have been hampered by a lack of skilled manpower and adverse weather conditions. Since 1976 more than 1,500 communal villages have been established, and state farms set up, in the effort to 'socialize' the rural sector. The state farms, most of which were formerly Portuguese-owned, are to give 50% of their profits to the Government. By 1980 165 agricultural co-operatives, with a total membership of 13,000, had also been established. However, a number of state farms have proved to be uneconomic, and were to be divided into individual peasant holdings in 1984.

A prolonged and severe drought in parts of the country has had an increasingly damaging effect on crop production since 1981, and further problems were caused by floods and cyclones in 1984. The output of maize, which normally reaches about 400,000 metric tons annually, has been consistently insufficient to meet domestic needs. About 300,000 metric tons of imports were required in both 1980 and 1981, and about 500,000 tons in 1982. The overall situation continued to deteriorate during 1983 and 1984. In 1983 an estimated 1m. tons of cassava, equivalent to about one-third of the total annual crop, was lost because of drought. In the six southern provinces, agricultural production had declined by about 70%–80%, and some 550,000 tons of cereals were required to offset crop losses in 1983/84. The drought was also likely to affect 1984 harvests in some of the southern provinces, owing to a lack of seed reserves for planting, and further damage was caused to these areas by severe floods early in 1984. In that year it was estimated that 600,000–900,000 tons of maize imports would be required for 1984/85, and the total cereal import requirement for that period (including commercial imports) was estimated at 620,000 tons. The total production of cashew nuts fell from 80,000 tons in 1975 to about 70,000 tons in 1980/81, and to about 60,000 tons in 1981/82, and output continued to decline in 1983. In that year exports of cashews fell to only 5,800 tons, from 16,700 tons in 1982. In 1984 the Government doubled producer prices for cashews in an attempt to increase production levels. Output of raw sugar has also been affected, and fell to a record low of 120,000 tons in 1982, less than 66% of the 1981 level, although production was expected to recover to some 150,000 tons in 1985. The tea crop has remained reasonably stable, with 22,190 tons and 21,000 tons produced in 1981 and 1982 respectively, but output declined to about 15,000 tons in 1983. Mozambique has received considerable international assistance during the drought, including 153,000 tons of food aid in 1981 and 235,000 tons in 1982. Between January and July 1983 a total of 227,000 tons of confirmed and unconfirmed donations of food aid were made. However, distribution of food supplies has been persistently hampered by security and transport problems, owing to MNR guerrilla activity.

Fishing has traditionally been only a minor element in the economy, but prawns became the largest export commodity in 1983, and it is planned to expand the sector further. In 1977 a national fishing company, EMOPESCA, was set up. In December 1979 EMOPESCA operated 48 fishing vessels, with plans

to purchase a further 15. In 1983 fish catches totalled 7,965 tons. Although Mozambique is still not self-sufficient in fish, domestic catches cover about 34% of consumption at present, compared with 6% in 1979. Mozambique imported 15,735 tons of fish in 1983. In 1984 South Africa and Mozambique signed a three-year fisheries agreement, under which South Africa provided a credit worth 2m. rand for the development of the fishing sector.

There are considerable mineral resources, although only coal, diamonds and bauxite are currently exploited. The growth in coal production from Moatize, in Tete province, has been slower than expected because of security and technical problems. Although the mine has an annual production capacity of 600,000 metric tons, output in 1984 was limited to about 100,000 tons, owing to a lack of facilities for transporting the coal to Beira port. Under the three-year state plan, approved in 1983, levels of coal production are to be determined by transport capacity, and it is hoped that upgrading the railways will enable more coal to be transported, thereby avoiding unnecessary stockpiling at the mine pitheads. In 1984 negotiations were under way for further development of the Moatize mines, and there are plans for mining coal at Mingova, also in Tete province. High-grade iron ore deposits have been found in large quantities in the Tete area, while gold, emeralds and semi-precious stones have also been discovered in the province. Plans are under way for the development of several gold mines which were abandoned at independence. In 1975 the Anglo-American Corporation of South Africa began to mine diamonds in the Tete region. Vast reserves of natural gas were discovered during the 1960s but have yet to be exploited. Exploration for petroleum has been carried out by various foreign companies. Licences for production will be granted only in co-operation with the state-owned Empresa Nacional de Hidrocarbonetos. In 1983 the Government invited bids for offshore petroleum and gas concessions, and two contracts for offshore petroleum exploration and production were signed with foreign companies in 1984. Mozambique signed a contract with Esso and Shell in 1983 for onshore petroleum research in the Rovuma river basin, in Cabo Delgado province. Under the terms of the contract, Esso and Shell agreed to spend $60m. on petroleum exploration over a seven-year period. In recent years a critical shortage of foreign exchange has drastically reduced Mozambique's imports of crude petroleum, which fell from 641,000 tons in 1982 to 105,000 tons in 1983.

Manufacturing is on a limited scale, and Mozambique is heavily dependent on South African industrial products. Food processing forms the basis of this sector, with sugar refining, cashew- and wheat-processing predominating. Other industries include cotton spinning and weaving, brewing and the manufacture of cement, fertilizers and agricultural implements.

After independence in 1975, Mozambique's agricultural and industrial production fell by between 50 and 75%, and recovery has been slow because of the disruption caused by the war in neighbouring Rhodesia (now Zimbabwe) and by subsequent guerrilla activities. The economy has also been hampered by adverse weather conditions and a lack of foreign exchange. Mozambique's ports and railways provide a vital link in the transport system of southern and central Africa. Traffic was greatly reduced during the Rhodesian war, causing both a serious loss in revenue and shortages in food and industrial supplies.

Between 1977 and 1981, Mozambique's gross national product expanded by only 11.6% (measured in constant prices), less than the increase in the country's population over the same period, and in 1981/82 agricultural output fell in real terms by 2.4%. Gross domestic product (GDP) grew by about 18% in real terms during 1975–81, with an average annual growth rate of some 2.8%. However, real GDP declined by 7% in 1982. In 1983 a new three-year state plan, aimed at improving the economy, was approved. At the fourth Frelimo Party congress in April, considerable changes in economic policy were announced. Priority was to be given to food production, and greater assistance was to be made available to peasant farmers and to large private farms. More consumer goods were to be imported for sale to farmers, in order to provide them with an incentive to increase agricultural production. Existing financial resources were to be used primarily for small-scale projects, and no new major projects were to be started between 1983 and 1985. State farms would not increase in area, and were to concentrate on increasing production by more effective use of present resources. The Government aimed to continue these policies during 1984, and in that year hoped to increase agricultural production by 30%. The 1983–85 plan also aimed to encourage small industries, and projected an overall increase in industrial production of 7% for 1983. Mining and heavy industry have the potential for major development, aided by the construction of a national electricity grid, using power from the hydroelectric plant at the Cabora Bassa dam, constructed by the Portuguese on the Zambezi river. The plant, projected to be the largest of its kind in Africa, already has a generating capacity of 2,075 MW, but plans to add a further 1,250 MW have been jeopardized by the frequent sabotage of existing power lines by the MNR. In 1984 Mozambique, South Africa and Portugal (which still owns the dam) signed an agreement under which South Africa agreed to pay a higher tariff for electricity generated by Cabora Bassa. Under this agreement, Mozambique will earn 5m.–10m. rand per year from South African electricity purchases. In 1983 the Lichinga project, the first hydroelectric power station to be built in Mozambique since independence, was completed.

Mozambique's severe balance-of-payments problem (the current deficit was projected at some 7,950m. meticais in 1983) has been accentuated by high defence spending (amounting to 30% of budget expenditure in 1981), much of it in already scarce foreign exchange, and by the drastic decline in tourism. In the 1984 budget, revenue was estimated at about $500m. (some 20,000m. meticais), a slight decline from estimates for the previous year. Government expenditure was put at $670m., creating a projected budgetary deficit of about $170m. Mozambique has also suffered from adverse movements in the terms of trade: between 1981 and 1982 the average prices for exports fell by about 11%, while those for imports rose by about 3%. The value of exports fell from about $285m. in 1981 to less than $150m. in 1983, and in that year the volume of exports declined by 40%, as a result of guerrilla sabotage and unfavourable weather conditions. The ensuing shortage of foreign exchange led to a 21% fall in imports in 1983, with adverse consequences for industry and transport. The Government aimed to boost exports by 20% in 1984. In February of that year Mozambique asked its creditors to renegotiate its foreign debt of $1,400m. According to the report in which the request for the renegotiation appeared, the debt has partly arisen through substantial revenue losses, caused by the guerrilla war and by South Africa's decision to stop the flow of its goods chartered through Mozambican ports. The report estimates that Mozambique's lost revenue since 1975 totals $5,500m. One traditional source of foreign exchange was gold (nominally valued at a low fixed price), sent as part-payment for the work of Mozambican miners in South Africa. This arrangement was terminated in 1978. The employment of Mozambicans in South African mines also declined from a pre-independence peak of 118,000 to about 45,000 in 1984, creating a major unemployment problem and costing Mozambique about $568m. in lost revenue from remittances. However, after an improvement in relations between the two countries during 1984, South Africa agreed to allow a further 8,000 Mozambican miners to work in the Republic in 1985. In June 1983 the Government introduced 'Operation Production', comprising measures to expel an estimated 100,000 unemployed people from the cities, and to resettle them in rural areas to work on agricultural schemes. Although the measures have met with little success, further resettlement was to be implemented in 1984.

During 1984 Mozambique took further steps to revitalize the economy. It was hoped that new laws relating to foreign exchange and investment, introduced in May and September, would act as incentives to increased industrial production and greater foreign investment. These measures were accompanied by increasingly close economic links with the West. Following the signing of the Nkomati accord in March (see Recent History), the USA announced in June that its congressional ban on direct bilateral aid to Mozambique had been lifted. In July Mozambique signed an agreement with the US Overseas Private Investment Corporation, providing for bilateral investment guarantees to US investors, and in September the USA approved an $8m. aid programme for Mozambique. In the same month, Mozambique became a member of both the International Monetary Fund (IMF) and the World Bank. Mozam-

bique's IMF quota will be some $60.5m., and a $100m. loan was negotiated with the World Bank earlier in 1984. Membership of the IMF enabled Mozambique to secure, in October, the rescheduling of some $250m.–$300m. of debt repayments and arrears, owed to Western creditors. The repayments are now due to begin in 1990. Mozambique's membership of the IMF was also expected to lead to a devaluation of the metical by about 50% in early 1985. As a result of the increased economic links between Mozambique and South Africa since the Nkomati accord—a trade agreement between the two countries was signed in December 1984—it is likely that the value of the metical will be determined mainly by its relationship with the South African rand. In December 1984 Mozambique became a party to the third Lomé Convention, linking the EEC with a group of African, Caribbean and Pacific countries.

Transport and Communications

In 1984 there were 3,843 km (2,388 miles) of state-owned railways. There are rail links between Mozambican ports and South Africa, Zimbabwe and Malawi, plus internal routes. In 1983 Mozambique secured several grants for making improvements to the railway network, including the rehabilitation of the vital 450-km rail link between the Moatize coalfields and Beira port. The country lacks a good road system, with only 39,173 km (24,341 miles) of roads and tracks in 1974. However, improvements to the network have been made, and a major programme, supervised by the SADCC, is under way to improve the road links between Mozambique and neighbouring countries. Efforts are to be made to improve north–south road connections. The main ports are Maputo (the second largest port in Africa), Beira, Nacala and Quelimane. In 1984 Mozambique and South Africa agreed on a project to redevelop Maputo port and to upgrade transport links between the two countries, assisted by finance from South Africa. Several lesser ports have been reopened since 1980. A cargo terminal at Moatize was opened in 1976 to link the port of Beira to Zambia and Zaire, and to handle goods for these countries. International air transport is operated by LAM, and domestic links by TTA, both state-owned airlines. There are 16 airports, of which three are international airports.

Social Welfare

Most of the European medical personnel left the country at independence, leaving only about 100 physicians in late 1975. By 1981 Mozambique had 365 physicians (one per 35,000 inhabitants). There were 40 hospitals and more than 1,000 health posts and centres. A major programme of vaccination against tetanus, smallpox, tuberculosis and other diseases was launched after independence.

Education

At independence, between 85% and 95% of the adult population were illiterate. By 1980, according to estimates by UNESCO, the proportion was 66.8% (males 55.6%; females 77.3%). There is a major emphasis on campaigns for adult literacy and other adult education, with about 550,000 people attending classes in 1981, as well as on widening the scope of primary and secondary schooling. At five years of age, children attend initiation classes to learn Portuguese. Education is officially compulsory for seven years from the age of six. Primary schooling lasts for four years, and secondary schooling for six years. The number of children receiving primary education increased from 634,000 in 1973 to 1,495,000 in 1979, but fell to 1,402,500 in 1983. As a result, the total enrolment at primary and secondary schools of children in the appropriate age-group rose from 30% in 1972 to 52% in 1979. Secondary enrolment was only about 5% in 1981. There is a university at Maputo, renamed the Eduardo Mondlane University in 1976, and there were some 836 students at the university in 1982. All university students must give as many years of public service as time spent at university. The National Education System was approved in 1982 and began to be introduced in 1983. In the 1984 budget the Government allocated more than one-third of the estimated state income for the year to health and education. The state plan for 1983–85 forecast that 722,900 new pupils would be admitted to general education, 6,100 to technical education, and 330 to higher education, and that literacy classes would admit 229,000 adults. In 1984 there were plans to open four new vocational schools, with places for up to 3,000 students, by the end of 1985.

Tourism

There were almost 70,000 tourists in 1974, and tourism was formerly a considerable foreign exchange earner. Following independence, tourist arrivals ceased completely, and were resumed on only a limited scale in 1980. The state administration of tourism was reorganized in 1982. In 1984 a joint-venture tourism company was established with South Africa in order to develop tourism on Inhaca island. There is also a state tourism company, but the growth of tourism has been hampered by the security situation.

Public Holidays

1985: 1 May (Workers' Day), 25 June (Independence Day), 7 September (Victory Day—anniversary of the end of the Armed Struggle), 25 September (Anniversary of the launching of the Armed Struggle for National Liberation, and Day of the Armed Forces of Mozambique), 25 December (National Family Day).

1986: 1 January (New Year's Day), 3 February (Heroes' Day, anniversary of the assassination of Eduardo Mondlane), 7 April (Day of the Mozambican Woman).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centavos = 1 metical.

Exchange rates (31 December 1984):
£1 sterling = 50.95 meticais;
US $ = 43.96 meticais.

Directory

The Constitution

The Constitution came into force at independence on 25 June 1975. It was revised in 1978, and subsequent legislation made provision for the conduct of elections.

GENERAL PRINCIPLES

The People's Republic of Mozambique is a sovereign, independent and democratic State. Power belongs to the workers and peasants, united and led by Frelimo, and is exercised by the organs of people's power. Frelimo is the leading force of the State and Society. The Republic has the following fundamental objectives:

The elimination of colonial and traditional structures;

the extension of people's democratic power;

the building of an independent economy;

the defence and consolidation of national independence and unity;

the building of people's democracy and the material and ideological base of a socialist society;

the pursuit of the struggle against colonialism and imperialism.

The Mozambique People's Liberation Forces (FPLM) are responsible for national defence. Its Commander-in-Chief is the President of Frelimo. The land and the natural resources of the soil and subsoil, of the territorial waters and continental shelf of Mozambique are the property of the State. The State economic sector is the leading and driving factor in the national economy. The State encourages individual peasants and workers to organize themselves in collective forms of production. Personal property is guaranteed and foreign capital shall be authorized to operate within the framework of the State's economic policy. The Republic is a secular State in which there is absolute separation between the State and religious institutions.

FUNDAMENTAL RIGHTS AND DUTIES OF CITIZENS

All citizens enjoy the same rights and are subject to the same duties, irrespective of colour, race, sex, ethnic origin, place of birth, religion, level of education, social position or occupation. In realizing the objectives of the Constitution, all citizens enjoy freedom of opinion, assembly and association. All citizens over 18 years of age are entitled to vote and be elected. Active participation in the defence of the country and the Revolution is the right and supreme duty of every citizen. Individual freedoms are guaranteed by the State, including the freedom to practise or not to practise a religion. The State guarantees accused persons the right to a legal defence.

STATE ORGANS

Principles

State organs are directed by Frelimo on the principle of democratic centralism. Lower-level assemblies are responsible to higher state organs.

Central state organs

The People's Assembly is the supreme organ of the State. It expresses the will of the people and realizes the aim of the Republic as defined by Frelimo.

The Assembly is convened and presided over by the President of the Republic. It meets in ordinary sessions twice a year and in extraordinary session when requested by the Central Committee, the President, the Permanent Commission of the Assembly or by at least one-third of the members of the Assembly.

The Assembly may deliberate only when a majority of its members are present, and decisions are made by majority vote.

The Permanent Commission of the Assembly consists of members elected by the Assembly from among its members on the proposal of the Central Committee, and is summoned and chaired by the President.

The Permanent Commission assumes the functions of the Assembly in the periods between meetings of that body, and is answerable to the Assembly.

The President of the People's Republic of Mozambique is the President of Frelimo and the Head of State. His function is to create ministries and define their jurisdiction; to direct the activities of the Council of Ministers and preside over its meetings; to appoint and dismiss members of the Council of Ministers, the President and Vice-President of the Supreme People's Court and the Attorney-General of the Republic, provincial governors, the governor and deputy governor of the Bank of Mozambique, the general commander and deputy general commander of the Police Corps, the rector of the University, Secretaries of State, the director of the National Service of People's Security and diplomatic representatives of the Republic in other countries; to promulgate and have issued laws and legislative decrees; to declare a state of war and conclude peace treaties by decision of the Central Committee of Frelimo; to proclaim mobilization; to accredit diplomatic representatives of other countries. In the event of the President's death, resignation or permanent incapacity, the functions of the President shall be immediately assumed by Frelimo's Central Committee who shall nominate a new President.

The Council of Ministers is the government of the Republic and is presided over by the President of the Republic. It is answerable to the Assembly and must comply with resolutions of the Assembly and its Permanent Commission and decisions of the President of the Republic.

Local state organs

The Republic is administered in provinces, districts, cities and localities. The highest state organ in a province is the provincial government presided over by the governor, who is answerable to Frelimo and the central government. There shall be assemblies at each administrative level.

Judiciary

Judicial functions shall be exercised through the Supreme People's Court and other courts provided for in the law on the judiciary, which also subordinates them to the People's Assembly. Courts must safeguard the principles of the constitution and defend the rights and legitimate interests of citizens. Judges are independent, subject only to the law.

CONDUCT OF ELECTIONS

Elections to assemblies at the locality, district, provincial and national levels were held between 25 September and 4 December 1977, under the control of Frelimo and on the basis of universal franchise for all citizens over 18 (with certain exceptions). These elections were conducted in accordance with the electoral law adopted at the first meeting of the People's Assembly, held with a provisional membership in August 1977. General elections were to be held in 1985.

The Government

HEAD OF STATE

President of the Republic, Commander-in-Chief of the Armed Forces, overall responsibility for the Ministry of Defence: Samora Moïsés Machel (took office 25 June 1975).

COUNCIL OF MINISTERS

(March 1985)

Minister for Foreign Affairs: Joaquim Alberto Chissano.

Minister of Defence: Alberto Joaquim Chipande.

Minister of the Interior: José Oscar Monteiro.

Minister of the National People's Security Service: Sérgio Vieira.

Minister in the President's Office: Armando Emílio Guebuza

Minister in the President's Office for Economic Affairs: Jacinto Soares Veloso.

Minister of Planning: Mário da Graça Machungo.

Minister of Justice: Ossumane Ali Dauto.

Minister of Finance: Rui Baltazar dos Santos Alves.

Minister of Education and Culture: Graça Simbine Machel.

Minister of Information: José Luís Cabaço.

Minister of Health: Pascoal Manuel Mocumbi.

Minister of Mineral Resources: Abdul Magid Osman.
Minister of Construction and Waters: Júlio Zamith Carrilho.
Minister of Foreign Trade: Joaquim Ribeiro de Carvalho.
Minister of Agriculture: João dos Santos Ferreira.
Minister of Industry and Energy: António José Lima Rodrigues Branco.
Minister of Ports, Railways and Merchant Marine: Luís Maria Manuel Alcântara Santos.
Minister of Posts, Telecommunications and Civil Aviation: Rui Lousã.
Minister of Internal Trade: Manuel Jorge Aranda da Silva.
Deputy Minister for Defence and Chief of General Staff of the Forces: Sebastião Marcos Mabote.

MINISTRIES

All Ministries are in Maputo.

PROVINCIAL GOVERNORS

Cabo Delgado Province: Alberto Joaquim Chipande.
Gaza Province: Aurélio Benete Manave.
Inhambane Province: José Pascoal Zandamela.
Manica Province: Manuel António.
Maputo Province: José Moiane.
Nampula Province: Feliciano Salomão Gundana.
Niassa Province: Mariano de Araújo Matsinhe.
Sofala Province: Marcelino dos Santos.
Tete Province: Eduardo Arão.
Zambézia Province: Mário da Graça Machungo.
City of Maputo: Alberto Massavanhame.

Legislature

ASSEMBLÉIA POPULAR

The 210-member People's Assembly comprises the 130-member Central Committee of Frelimo, the Executive Committee, the 15-member Permanent Commission, ministers and vice-ministers, provincial governors, representatives of the armed forces, representatives from each of the provinces and 10 other citizens. It was elected on 1–4 December 1977.

Political Organizations

Frente de Libertação de Moçambique (Frelimo): CP 4030, Avda 24 de Julho 1921, Maputo; f. 1962 by the merger of three existing nationalist parties: the União Democrática Nacional de Moçambique (UDENAMO), the Mozambique African Nationalist Union (MANU) and the União Africana de Moçambique Independente (UNAMI); Frelimo was reconstituted in 1977 as a 'Marxist-Leninist vanguard party'.

Political Bureau

Samora Moïsés Machel, Marcelino dos Santos, Joaquim Alberto Chissano, Alberto Joaquim Chipande, Armando Emílio Guebuza, Jorge Rebelo, Mariano de Araújo Matsinhe, Sebastião Marcos Mabote, Jacinto Soares Veloso, Mário da Graça Machungo, José Óscar Monteiro.

Central Committee Secretariat

Pres. Samora Moïsés Machel; Sec. for Economic Affairs Marcelino dos Santos; Sec. for Foreign Relations Joaquim Alberto Chissano; Sec. for Ideological Affairs Jorge Rebelo; other mems: José Luís Cabaço, Armando Panguene.

The following group is in armed conflict with Frelimo:

Resistência Nacional Moçambicana (Renamo): also known as Movimento Nacional da Resistência de Moçambique (MNR); guerrilla group, supported by South Africa until March 1984; operates 'Voice of Free Africa' radio station; Pres. and C-in-C Afonso Dlakama; Sec.-Gen. Evo Fernandes.

Judicial System

In May 1978 it was announced that pilot tribunals were to be established in each province by People's Tribunal Brigades. A

Revolutionary Military Tribunal was created in March 1979 to try breaches of the Security Laws. People's Courts are being set up at all administrative levels.

Religion

Most of the population follow traditional beliefs, but there are about 2,000,000 Muslims and 2,000,000 Christians (1,584,000 Roman Catholics in 1980) and a smaller Hindu community. After talks in 1982, the government established good relations with all religious leaders, with the exception of Roman Catholics.

Linhas Aéreas de Moçambique (LAM): CP 2060, Aeroporto Maputo, Maputo; tel. 731688; telex 6386; took over functions of DETA in 1980; operates domestic and international services to South Africa, Zambia, Zimbabwe, Lesotho, Tanzania, Bulgaria, France, the German Democratic Republic and Portugal; fleet: 2 Boeing 737-200, 1 Boeing 737-200C, 1 DC-10-30; CEO Capt. José Bacelar.

Empresa Nacional de Transportes e Trabalho Aéreo, EE (TTA): Aeroporto Internacional de Maputo, CP 2054, Maputo; scheduled services to 35 destinations, air taxi services, aerial photography, agricultural aviation and special services; Dir Gerónimo Albino Parruque.

Tourism

Empresa Nacional de Turismo (ENT): Avda 25 de Setembro 1203, Maputo; tourist industry; Dir George Welch.

NAMIBIA

(SOUTH WEST AFRICA)

Introductory Survey

Location, Climate, Language, Religion, Capital

Namibia lies in south-west Africa, with South Africa to the south and south-east, Botswana to the east and Angola to the north. The territory has a long coastline on the Atlantic Ocean. The narrow Caprivi Strip, between Angola and Botswana in the north-east, extends Namibia to the Zambezi river, giving it a border with Zambia. The climate is generally hot, although coastal areas have relatively mild temperatures. Most of the territory is subject to droughts and unreliable rainfall. The arid Namib Desert stretches along the west coast, while the easternmost area is part of the Kalahari Desert. The official languages are Afrikaans and English, although German is widely used and most of the African ethnic groups have their own languages. About 90% of the population are Christians. The capital is Windhoek.

Recent History

South West Africa became a German possession in 1884. The territory excluded a small area around the port of Walvis Bay, previously annexed by the United Kingdom and subsequently incorporated in South Africa. In 1914, when the First World War broke out, South African forces occupied South West Africa, and in 1915 the Germans surrendered the territory. In 1920 the League of Nations entrusted South Africa with a mandate to administer South West Africa. In 1925 South Africa granted a constitution giving limited self-government to European inhabitants only. No trusteeship agreement was concluded with the UN after the Second World War, and in 1946 the UN refused South Africa's request for permission to annex South West Africa. In 1949 the whites were given representation in the South African Parliament. In 1950 the International Court of Justice (ICJ) held that the area was still under international mandate and that South Africa should submit it to the control of the UN. South Africa refused to comply with this judgment. In October 1966 South Africa's security and apartheid laws were extended to South West Africa, retrospective to 1950.

Within South West Africa there was opposition to South Africa's policies of racial segregation, land appropriation, the contract labour system and restrictions on Africans' freedom of movement. These grievances led to the establishment of the South West Africa People's Organisation (SWAPO) in 1958 and the South West African National Union (SWANU) in 1959. These groups campaigned for an end to racial discrimination and for progress to full independence from South Africa. In October 1966 SWAPO announced that it would launch an armed struggle for the liberation of the territory.

SWAPO had a legal wing which was tolerated in Namibia, but repeated harassment led to the closure of the movement's offices at Windhoek and the dissolution of its executive council in June 1979. The exiled wing is led by the SWAPO President, Sam Nujoma, and controls the People's Liberation Army of Namibia (PLAN), whose guerrilla activities, operating from bases in Angola and Zambia, have steadily increased since its first operations in the 1960s. Conflict between PLAN and South African forces increased in 1980–82, with South Africa launching incursions into southern Angola in an attempt to destroy SWAPO's operational bases.

The interpretations of South Africa's obligations have been the subject of repeated controversy, and South Africa has been consistently criticized at the UN over its extension of apartheid to the territory. The UN General Assembly voted to terminate South Africa's mandate in October 1966, set up a UN Council for South West Africa in May 1967, and changed the name of the territory to Namibia in June 1968. The ICJ considered the dispute five times, and in 1971 South Africa's presence was ruled illegal.

In 1972 the UN Security Council initiated contacts with South Africa in an attempt to resolve the deadlock over Namibia. These were abandoned in December 1973, and the Security Council ended contact with South Africa. At the same time the UN General Assembly recognized SWAPO as 'the authentic representative of the Namibian people' and appointed the first UN Commissioner for Namibia to carry out 'executive and administrative tasks'.

During 1973 and 1974 South Africa became more flexible, influenced by events in Rhodesia (now Zimbabwe) and in the former Portuguese territories of Angola and Mozambique. The South African Prime Minister, B. J. Vorster, tried to create a multiracial Advisory Council for the territory, but it was boycotted by SWAPO and most influential Africans. In November 1974 the all-white South West Africa Legislative Assembly organized a multiracial constitutional conference on the territory's future which began at the Turnhalle, in Windhoek, in September 1975, attended by 134 delegates representing the territory's 11 main ethnic groups. Neither the UN nor the Organization of African Unity (OAU) recognized the conference, owing to its ethnic and non-democratic basis. Although invited, the legal wing of SWAPO refused to attend the conference. In January 1976 the UN Security Council again ordered South Africa to withdraw its forces from Namibia and to allow free elections.

In August 1976 the constitutional committee of the Turnhalle conference announced 31 December 1978 as a target date for Namibian independence, that it should be a unitary state (a point previously resisted by the white delegates) and that an interim government was to be formed as soon as a constitution had been drafted. These proposals received South African backing but were rejected by SWAPO, the UN and the OAU, which stated that SWAPO was entitled to foreign military assistance in its struggle to liberate Namibia. In December the UN Committee on the Ending of Colonialism declared its support for the guerrilla war.

In March 1977 the Turnhalle conference agreed on a draft constitution for an interim government, pending the granting of independence by South Africa in December 1978. After endorsement in May 1977 by 95% of voters in a whites-only referendum, the proposals were abandoned in June 1977, following pressure from the UN Security Council. In September 1977 South Africa appointed an Administrator-General (see below) to govern the territory, and promised that free elections would be held in 1978. Early in 1978 talks were held between South Africa, SWAPO and the 'contact group' comprising the five Western members of the Security Council. In March the Western powers presented proposals for an internationally recognized Namibian settlement, including the holding of UN-supervised elections, the reduction in the numbers of South African troops in Namibia and the release of political prisoners. These proposals, conditionally accepted by both South Africa and SWAPO, became enshrined in Security Council Resolution 435 in September.

However, South Africa pressed forward with its own internal solution for Namibia by holding an election for a Constituent Assembly in December. The election, regarded by the Western powers as invalid, was contested by five parties, but boycotted by SWAPO, the SWAPO-Democrats and the Namibian National Front. Of the 50 seats in the Assembly, 41 went to the Democratic Turnhalle Alliance (DTA), a coalition of 11 conservative bodies representing various ethnic groups. In May 1979 South Africa unilaterally established a legislative National Assembly, without executive powers, from the existing Constituent Assembly.

An attempt to establish a demilitarized zone along the border

between Angola and Namibia faltered in 1980, when South Africa refused to allow SWAPO to maintain bases in such a zone. The UN succeeded in bringing all parties to a conference at Geneva in January 1981, but negotiations to reach a cease-fire and to proceed to UN-supervised elections broke down over what South Africa interpreted as the UN's pro-SWAPO bias. Meanwhile, South Africa continued to develop internal governmental institutions and extended the executive powers of the interim legislature in pursuit of an internal settlement. Later in 1981 the Western powers sought agreement from the Namibian parties and nearby African countries to commence a three-phase independence plan, which would give constitutional guarantees to minority groups in Namibia within the framework of Resolution 435. This initiative faltered over South Africa's insistence, supported by the US Government, that any withdrawal of South African forces must be linked to the withdrawal of Cuban troops from Angola. The influence of the Western powers' 'contact group' on the independence issue gradually diminished during 1983. At a UN conference on Namibia, held in April, the group was heavily criticized by African delegates, and Sam Nujoma called for it to disband. Most of the criticism was directed against the US Government's support for South Africa's insistence on the withdrawal of the Cuban troops, and this also caused disagreement within the 'contact group', with France condemning the US stance and eventually suspending its membership of the group in December 1983.

The linking of the Cuban withdrawal from Angola to the implementation of Namibian independence is unacceptable to both the Angolan Government and the UN, and disagreement over this issue continued to impede the progress of initiatives towards independence in 1982 and 1983. Delegations from South Africa and Angola held talks in Cape Verde in December 1982 and February 1983, aimed at negotiating a cease-fire on the Angola–Namibia border, but no conclusive agreement was reached. In August 1983 the UN Secretary-General visited South Africa, Angola and Namibia on a UN Security Council mission and held talks concerning the implementation of Resolution 435. The talks resulted in agreement with South Africa concerning the electoral system and the composition of the UN peace-keeping forces to be employed during Namibia's transition to independence, but did not cover the issue of the Cuban withdrawal, and did not succeed in setting a date for the start of the implementation of independence.

Although South Africa continued to participate in negotiations on Namibia's independence, the Pretoria Government, nevertheless, also took measures to consolidate the interim administration in Namibia. A Ministerial Council was formed in July 1980, with Dirk Mudge, leader of the DTA, as Chairman. This Council assumed much of the Administrator-General's executive power in September 1981. The DTA was seriously weakened in February 1982 by the resignation of its President, Peter Kalangula, leader of the only significant Ovambo movement other than SWAPO. Mudge, having been in serious disagreement with the South African Government over the future role of the DTA in the territory for several months, resigned in January 1983, causing the dissolution of the Ministerial Council. South Africa, through the Administrator-General, dissolved the National Assembly and resumed direct rule of Namibia. In February Dr Willem van Niekerk took office as Administrator-General, replacing Danie Hough, and in April he held talks with internal political parties, aimed at re-establishing an interim internal administration. In June Dr van Niekerk promulgated a new State Council, designed to comprise 50 representatives from the internal political parties, to sit for an initial period of six months and to draw up a constitution. The proposed Council was approved by South Africa but failed to gain much support from the political parties, and was condemned by SWAPO. The plan for its establishment has not yet been implemented.

In November 1983 the Multi-Party Conference (MPC), a grouping initially comprising seven internal political parties, was launched. Although in February 1984 the MPC declared its commitment to securing Namibian independence, and to the implementation of Resolution 435, it was denounced as 'another South African puppet show' by SWAPO, which stated that under no circumstance would it agree to participate in the MPC. Throughout 1984 SWAPO continued to denounce the grouping, which appeared to be increasingly promoted by South Africa. It is thought that South Africa hoped to reach a settlement on the independence issue outside the framework of Resolution 435, by encouraging the internal political parties to come to an agreement, and that Pretoria was also promoting the MPC in a bid to reduce SWAPO's dominance in any future post-independence government for Namibia, by providing an alternative political force which could also participate in the government. These views were partly confirmed when SWAPO reportedly claimed in May 1984 that, at a secret meeting with South African representatives in January, SWAPO delegates had rejected a South African proposal for setting up a 'government of national unity', involving SWAPO and other Namibian political groups.

In April 1984, contrary to policies outlined in Resolution 435, the MPC published a bill of human rights, designed to provide the basis for a future constitution for Namibia, also supposedly to be drafted by the MPC. In May the MPC participated in talks held in Lusaka, Zambia, on the independence issue (see below), but disagreement between the grouping and SWAPO delegates contributed to the failure of the talks. A delegation of MPC representatives embarked on a tour of foreign states, which included talks with the US Secretary of State, following the Lusaka conference, in a bid to increase the grouping's political standing. In October the DTA, a member of the MPC, called for Namibia to be granted effective self-government and direct control of constitutional development, and for a review of Resolution 435. In November SWAPO claimed that it had rejected an invitation to participate in talks with the Administrator-General and the MPC, aimed at drafting a constitution for Namibia outside the framework of Resolution 435.

In January 1985 a member of the MPC stated that the grouping would continue to negotiate with South Africa for a settlement on the territory's independence, even if SWAPO refused to participate in such negotiations. In February SWAPO condemned an alleged secret plan, which it claimed had been devised by the MPC and South Africa, to set up an interim central government for Namibia by June 1985. SWAPO claimed that, under the plan, the MPC would assume responsibility for the government of the territory, with the exception of defence matters and foreign affairs.

Although clearly seeking ways of reaching a settlement on Namibia outside the framework of Resolution 435, South Africa continued during 1984 to negotiate on the independence issue with SWAPO and Angola. In February 1984 hopes for a settlement grew when South Africa and Angola agreed to a cease-fire on the Angola–Namibia border, and set up a joint commission to monitor the withdrawal of all South African troops from Angola. Under the agreement, Angola undertook to ensure that neither Cuban nor SWAPO forces would move into the areas vacated by the South African troops. Sam Nujoma stated that SWAPO would abide by the agreement, but that the war in Namibia would continue, and that SWAPO would not lay down its arms until there was a cease-fire in Namibia itself and until South Africa had agreed to UN-supervised elections. In January 1984 SWAPO stated that it was prepared to hold talks with South Africa concerning a possible cease-fire in Namibia, but there were reports that up to 800 SWAPO guerrillas had infiltrated into Namibia after the South Africa–Angola agreement.

None the less, prospects for a settlement on the independence issue seemed more favourable, and in March 1984 South Africa released a co-founder of SWAPO, Herman (subsequently known as Andimba) Toivo ja Toivo, after 16 years of imprisonment. It was thought that this measure may have been intended to create a power struggle within SWAPO between Toivo and Nujoma, but Toivo declared his support for the SWAPO leadership, and was subsequently elected Secretary-General of the organization in August.

In March 1984 South Africa called for a regional conference of all the parties involved in the Namibian independence issue, including the MPLA Government of Angola and the Angolan rebel movement, UNITA, with the aim of securing peace in the region. This conference did not materialize, but in May South Africa released 54 members of SWAPO who had been detained for six years without trial. In the same month, talks on the independence issue were held in Lusaka between Dr van Niekerk, SWAPO representatives and members of the MPC, under the joint chairmanship of President Kaunda of Zambia and Dr van Niekerk. However, the talks ended inconclusively,

as a result of disagreement between SWAPO and the MPC, and South Africa's continued insistence on the 'linkage' issue. In June, during a tour of European states, the South African Prime Minister, P. W. Botha, proposed that South Africa would withdraw completely from Namibia within two months, providing that one of the members of the Western 'contact group' would take over the administration and defence of the territory, which South Africa is finding an increasing financial burden. The offer, which was linked to a Cuban withdrawal from Angola, met with an unfavourable response from the Western political leaders whom Botha visited.

Unproductive talks between South African representatives and Dr Chester Crocker, the US Assistant Secretary of State for African Affairs, held in Italy in June, were followed by a bid to revive the Lusaka talks in July, when Dr van Niekerk met SWAPO representatives in Cape Verde for further negotiations on Namibian independence. However, the talks proved inconclusive, as a result of disagreement over the 'linkage' issue, and SWAPO's refusal to agree to a settlement outside the framework of Resolution 435. South Africa held further talks with US and Angolan delegates during September and October, and there were fresh hopes for a settlement when President dos Santos of Angola proposed a peace plan for Namibia, involving a phased withdrawal of most of the Cuban forces in Angola. Under the plan, the Cuban withdrawal would begin only after the implementation of Namibian independence was under way, and the number of South African troops in Namibia had been reduced to 1,500, and would also be conditional on the withdrawal of the remaining South African forces from Angola. However, South Africa's counter-proposals to the plan in November were rejected by Angola, because of disagreement over the timing of the Cuban withdrawal.

By early 1985 there had been little practical progress on the independence issue. Angola and South Africa remained deadlocked over the withdrawal of the Cuban forces, and, in spite of the cease-fire agreement of the previous year, South African forces remained within the Angolan border, allegedly because of SWAPO's continued guerrilla activity in the area. There were reports in late 1984 and early 1985 that SWAPO guerrillas were once again massing in the Angola–Namibia border area, preparatory to launching their annual rainy-season offensive into Namibia. South Africa held further talks with Dr Crocker in February 1985, but once more these were inconclusive, and by March no settlement on the territory's independence had been reached.

Government

In September 1977 the South African Government appointed an Administrator-General with executive authority. A 12-member Ministerial Council was formed in July 1980. In September 1981 the Council was increased to 15 and given executive authority over all matters except constitutional issues, security and foreign affairs. Both the Ministerial Council and the 72-member National Assembly were dissolved in January 1983, and executive and legislative authority were returned to the Administrator-General. Elections for 11 'second-tier' legislative assemblies, according to ethnic group, were held in November 1980. No poll was held in the Ovambo region, where 47% of the Namibian population live, because of the guerrilla war.

Defence

In 1984 there were an estimated 90,000 South African and South African-trained troops stationed in the territory. The South African Government transferred some of its responsibility for defence to the Namibian National Assembly in 1980, and the South West Africa Territory Force (SWATF) was established. This comprised some 14,000 troops in July 1984. In October compulsory conscription into the SWATF was introduced for all Namibian men aged between 17 and 54 years. There are also police units which specialize in anti-insurgency operations and patrol the border area. The People's Liberation Army of Namibia, the guerrilla army of SWAPO, is thought to number about 8,000.

Economic Affairs

Namibia is rich in minerals, particularly diamonds, uranium, copper, lead, zinc, tin, lithium, manganese, silver, tungsten, cadmium and vanadium, and the territory is Africa's fourth largest mineral exporter. The mining sector provided 47% of Namibia's gross domestic product (GDP) in 1979, and about 50% in 1980. However, the proportion declined to 27% in 1983. Mining is the largest single contributor to the territory's export earnings, and minerals accounted for 88% of Namibia's total exports in 1983. The total value of mineral sales in 1984 was estimated at R700m. ($567m.), equivalent to about 80% of export earnings. However, the sector has been adversely affected in recent years by a decline in world market prices. The contribution of mining to state revenue declined from R142m. in 1980 to R20m. in 1983, although this was expected to improve, to R73m., in 1984. Diamonds are the most important of the minerals produced in Namibia, and the territory has the world's richest alluvial deposits of gem diamonds. About 98% of diamonds mined in Namibia are of gem quality, and Consolidated Diamond Mines (CDM) of South West Africa, which is 98.3% owned by De Beers Consolidated Mines Ltd, is the world's largest producer of gem diamonds. However, a weak world diamond market has resulted in a reduction in Namibia's output, which fell from 2m. carats in 1977 to 1.56m. carats in 1980, and to 963,000 carats in 1983. Taxes on diamond production produced 40% of state revenue in 1981/82 but, after a slump in the diamond market, only 7.5% in 1982/83. Diamond sales earned R399m. in 1980 and R210m. in 1981, but sales for 1982 were estimated at only R180m.

The huge, although low-grade, uranium mine at Rössing—the largest open-pit uranium mine in the world—is being jointly developed by the South African Industrial Development Corporation and a British company, Rio Tinto-Zinc, but in February 1983 the United Kingdom announced that it would stop buying uranium from Namibia when its current contract with the Rössing mine expired in 1984. The mine produced 5,200 metric tons of uranium in 1980, worth an estimated R280m., but output declined to 4,900 tons in 1982, and to about 4,500 tons in 1983. Uranium sales fell by 20.6% in 1983, owing to a glut in the world market. However, the Rössing mine remains one of Namibia's most important sources of revenue, and in 1984 it was estimated that uranium from Rössing accounted for about 40% of Namibia's total earnings from mineral sales. The mine began paying tax in 1984, and, at its current capacity level, its contribution to tax revenue is eventually expected to reach about R100m. per year. General Mining's Langer Heinrich uranium project, about 80 km (50 miles) south of Rössing, is awaiting development. Its ore deposits, although smaller than Rössing's, are believed to be of better quality.

Copper, lead and zinc are mined by the US-owned Tsumeb Corporation, although, with the exception of copper and lead, all minerals are processed outside Namibia. Mine production of copper increased from 44,000 tons in 1981 to 52,000 tons in 1983, but, as a result of poor world markets for base metals, Tsumeb Corporation closed one mine, and reduced production at others, during 1983–84. Namibia is also believed to have significant reserves of coal, iron ore and platinum, but these have yet to be assessed. Considerable offshore reserves of hydrocarbons have been discovered, in an area known as the Kudu field, and in January 1985 South Africa reportedly sanctioned the final evaluation, and subsequent exploitation, of the field's natural gas reserves.

The Ruacana hydroelectric scheme, developed jointly with Angola, is crucial to the prospects of the mining industry. The first stage of the scheme became operational in 1977, although it will not reach full capacity until the Angolan Government agrees to allow diversion of part of the Cunene river through the power plant. The potential generating capacity of the scheme is estimated at some 1,530 MW.

Potentially, Namibia has one of the richest fisheries in the world, and the fishing industry, based on large reserves of pilchards, was formerly second in importance to mining. However, following serious overfishing by foreign trawlers, stringent restrictions were introduced in 1978, and have since remained in force. Landings of pilchard fell catastrophically from 545,000 metric tons in 1975 to 10,000 tons in 1980, recovering slightly to 56,500 tons in 1984. Revenue from the export of canned pilchards fell from R50m. in 1976 to virtually nothing in 1978. The decline in the catch of pilchards has been partially offset by increased landings of other species. The fishing sector usually accounts for only about 2% of GDP, and the growth rate of the fishing industry declined by 7.4% in 1983. In November 1979

Namibia's territorial waters were extended to 200 nautical miles (370 km) as a further protection against overfishing, but in 1984 it was estimated that foreign boats were still taking catches of about 1m. tons of fish, worth a total of about R500m., per year.

Namibia's major agricultural activities are the processing of meat and other livestock products, and over 90% of agricultural output comprises commercial livestock production. Of total revenue from agriculture, beef accounts for 50%, karakul pelts 33%, and mutton and pork 15%. Among the crops grown in Namibia are maize, millet and groundnuts. Agriculture suffered from a drought between 1978 and 1982, and the real value of commercial agricultural output declined by 40% during this period. Agricultural cash income fell from R190m. in 1982 to R142m. in 1983. Of the 1983 total, beef contributed R77.4m., mutton R24.2m., and karakul pelts R11.9m. The drought, which in some areas has been continuous since 1978, has reduced the numbers of livestock on Namibia's ranches to about one-third of previous normal levels, and has contributed, along with a decline in world demand for karakul pelts, to a drastic depletion of the flocks of karakul sheep. These had declined by 1984 to some 2m., from a total of about 5m. in 1978. The number of karakul pelts produced fell from about 3m. in 1980 to some 1.5m. in 1983. War, drought, overgrazing and unscientific farming methods have all contributed to a decline in the agricultural sector, and agriculture's contribution to GDP fell from about 9% in 1982 to 6.5% in 1983. The combined share of the primary sector (mining, agriculture and fishing) in GDP declined from 43% in 1982 to 34% in 1983. Manufacturing output is negligible, contributing only 4% of gross national product in 1980, accounting for less than 5% of GDP in 1983, and employing about 10% of the working population.

The real growth rate in GDP for 1970–79 averaged 6% per annum, and GDP was estimated at R1,200m. in 1979. However, the drought, war, and depressed world markets for minerals have all adversely affected the economy. GDP totalled R1,432m. in 1981, but it declined by 7%, in real terms, in 1983. In 1981 tax rates 25% lower than the equivalent rates in South Africa were introduced for foreign investors. Namibia's increasingly serious economic problems led the South African Government to subsidize R215m. directly to the budget deficit of R410m. in 1982/83. Real government spending was cut in 1982/83, and all new capital projects were suspended. South Africa agreed to a direct subsidy of R241m. for the 1983/84 budget but, in spite of this, the deficit reached an estimated R228m. by the end of the financial year. Namibia's complex system of government has proved increasingly costly, and in 1983 state expenditure was estimated to amount to 37% of GDP. South Africa was to provide a direct grant of R318m. for the 1984/85 budget. Total revenue for that year was estimated at R967m., slightly less than the projected revenue for 1983/84 of R975m. Expenditure in 1984/85 was expected to rise to R1,177m., from R1,036m. in the previous year. South Africa was expected to spend a total of R1,143m. ($760m.) on Namibia in 1984/85, nearly 42% of it—some R480m.—on defence. South Africa is the territory's major supplier of consumer goods—in 1984 it was estimated that only about 15% of Namibia's locally produced goods remain within the territory—and takes most of Namibia's exports.

Transport and Communications

South African Transport Services operate 2,340 km of railway track in Namibia. Control of all transport services allied to the railways, with the exception of rolling stock, was expected to be assumed by Namibia in April 1985. There are 41,361 km of roads, including 4,175 km of tarred roads maintained by the Department of Transport. The construction of the territory's network of major roads is virtually complete. Most improvements are concentrated on benefiting the southern, white-occupied zone. The port of Walvis Bay, the possession of which is disputed by South Africa and Namibia, is linked to the main overseas shipping routes and has been extended. It is the only deep-water port, although there is an alternative harbour at Lüderitz. The international airport is at Windhoek. There are a number of other airports dispersed throughout the territory, as well as numerous landing strips.

Social Welfare

In 1980 Namibia had 116 hospitals and clinics, with a total of 7,759 beds.

Education

The South African Government took control of education in 1921. A large-scale education development plan began only after 1964, with a Five-Year Plan in accordance with the Bantu Education Act of 1953. Education is based on apartheid, with separate facilities for different ethnic groups. In 1978 it was estimated that 65% of adult black Namibians were illiterate. In 1980 there were 228,287 pupils in 932 racially segregated schools, and in 1983 there were 272,615 pupils in 1,100 schools, representing more than 80% of the potential school population in the group comprising children aged between seven and 18 years. In 1984 there were 317,342 pupils attending 1,090 schools. Various schemes for informal adult education are also in operation in an effort to combat illiteracy among youths and adults not attending schools.

Tourism

There are 11 game parks and resorts operated by the Government. Wildlife is Namibia's main tourist attraction, and the Etosha Pan, one of the finest game reserves in Africa, attracts many tourists. In 1983 it was estimated that Namibia receives about 400,000 visitors each year, and the Namibian administration planned to spend about R12m. in that year on improving existing tourist facilities, and on marketing in South Africa and abroad. A further sum of between R30m. and R40m. was to be spent on creating more nature and game reserves.

Public Holidays

1985: 16 May (Ascension), 31 May (Republic Day), 5 September (Settlers' Day), 10 October (Kruger Day), 16 December (Covenant Day), 25, 26 December (Christmas).

1986: 1 January (New Year's Day), 28–31 March (Easter).

Weights and Measures

The metric system is in use.

Currency and Exchange Rates

South African currency: 100 cents = 1 rand (R).

Exchange rate (31 December 1984):
£1 sterling = 2.2985 rand;
US $1 = 1.988 rand.

(sea-borne freight traffic at Walvis Bay, '000 metric tons)

1982/83: Goods loaded 252; Goods unloaded 942.

CIVIL AVIATION

J. G. Strijdom Airport (1982/83): To South Africa 75,315 passengers, from South Africa 75,434 passengers; 9,931 arrivals on international flights, 10,099 departures.

Eros Airport (1982/83): 51,921 passengers (arrivals and departures).

Education

(1984)

	Schools	Pupils
Pre-primary	23	3,909
Primary	1,057	252,759
Secondary		59,533
Special education	5	935
Technical and agricultural	5	206

There was a total of 9,903 teachers in 1984.

Directory

Administration

(March 1985)

The UN General Assembly terminated South Africa's mandate in October 1966, and established a UN Council for South West Africa in May 1967. The name of the territory was changed to Namibia in June 1968.

UN Commissioner for Namibia: Brajesh Chandra Mishra (took office 1 April 1982).

Commander (designate) of UN Transitional Assistance Group: Lt-Gen. D. Prem Chand (took office January 1980).

In September 1977 the South African government appointed an Administrator-General with executive authority. In July 1980 a 12-member Ministerial Council was formed, and in September 1981 this body was increased to 15 members and given executive authority over all matters except constitutional issues, security and foreign affairs. The Ministerial Council was dissolved in January 1983, after the resignation of its Chairman, Dirk Mudge. Executive and legislative powers were then returned to the Administrator-General. A Chief Executive Officer was appointed in February 1983 to assist the Administrator-General in performing his duties, and in that month a number of the Administrator-General's powers were delegated to the Chief Executive Officer.

Administrator-General for the Territory of South West Africa: Dr Willem van Niekerk (took office 1 February 1983).

Chief Executive Officer: J. Grebe (took office February 1983).

Legislature

NATIONAL ASSEMBLY*

President: Johannes Skrywer.

Election, 4–8 December 1978

Party†	Votes	Seats‡
Democratic Turnhalle Alliance (DTA)	268,130	41
Action Front for the Retention of Turnhalle Principles (AKTUR)§	38,717	6
Namibia Christian Democratic Party	7,072	1
Herstigte Nasionale Party (HNP)	5,781	1
Rehoboth Liberation Front§	4,564	1
Total	326,264	50

* The Administrator-General dissolved the National Assembly on 19 January 1983, and all legislative powers were returned to the Administrator-General.

† The Namibia National Front (NNF), the South West Africa People's Organisation (SWAPO) and the SWAPO-Democrats refused to participate in the election.

‡ The number of seats was increased to 72 in September 1981, the further 22 being nominated by 11 ethnic representative bodies.

§ Subsequently dissolved.

Political Organizations

Caprivi National Union (CANU): Caprivians; Leader Mishake Muyongo.

Christian Democratic Action (CDA): Windhoek; f. 1982; supported by Ovambos and former supporters of National Democratic Party; Leader Peter Kalangula.

Christian Democratic Coalition: Hereros; Leader Rehabeam Uazukuani.

Damara Council (DC): Damaras; Leader Justus Garoeb.

Democratic Turnhalle Alliance (DTA)*: POB 173, Windhoek 9000; f. 1977; coalition of 11 conservative European, Coloured and African political groupings seeking independence on an ethnic basis; the DTA has not formally constituted itself as a political party; Pres. Kuaima Riruako; Chair. Dirk Mudge. Includes:

Bushman Alliance (BA): Bushmen; Leader Geelbbooi Kashe.

Caprivi Alliance (CA): Caprivians; Leader Richard M. Mamili.

Christian Democratic Union (CDU): Coloureds; Leader A. F. Kloppers.

Namibia Democratic Turnhalle Party (NDTP): Namas; Leader Daniel Luipert.

Nasionale Demokratiese Eenheids Party (NDEP): Kavangos; Leader Sebastiaan Kamwanga.

National Democratic Party (NDP): Ovambos; Leader Tara Imbili.

National Unity Democratic Organisation (NUDO): Hereros; Leader Chief Kuaima Riruako.

Rehoboth Baster Association (RBA): Rehoboth Basters; Leader Ben Africa.

Republican Party: Europeans; Leader Dirk Mudge.

Seoposengwe Party: Tswanas; Leaders Chief Constance Kgosemang, Gregor Tibanyane.

South West Africa People's Democratic United Front (SWAPDUF): Damaras; Leader Max Haraseb.

Herstigte Nasionale Party (HNP): Windhoek; extreme right-wing group seeking Namibia's incorporation into South Africa; Leader Sarel Becker.

Interessengemeinschaft Deutschsprachiger Südwester (IG): POB 1208, Windhoek 9000; German-speaking group supporting independence for Namibia; Pres. Dr W. Weitzel; Chair. Klaus J. Becker.

Labour Party: Windhoek; expelled from DTA; Coloureds; Leader Dawid Bezuidenhout.

Mbanderu Council: Hereros; Leader Chief Nguvauha Munjuku.

Namibia Christian Democratic Party: POB 690, Tsumeb 9000; tel. (0671) 3573; telex 56-3447; f. 1978; supports Social Christian form of capitalism and condemns racial discrimination; mainly Coloured support; Leader J. K. N. Röhr.

Namibia Independence Party (NIP): Coloureds; Leaders Charlie Hartung, Othilie Abrahams.

Namibia National Independence Party: Kavangos; Leader Rudolf Ngondo.

Namibia People's Liberation Front (NPLF): Damaras and Namas; Leader Kefas Conradie.

National Party (NP)*: Europeans; Leader Kosie Pretorius.

Rehoboth Bevryder Demokratiese Party (RBDP)*: Leader Hans Diergaardt; coalition of the **Rehoboth Bevrydingsparty** (Leader Hans Diergaardt) and the **Rehoboth Democratic Party** (Leader K. G. Freigang).

South West Africa National Union (SWANU)*: Hereros; Leader Moses Katjiuongua†.

South West Africa People's Organisation of Namibia (SWAPO): f. 1958; aims at removal of racial discrimination and full and unconditional independence for Namibia, and seeks to establish a classless society founded on the alliance of the worker and peasant masses and on state ownership of all means of production and distribution; had a legal wing in Namibia supporting free democratic electoral process until the closure of its Windhoek offices in June 1979. There is also an exiled wing which commands the guerrilla forces of the People's Liberation Army of Namibia (PLAN); is recognized by the OAU and the UN as the 'authentic representative of the Namibian people'; Pres. Sam Nujoma (based in Lusaka, Zambia); Vice-Pres. Pastor Hendrik Witbooi; Sec.-Gen. Andimba Toivo ja Toivo; Nat. Chair. David Meroro.

SWAPO-Democrats (SWAPO-D)*: POB 20855, Windhoek 9000; f. 1978; Ovambos; SWAPO breakaway group; negotiations for a merger with the NNF broke down in April 1980; Pres. Andreas Shipanga; c. 50,000 mems.

Volksparty van Rehoboth: Rehoboth Basters; Leader Stellmacher Dentlinger Beukes.

* In December 1984 these parties were members of the Multi-Party Conference (MPC), a grouping committed to securing Namibian independence. The Namibia Christian Democratic Party left in December 1983, and the Damara Council left in March 1984. The Labour Party and the Rehoboth Liberation Front were also members of the MPC.

† A dissident faction of SWANU is reported to exist, led by Kuzeeko Kangueehi, which opposes SWANU's membership of the MPC.

Judicial System

The Territory is divided into 24 magisterial districts, each with one or more lower courts. Magistrates and other court personnel operate from three centres: Keetmanshoop for southern areas, Windhoek for central areas and Tsumeb for northern areas. Appeals from the magistrates' courts lie to the Supreme Court of South West Africa, which has its seat in Windhoek.

The Supreme Court of South West Africa:

Judge-President: H. J. BERKER.

Puisne Judges: K. BETHUNE, C. J. MOUTON, G. J. C. STRYDOM.

Attorney-General: T. N. LOUW.

Religion

It is estimated that about 90% of the population are Christians. The principal Churches are Lutheran (478,000 adherents), Dutch Reformed (50,000 adherents), Roman Catholic (253,000 adherents), Anglican (90,000 adherents) and Methodist (40,000 adherents).

CHRISTIANITY

The Anglican Communion

Bishop of Namibia: Rt Rev. JAMES H. KAULUMA, POB 57, Windhoek 9000.

Dutch Reformed Church

Dutch Reformed Church of South West Africa/Namibia: POB 389, Windhoek 9000; Moderator Rev. P. A. DU TOIT.

Evangelical Lutheran

Non-White Churches

Ovambo-Kavango Church: Bishop Dr KLEOPAS DUMENI, Private Bag 2018, Ondangwa 9000; tel. (06762) 41; telex 56-3257; f. 1870.

United Evangelical Lutheran Church in South West Africa (Rhenish Mission Church): POB 5069, Windhoek 9000; tel. 24533; telex 3107; f. 1967; Pres. Präses H. FREDERIK.

White Church

German Evangelical Lutheran Church in South West Africa: POB 233, Windhoek 9000; tel. 24294; mems 12,000; Pres. Rev. Landespropst W. BLANK.

Methodist

African Methodist Episcopal Church: Rev. KARVARA, POB 558, Windhoek.

The Roman Catholic Church

Titular Bishop of Troyna: Most Rev. Bishop BONIFATIUS HAUSHIKU, POB 2328, Windhoek 9000; tel. (061) 23430.

INSURANCE

African Eagle Life Assurance Society Ltd: Windhoek; Man. B. T. HATTINGH.

Mutual & Federal Insurance Co Ltd: Mutual Bldg, Kaiser St, POB 151, Windhoek 9000; Man. H. K. BORCHARDT.

Protea Assurance Co Ltd: Windhoek.

Prudential Assurance Co: POB 365, Windhoek.

Trade and Industry

SOUTH WEST AFRICAN DEVELOPMENT ADVISORY COUNCIL

Various advisory boards have been established by the administration to advise it on the development of industries, and to promote them. The most important are the Karakul Industry Advisory Board, the Diamond Board and the Fisheries Development Board. In September 1978 the National Development Corporation of South West Africa was established to take over development and planning from existing state departments.

CHAMBER OF COMMERCE

Chamber of Commerce and Industries of South West Africa/Namibia: POB 191, Windhoek 9000; tel. 34151; f. 1920; Pres. KURT BOHME; 150 mems.

LABOUR ORGANIZATIONS

SWANLA, the South West African Native Labour Association at Grootfontein, and the recruiting organization to obtain African labour from the north under contract for mines, fisheries and farms, was abolished as from 31 January 1972. It was replaced by South African government recruiting stations at Ondangua in Ovambo, and Runtu in Kavango and a system of labour bureaux in all towns and tribal areas. In July 1978 membership of trade unions was legalized for workers of all races.

Transport

RAILWAYS

South African Transport Services: Paul Kruger Bldg, Wolmarans St, Johannesburg 2001, South Africa; telex 424205; railways in Namibia are administered by South African Transport Services, although Namibia was expected to assume control of all transport facilities associated with the railways, with the exception of rolling stock, in April 1985.

The main lines are from De Aar in the Republic of South Africa to Lüderitz on the coast, Windhoek to Walvis Bay and Tsumeb; total rail tracks in Namibia are 2,340 route-km.

ROADS

The road network comprised 41,361 km of roads, including 4,175 km tarred, in 1984. In that year the budget for road maintenance and construction was R90m.

SHIPPING

Walvis Bay and Lüderitz are the only ports. Walvis Bay harbour has been extended and is the only deep-water port. It handles approximately 1.3m. tons of cargo per year.

CIVIL AVIATION

Namib Air (Pty) Ltd: POB 731, Eros Airport, Windhoek 9000; f. 1946; Namibian interim government bought 51% holding in 1982; domestic flights and services to South Africa; Chair. J. N. G. Lerm; Exec. Dir J. Lourens; fleet of 1 DC-3, 1 Cessna 414, 1 Cessna 404, 1 Cessna 402, 5 Cessna 310, 2 Cessna 210, 2 Cessna 182 RG, 1 Piper Chieftain, 1 Piper Seneca and 2 Convair CV 580.

NAURU

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of Nauru is a small island in the central Pacific Ocean, lying about 40 km (25 miles) south of the Equator and about 4,000 km (2,500 miles) north-east of Sydney, Australia. Its nearest neighbour is Banaba (Ocean Island), in Kiribati, about 300 km (185 miles) to the east. The climate is tropical, with a westerly monsoon season from November to February. The average annual rainfall is 455 mm (18 in), but actual rainfall is extremely variable. Of the total population in 1977, 57.5% were Nauruans. Their language is Nauruan, but English is also widely understood. The majority of Nauruans are Christians, mostly adherents of the Nauruan Protestant Church. The national flag (proportions 2 by 1) is blue, divided by a horizontal gold bar, with a 12-pointed white star at the lower hoist. The island state has no official capital.

Recent History

Nauru was annexed by Germany in 1888. In 1914, shortly after the outbreak of the First World War, the island was captured by Australian forces. It continued to be administered by Australia under a League of Nations mandate (granted in 1920) which also named the United Kingdom and New Zealand as co-trustees. Between 1942 and 1945 Nauru was occupied by the Japanese. In 1947 the island was placed under United Nations Trusteeship, with Australia as the administering power on behalf of the Governments of Australia, New Zealand and the United Kingdom. The UN Trusteeship Council proposed in 1964 that the indigenous people of Nauru be resettled on Curtis Island, off the Queensland coast. This offer was made in anticipation of the progressive exhaustion of the island's phosphate deposits. The Nauruans elected to remain on the island, and studies were initiated in 1966 for the shipping of soil to the island to replace the phosphate rock. Nauru received a considerable measure of self-government in January 1966, with the establishment of Legislative and Executive Councils, and proceeded to independence on 31 January 1968. Under an agreement announced in November 1968, Nauru became a 'special member' of the Commonwealth, not represented at meetings of Heads of Government.

The Head Chief of Nauru, Hammer DeRoburt, was elected President in May 1968 and re-elected in 1971 and 1973. Dissatisfaction with his increasingly personal rule led to the parliamentary election of a new President, Bernard Dowiyogo, in December 1976 and the formation of a new Cabinet. Dowiyogo later resigned, but was re-elected President after a general election in November 1977. DeRoburt's supporters, however, forced Dowiyogo to resign in April 1978 by defeating a legislative proposal concerning phosphate royalties. Lagumot Harris succeeded him but resigned three weeks later, when Parliament rejected a finance measure, and DeRoburt was again elected President. He was re-elected in December 1978, in December 1980 and in May and December 1983.

Government

Legislative power is held by a unicameral Parliament, with 18 members elected by universal adult suffrage for up to three years. Executive authority is vested in a Cabinet, which consists of the President of the Republic, elected by the Parliament, and ministers appointed by him. The Cabinet is collectively responsible to Parliament.

Economic Affairs

The island's economy is based on the extraction of phosphate rock, derived from rich deposits of guano, which constitutes about four-fifths of the area. The mining of phosphates is conducted mainly by indentured labour. Exports of phosphate rock were 1.8m. metric tons in 1978/79 but phosphate deposits are expected to be exhausted by 1995, by which time, it is hoped, Nauru will be able to derive economic security from its shipping and civil aviation services and from its proposed role as a tax haven for international business.

Although Nauru accounts for only 0.5% of world exports of phosphates, the revenue gained is very high: some $A120m. in 1974, a boom year. The revenue from phosphate sales is shared between the Government (which takes about 50% of the profits), the Nauruan landowners, a royalties long-term trust fund and the Nauru Local Government Council. Under the latter's auspices, the Government opened a 53-storey office block in Melbourne, Australia, in 1977, and in June 1982 agreed to contribute 40% of the cost of a US $205m. fertilizer plant in India. In January 1985 approval was given to the Nauru Phosphate Royalties Trust to proceed with a project to build a US $500m. commercial, industrial and residential complex in Honolulu, Hawaii. Largely as a result of its phosphate revenues, the Government is able to provide an extensive welfare system and to maintain an international airline which operates services to most other Pacific countries, Australia and New Zealand.

Transport and Communications

There are 5.2 km (3¼ miles) of narrow-gauge railway track to serve the phosphate workings. A sealed road, 19 km (12 miles) long, circles the island. Nauru Pacific Line, founded in 1969, provides shipping services to Australia, New Zealand, Asia and the USA. The island has no wharves, so passenger and cargo handling is by barge. Air Nauru, founded in 1972, operates services to many other Pacific islands, as well as to Australia, New Zealand, Japan and the Philippines.

Social Welfare

The Government maintains a comprehensive social welfare system which provides housing and free medical treatment for all citizens. There are two hospitals, with a total of about 200 beds.

Education

Education is free and compulsory for Nauruan children between six and 16 years of age. In 1984 there were five infant schools (with 937 pupils), three primary schools (with 1,285 pupils) and two secondary schools (with 413 pupils); the total number of teachers was 142. Nauruans studying overseas at secondary and tertiary levels numbered 95.

Public Holidays

1985: 17 May (Constitution Day), 26 October (Angam Day), 25, 26 December (Christmas).

1986: 1 January (New Year's Day), 31 January (Independence Day), 28–31 March (Easter).

Currency and Exchange Rates

Australian currency: 100 cents = 1 Australian dollar ($A).

Exchange rates (31 December 1984):
£1 sterling = $A1.403;
US $1 = $A1.2115.

Statistical Survey

AREA AND POPULATION

Area: 21.3 sq km (8.2 sq miles).

Population: 7,254 at census of 22 January 1977; 8,042 (Nauruan 4,964, Other Pacific Islanders 2,134, Asians 682, Caucasians —mainly Australians and New Zealanders—262) at census of 13 May 1983.

Density: 378 per sq km (1983 census).

Births and Deaths (1983): Live births 251 (birth rate 31.2 per 1,000); Deaths 47 (death rate 5.8 per 1,000).

Economically Active Population (1966): 2,473 (Administration 845, Phosphate Mining 1,408, Other activities 220).

AGRICULTURE, ETC.

Principal Crop and Livestock (1982): Coconuts 2,000 metric tons; Pigs 2,000 (FAO estimates).

MINING

Phosphate Rock (exports, '000 metric tons, year ending 30 June): 1,146 in 1976/77; 1,999 in 1977/78; 1,820 in 1978/79.

FINANCE

Currency and Exchange Rates: Australian currency: 100 cents = 1 Australian dollar ($A). *Coins:* 1, 2, 5, 10, 20 and 50 cents; 1 dollar. *Notes:* 1, 2, 5, 10, 20, 50 and 100 dollars. *Sterling and US Dollar Equivalents* (31 December 1984): £1 sterling = $A1.403; US $1 = $A1.2115; $A100 = £71.26 = US $82.54. *Average Exchange Rate* (US $ per Australian dollar): 1.1493 in 1981; 1.0174 in 1982; 0.9025 in 1983.

Budget (1984/85, $A '000): Estimated expenditure 88,130.6; Estimated revenue 88,273.0.

EXTERNAL TRADE

1976/77: *Imports:* $A14,190,000. *Exports* (metric tons, phosphate only): to Australia 474,297, New Zealand 377,677, Japan 44,338, Republic of Korea 32,830, Total 929,142.

TRANSPORT

Road Traffic (1984): 1,788 registered motor vehicles.

EDUCATION

Infant (1984): 5 schools, 937 pupils.

Primary (1984): 3 schools, 1,285 pupils.

Secondary (1984): 2 schools, 413 pupils.

There were 142 teachers in 1984. Nauruans studying at secondary and tertiary levels overseas in 1984 numbered 95.

Directory

The Constitution

The Constitution of the Republic of Nauru came into force at independence on 31 January 1968, having been adopted two days previously. It protects fundamental rights and freedoms, and provides for a Cabinet which is responsible to a popularly elected Parliament. The President of the Republic is elected by Parliament from among its members. The Cabinet is composed of five or six members, including the President, who presides. There are 18 members of Parliament, including the Cabinet. Voting is compulsory for all Nauruans who are more than 20 years of age, except in certain specified instances.

The highest judicial organ is the Supreme Court and there is provision for the setting up of subordinate courts with designated jurisdiction.

There is a Treasury Fund from which monies may be taken by Appropriation Acts.

A Public Service is provided for with the person designated as the Chief Secretary being the Commissioner of the Public Service.

Special mention is given to the allocation of profits and royalties from the sale of phosphates.

The Government

HEAD OF STATE

President: Sir Hammer DeRoburt (elected 11 May 1978; re-elected in December 1978, in December 1980 and in May and December 1983).

CABINET
(January 1985)

President, Minister for Internal Affairs, External Affairs, Island Development and Industry, and Public Service: Sir Hammer DeRoburt.

Minister for Health and Education: Lawrence Stephen.

Minister for Finance: Kenas Aroi.

Minister for Works and Community Services and Minister Assisting the President: Robidok Buraro Detudamo.

Minister for Justice: Bernard Dowiyogo.

Legislature

PARLIAMENT

Parliament comprises 18 members. The most recent general election took place in December 1983.

Speaker: Reuben Kun.

Diplomatic Representation

HIGH COMMISSION IN NAURU

Australia: Civic Centre, Nauru; High Commissioner: (vacant).

Judicial System

The Chief Justice presides over the Supreme Court, which exercises both original and appellate jurisdiction. The Resident Magistrate presides over the District Court, and he also acts as Coroner under the Inquests Act 1977. The Supreme Court and the District Court are courts of record. The Family Court consists of three members, one being the Resident Magistrate as Chairman, and two other members drawn from a panel of Nauruans.

SUPREME COURT

Chief Justice: (vacant).

DISTRICT COURT

Resident Magistrate: Sushil Chandra Chaturvedi.

FAMILY COURT

Chairman: Sushil Chandra Chaturvedi.

Religion

Nauruans are predominantly Christians, adhering either to the Nauruan Protestant Church or to the Roman Catholic Church

The Press

Bulletin: Local and overseas news in Nauruan and English; fortnightly; Editor A. D. Deiye; circ. 750.

Radio

There were an estimated 5,500 radio receivers in use in 1984.

Radio Nauru: f. 1968; govt-owned and non-commercial; broadcasts in English and Nauruan; Man. David Agir; Broadcasts Officer Reginald Akiri.

Finance

(auth. = authorized; cap. = capital; dep. = deposits; m. = million; amounts in Australian dollars.)

BANKING

State Bank

Bank of Nauru: POB 289, Nauru; tel. 5217; telex 33085; f. 1976; govt-owned; cap. and res 19.9m., dep. 85.4m. (1984); Chair. R. B. Detudamo; Gen. Man. and Sec. M. R. Sethuraman.

INSURANCE

Nauru Insurance Corporation: POB 82, Nauru; f. 1974; sole licensed insurer and reinsurer in Nauru.

Trade and Industry

Nauru Corporation: Civic Centre; f. 1925; operated by the Nauru Local Government Council; the major retailer in Nauru; Man. Dir Sir Hammer DeRoburt.

Nauru Fishing Corporation: Aiwo District; f. 1979; owned by Nauru Local Government Council; two 600-ton purse-seine vessels; Chair. Sir Hammer DeRoburt.

Nauru Phosphate Corporation: Aiwo; f. 1970; operates the phosphate industry of the Republic of Nauru on behalf of the Nauruan people; responsible for the mining and marketing of phosphate; Chair. P. D. Cook (acting); Gen. Man. J. Hooftallen (acting).

Transport

RAILWAYS

There are 5.2 km of 0.9-m gauge railway to serve the phosphate workings.

ROADS

A sealed road, 19 km long, circles the island, and another serves Buada District. In 1984 there were 1,788 registered vehicles.

SHIPPING

As Nauru has no wharves, passenger and cargo handling is carried out by barge.

Nauru Pacific Line: Civic Centre; tel. 4581; telex 33083; f. 1969; six vessels; owned by Nauru Local Government Council; operates services to ports in Australia, New Zealand, Asia, the Pacific and the west coast of the USA; Man. Dir Sir Hammer DeRoburt.

CIVIL AVIATION

Air Nauru: Directorate of Civil Aviation, Government of Nauru Offices, Yaren; f. 1972; operates services to Apia, Auckland, Guam, Honiara, Honolulu, Kagoshima, Koror, Majuro, Manila, Melbourne, Nadi, Niue, Nouméa, Okinawa, Pago Pago, Ponape, Rarotonga, Saipan, Suva, Sydney, Taipei, Tarawa, Truk and Vila; fleet of 2 Boeing 727, 4 Boeing 737; Dir George Vae'au.

NEPAL

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Nepal is a land-locked Asian country in the Himalaya mountain range, with India to the east, south and west, and the People's Republic of China to the north. The climate varies sharply with altitude, from arctic on the higher peaks of the Himalaya mountains (where the air temperature is permanently below freezing point) to humid sub-tropical in the central valley of Kathmandu, which is warm and sunny in summer. Temperatures in Kathmandu, which is 1,337 m (4,386 ft) above sea-level, are generally between 2°C (35°F) and 30°C (86°F), with an annual average of 11°C (52°F). The rainy season is between June and October. Average annual rainfall varies from about 1,000 mm (40 in) in western Nepal to about 2,500 mm (100 in) in the east. The official language is Nepali, spoken by 52% of the population in 1971. Other languages include Maithir (11.5%) and Bhojpuri (7%). Nearly 90% of the population are Hindus, with 7.5% Buddhists and 3% Muslims. The national flag (proportions 3 by 4) is composed of two crimson pennants, each with a blue border. The upper section contains a white crescent moon, and the lower section a white sun in splendour. The capital is Kathmandu.

Recent History

Nepal is an hereditary monarchy but for more than 100 years, until 1951, effective power was held by the Rana family, who created the post of hereditary Prime Minister. A popular revolution, led by the Nepali Congress, toppled the Ranas and restored King Tribhuvan to power. A limited constitutional monarchy was established in 1951. During most of the 1950s government was controlled by the monarchy, first under Tribhuvan and then, after his death in 1955, under his son, Mahendra. In 1959 King Mahendra promulgated Nepal's first constitution, providing for a bicameral Parliament, including a popularly-elected Lower House. Elections resulted in victory for the Nepali Congress, led by B. P. Koirala, who became Prime Minister.

However, the King retained a certain degree of power, and continuing differences between the King and the Prime Minister led to a royal coup in December 1960. The King dismissed the Cabinet and dissolved Parliament. A royal decree of January 1961 banned political parties. King Mahendra accused the Koirala administration of corruption, and in December 1962 he introduced a new constitution, reasserting royal power and providing for a 'partyless' system of government, based on the Panchayat (village council), with a Prime Minister appointed by the King. This office was filled successively by Dr Tulsi Giri (1962–65), Surya Bahadur Thapa (1965–69) and Kirti Nidhi Bista (1969–70, 1971–73). King Mahendra himself was Prime Minister from April 1970 to April 1971. In January 1972 King Mahendra died and was succeeded by his son, Birendra. Nagendra Prasad Rijal became Prime Minister in July 1973, and held office until December 1975, when Dr Giri was reappointed. The new Government made major changes to the Constitution. In September 1977 Dr Giri resigned and was succeeded by Bista.

B. P. Koirala, the former Prime Minister and an advocate of parliamentary democracy, was acquitted of treason in February 1978. Returning from abroad a year later, he was placed under house arrest in April 1979, but then released, partly to appease students who had been demonstrating for reforms. National unrest grew and, after King Birendra announced in May that there would be a national referendum on whether to restore multi-party democracy, Bista resigned and was succeeded as Prime Minister by Thapa. In the referendum, held in May 1980, 54.8% of the voters supported the Panchayat system with reforms. As a result, the King formed a Constitutional Reforms Commission, and in December 1980 the Government issued a decree amending the Constitution (see Constitution). Under the new provisions, elections were held in May 1981, the first of their kind since 1959, although still on a non-party basis. Despite calls by B. P. Koirala to boycott the polling, 1,096 candidates contested the 112 elective seats in the Rashtriya Panchayat (National Assembly). Only 35 of the 93 pro-Government candidates obtained seats. B. P. Koirala died in July 1982.

Thapa was re-elected by the Rashtriya Panchayat as Prime Minister in June 1981, and the King installed a new Council of Ministers. An extensive ministerial reshuffle took place in October 1982, but this failed to stem increasing official corruption and economic mismanagement. A new Press Act, approved in November, increased censorship. A late monsoon exacerbated Nepal's economic problems, while a convention held by the banned Nepali Congress Party angered some political opponents of the Government. In July 1983, for the first time in the 23-year history of the Panchayat system, the incumbent Prime Minister, Surya Bahadur Thapa, was ousted, and a new Council of Ministers was formed by a former Chairman of the Rashtriya Panchayat, Lokendra Bahadur Chand, who had successfully introduced a motion expressing 'no confidence' in Thapa.

In September 1984 a motion expressing 'no confidence' in Chand was proposed in the Rashtriya Panchayat by Thapa, the former Prime Minister, in protest against increasing corruption in the Government. The motion failed, however, to reach a vote because of the intervention of a group of 'neutralist' members who feared that repeated votes on motions of 'no confidence' would undermine the Panchayat system. A government reshuffle ensued, and several corrupt ministers were removed, while all factions in the Panchayat were accommodated. Disappointment with the reshuffle led to the emergence of a new anti-Chand group from within the 'neutralists', led by Badra Sharma, a former Secretary-General of the Nepali Congress. An appeal was made to the King to hold a winter session of the Rashtriya Panchayat, and the outlawed Nepali Congress was planning a campaign of civil disobedience, aimed a restoring political parties and parliamentary rule. The next general election was due to be held in May 1986, and Chand appealed to his followers to mobilize their support for the Panchayat system.

Nepal has traditionally been very dependent on India, but in 1977 the old Trade and Transit Treaty between the two countries was replaced by two treaties allowing Nepal to develop trade with other countries. Relations with India cooled in 1983, and there was concern in Nepal over the renewal of the two treaties, which were due to expire in 1985. However, the treaties were renewed in 1984. The People's Republic of China has contributed a considerable amount to the Nepalese economy, and ties with Bangladesh are also significant. In December 1982 Pakistan and Nepal strengthened their trade links by renewing a 1962 agreement, and in 1983 they established a joint economic commission and a regular air link.

By 1984 a total of 36 countries had endorsed the Nepalese Government's plan for a 'zone of peace' in southern Asia. Nepal has diplomatic relations with 86 countries, after establishing links with the Holy See and with neighbouring Bhutan in 1983. In that year King Birendra made several state visits to foreign countries, including the USA, the United Kingdom, India, Pakistan and Bangladesh, and pursued Nepal's non-aligned foreign policy with vigour.

Government

Nepal is a constitutional monarchy. Executive power is vested in the King, who presides over the unicameral legislature, the Rashtriya Panchayat (National Assembly). Under the Panchayat system, voters elect village councils, whose members then elect district councils, whose members elect zonal councils. Under the Constitutional amendments of December 1980, direct elections are to be held every five years for 112 of the 140 seats in the Rashtriya Panchayat, while the remaining 28 members are to be nominated by the King. On the recommendation of the Prime Minister, who is elected by the members of the

Rashtriya Panchayat, the King appoints the Council of Ministers, which is responsible to the Rashtriya Panchayat. No political parties are allowed. A constitutional body, the Raj Sabha (State Council), was formed in 1975 to watch over political affairs and to propagate Panchayat ideology.

For local administration, Nepal is divided into 14 zones, each headed by an appointed Commissioner.

Defence

In July 1984 Nepal had an army with an estimated 25,000 men. Military service is voluntary. The Nepalese budget envisaged expenditure of 529.2m. rupees on defence in 1984/85.

Economic Affairs

With an inhospitable terrain, comprising isolated valleys and very high mountains, Nepal is among the least developed countries in the world. Since 1960 the country's economic growth has failed to keep pace with the increase in its population. In 1982, according to estimates by the World Bank, Nepal's gross national product (GNP) per head was US $170 (at average 1980–82 prices), which was among the 10 lowest in the world. Between 1960 and 1982, it was estimated, Nepal's GNP per head declined, in real terms, at an average rate of 0.1% per year. In the 1970–80 decade the average fall was 0.3% annually, measured in constant prices. The average annual growth of overall gross domestic product (GDP) was 2.5% in 1960–70, rising to 2.7% in 1970–82.

Much of the country is forested and too steep for cultivation, yet about 90% of the labour force are employed in agriculture, forestry and fishing. This sector contributed 59.4% of Nepal's GDP in 1981/82, and provides an estimated 60% of export earnings. Forest cover has been reduced from 60% of the land area to around 30% since the early 1950s, mainly because of the rapid increase in Nepal's population. In December 1983 the International Centre for Integrated Mountain Development was established in Kathmandu to combat the serious problems of deforestation in the region, and the World Bank has approved a loan of Rs 216m. for a five-year programme of tree-planting. Nepal also suffers from droughts, floods and occasional poor harvests, such as that of 1982, and food aid is supplied by many countries, including France, India, the USA and the United Kingdom. Between 1970 and 1980 the population of Nepal increased at an average rate of 2.3% per year, while agricultural production rose by only 1% per year. The agricultural settlements are confined to the Kathmandu valley and wider sections of the river valleys. The Government has announced measures to develop agriculture, with particular emphasis on irrigation. Under the sixth Five-Year Plan (1980–85), nearly one-third (NRs 10,570m.) of projected expenditure was invested in agriculture and improved irrigation. In 1979 only about 10% of potentially irrigable land had irrigation facilities. In December 1982 the International Fund for Agricultural Development pledged NRs 144m. for three irrigation projects in Nepal, at Banganga, Narayani and Manusmara.

Manufacturing contributed only 4.2% of GDP in 1981/82. The most important modern industries include brick and tile manufacture, construction materials, paper, food grain processing and vegetable oil extraction, sugar refining and a brewery. According to one estimate, about 1m. workers are employed in traditional industries such as basket making, cotton fabrics, edible oils, etc.

To meet its energy requirements, Nepal has to import some 150,000 metric tons of petroleum products annually (one-third from the Persian Gulf, and the remainder from the USSR). The cost of these imports consumes most of the country's export earnings. In 1985 the Government offered 10 exploration tracts in the Terai and Siwalik foothills for tenders from foreign oil companies, to assess the commercial viability of petroleum deposits found in Bardia and Mustang.

Mica is mined east of Kathmandu, and there are also small deposits of lignite, copper, cobalt and iron ore. In 1984 an Italian company expressed interest in building an iron ore smelter in the Phulchowki region. The International Finance Corporation and others have invested $25m. in Nepal Orind Magnesite Ltd, a joint Indian-Nepalese venture, to build a magnesite mining and processing unit at Kharidunga. Nepal's rivers are being exploited for hydroelectric power production. In 1983 the Nepal Aid Group agreed to provide US $326m. to construct a 60,000 kW hydroelectric generator at Marsgangdhi, in addition to development aid of US $542m. for the next two years. Two other important development projects were launched in 1983: a 33 MW second-phase hydroelectric project at Kulekhani, costing $72m., and a pulp and paper mill at Narval Parasi, costing $20m. To encourage private investment, a stock exchange was established in Kathmandu in November 1984.

Under the fifth Five-Year Plan (1975–80), new industries were set up, including enterprises for the production of medicines, textiles, farm tools, and paper and pulp. However, the Plan failed to meet its target of increasing national income by 4%–5% per year, and GDP increased at an average annual rate of 2.2% (less than the country's population growth of 2.3%) and actually fell by 1.4% in 1979/80. In 1981/82 and 1982/83 Nepal's GDP grew by an estimated 4.1% per year, and in 1983/84 it increased by 7.4%. GDP was expected to rise by 7.2% in 1984/85. However, Nepal remains very dependent on the weather.

The sixth Five-Year Plan (1980–85) envisaged a total expenditure of NRs 33,940m. The Plan's main emphasis was on agriculture and small-scale and cottage industries, and on increased irrigation and hydroelectric power generation.The plan attained its targeted average annual growth of 4.2%. The seventh Five-Year Plan (1985–90), which envisages a total expenditure of NRs 54,110m., aims at an average annual growth rate of 4.5%. As in the previous Plan, more than 60% of expenditure was to be provided by foreign aid from India, the People's Republic of China, the EEC and some of its member countries, Canada, the USA and Switzerland, plus multilateral aid from international agencies. Nepal receives about US $200m. per year, but it spends only a proportion of this amount.

In 1981/82 Nepal's trade deficit reached NRs 3,438.8m., mainly as a result of a rise in imports, and in 1982/83 the deficit grew to NRs 5,040.5m. In 1983/84 it fell to NRs 4,810.4m., as exports increased by 50% over the previous year. Nepal's major trading partner is India, taking more than 70% of its foreign trade, and almost all of Nepal's imports pass through the Indian port of Calcutta. Nepal has established trade links with the People's Republic of China, the Democratic People's Republic of Korea, Bangladesh, Pakistan, Egypt and Sri Lanka, but its trade is still largely controlled by India, which persistently withheld transit rights until 1978, when a memorandum of understanding was signed by Bangladesh and India to provide Nepal with overland transit facilities through their respective territories. In 1984, Nepal and Bhutan signed their first trade agreement, following the exchange of ambasadors. After a visit to Nepal in 1980 by a trade delegation from the Xizang (Tibet) Autonomous Region in the People's Republic of China, which adjoins the whole of Nepal's northern frontier, 21 trade routes were opened up along the Sino-Nepalese border. In 1981 Nepal and the People's Republic of China signed a new bilateral agreement, replacing a 1974 pact, in an effort to boost two-way trade, which totalled $20.2m. in 1980/81. Tariffs on several products from China, the USA, the United Kingdom, Italy, the Federal Republic of Germany and the Republic of Korea were also relaxed. In 1984/85 the Government announced measures to stimulate imports, so as to increase its chief sources of revenue (import taxes and licence fees), in order to combat a mounting budget deficit and an inability to collect rural taxes.

Transport and Communications

There are short sections of motorable roads around Kathmandu, while a mountain road links the capital with the Indian railhead at Raxaul. Heavy goods on this route are transported by a 42-km ropeway from Hetauda to Kathmandu. A number of important new roads have been built, notably that linking Kathmandu with the Sino-Nepalese border at Kodari. In 1980/81 340 km of roads were constructed, and in 1981/82 115 rope suspension bridges were built. There are two sections of railway, totalling 100 km. Porters, however, are still the principal means of transport, supplemented by ponies, mules and yaks in the more open upper valleys. A national shipping corporation was set up in 1971. Regular air services link India, Pakistan, Thailand and the larger towns in Nepal. Nepal has telegraph links with both India and Pakistan, and in November 1982 the country's first

satellite earth station, built with British help, was opened near Kathmandu, providing Nepal with improved communications.

Social Welfare

In 1982 Nepal had 2,586 hospital beds, one for every 5,483 of the population, and there were 73 hospitals. Under the sixth Five-Year Plan (1980–85), 24.4% of development expenditure was allocated to the social services. In November 1982 Japan granted Rs 97m. for a teaching hospital at Mahaharajgunj.

Education

Free primary education for five years was introduced in government schools in 1975, when an estimated 27% of children aged from six to 11 were enrolled. In 1982 primary school pupils totalled some 1,475,000 and there were about 370,000 pupils at secondary and higher educational establishments. There is one university. In 1983 more than 80% of the adult population was illiterate.

Tourism

Tourism is being developed by the construction of new tourist centres in the Kathmandu valley, and regular air services link Kathmandu with Pokhara Lake. Major tourist attractions include Lumbini, the birthplace of Buddha, and the Himalaya mountain range, including Mount Everest, the world's highest peak. In 1983 Nepal received 179,405 tourists. In 1983 about 700 climbers visited Nepal and spent US $1.25m.

Public Holidays

1985: May/June (Indra Jatra—Festival of Rain God), October, over a week (Dasain—Durga Puja Festival), November, two days (Tihar—Festival of Lights), 16 December (Mahendra Jayanti and Constitution Day), 28 December (King Birendra's Birthday).

1986: 18 February (Tribhuvan Jayanti—Birthday of the late King Tribhuvan—and Rashtriya Prajatantra Divas—National Day), February/March (Shivaratri—in honour of Lord Shiva), April (Navabarsha—New Year's Day), April (Baishakh Purnima—Birthday of Lord Buddha).

Weights and Measures

Nepal uses the Indian system of weights but has other measures of its own. Steps have been taken to introduce the metric system.

Currency and Exchange Rates

100 paisa (pice) = 1 Nepalese rupee (NR).

Exchange rates (31 December 1984):
£1 sterling = NRs 20.86;
US $1 = NRs 18.00.

Directory

The Constitution

A new Constitution for the Kingdom of Nepal was adopted on 16 December 1962. It was amended in 1967, 1976 and 1980. The main provisions of the Constitution are summarized below:

GOVERNMENT

Nepal is a constitutional monarchy, with executive power vested in the King but ordinarily exercised on the recommendation of a Council of Ministers, led by a Prime Minister, who is selected by the King from among the membership of the Rashtriya Panchayat (National Assembly). The Council of Ministers is responsible to the Rashtriya Panchayat but the King has power to grant or withhold assent to Bills at his discretion.

State Council

The Constitution also provides for a State Council or Raj Sabha which will declare upon the succession or appoint a Regency Council besides giving advice to the King in times of emergency.

Legislature—Rashtriya Panchayat

The Rashtriya Panchayat, which is at the apex of the non-party Panchayat system of democracy, is the supreme national unicameral legislature, comprising 135 members, 112 of whom are elected from among the members of the Anchal Sabhas (Zonal Councils), who in turn are elected from among the members of Zilla Sabhas (District Councils) who, again in turn, are elected from the Gaon Sabhas (Village Councils). In other words, membership of the Rashtriya Panchayat is based on the popular election of Local Panchayat (which is the basic unit of the four-tiered Panchayat system), from each of which members choose from among themselves representatives for District Panchayats. They may advance by similar stages to the zonal and then to the Rashtriya Panchayat. The remaining members are nominated by the Crown according to the Constitution.

The Rashtriya Panchayat is a perpetual body whose members are elected from Zonal Councils and serve a fixed term of five years. House proceedings are open to the public. A summary record of the proceedings of every meeting of the House or its committees is published.

Bills to the House are presented by the Committees of the House, in consultation with Ministers. The annual budget is submitted to the House for consideration, deliberation and adoption. In order that these legislative tasks be conducted with becoming dignity and efficiency, the members of the House fully enjoy the privilege of freedom from arrest for anything spoken in the House or the manner in which voting is exercised.

CITIZENS' RIGHTS AND DUTIES

Besides enumerating a number of fundamental rights, including the right against exile, the Constitution lays down a series of fundamental duties of the citizen.

AMENDMENTS

Amendments to the 1962 Constitution, adopted in 1967 and 1976, include the following: Prime Minister to be appointed by the King who may, if he wishes, consult the Rashtriya Panchayat; Ministers to be collectively and individually responsible to the King; King to appoint directly the Zonal Commissioners who are to enjoy greater powers than the Chairmen of Zonal Panchayat; Speaker of the House to be appointed by at least two-thirds of Rashtriya Panchayat; associations for non-political purposes allowed but political parties continue to be banned; provision for appointment of an independent Election Commission; the country to be divided into four areas for electoral purposes, with elections for all elective bodies every four years on a rotational basis; elected members of Rashtriya Panchayat can be recalled. Following the national referendum of May 1980, the King formed an 11-member Constitutional Reforms Commission to recommend reforms to the system.

Amendments to the Constitution of December 1980: direct elections to be held every five years for 112 of the 140 seats in the Rashtriya Panchayat; the remaining 28 seats to be nominated by the King; the Prime Minister to be elected by members of the Rashtriya Panchayat; the Council of Ministers to be appointed by the King (on the recommendation of the Prime Minister) and to be responsible to the Rashtriya Panchayat; the establishment of Nepal as a 'zone of peace' to be included as a directive principle in the Constitution.

The Government

HEAD OF STATE

HM King Birendra Bir Bikram Shah Dev (succeeded to the throne 31 January 1972; crowned 24 February 1975).

COUNCIL OF MINISTERS
(March 1985)

Prime Minister, Minister of Defence and Palace Affairs: Lokendra Bahadur Chand.

Minister of Panchayat Affairs, Local Development and Health: Jog Mehar Shrestha.

Minister of Home and General Administration: Padma Sundar Lawati.

Minister of Commerce: Parasu Narayan Chaudhary.

Minister of Water Resources: Pashupati Shumsher J. B. Rana.

Minister of Agriculture and Land Reforms: Hem Bahadur Malla.

Minister of Communications: Rudra Prasad Giri.

Minister of Industry: Narayan Datta Bhatta.

Minister of Law and Justice: Bishnu Maden.

Minister of Foreign Affairs: Padma Bahadur Khatri.

Minister of Works and Transport: Harish Chandra Mahat.

Minister of Finance: Prakash Chandra Lohani.

Minister of State for Education and Culture: Fatteh Singh Tharu.

Minister of State for Tourism, Labour and Social Welfare: Prasad Budathoki.

Minister of State for Land Reforms: Labaru Rana Tharu.

Minister of State for Supplies: Hiralal Biswokarma.

Minister of State for Forest and Soil Conservation: Badri Prasad Mandal.

Minister of State for Law and Justice: Radheshyam Kamaro.

Minister of State for General Administration: Lilaraj Bista.

Assistant Minister for Agriculture: Mohan Lal Prasad Choudhury.

Assistant Minister for Home Affairs: Ram Dhyan Roy.

Assistant Minister for Health: Bidya Devi Devkota.

Assistant Minister for Supplies: Kedar Rai.

Assistant Minister for Panchayat and Local Development: Niranjan Thapa.

Assistant Minister for Works and Transport: Nara Bahadur Hirachan.

Assistant Minister for Industries and Commerce: Mukunda Bahadur Basnet.

MINISTRIES

All Ministries are in Kathmandu.

Legislature

RASHTRIYA PANCHAYAT

The Rashtriya Panchayat (National Assembly) is the supreme legislative body of Nepal under the Panchayat system (see under Constitution). It has 140 members, of whom 112 are directly elected for five years and 28 nominated by the King.

Chairman of the Rashtriya Panchayat: Marich Man Singh.

Political Organizations

Under the Panchayat system, there are no political parties in Nepal. Although officially banned, the following opposition groups maintain offices in Kathmandu:

Communist Party of Nepal: banned 1960; pro-Soviet; in 1983 the four constituent splinter groups formed a united front to oppose the Panchayat system and to seek restoration of democratic rights; Leader Man Mohan Adhikari.

Nepali Congress Party (NCP): f. 1950; banned 1960; seeks dissolution of the National Assembly, constitutional reform and new elections; Pres. Ganesh Man Singh; Gen Sec. G. P. Koirala; claimed membership 10,000.

USA: Panipokhari, Kathmandu; tel. 211199; Ambassador: Carleton S. Coon, Jr.

Judicial System

There is a Supreme Court and four Regional, 15 Zonal and 75 District Courts. There have both civil and criminal jurisdiction.

The Supreme Court: The Constitution provides for a Supreme Court which shall have a Chief Justice and not more than six other Justices unless otherwise specified by law. The Supreme Court holds appellate as well as original jurisdiction, and may function as a court of review. The Supreme Court protects the fundamental rights of the people and guarantees the Rule of Law.

Chief Justice: Nayan Bahadur Khatri.

Religion

At the 1971 census 89.4% of the population professed Hinduism (the religion of the Royal Family), while 7.5% were Buddhists and 3.0% Muslims. In 1976 it was estimated that 60% of the population were Hindus, 33% Buddhists and 7% Muslims.

BUDDHISM

Nepal Buddhist Association: Kathmandu; tel. 5214420; Rev. Bhikkhu Amritananda, Ananda Kuti, Kathmandu.

Young Buddhist Council of Nepal: Rev. Amritananda.

The Press

In 1983, 346 newspapers were published in Nepal, of which 51 were dailies, representing a four-fold increase in 18 months, following a liberalization of licensing policies.

Man. Akrur Narsingh Rana.

Nepal Arab Bank Ltd (Nabil): Kathmandu; f. 1984; joint venture between Nepal and Dubai to raise capital for the private sector; cap. p.u. 30m.; Gen. Man. Dev Daitra.

Nepal Industrial Development Corporation (NIDC): NIDC Bldg, POB 10, Durbar Marga, Kathmandu; tel. 213560; f. 1959; state-owned; has shares in 37 industrial enterprises; offers financial and technical assistance to private sector industries; cap. 250m.; Chair. and Gen. Man. Ramesh Nath Dhungel.

INSURANCE

Rastriya Beema Sansthan (National Insurance Corpn): POB 527, Kathmandu; f. 1967; sole insurer operating in Nepal; Gen. Man. Nara Pratap.

Trade and Industry

National Planning Commission: POB 1284, Singh Durbar, Kathmandu; Chair. The Prime Minister; Vice-Chair. Dr Ratna S. J. B. Rana; Sec. Dr Debya Deo Bhatt.

CHAMBERS OF COMMERCE

Federation of Nepalese Chambers of Commerce and Industry: POB 269, Tripureswar, Kathmandu; f. 1965; Pres. Pashupati Giri; Vice-Pres. Mahesh Lal Pradhan; Sec.-Gen. Nanda Lal Joshi.

Nepal Chamber of Commerce: Nepal Bank Bldg No. 2, POB 198, Kathmandu; f. 1952; non-profit organization promoting industrial and commercial development; c. 2,400 mems.

DEVELOPMENT ORGANIZATIONS

Agriculture Inputs Corporation: Teku, Kuleswor, Kathmandu, POB 195; f. 1972; govt-owned; sole supplier of inputs for agricultural development (procuring and distribution of chemical fertilizers, improved seeds, agricultural tools and plant protection material) at national level; operates seeds multiplication programme (paddy, wheat, maize and vegetable); seed processing plants at Hetauda, Itahari, Janakpur, Nepalgunj and Sidharthanagar; Chair. Prithu Narshing Rana; Gen. Man. Narayan Bahadur Shrestha; Planning Chief Amrit Man Tamrakar.

International Centre for Integrated Mountain Development (ICIMOD): 4/80 Jawalakhel, POB 3226, Kathmandu; tel. 521575; telex 2245; f. 1983 by the govt and UNESCO, with the financial backing of Switzerland and the Federal Republic of Germany, to develop programmes for the preservation and utilization of the natural resources of the countries in the region, and particularly to combat the problems of deforestation, soil erosion and overgrazing; Dir Dr Colin Rosser.

National Trading Ltd: POB 128, Teku, Kathmandu; tel. 211962; f. 1962; govt-owned; imports and distributes construction materials and raw materials for industry; also machinery, vehicles and consumer goods; operates bonded warehouse, duty-free shop and related activities; brs in all major towns; Exec. Chair. and Gen. Man. Mana Mohan Lal Singh.

Nepal Resettlement Company: Kathmandu; f. 1963; govt-owned; engaged in resettling people from the densely-populated hill country to the western Terai plain.

Salt Trading Corporation Ltd: POB 483, Kalimati, Kathmandu; tel. 212208; telex 2241; f. 1963 as a joint venture of the public and private sectors (30% and 70% respectively) to manage the import and distribution of salt; also deals in sugar, edible oils, matches, vegetable fat and wheat flour; Chair. A. M. Sherchan; Gen. Man. H. B. Malla.

Trade Promotion Centre: Lal Durbar, Durbar Marga, Kathmandu, POB 825; tel. 412771; telex 2302; f. 1971; govt-owned; to encourage exports; Chair. S. R. Bhandary.

Transport

Ministry of Works and Transport: Babar Mahal, Kathmandu; Sec. Gyan Prasad Sharma.

Nepal Yatayat Sansthan (Nepal Transport Corpn): POB 309, Teku, Kathmandu; tel. 212972; controls the operation of road transport facilities, railways, ropeway, trucks, trolley buses, autobuses and container service; Chair. and Gen. Man. Krishna Raj Pandey.

RAILWAYS

Janakpur Railway: Khajuri; f. 1937; 53 km open, linking Jayanagar (India) with Janakpurdham and Bijalpura; narrow gauge; 11 steam engines, 22 coaches and 72 goods wagons; Man. B. B. Pradhan.

Nepal Railway: Birganj; f. 1927; 49 km linking Raxaul to Amlekhganj, of which the 6 km between Raxaul and Birgunj are used for goods traffic; 7 steam engines, 12 coaches and 82 wagons; Man. Devendra Singh.

Provision was made in the sixth Five-Year Plan (1980–1985) for the construction of a railway line between Udaipur Garhi in eastern Nepal and Calcutta, India.

ROADS

There are over 5,000 km of roads, of which about 2,000 are metalled. Around Kathmandu there are short sections of motorable roads and there is a 28-km ring road round the valley. A mountain road, Tribhuwana Rajpath, links the capital with the Indian railhead at Raxaul. The Siddhartha Highway, constructed with Indian assistance, connects the Pokhara valley in mid-west Nepal with Sonauli on the Indian border in Uttar Pradesh. A British-built section of

40 km links Butwal with Batghat. Mahendra highway will have a total length of 1,040 km and is expected to be completed by 1988. Construction of the 400-km Pokhara–Surkhet road began in 1974, with Chinese help, and this will eventually be linked to the 149-km all-weather highway which stretches from Dhangadhi to Dedelhura in the west. The 65-km Dharan–Dhankuta road was constructed with British help and opened in 1984.

A fleet of container trucks operates between Calcutta and Raxaul and other points in Nepal for transporting exports to, and imports from, third countries. Trolley buses provide a passenger service over the 13 km between Kathmandu and Bhaktapur.

ROPEWAY

A 42-km ropeway links Hetauda and Kathmandu and can carry 25 tons of freight per hour throughout the year. Food grains, construction goods and heavy goods on this route are transported by this ropeway.

SHIPPING

Royal Nepal Shipping Corpn: Kanti Path, Kathmandu; f. 1971, operational from May 1972; Resident Dir Brig.-Gen. R. S. Rana.

Royal Nepal Shipping Line: f. 1971, operational from May 1972; Man. Dir Dr J. Jha.

CIVIL AVIATION

Royal Nepal Airlines Corporation: RNAC Bldg, Kanti Path, Kathmandu; tel. 214511; f. 1958; scheduled services and charters to 34 domestic airfields and international flights to Bangladesh, Burma, Dubai, Hong Kong, India, Pakistan, Singapore, Sri Lanka and Thailand; fleet of 3 Boeing 727, 3 Avro HS-748, 8 Twin Otters, 3 Pilatus Porters; Chair. B. B. Pradhan; Man. Taj Bahadur Prasai.

Tourism

Department of Tourism: HM Government of Nepal, Tripureswar, Kathmandu; tel. 211293; Dir-Gen. Janak Bahadur Thapa (acting).

THE NETHERLANDS ANTILLES

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Netherlands Antilles consists of two groups of islands in the Caribbean Sea, about 800 km (500 miles) apart. The main group, lying off the coast of Venezuela, consists of Aruba, Bonaire and Curaçao which are known as the 'Leeward Islands'; to the north lie the small volcanic islands of St Eustatius, Saba and St Maarten (the northern half of the latter island being part of the French dependency of Guadeloupe), known as the 'Windward Islands' (though actually in the Leeward group of the Lesser Antilles). The climate is tropical, moderated by the sea, with an average annual temperature of 27.5°C (81°F) and little rainfall. The official language is Dutch. The dominant language of the 'Leeward Islands' is Papiamento, a mixture of Dutch, Spanish, Portuguese, English, Arawak Indian and several West African dialects, while the principal language in the 'Windward Islands' is English. Spanish is also spoken. Almost all of the inhabitants profess Christianity: the people of the 'Leeward Islands' and Saba are predominantly Roman Catholics, while those of St Eustatius and St Maarten are predominantly Protestants. The state flag (proportions 3 by 2) is white, with a red vertical stripe in the centre, crossed by a horizontal blue stripe on which there are six white five-pointed stars (one for each of the main islands) arranged in an oval. The capital is Willemstad, on the island of Curaçao.

Recent History

The 'Leeward Islands' were discovered by the Spanish in 1499 and were seized by the Dutch in the 1630s. Curaçao became prosperous in the late 17th and 18th centuries as an entrepôt for trade in the Caribbean. The 'Windward Islands', first found by Columbus in 1493, were settled by the Dutch in the mid-17th century, and, after frequent changes in possession, were finally confirmed as Dutch territory in 1816. The two groups were collectively known as Curaçao until 1948. Slavery was abolished in 1863, and the islands suffered from an economic decline until the establishment of petroleum refineries on Curaçao and Aruba, in 1918 and 1929 respectively. During the Second World War Queen Wilhelmina of the Netherlands promised independence, and in 1954 a Charter gave the islands full autonomy in domestic affairs.

Divisions of political allegiance within the territory have always been along island, rather than policy, lines and a series of coalition governments has paralysed decision-making. In 1969 serious rioting and looting broke out in Willemstad after a demonstration by workers in the petroleum industry. Troops had to be sent from the Netherlands to quell the disturbances and to restore order. In February 1970 the socialist Government of Ciro Kroon resigned over the nomination of a new Governor, and in 1971 the Government of E. Petronia resigned over the defeat in the Staten of new financial measures.

Elections were held in August 1973, and Juancho Evertsz became Prime Minister. After the June 1977 elections a coalition Government, excluding the Movimentu Electoral di Pueblo (MEP) of Aruba, was formed, with the leader of the Democratische Partij (DP), Silvio Rozendal, as Prime Minister. After a boycott of the session by the MEP and the Frente Obrero, the Staten was eventually convened by a Governor's decree in October. Rozendal resigned in April 1979, and elections were held in July. A coalition Government was formed by the Movimentu Antiyas Nobo (MAN), the MEP and the Unión Patriótico Bonairiano (UPB), with Dominico Martina, the leader of the MAN, as Prime Minister.

Aruba has traditionally resented the administrative dominance of Curaçao, and the MEP, under its leader Betico Croes, has sought independence for the island. In 1981 a series of talks began with the Netherlands Government over Aruba's future. However, in September the MEP representatives in the Staten withdrew their support for the Government over Aruba's rights to possible discoveries of petroleum off its coast. The Government's majority was restored by the inclusion of the DP in the coalition, but a DP resignation in January 1982 led to another crisis. A general election in June failed to break the stalemate, and it was not until October that agreement was reached on the formation of a new coalition, which excluded the MEP. Dominico Martina remained as Prime Minister.

In March 1983 agreement was finally reached whereby Aruba would be given separate status within the Netherlands from January 1986, achieving full independence in 1996. A union for economic co-operation was to be formed between Aruba and the five remaining islands of the Netherlands Antilles, and Aruba was to contribute to the support of the four smaller islands. Arguments continued over the division of the Antilles' financial reserves, and over rights to explore for petroleum and other minerals. In June 1984 Martina's coalition Government resigned, precipitating a three-month political crisis. In September a five-party coalition Government was formed, with Maria Liberia-Peters of the National Volkspartij (NVP) as Prime Minister. However, the Government would have a limited life of 15 months, because of the anticipated withdrawal of the Aruban MEP members in January 1986.

Government

The Governor of the Netherlands Antilles, appointed by the Crown, represents HM Queen Beatrix of the Netherlands. He has executive power over external affairs and is assisted by an Advisory Council. Executive power in internal affairs is vested in the Council of Ministers. The Council is responsible to the Staten (legislature), with 22 members elected by universal adult suffrage for four years (subject to dissolution). The administration of each of the four island groups of Curaçao, Aruba, Bonaire and the 'Windward Islands' is in the hands of an Island Council, an Executive Council and a Lieutenant-Governor.

Defence

Although defence is the responsibility of the Netherlands, compulsory military service is laid down in an Antilles Ordinance. The Governor is the Commander-in-Chief of the armed forces in the islands, and a naval contingent is stationed in the Netherlands Antilles.

Economic Affairs

Agriculture is comparatively unimportant, being hampered by poor soils and scarcity of water. The chief products are aloes (Bonaire is a major exporter), sorghum, divi-divi, groundnuts, beans, fresh vegetables and tropical fruit. In June 1980 the Government forbade the import of cucumbers, green peppers, aubergines and hot peppers in an attempt to stimulate domestic production. A privately-owned company produces about 1,500 litres per week of green Curaçao liqueur. Desalination plants help to provide the 'Leeward Islands' with fresh water.

The islands' principal industry, petroleum refining, began in Curaçao in 1918. It accounted for about 40% of GNP and one-third of the labour force in the 1950s, but only 15–20% and 4% respectively in 1982. As a result of the recent downturn in world demand, the output of refined petroleum products from the Caribbean area was only about one-half of the region's refining capacity by 1982. Most of the crude petroleum for the islands' refineries is imported from nearby Venezuela, and the rest mainly from Mexico. The loss of the US market, and cutbacks in Venezuelan supplies, created serious problems for the Antilles' refineries: in 1982 Shell Curaçao halved its capacity to 200,000 barrels per day (b/d) and recorded a loss of NA Fl. 158m. Lago Oil (part of the Exxon group) on Aruba reduced its capacity from 440,000 to 300,000 b/d. Further operational losses and redundancies by the two refineries continued, and in 1984 Lago Oil announced the closure of its refinery on Aruba. In November Prime Minister Liberia-Peters visited Venezuela in order to gain assurances of continued supplies of crude pet-

roleum to avoid the threatened closure of Shell Curaçao. By 1982 emphasis was shifting to oil transhipment terminals (of which there were four, including ones on Bonaire and St Eustatius), although these, too, were working at less than full capacity. Curaçao has one of the largest dry docks for ship repairs in the western hemisphere, capable of handling ships of 150,000 dwt, but the depressed state of the world shipping industry resulted in declining business in Curaçao after 1977, and in Aruba after 1979. Two container terminals on Curaçao were opened in 1984, enlarging the freight capacity of the port, and Aruba was planning to double the port area of Oranjestad.

A sophisticated network of banking and other financial services is concentrated in Willemstad, making it the leading Caribbean centre for company financing and property investment, and bringing the islands US $147m. in foreign exchange earnings in 1981. The financial sector accounts for about 20% of all tax revenues, taking NA Fl. 220.4m. in 1982, compared with NA Fl. 100.5m. in 1980. In 1983 about 25,000 offshore companies were registered, although 40% of these were dormant. The USA accounts for 50% of offshore business, and in July 1984, after protracted negotiations, a new tax treaty was agreed with the US Government. However, as a result of the withdrawal of tax advantages, the Netherlands Antilles faces the loss of 25% of its budget revenue, represented by dues paid by US companies, which totalled US $157m. in 1983.

Import substitution has been successfully introduced: beer, soft drinks, cigarettes, paint, flour, car batteries, edible oils, toilet paper and soap are produced locally. In 1983, to protect local industries, import restrictions on certain products were imposed. Tourism has ended the islands' dependence on petroleum, and by 1980 tourism was the largest sector in the economy in terms of employment (outside the public sector), accounting for 10% of total employment, or about 8,000 workers. Development of the industry is hampered by high air fares and a high cost-structure. In 1983 tourism on Aruba and Curaçao was seriously affected by the devaluation of the Venezuelan bolívar, which caused the number of Venezuelans visiting the islands to fall drastically. However, the number of tourists visiting St Maarten has increased steadily.

The Netherlands Antilles is one of the most wealthy and stable Caribbean territories. According to estimates by the World Bank, the islands' total GNP (at average 1979–81 prices) was US $1,070m. ($4,160 per head) in 1980, rising to $1,190m. ($4,540 per head) in 1981. It was estimated that GNP per head increased by an average of 0.9% per year, in real terms, between 1970 and 1980. GNP grew by an estimated 2% in 1982. Petroleum and its derivatives account for the bulk of visible trade and help to offset the cost of imports. After surpluses in 1981 and 1982, there was a balance-of-payments deficit of NA Fl. 47m. in 1983. Dutch development aid of 245.7m. guilders was agreed for 1984. Expenditure on the islands has overtaken revenue receipts, and there was a NA Fl. 62.4m. budget deficit in 1983. The relative isolation of the individual islands has led to the development of semi-independent economies. Average incomes on Aruba, St Maarten and Curaçao are higher than on the other islands, but there were wage cuts in 1984, and further wage reductions in the public and private sectors have been proposed in order to counter the adverse economic situation. In 1982 unemployment affected 21% of the labour force in Curaçao, while the rate was only 9% in Aruba. The rate of inflation averaged 6.1% in 1982, falling to 2.3% in the year to May 1984.

In December 1983 it was announced that the Netherlands Antilles qualified for US aid under the terms of the US Government's Caribbean Basin Initiative.

Transport and Communications

There are no railways. All the islands have a good system of all-weather roads. Each island has a good harbour and an airport. A new container harbour at Willemstad, financed by the Netherlands, was opened in 1984. There are international airports on Curaçao, Aruba and St Maarten, while Bonaire, St Eustatius and Saba have air strips for inter-island flights.

Social Welfare

The Government provides free medical care and supplementary food supplies for poor persons. There are six hospitals on Curaçao and five for the other islands, with a total of about 2,500 beds. A National Health Insurance scheme has been proposed.

Education

Education is not compulsory. The Government allocates about one-third of budget expenditure to education, and the islands' educational facilities are generally of a high standard. The education system is the same as that of the Netherlands. Dutch is used as the principal language of instruction in schools on the 'Leeward Islands', while English is used in schools on the 'Windward Islands'. Primary education begins at six years of age and lasts for six years. Secondary education lasts for a further five years. In 1979 there were 215 nursery and primary schools, 68 junior, senior and vocational schools, two teacher-training colleges and one university, sited on Curaçao. The estimated rate of adult literacy is 95%.

Tourism

Tourism is a major industry on all the islands. The white sandy beaches of Aruba, Bonaire and St Maarten are a major attraction. The number of tourists visiting Curaçao declined in 1981 and 1982, while the number visiting St Maarten was increasing. The majority of tourists are from the USA, although an increasing proportion of visitors are of Latin American origin.

Public Holidays

1985: 1 May (Labour Day), 16 May (Ascension), 27 May (Whit Monday), 15 December (Kingdom Day), 25, 26 December (Christmas).

1986: 1 January (New Year's Day), 28–31 March (Easter), 30 April (Queen's Day).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 cents = 1 Netherlands Antilles gulden (guilder) or florin (NA Fl.).

Exchange rates (31 December 1984):
£1 sterling = 2.086 NA Fl.
US $1 = 1.800 NA Fl.

Statistical Survey

Sources (unless otherwise stated): Bureau voor de Statistiek, Willemstad, Curaçao; Bank van de Nederlandse Antillen, Breedestraat 1, Willemstad, Curaçao; tel 613600.

AREA, POPULATION AND DENSITY

Area (sq km): Curaçao 444, Aruba 193, Bonaire 288, St Maarten (Dutch portion) 34, St Eustatius 21, Saba 13; Total 993.

Population: 218,390 (excluding adjustment for underenumeration, estimated at 2%) at census of 31 December 1971; 231,932 (official estimate) at 1 February 1981. *By island* (1981 estimates): Curaçao 147,388; Aruba 60,312; Bonaire 8,753; St Maarten (Dutch portion) 13,156; St Eustatius 1,358; Saba 965.

Density (per sq km, 1 February 1981): Curaçao 332.0; Aruba 312.5; Bonaire 30.4; St Maarten (Dutch portion) 387.0; St Eustatius 64.7; Saba 74.2; Total 233.6.

Births, Marriages and Deaths (1975): Live births 4,258, Marriages 1,536, Deaths 1,193.

Economically Active Population (ISIC Major Divisions, official estimates at 31 December 1982): Agriculture, hunting, forestry and fishing 320; Mining and quarrying 177; Manufacturing 8,428; Electricity, gas and water 1,697; Construction 7,029; Trade, restaurants and hotels 21,865; Transport, storage and communications 5,876; Financing, insurance, real estate and business services 4,941; Community, social and personal services 30,232; Activities not adequately defined 166; *Total Employed* 80,731 (males 51,527, females 29,474); Unemployed 15,462 (males 6,881, females 8,581); *Total Labour Force* 96,193 (Source: ILO, *Year Book of Labour Statistics*).

AGRICULTURE, ETC.

Principal Crop (FAO estimate, 1982): Sorghum 1,000 metric tons (Source: FAO, *Production Yearbook*).

Livestock (1982): asses 3,000, cattle 9,000, pigs 8,000, goats 21,000, sheep 8,000, poultry 132,000 (Source: FAO, *Production Yearbook*).

Fishing (metric tons, live weight): Total catch 1,780 in 1979; 1,860 in 1980; 1,760 in 1981 (Source: FAO, *Yearbook of Fishery Statistics*).

MINING

Production ('000 metric tons, 1980): Phosphate rock 18; Salt (unrefined) 399 (1981 estimate).

INDUSTRY

Production (estimates, '000 metric tons, 1981): Motor spirit (petrol) and naphtha 2,500, Aviation gasoline 180, Kerosene 70, Jet fuel 1,450, Distillate fuel oils (gas oil) 3,350, Residual fuel oils 16,000, Lubricating oils 575, Petroleum bitumen (asphalt) 940, Sulphur (recovered) 90, Electric energy (million Wh) 2,275 (Source: UN, *Yearbook of Industrial Statistics*).

FINANCE

Currency and Exchange Rates: 100 cents = 1 Netherlands Antilles gulden (guilder) or florin (NA Fl.). *Coins:* 1, 2½, 5, 10, and 25 cents; 1, 2½ and 25 NA Fl. *Notes:* 1, 2½, 5, 10, 25; 50, 100, 250 and 500 NA Fl. *Sterling and Dollar Equivalents* (31 December 1984): £1 sterling = 2.086 NA Fl.; US $1 = 1.800 NA Fl; 100 NA Fl. = £47.93 = $55.56. *Exchange Rate:* fixed at US $1 = 1.79 guilders (par value) or $1 = 1.80 guilders (market rate) since December 1971.

Cost of Living (Consumer price index for Aruba, Bonaire and Curaçao; averages for December; base: April 1975 = 100): 178.8 in 1981; 187.2 in 1982; 191.3 in 1983.

Money Supply (million NA Fl. at 31 December 1983): Currency outside banks 162.6; Demand deposits at commercial banks 280.8 (Source: IMF, *International Financial Statistics*).

Balance of Payments (US $ million, 1980): Merchandise exports f.o.b. 6,053.3, Merchandise imports f.o.b. −5,943.9, *Trade Balance* 109.4; Exports of services 1,275.6, Imports of Services −1,431.0, *Balance on Goods and Services* −46.0; Private unrequited transfers (net) −25.6; Government unrequited transfers (net) 66.7, *Current Balance* −4.9; Direct capital investment (net) 26.7, Other long-term capital (net) 2.8, Short-term capital (net) −17.2, Net errors and omissions 0.3, *Total* (net monetary movements) 7.6, Valuation changes (net) 14.0, *Changes in Reserves* 21.6. (Source: IMF, *International Financial Statistics*).

EXTERNAL TRADE

Principal Commodities (Aruba and Curaçao, US $ million, 1979): *Imports:* Food and live animals 135.7, Petroleum and petroleum products 3,713.0, Basic manufactures 115.0, Machinery and transport equipment 138.8; Total (incl. others) 4,389.5 *Exports:* Crude petroleum 160.4, Partly refined petroleum 41.4, Petroleum products 3,702.7 (Motor spirit 632.0, Kerosene 493.4, Distillate fuels 832.7, Residual fuel oil 1,514.2); Total (incl. others) 3,963.6.

Principal Trading Partners (Aruba and Curaçao, US $ million, 1979): *Imports:* Brazil 19.3, Colombia 20.3, Ecuador 106.5, Japan 26.9, Netherlands 109.8, Nigeria 257.6, Qatar 125.5, Saudi Arabia 88.6, United Kingdom 29.2, USA 303.0, Venezuela 3,099.7. Total (incl. others) 4,389.5. *Exports:* Colombia 117.1, Costa Rica 105.7, Dominican Republic 97.1, Ecuador 100.6, France 102.9, Jamaica 112.1, Netherlands 99.7, United Kingdom 121.9, USA 2,032.5; Total (incl. others) 3,963.6.

TRANSPORT

Road Traffic (motor vehicles in use, 1975): *Curaçao:* cars 34,597, Lorries 5,185, Buses 432, Taxis 156, Other cars 782, Motor cycles 770, Total 41,922; *Aruba:* Cars 14,247, Lorries 465, Buses 127, Taxis 67, Other cars 287, Motor cycles 200, Total 15,393.

Shipping (international freight traffic, estimates in '000 metric tons, 1982): Goods loaded 46,500; Goods unloaded 50,600 (source: UN, *Monthly Bulletin of Statistics*).

TOURISM

Tourists ('000, 1983): *Stay-over Tourists:* Aruba 195.1, Bonaire 20.2, Curaçao 110.9, St Maarten 263.2; *Cruise Tourists:* Aruba 39.1, Bonaire 0.3, Curaçao 107.1, St Maarten 73.

EDUCATION

Primary (1973/74): 126 schools, 38,170 pupils, 1,452 teachers.
Junior High (1973/74): 34 schools, 9,410 pupils, 455 teachers.
Senior High (1973/74): 4 schools, 2,694 pupils, 176 teachers.
Special Education (1973/74): 22 schools, 1,715 pupils, 173 teachers.

Directory

The Constitution

The form of government for the Netherlands Antilles is embodied in the Charter of the Kingdom of the Netherlands, which came into force on 20 December 1954. The Netherlands and the Netherlands Antilles each enjoy full autonomy in domestic and internal affairs and are united on a footing of equality for the protection of their common interests and the granting of mutual assistance.

The monarch is represented in the Netherlands Antilles by the Governor, who is appointed by the Crown. The central Government of the Netherlands Antilles appoints a Minister Plenipotentiary to represent the Antilles in the Government of the Kingdom. Whenever the Netherlands Council of Ministers is dealing with matters coming under the heading of joint affairs of the realm (in practice mainly foreign affairs and defence), the Council assumes the status of Council of Ministers of the Kingdom. In that event, the Minister Plenipotentiary appointed by the Government of the Netherlands Antilles takes part, with full voting powers, in the deliberations.

A legislative proposal regarding affairs of the realm and applying to the Netherlands Antilles as well as to the metropolitan Netherlands is sent, simultaneously with its submission, to the Netherlands Parliament, the States-General, and to the legislature (Staten) of the Netherlands Antilles. The latter body can report in writing to the States-General on the draft Kingdom Statute and designate one or more special delegates to attend the debates and furnish information in the meetings of the Chambers of the States-General. Before the final vote on a draft the Minister Plenipotentiary has the right to express an opinion on it. If he disapproves of the draft, and if in the Second Chamber a three-fifths majority of the votes cast is not obtained, the discussions on the draft are suspended and further deliberations take place in the Council of Ministers of the Kingdom. When special delegates attend the meetings of the Chambers this right devolves upon the delegates of the parliamentary body designated for this purpose.

The Governor has executive power in external affairs, which he exercises in co-operation with the Council of Ministers. He is assisted by an Advisory Council which consists of at least five members appointed by him.

Executive power in internal affairs is vested in a nominated Council of Ministers, who are responsible to the legislature (Staten). The Netherlands Antilles Staten consists of 22 members, who are elected by universal adult suffrage for four years (subject to dissolution). Every island group is an electoral district. Aruba elects eight members, Bonaire one member, the Netherlands 'Windward Islands' one member and Curaçao 12 members. In the island groups where more than one member is elected, the election is by proportional representation. Inhabitants have the right to vote if they have Dutch nationality and have reached the age of 18. Voting is not compulsory. Each island territory also elects an Island Council, to manage its internal affairs, consisting of a Lieutenant-Governor, and a number of councillors. The Central Government of the Netherlands Antilles has the right to annul any local island decision which is in conflict with the public interest or the constitution. Control of the police, communications, monetary affairs, health and education remain under the jurisdiction of the Central Government.

On 1 January 1986 Aruba was to acquire separate status within the Kingdom of the Netherlands. However, in economic and monetary affairs there was to be a co-operative union between Aruba and the other five islands, to be known as the 'Union of the Netherlands Antilles and Aruba'.

The Government

HEAD OF STATE

HM Queen Beatrix of the Netherlands

Governor: Dr Rene A. Römer

COUNCIL OF MINISTERS

A coalition of the Nationale Volkspartij (NVP), the Movimentu Electoral di Pueblo (MEP), the Democratische Partij (DP), the Unión Patriótico Bonairiano (UPB) and the Democratic Party of St Maarten.

NEW ZEALAND

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Dominion of New Zealand lies in the South Pacific Ocean, about 1,750 km (1,100 miles) south-east of Australia. It consists of North Island and South Island, separated by the narrow Cook Strait, and several smaller islands, including Stewart Island in the south. The climate is temperate and moist, with an average temperature of 12°C (52°F), except in the far north, where higher temperatures are reached. The official language is English but the indigenous Maori population also use their own language. About 75% of the inhabitants profess Christianity: 35% are Anglicans, 22% Presbyterians and 16% Roman Catholics, with the remainder belonging to other Christian denominations. The national flag (proportions 2 by 1) is blue, with a representation of the United Kingdom flag as a canton in the upper hoist. In the fly are four five-pointed red stars, edged in white, in the form of the Southern Cross constellation. The capital is Wellington, on North Island.

Recent History

New Zealand is a former British colony. It became a dominion, under the British Crown, in 1907 and achieved full independence by the Statute of Westminster, passed by the British Parliament in 1931 and accepted by New Zealand in 1947.

In 1962 Western Samoa, formerly administered by New Zealand, achieved independence, and in 1965 the Cook Islands attained full internal self-government, but retained many links, including common citizenship, with New Zealand. In October 1974 Niue, one of New Zealand's island territories, obtained similar status 'in free association with New Zealand'.

In December 1972 the first Labour government for more than 12 years came to power, under the leadership of Norman Kirk, after a succession of National Party administrations. When Labour took office, the economy was thriving, mainly as a result of an international price boom for agricultural commodities. However, this prosperity brought with it the problem of inflation. Soaring domestic demand and the energy crisis of 1973–74 led to a rapid rise in imports, a consequent reduction in exchange reserves and a severe balance-of-payments problem.

The Labour government's foreign policy was more independent than that of its predecessors. It phased out New Zealand's military commitments under the South-East Asia Treaty Organization and established diplomatic relations with the People's Republic of China.

Norman Kirk died in August 1974, and Wallace Rowling, hitherto Minister of Finance, became Prime Minister in September. The economic recession worsened, and in November 1975 a general election resulted in victory for the National Party, which won 55 of the 87 seats in the House of Representatives, while the Labour Party took the remaining 32 seats. The new government, under Robert (from January 1984, Sir Robert) Muldoon, who had led the National Party since 1974, introduced austere economic policies and a 'freeze' on wages, and in 1976 reduced the annual intake of migrants from 30,000 to 5,000, while conducting a determined campaign against illegal immigrants.

New Zealand's economy continued to be affected by very low growth and increasing unemployment. Muldoon's leadership was characterized by several controversial issues, and growing dissatisfaction with the Government was reflected at the general election in November 1978. The National Party remained in power, with 50 of the 92 seats in the enlarged House of Representatives, but its share of the total vote fell from 47.2% in 1975 to 39.8%. Labour won more votes (40.4% of the total) but fewer seats (41). The Social Credit Political League won 17.1% of the poll, compared with only 7.4% in 1975, but gained only one seat. In the November 1981 election the National Party's majority was further reduced. It won 47 of the 92 seats in the House, with 38.6% of the votes, while Labour won 43 seats (with 38.8%) and Social Credit two (with 20.6%).

In February 1984 Muldoon's Government antagonized New Zealand's trade unions by effecting legislation to ban 'closed shop' agreements with employers, thus giving employees the right to choose whether or not to join a trade union. Further legislation was used in June to compel striking construction workers at the Marsden Point petroleum refinery to return to work. In the same month, faced with dissent within his own party (which threatened its working majority of one seat in the House of Representatives), Muldoon called a general election for July, four months earlier than it was due. The Labour Party won the election, with 56 of the 95 seats in an enlarged House of Representatives, receiving 43% of the valid votes, while the National Party took 37 seats (with 36% of the votes), and the Social Credit Party two seats (with 8%). It was thought that the National Party had lost considerable support to the newly-formed New Zealand Party, a right-wing party which had gained 12% of the votes, though no seats, after campaigning for a minimum of government intervention in the economy.

The new Prime Minister, David Lange (who had succeeded Wallace Rowling as leader of the Labour Party in February 1983), immediately affirmed his party's pledge to ban from New Zealand's ports all vessels believed to be carrying nuclear weapons or powered by nuclear energy, a move which caused considerable strain in the country's relations with Australia and the USA, its partners in the ANZUS military pact (see page 97), and led to the cancellation, in February 1985, of a joint naval exercise. New Zealand's stand against South Africa's policy of racial apartheid caused South Africa to close its consulate in Wellington in anticipation of its threatened closure by the New Zealand Government. It was also decided that South African sportsmen would be allowed into New Zealand only if they declared that they were not representing their country, a move which may serve to avoid much of the controversy which attached to a tour by a South African rugby football team in 1981. James McLay, who had been deputy leader of the National Party since March 1984, defeated Sir Robert Muldoon in an election for leader of the party in November 1984.

Government

Executive power is vested in the British monarch, as Head of State, and is exercisable by an appointed representative, the Governor-General, who must be guided by the advice of the Executive Council (Cabinet), led by the Prime Minister. Legislative power is vested in the unicameral House of Representatives, with 95 members (including four Maoris) elected for three years by universal adult suffrage from single-member constituencies. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers. The Cabinet is responsible to the House.

Defence

The total strength of regular forces in July 1984 was 12,692: army 5,548, navy 2,827, air force 4,317. Defence spending for 1982/83 amounted to an estimated $NZ652.1m.

Economic Affairs

New Zealand's economy is essentially based on free enterprise, although there is considerable government regulation and an extensive system of social welfare. The country's prosperity is based on diversified industrial and commercial activity, but it remains dependent on primary products and processed foods for about 60% of export earnings. In 1982, according to estimates by the World Bank, New Zealand's gross national product (GNP) per head, measured at average 1980–82 prices, was US $7,920, a level comparable with that of industrialized European countries. It was estimated that New Zealand's GNP per head increased by an average of 1.5% per year, in real terms, between 1960 and 1982. In the 1970–80 decade, however, the

annual real growth of GNP per head averaged only 0.3%. The average rise in overall gross domestic product (GDP) was 3.6% per year in 1960–70, slowing to 1.8% per year in 1970–82.

Agriculture, forestry and fishing contributed 7.6% of GDP in 1982/83 and employed 11.3% of the working population in 1982. However, New Zealand's external economy is heavily dependent on agriculture, particularly livestock products. Wool, meat and dairy produce together provided an estimated 43.4% of export earnings in 1983/84. New Zealand was compelled to reduce its exports of butter to the United Kingdom from 115,000 metric tons (70% of export production) in 1979 to 83,000 tons in 1984, as a result of British obligations to the EEC, with further reductions agreed, to 81,000 tons in 1985 and 79,000 tons in 1986. Exports of lamb were also reduced in return for lower EEC import levies. The United Kingdom's share of New Zealand exports declined from 30% in 1971 to 10.3% in 1983/84. Owing to the growing inaccessibility of its traditional European market, New Zealand has increased exports to other regions, particularly Asia, the USSR and the Middle East; in 1983 Iran replaced the United Kingdom as the principal customer for New Zealand's lamb. Terms for closer economic relations (CER), agreed with Australia in November 1982, were to result in the gradual elimination of trade barriers between the two countries by 1995. In 1983/84 the principal customers for New Zealand's exports were Japan (taking 15.2% of the total), Australia (15.0%), the USA (12.9%) and the United Kingdom (10.3%).

Manufacturing contributed 22.7% of GDP in 1982/83 and provides about one-quarter of New Zealand's export earnings. The management of exotic forests, providing the basis of the pulp and paper industry, is a rapidly expanding sector. New Zealand's annual output of roundwood is expected to increase from 10m. cu m in 1982 to 36m. cu m in the year 2000. Light industry continues to expand, the principal branches being food-processing and canning, the assembly of motor vehicles, the manufacture of other transport equipment, wood and cork products, clothing, footwear and made-up textile goods. A government-sponsored steel industry, based on the smelting of local iron sands, has been established on the west coast of North Island. A large aluminium smelter at Bluff produces about 200,000 tons annually. High-quality silica sand has also been found in South Canterbury (South Island).

Since 1974 New Zealand has faced serious economic problems, largely initiated by the effects of a sharp rise in the world price of petroleum on a country almost wholly dependent on imported fuels. Symptoms of the depression include a low rate of economic growth since 1975 (the economy actually contracted by 0.75% in 1982/83) and a persistent deficit on the current account of the balance of payments ($NZ 2,100m. in 1982/83). A rise in the number of registered unemployed, from 5,000 in 1975 to 76,963 (5.7% of the labour force) in September 1983, has been accompanied by a shortage of skilled workers, many of whom have been seeking higher pay in Australia. In June 1982 the Government imposed a 'freeze' on wages and prices, in order to combat inflation, which subsequently fell to 3.5% in the year to March 1984, compared with 16.6% in the year to September 1982. However, influenced by a devaluation of the New Zealand dollar by 20% in July 1984, inflation rose to 7% in the year to September 1984, and the new Labour Government of David Lange allowed limited wage bargaining to take place in December, with settlements producing increases of about 6%–7%.

The Government has given priority to reviving economic growth, particularly by stimulating the export sector and by rapid development of indigenous energy resources, with new jobs expected as a result. The exploitation of new markets, frequent devaluations of the New Zealand dollar (by about 6% per year in 1980–83 and by 20% in July 1984) and various export incentive schemes are expected to assist in achieving an increase in the volume of exports. However, many economists argue that the removal or reduction of New Zealand's multitude of import controls is necessary to induce greater efficiency in the private sector and more competitive goods for export.

The exploitation of New Zealand's energy resources seeks both to reduce (and eventually to eliminate) the country's dependence on imported fuels, and to increase its energy-related exports, mainly by using natural gas, hydroelectric power and coal to increase the output of energy-intensive products such as aluminium. In 1979 the Government announced that less than 10% of the natural gas resources of the inland Kapuni field, on North Island, and the huge Maui field, off the Taranaki coast, would be exported, thus making New Zealand more than 50% self-sufficient in transport fuels by 1987. About 25% of the Maui reserves are to be converted to liquid fuels. New Zealand also has enormous proven coal reserves: South Island has 4,400m. metric tons of lignite. In 1983 hydroelectricity contributed more than 80% of the country's electricity output.

Transport and Communications

New Zealand had 4,332 km of railways in 1984 and 92,910 km of roads in 1983. In 1984 contracts were awarded for the first stage of the electrification of the 686-km trunk railway line linking Auckland and Wellington. There are about 40 seaports, of which the most important are Auckland, Wellington, Lyttelton (the port of Christchurch) and Dunedin. Much traffic between North Island and South Island is by air; there are also 'roll-on, roll-off' ferry services linking Wellington and Picton and Lyttelton. The country's principal towns are linked by a network of air services, and there are international airports at Auckland, Christchurch and Wellington. In July 1971 the earth satellite station at Warkworth (north of Auckland) was opened and is linked to the INTELSAT III communications system over the Pacific Ocean.

Social Welfare

New Zealand has a comprehensive system of social welfare, administered by the Department of Social Security. A tax is levied on all incomes to finance the services, which provide medical care and benefits for old age, blindness, widowhood, orphanhood, unemployment and sickness, as well as superannuation and family benefits. There are reciprocal agreements with Australia and the United Kingdom. New Zealand had 32,047 hospital beds (one for every 98 inhabitants) in 1978, and there were 4,880 physicians (one for every 635 inhabitants) working in the country in 1980.

Education

State education is free and, for children between six and 15 years of age, compulsory. Primary education lasts from five to 11 years of age, after which children pass on to intermediate schools for two years before going on to secondary schools until a maximum age of 18. In 1983, 469,735 pupils were enrolled in primary schools and 227,831 in secondary schools. Special educational services cater for children in remote areas and for the handicapped. There are six universities and an agricultural college with university status.

Tourism

New Zealand's principal tourist attractions are its high mountains, lakes, hot springs and beaches. There are abundant opportunities for outdoor recreation, and New Zealand is particularly well known for its fishing. In 1982/83 New Zealand received 487,700 visitors.

Public Holidays

1985: 3 June (Queen's Official Birthday), 28 October (Labour Day), 25, 26 December (Christmas Day and Boxing Day).

1986: 1 January (New Year's Day), 6 February (Waitangi Day, anniversary of 1840 treaty), 28–31 March (Easter), 25 April (ANZAC Day, anniversary of 1915 landing at Gallipoli).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 cents = 1 New Zealand dollar ($NZ).

Exchange rates (31 December 1984):
£1 sterling = $NZ2.4315;
US $1 = $NZ2.1000.

Directory

The Constitution

New Zealand has no written constitution. The political system is closely modelled on that of the United Kingdom. As in the latter country, constitutional practice is an accumulation of convention, precedent and tradition. A brief description of New Zealand's principal organs of government is given below:

HEAD OF STATE

Executive power is vested in the British monarch and is exercisable in New Zealand by the monarch's personal representative, the Governor-General.

In the execution of the powers and authorities vested in him, the Governor-General must be guided by the advice of the Executive Council; but, if in any case he sees sufficient cause to dissent from the opinion of the Council, he may act in the exercise of his powers and authorities in opposition to the opinion of the Council, reporting the matter to the monarch without delay, with the reasons for his so acting.

EXECUTIVE COUNCIL

The Executive Council consists of the Governor-General and all the Ministers. Two members, exclusive of the Governor-General or the presiding member, constitute a quorum. The Governor-General appoints the Prime Minister and, on the latter's recommendation, the other Ministers.

HOUSE OF REPRESENTATIVES

Parliament comprises the Crown and the House of Representatives.

The number of members constituting the House of Representatives is 95, each representing a single constituency. Of the total members, 91 are drawn from general seats and four from Maori seats. They are designated 'Members of Parliament' and are elected for three years, subject to the dissolution of the House before the completion of their term.

Everyone over the age of 18 years may vote in the election of members for the House of Representatives. Since August 1975 any person, regardless of nationality, ordinarily resident in New Zealand for 12 months or more and resident in an electoral district for three months or more is qualified to be registered as a voter. Compulsory registration of all electors except Maoris was introduced at the end of 1924; it was introduced for Maoris in 1956.

There are 91 European electoral districts and four Maori electoral districts. As from August 1975, any person of the Maori race, which includes any descendant of such a person, who elects to be considered as a Maori for the purposes of the Electoral Act may enrol on the Maori roll for that particular Maori electoral district in which that person resides.

By the Electoral Amendment Act, 1937, which made provision for a secret ballot in Maori elections, Maori electors were granted the same privileges, in the exercise of their vote, as general electors.

In local government, with some minor exceptions, there is a wider electoral franchise, with non-residential ratepayers also being eligible to vote.

The Government

Head of State: HM Queen Elizabeth II.

Governor-General and Commander-in-Chief: Sir David Stuart Beattie (took office 6 November 1980).

CABINET

(January 1985)

Judicial System

The Judicial System of New Zealand comprises a Court of Appeal, a High Court, an Arbitration Court and a Compensation Court. There are also District Courts, having both civil and criminal jurisdiction. Final appeal is to the Judicial Committee of the Privy Council in the United Kingdom.

District Courts have jurisdiction in most criminal matters and specified District Court Judges are empowered to sit with juries. Family Courts are constituted as Divisions of District Courts to deal with dissolution of marriage, separation, maintenance, child custody and other family law matters.

Chief Justice: Sir RONALD DAVISON.

Radio and Television

The Broadcasting Corporation of New Zealand (BCNZ), established in 1977, supervises the independent operating Services, Radio New Zealand (RNZ) and Television New Zealand (TVNZ), and provides transmission facilities for them. Revenue for public broadcasting is derived from radio and television advertising and from the television licence fee.

Commercial radio has been operating in New Zealand since 1937. In 1984 there were 14 privately-owned commercial radio stations and 30 public commercial stations. In January 1984 there were 945,398 licensed television sets, including 830,834 colour sets. Colour transmissions began in 1973.

Broadcasting Corporation of New Zealand (BCNZ): Bowen State Bldg, Bowen St, POB 98, Wellington; tel. (04) 721777; telex 31031; f. 1977; nine-mem. board; supervises public radio and TV; Chair. HUGH B. RENNIE.

NEW ZEALAND'S ASSOCIATED TERRITORIES

New Zealand's associated territories are the self-governing Cook Islands and Niue, and the dependent territories of Tokelau and the Ross Dependency.

COOK ISLANDS

Introductory Survey

Location, Climate, Language, Religion, Capital

The 13 inhabited and two uninhabited islands of the Cook Islands are located in the southern Pacific Ocean. The territory lies between American Samoa, to the west, and French Polynesia, to the east. The islands extend over about 2m. sq km (more than 750,000 sq miles) of ocean, and form two groups: the Northern Cooks, which are all atolls and include Pukapuka, Rakahanga and Manihiki, and the Southern Cooks, including Aitutaki, Mangaia and Rarotonga, which are all volcanic islands. From December to March the climate is warm and humid, with the possibility of serious storms; from April to November the climate is mild and equable. The average annual rainfall in Rarotonga is 2,134 mm (84 in). The official language is English, but Polynesian languages are also spoken. The principal religion is Christianity, with about 75% of the population adhering to the Cook Islands Congregational Christian Church. The capital is Avarua, on Rarotonga.

Recent History

The Cook Islands were proclaimed a British Protectorate in 1888, and a part of New Zealand in 1901. On 4 August 1965 they became a self-governing territory in free association with New Zealand. The people are British subjects and New Zealand citizens. Sir Albert Henry, leader of the Cook Islands Party (CIP), was elected Premier in 1965 and re-elected in 1974 and March 1978. However, in July 1978, following an enquiry into alleged electoral malpractice, the Chief Justice disallowed votes cast in the elections to the Legislative Assembly (later renamed Parliament) by Cook Islands expatriates who had been flown from New Zealand in charter aircraft, with their fares paid from public funds. The amended ballot gave a majority to the Democratic Party (DP), and its leader, Dr (later Sir) Thomas Davis, was sworn in as Premier by the Chief Justice. In August 1979 Sir Albert Henry was convicted of conspiracy to defraud, and was stripped of his knighthood.

In May 1981 an Amendment Bill made several changes in the Cook Islands' Constitution, increasing the membership of Parliament from 22 to 24, and extending the parliamentary term from four to five years.

In March 1983 Sir Thomas Davis lost power to the CIP, under Geoffrey Henry, cousin of the former Prime Minister. However, with one seat already subject to re-election, Henry's majority of three was eradicated by the death of one CIP Member of Parliament and the transfer of support to the DP by another, Tupui Henry, son of the late Albert Henry. Geoffrey Henry resigned in August and continued with a caretaker government until a general election in November returned the DP to power under Sir Thomas Davis. In August 1984 Sir Thomas Davis announced a radical Cabinet reshuffle, with three of the seven posts going to members of the CIP, to form a coalition government, with Geoffrey Henry as Deputy Prime Minister. In view of the DP's slender parliamentary majority of two seats, this move was believed to have been made in order to counter the possibility that Vincent Ingram, a member of the DP, would vote in Parliament against the Government's forthcoming budget.

Government

The Cook Islands is an internally self-governing state in free association with New Zealand, which is responsible for the Cook Islands' external affairs and defence. Executive authority is vested in the British monarch, who is Head of State, and is exercised through her official representative, while a representative of the New Zealand Government resides on Rarotonga. Executive government is carried out by a Cabinet, consisting of a Prime Minister and six other ministers. The Cabinet is collectively responsible to the Parliament, which is formed of 24 members who are elected by universal adult suffrage every five years. The House of Ariki, which comprises up to 15 members who are hereditary chiefs, can advise the Government, but has no legislative powers.

Economic Affairs

Economic development on the Cook Islands has always been hindered by isolation and the limited scale of activity. All forms of exports, but in particular fresh fruit, oranges, bananas, tomatoes and pineapples, have been restricted by lack of shipping facilities and inadequate marketing in New Zealand metropolitan centres.

The islands receive a large proportion of their revenue in the form of aid from New Zealand, and from remittances which are sent back to the islands by migrants. A fruit processing plant and several clothing factories represent the major manufacturing activities.

A feature of island life since 1945 has been the pattern of migration from the outer islands to Rarotonga and, from there, to New Zealand, where, until 1976, Cook Islanders enjoyed free entry as New Zealand citizens. In 1978 there were 18,610 Cook Islanders living in New Zealand, more than in the Cook Islands. Meanwhile, the islands' gross domestic product declined by 26.5%, in real terms, between 1970 and 1978.

Following the change of Government in July 1978, the Cook Islands' first Development Plan was announced. The main aims were to stimulate the economy, through the private sector wherever possible, by offering incentives and developing infrastructure, negotiating joint ventures with 'distant water' fishing nations in order to benefit from the new exclusive economic zone extending to 200 nautical miles (370 km) from the coasts, and attracting qualified Cook Islanders back from New Zealand. The second Development Plan (1982-85) placed emphasis on agriculture, fisheries and tourism; expenditure was set at $NZ25m. Offshore banking was established in the islands in May 1982.

Transport and Communications

Sea and air services connect Rarotonga with the outer Cook Islands, New Zealand and other Pacific states, and a 33-km sealed road encircles the island.

Social Welfare

In 1976 the Cook Islands had eight hospitals, with a total of 161 beds, and in 1979 there were 22 physicians working in the territory.

Education

Free secular education is compulsory for all children between six and 15 years of age. In 1983 there were 34 schools, attended by 5,530 students, providing education at pre-school, primary, high school and college levels. Secondary education is provided at Tereora College, on Rarotonga, and at colleges on Aitutaki, Mangaia, Mauke and Atiu. Under the New Zealand Training Scheme, the New Zealand Government offers overseas scholarships in New Zealand, Fiji, Papua New Guinea, Australia and Western Samoa for secondary and tertiary education, career-training and short-term in-service training.

Tourism

Tourism is an important industry in the Cook Islands. Most of the tourist facilities are to be found on Rarotonga, but the outer islands offer attractive scenery.

Public Holidays

1985: 3 June (Queen's Official Birthday), 25, 26 December (Christmas Day and Boxing Day).
1986: 1 January (New Year's Day), 28–31 March (Easter), 25 April (ANZAC Day, anniversary of 1915 landing at Gallipoli).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

Local and New Zealand currencies are both legal tender:
100 cents = 1 Cook Islands dollar ($CI);
100 cents = 1 New Zealand dollar ($NZ).

Exchange rates (31 December 1984):
£1 sterling = $NZ2.4315;
US $1 = $NZ2.1000.

Statistical Survey

Source (unless otherwise stated): Statistics Office, POB 125, Rarotonga; tel. 29390.

AREA AND POPULATION

Area: 234 sq km (90.3 sq miles).

Population: 17,227 (males 8,889; females 8,338) at census of 1 December 1981. *By island:* Rarotonga (including the capital, Avarua) 9,098, Aitutaki 2,295, Atiu 1,225, Mangaia 1,360, Manihiki 396, Mauke 675, Mitiaro 256, Manuae 12, Nassau 133, Palmerston 51, Penrhyn 607, Pukapuka 788, Rakahanga 271.

Vital Statistics (1983): birth rate 23.8 per 1,000, death rate 7.4 per 1,000.

Economically Active Population (1981 census): Agriculture, hunting, forestry and fishing 1,697; Mining and quarrying 16; Manufacturing 397; Electricity, gas and water 137; Construction 309; Trade, restaurants and hotels 717; Transport, storage and communications 581; Financing, insurance, real estate and business services 131; Community, social and personal services 1,573; Activities not adequately defined 252; Total labour force 5,810 (males 4,051; females 1,759).

AGRICULTURE, ETC.

Principal Crops (1982, metric tons unless otherwise indicated): Copra* 1,525, Citrus fruit* 145, Pineapples* 174, Bananas 2,132, Pawpaw† 410,039 kg, Capsicums† 17,596 kg, Beans† 22,827 kg, Courgettes† 14,009 kg, Avocados† 27,075 kg.

* Processed and exported quantities.

† Production from Rarotonga only, air freighted and sold on the New Zealand market.

Livestock (1982): Pigs 17,000, Goats 1,000, Poultry 72,000, Horses 9,000 (FAO estimates).

Fishing (metric tons): Total catch 1,091 in 1978; 830 in 1979.

FINANCE

Currency and Exchange Rates: New Zealand and Cook Islands currencies are both legal tender. New Zealand currency: 100 cents = 1 New Zealand dollar ($NZ); *Coins:* 1, 2, 5, 10, 20 and 50 cents; *Notes:* 1, 2, 5, 10, 20 and 100 dollars. Cook Islands currency: 100 cents = 1 Cook Islands dollar ($CI); *Coins:* 1, 2, 5, 10 and 50 cents, 1 dollar. *Sterling and US Dollar Equivalents* (31 December 1984): £1 sterling = $NZ2.4315; US $1 = $NZ2.1000; $NZ100 = £41.13 = US $47.62. *Average Exchange Rate* (US $ per $NZ): 0.870 in 1981; 0.752 in 1982; 0.669 in 1983.

Budget (1982/83, $NZ million): Revenue 24.8 (principal sources are import and export duties, sales tax, stamp sales, income and welfare tax, turnover tax and budgetary aid from New Zealand ($NZ8.4m. in 1981/82 and $NZ8.9m. in 1984/85)); Expenditure 24.8 (principal items are education, public health and public works).

Cost of Living (Consumer Price Index, 1970 = 100): 446.5 (1981), 502.5 (1982), 540.1 (1983).

Gross Domestic Product ($NZ '000 in current prices): 13,731 in 1976; 16,372 in 1977; 17,818 in 1978.

EXTERNAL TRADE

Principal Commodities (1982): *Imports:* Foodstuffs, Timber, Fuel and Cement, Total (incl. others) $NZ26.6m. *Exports:* Clothing $NZ1,950,400, Pawpaw $NZ674,100, Bananas $NZ570,900, Copra $NZ433,200, Total (incl. others) $NZ4.9m.

Principal Trading Partners: New Zealand, the EEC, Japan, the USA, Hong Kong and Australia.

TRANSPORT

Road Traffic (registered vehicles, April 1983): 6,555.

TOURISM

Foreign Tourist Arrivals (1983): 19,472.

EDUCATION

In 1983 there were 34 schools, attended by 5,530 students, providing education at pre-school, primary, high school and college levels.

Directory

The Constitution

A new constitution was proclaimed in 1965, under which the Cook Islands have complete control over their own affairs in free association with New Zealand, but they can at any time move into full independence by a unilateral act if they so wish.

Executive authority is vested in the British monarch, who is Head of State, and exercised through her official representative. The New Zealand Government is represented by a representative, resident on Rarotonga.

Executive government is carried out by a Cabinet consisting of a Prime Minister and six ministers including a Deputy to the Prime Minister. The Cabinet is collectively responsible to Parliament.

Parliament consists of 24 members who are elected by universal suffrage every five years (including one member elected by voters living overseas), and is presided over by a Speaker. The House of Ariki comprises up to 15 members who are hereditary chiefs; it can advise the government but has no legislative powers.

Each of the main islands, except Rarotonga, has an Island Council.

The Government

Queen's Representative: (vacant).

New Zealand Representative: P. A. J. Tipping.

THE CABINET
(February 1985)

Prime Minister and Minister for Finance, Development and Planning, Police, Defence and Safety: Sir Thomas Davis (DP).

Deputy Prime Minister, Minister for Works, Education, Tourism and Arts and Culture and Associate Minister for Finance and Information: Geoffrey A. Henry (CIP).

Minister for Outer Island Affairs, Marine Resources and Trade, Labour and Transport and Minister responsible for Public Service and Information: Dr Pupuke Robati (DP).

Minister for Internal Affairs, Social Welfare and Justice and Lands and Associate Minister for Arts and Culture, Tourism and Agriculture: Dr Teariki Matenga (DP).

Minister for Posts and Telecommunications, Immigration, Electric Power Supply and Energy Development, and Associate Minister for Outer Island Affairs: Inatio Akaruru (CIP).

Minister for Foreign Affairs, Minister responsible for the Crown Law Office, Legislative Service and Corrective Services, and Associate Minister for Police, Customs and Immigration: Norman George (DP).

Minister for Agriculture and Health, Minister responsible for the Kia Orana Food Corporation and Associate Minister for Marine Resources, Works and Trade, Labour and Transport: Dr Terepai Maoate (CIP).

MINISTRIES

All Ministries are in Avarua, Rarotonga.

Legislature

PARLIAMENT

After the general election in November 1983, the Democratic Party held 13 seats, while the Cook Islands Party held 11 seats.

Speaker: David Hosking.

HOUSE OF ARIKI

President: Pa Tepaeru Ariki.

Political Organizations

Cook Islands Party (CIP): Rarotonga; Leader GEOFFREY A. HENRY.

Cook Islands Party Alliance (CIPA): Rarotonga; f. 1983; Leader TUPUI HENRY.

Democratic Party (DP): POB 202, Rarotonga; f. 1971; Leader Sir THOMAS DAVIS.

Unity Party: Rarotonga; Leader Dr JOSEPH WILLIAMS.

Judicial System

The judiciary comprises the Privy Council, the Court of Appeal and the High Court.

The High Court exercises jurisdiction in respect of civil, criminal and land titles cases throughout the Cook Islands. The Court of Appeal hears appeals against decisions of the High Court. The Privy Council, sitting in the United Kingdom, is the final appellate tribunal for the country.

Chief Justice of the High Court: Sir GRAHAM DAVIES SPEIGHT.

Judge of the High Court: J. D. DILLON.

Religion

Main groups are the Cook Islands Congregational Christian Church, to which 75% of the population belong, Roman Catholic, Latter-day Saints (Mormons), Seventh-day Adventists and the Bahá'í Faith.

CHRISTIANITY

The Roman Catholic Church

Bishop of Rarotonga (Cook Islands and Niue): ROBIN LEAMY, POB 147, Rarotonga; c. 2,590 adherents.

The Press

Akatauira: Rarotonga; f. 1979; Cook Islands Party weekly.

Cook Islands News: POB 126, Avarua, Rarotonga; f. 1954; govt-owned daily in English and Maori; Editor LAWRANCE BAILEY; circ. 2,000.

Viewpoint: POB 643, Avarua, Rarotonga; f. 1983; weekly; independent; Editor GREGG HOEPPER.

The Weekender: Rarotonga; f. 1971; Democratic Party weekly.

Radio

There were an estimated 10,000 radio receivers in use in 1983.

Radio Cook Islands: Cook Islands Broadcasting and Newspaper Corporation, POB 126, Avarua, Rarotonga; tel. 29460; broadcasts in English and Maori 24 hours daily Mon.–Sat. and until noon on Sun.; Gen. Man. ARTHUR TARIPO.

Radio Ikurangi: Avarua, Rarotonga; f. 1979; broadcasts daily on FM; Gen. Man. FREDDIE KIEHL.

Finance

BANKING

The National Bank of New Zealand has a branch on Rarotonga and the Government Post Office Savings Bank also operates in the islands. Legislation was passed in 1981 to facilitate the establishment of offshore banking operations.

Cook Islands Development Bank: POB 113, Rarotonga; tel. 29341; telex 62006; f. 1978 to replace National Development Corpn; finances development projects in all areas of the economy and helps islanders establish small businesses and industries by providing loans and management advisory assistance; cap. p.u. $NZ3,127,440; total assets $NZ5,218,790 (March 1984); Gen. Man. P. L. JONES.

Trade and Industry

There is a chamber of commerce on Rarotonga and in 1981 the Cook Islands Monetary Board was established as the general controlling body for all trade and industry in the islands.

Transport

ROADS

On Rarotonga a 33-km sealed road encircles the island's coastline.

SHIPPING

The Shipping Corporation of New Zealand Ltd operates regular cargo services between the Cook Islands, Niue, French Polynesia and Auckland, New Zealand.

Silk and Boyd: POB 131, Rarotonga; operates passenger and cargo services to the outer Cook Islands and to Western Samoa, American Samoa and Niue.

CIVIL AVIATION

An international airport was opened at Rarotonga in 1974.

Air New Zealand: Rarotonga; tel. 26300; passenger and cargo flights between Rarotonga, New Zealand, Fiji, French Polynesia and the USA (Los Angeles) operated with Boeing 737 and Boeing 747 aircraft.

Air Rarotonga: POB 79, Rarotonga; telex 62036; privately owned; operates internal passenger and cargo service for the Cook Islands using Queenair, Piper Chieftain and Cessna 172 aircraft, and charter services to Niue and French Polynesia; Man. Dir EWAN F. SMITH.

Cook Islandair: Rarotonga; tel. 26304; owned by Air New Zealand and the Cook Islands govt; operates an internal cargo and passenger service between Rarotonga, Mauke, Aitutaki, Mitiaro and Atiu with 1 KHB Islander aircraft.

NIUE

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

Niue is a coral island, located in the Pacific Ocean, about 480 km (300 miles) east of Tonga and 930 km (580 miles) west of the southern Cook Islands. Rainfall is fairly evenly distributed throughout the year, but hurricanes may occur during the hottest months, from December to March. Niuean, a Polynesian language, and English are spoken. The population is predominantly Christian, with 75% belonging to the Ekalesia Niue, a Protestant church. Niue's flag is yellow, with the United Kingdom's Union Flag as a canton in the upper hoist. The capital is Alofi.

Recent History

The first Europeans to discover Niue were members of a British expedition, led by Capt. James Cook, in 1774. Missionaries visited the island throughout the 19th century, and in 1900 Niue was declared a British protectorate. In 1901 Niue was formally annexed to New Zealand as part of the Cook Islands, but in 1904 it was granted a separate administration.

In October 1974 Niue attained 'self-government in free association with New Zealand'. Niueans retain New Zealand citizenship, and a sizeable resident Niuean community exists in New Zealand. The 1981 population figures show a 16% decrease compared with those for 1976; about twice as many Niueans live in New Zealand as on Niue. Robert (from 1982, Sir Robert) Rex, who had been the island's political leader since the early 1950s, was the territory's Premier when it became self-governing, and retained the post at general elections in 1975, 1978, 1981 and 1984.

Government

Niue is a self-governing territory in free association with New Zealand. The New Zealand Government, however, remains responsible for the island's defence and external affairs. Executive government is carried out by the Premier and three other ministers. Legislation is the responsibility of the Niue Assembly, which has 20 members (14 village representatives and six elected on a common roll), but New Zealand, if called upon to do so by the Assembly, will also legislate for the island. There is a New Zealand representative in the territory.

Economic Affairs

Aid and budgetary support from New Zealand is used in maintaining social services and for economic development projects, mainly in the agricultural sector. Few of the working population are engaged in full-time agriculture, although most people practise subsistence gardening. The main subsistence crops are taro, yams, cassava (tapioca) and sweet potatoes (kumara). Coconut cream is the island's leading export, while copra, honey, passion fruit, pawpaw, root crops and limes are also produced for export. Pigs, poultry and beef cattle are raised mainly for local consumption. A small forestry project is being undertaken, and New Zealand has provided a deep-sea fishing boat, together with fishing equipment and training for the crew.

Drought during 1983 resulted in the loss of one-half of the island's cattle, and a steep decline in agricultural export production. Coconuts had to be imported from Tonga in order that the factory producing coconut cream might honour its export contracts. Drought relief from the South Pacific Bureau for Economic Co-operation (SPEC) and Australia, including a well-boring project, began in November 1983, and imports of food doubled in the period from August to December, a reversal of the normal pattern.

Transport and Communications

There are 123 km of all-weather roads on Niue, and 106 km of access and plantation roads. Niue has no seaport, and the best anchorage is an open roadstead off Alofi, whence contact with the shore is maintained by small boat. An international airport near Alofi is served by flights from New Zealand and Western Samoa.

Social Welfare

The Niue Government maintained one hospital, with 42 beds, in 1977, and there were four physicians working on the island in 1979.

Education

Education is free and compulsory between six and 14 years of age. There are eight bilingual (Niuean/English) primary schools and one secondary school, together attended by 1,063 children in 1979. A number of school-leavers take up tertiary education, mainly in the Pacific region and, to a lesser extent, in New Zealand.

Tourism

Tourism provides Niue with a small source of income. There is a hotel in Alofi and numerous camping-sites. The waters around the island are noted for their clarity.

Public Holidays

1985: 3 June (Queen's Official Birthday), 25, 26 December (Christmas Day and Boxing Day).

1986: 1 January (New Year's Day), 28–31 March (Easter), 25 April (ANZAC Day, anniversary of 1915 landing at Gallipoli).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 cents = 1 New Zealand dollar ($NZ).

Exchange rates (31 December 1984):
£1 sterling = $NZ2.4315;
US $1 = $NZ2.1000.

Statistical Survey

Source (unless otherwise stated): Department of Economic Development, POB 42, Alofi; tel. 131.

AREA AND POPULATION

Area: 259 sq km (100 sq miles).

Population (Census of 28 September 1981): Total 3,281 (Males 1,672, Females 1,609).

Vital Statistics (1983): 94 live births; 25 deaths.

AGRICULTURE

Principal Products (1983, metric tons): Copra 236 (1976), Passion fruit 70, Limes 56, Honey 4, Beef 25.

FINANCE

Currency and Exchange Rates: 100 cents = 1 New Zealand dollar ($NZ). For details, see the Cook Islands.

Budget (1983/84, $NZ, 1 April to 31 March, estimates): Expenditure 7,940,600; Revenue 7,740,600 (incl. New Zealand subsidy of $NZ5,100,000).

Cost of Living (Consumer Price Index for July–Sept. 1984; Jan.–Mar. 1982 = 100): Food 125.0, Clothing 119.1, General Index 131.5.

EXTERNAL TRADE

Principal Commodities: *Imports*: Food and live animals, Manufactured goods, Machinery, Fuels, Lubricants, Chemicals and drugs, Total (1983, c.i.f., incl. others) $NZ3,158,778. *Exports*: Coconut cream, Copra, Footballs, Handicrafts, Honey, Pawpaw, Passion fruit products and limes, Total (1983, f.o.b., incl. others) $NZ632,571.

Principal Trading Partners (1983): *Imports*: 64.8% provided by New Zealand. *Exports*: 96.7% taken by New Zealand.

Directory

The Constitution

In October 1974 Niue gained self-government in free association with New Zealand. The latter, however, remains responsible for Niue's defence and external affairs and will continue economic and administrative assistance. Executive government in Niue is through the Premier, assisted by three Ministers. Legislation is carried out by the Niue Assembly, of 20 members (14 village representatives and six elected on a common roll), but New Zealand, if called upon

to do so by the Assembly, will also legislate for the island. There is a New Zealand representative in the territory.

The Government

New Zealand Representative: JOHN SPRINGFORD.

THE CABINET
(February 1985)

Premier and Minister of Finance, Inland Revenue, Transport (Shipping and Aviation), Government Administration, Housing, Police and Immigration: Sir ROBERT REX.

Deputy Premier, Minister of Economic Development, Customs and Trade, Justice, Lands and Survey, Health and Local and Women's Affairs: Dr ENETAMA LIPITOA.

Minister of Education, Information Services, Post Office, Telecommunications and Tourism: FRANK FAKAOTIMANAVA LUI.

Minister of Works, Fisheries, Agriculture and Forestry, Youth, Cultural Affairs and Sport: ROBERT R. REX, Jr.

MINISTRIES

All Ministries are in Alofi.

Legislature

ASSEMBLY

A general election was held on 31 March 1984.

Speaker: S. P. E. TAGELAGI.

Judicial System

The Chief Justice of the High Court and the Land Court Judge visit Niue quarterly. Appeals against High Court judgments are heard in the Appeal Court of New Zealand.

The High Court: exercises civil and criminal jurisdiction.

The Land Court: is concerned with litigation over land and titles.

Land Appellate Court: hears appeals over decisions of the Land Court.

Religion

Seventy-five per cent of the population belong to the Ekalesia Niue, which is closely related to the London Missionary Society, a Protestant organization. The Latter-day Saints (Mormons), Roman Catholics, Jehovah's Witnesses, Seventh-day Adventists and Church of God of Jerusalem are also represented.

The Press

Tohi Tala Niue: Information and Broadcasting Services, Central Office, POB 67, Alofi; weekly; English and Niuean.

Radio

There were an estimated 1,000 radio receivers in use in 1983. There is no television service.

Radio Sunshine Niue ZK2ZN: Information and Broadcasting Services, Central Office, POB 67, Alofi; govt-controlled; broadcasts in Niuean and English; Sec. T. M. CHAPMAN.

Transport

ROADS

There are 123 km of all-weather roads and 106 km of access and plantation roads. At 31 March 1979, there were 1,009 registered motor vehicles, of which 612 were motor cycles, 264 cars, 59 trucks, 5 buses and 69 other vehicles.

SHIPPING

The best anchorage is an open roadstead at Alofi, the largest of Niue's 13 villages. A shipping service operated by the Shipping Corporation of New Zealand Ltd (cargo only) is maintained with New Zealand via the Cook Islands on a regular monthly basis.

CIVIL AVIATION

Hanan International Airport has a total sealed runway of 1,650 m, capable of taking most types of aircraft. Polynesian Airlines (Western Samoa) link Niue with Auckland (New Zealand) and Western Samoa.

ROSS DEPENDENCY

The Ross Dependency comprises the sector of Antarctica between 160°E. and 150°W. (moving eastward) and the islands lying between those degrees of longitude and south of latitude 60°S. It has been administered by New Zealand since 1923 and has a total area of 730,000 sq km (282,000 sq miles), comprising a land area of 400,000 sq km and an ice shelf of 330,000 sq km.

Scott Base was established in 1957 on Ross Island. In 1968 a new scientific station was set up at Lake Vanda, about 130 km (80 miles) west of Scott Base.

Ross Dependency Research Committee: Department of Scientific and Industrial Research, Private Bag, Wellington 1, New Zealand; responsible to the Minister of Science and Technology for co-ordinating all New Zealand activity in the Dependency; Chair. Dr T. HATHERTON; Sec. C. M. SCHULTZ.

TOKELAU

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

Tokelau consists of three atolls (Atafu, Nukunonu and Fakaofo) which lie about 480 km (300 miles) north of Western Samoa, in the Pacific Ocean. The average annual temperature is 28°C, July being the coolest month and May the warmest; rainfall is heavy but inconsistent. Tokelauan (a Polynesian language) and English are spoken. The population is entirely Christian, adhering either to the Congregational Christian Church of Samoa (a Protestant denomination) or to the Roman Catholic Church. The New Zealand flag is used in the territory: it is blue, with a representation of the United Kingdom flag as a canton in the upper hoist and four five-pointed red stars, edged in white, in the form of the Southern Cross constellation, in the fly. Tokelau has no capital, each atoll having its own administrative centre.

Recent History

The islands became a British protectorate in 1877. At the request of the inhabitants, the United Kingdom annexed the islands in 1916 and included them within the Gilbert and Ellice Islands Colony (now Kiribati and Tuvalu). In 1925 the British Government transferred administrative control to New Zealand. In 1946 the group was officially designated the Tokelau Islands, and in 1948 sovereignty was transferred to New Zealand. From 1962 until the end of 1971 the High Commissioner for New Zealand in Western Samoa was also the Administrator of the Tokelau Islands. In November 1974 the administration of the Tokelau Islands was transferred to the Ministry of Foreign Affairs in New Zealand. In 1976 the Tokelau Islands were officially redesignated Tokelau.

Government

The administration of Tokelau is the responsibility of the Minister of Foreign Affairs of New Zealand, who is empowered to appoint an Administrator to the territory. In practice, most of the Administrator's powers are delegated to the Official Secretary at the Office of Tokelau Affairs, based in Apia, Western Samoa. Each village has a Council of Elders, or *Taupulega*, which comprises the heads of family groups together with the *Faipule* and the *Pulenuku*. The *Faipule* represents the village in its dealings with the administering power and the public service, and presides over the Council and the court. The *Pulenuku* is responsible for the administration of village affairs. The *Faipule* and the *Pulenuku* are democratically elected by universal adult suffrage every three years.

Economic Affairs

Tokelau's soil is thin and infertile. Apart from some copra production, agriculture is of a basic subsistence nature. Food crops include coconuts, pulaka, breadfruit, pawpaw and bananas. Livestock consists of pigs and poultry. Ocean and lagoon fish and shellfish are staple constituents of the islanders' diet.

Transport and Communications

The territory is visited about 10 times per year by vessels under charter, which anchor off shore as there are no harbour facilities. A telephone service, linking Tokelau's three atolls and providing an international service through Western Samoa, was due to be operational in early 1985.

Social Welfare

In 1978 Tokelau had three hospitals, with a total of 39 beds, and in 1979 there were four physicians working in the territory.

Education

Education is free, and enrolment of school-age children is almost 100%. There are three schools, one on each atoll. In 1982 there were 45 qualified Tokelauan teachers on the islands. The New Zealand Department of Education provides advisory services and some educational equipment. Schools receive daily radio broadcasts from the Western Samoan Education Department. Scholarships are awarded for secondary and tertiary education and vocational training in Western Samoa, Fiji, Niue and New Zealand.

Tourism

Tokelau has no established tourist industry.

Public Holidays

1985: 3 June (Queen's Official Birthday), 28 October (Labour Day), 25, 26 December (Christmas Day and Boxing Day).

1986: 1 January (New Year's Day), 6 February (Waitangi Day, anniversary of 1840 treaty), 28–31 March (Easter), 25 April (ANZAC Day, anniversary of 1915 landing at Gallipoli).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 cents = 1 New Zealand dollar ($NZ).

Exchange rates (31 December 1984):
£1 sterling = $NZ2.4315.
US $1 = $NZ2.1000.

Statistical Survey

AREA AND POPULATION

Area: Atafu 348 ha (860 acres), Nukunonu 465 ha (1,150 acres), Fakaofo 397 ha (980 acres), Total 1,210 ha (2,990 acres).

Population: 1,552 (males 751; females 801) at census of 1 October 1982.

Births and Deaths (1982): Live births 43 (birth rate 27.7 per 1,000); Deaths 16 (death rate 10.3 per 1,000).

AGRICULTURE

Production (FAO estimates, metric tons): Coconuts 4,000 (1982), Copra 1,000 (1980).

FINANCE

Currency and Exchange Rates: 100 cents = 1 New Zealand dollar ($NZ). For details, see the Cook Islands. Western Samoan currency is also used as a matter of convenience.

Budget (1983/84, $NZ, 1 April–31 March): Expenditure 2,852,021; Revenue 437,680, New Zealand Subsidy 2,414,341.

EXTERNAL TRADE

Principal Commodities: *Imports:* Foodstuffs, Building materials, Fuel. *Exports:* Copra $NZ43,542, Handicrafts $NZ6,119 (1982/83); there were no other exports.

Directory

The Government

The administration of Tokelau is the responsibility of the Minister of Foreign Affairs of New Zealand, who is empowered to appoint an Administrator to the territory. In practice, most of the Administrator's powers are delegated to the Official Secretary, Office of Tokelau Affairs. The islands are self-governing in many respects, and are serviced by the Tokelau Public Service. By agreement with the Government of Western Samoa, the Office of Tokelau Affairs is based in Apia.

Administrator: F. H. CORNER.

Official Secretary, Office of Tokelau Affairs: A. P. F. BROWNE.

LOCAL GOVERNMENT

Each village has a Council of Elders or *Taupulega* which comprises the heads of family groups together with the *Faipule* and the *Pulenuku*. The *Faipule* represents the village in its dealings with the administering power and the public service, and presides over the Council and the court. The *Pulenuku* is responsible for the

administration of village affairs. Both are democratically elected by universal adult suffrage every three years.

Judicial System

The High Court of Niue has civil and criminal jurisdiction, and the Supreme Court of New Zealand has original and appellate jurisdiction. There is provision for a Tokelauan Commissioner on each of the islands to deal with civil proceedings and criminal offences.

Religion

On Atafu all inhabitants are members of the Congregational Christian Church of Samoa; on Nukunonu all are Roman Catholic, while both denominations are represented on Fakaofo.

Finance

In February 1977 a savings bank was set up on each island; commercial and savings banking facilities are available in Apia, Western Samoa.

Trade and Industry

A village co-operative store was established on each island in 1977. Local industries are copra production, wood work and plaited craft goods.

Transport

The territory is visited about 10 times per year by vessels under charter.

NICARAGUA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of Nicaragua lies in the Central American isthmus, bounded by the Pacific Ocean to the west and by the Caribbean Sea to the east. Its neighbours are Honduras, to the north, and Costa Rica, to the south. The climate is tropical, with an average annual temperature of 25.5°C (78°F). The rainy season extends from May to October. The national language is Spanish, although English is spoken by some indigenous Indians along the Atlantic coast. Almost all of the inhabitants profess Christianity, and the great majority are Roman Catholics. The national flag (proportions 2 by 1) has three equal horizontal stripes, of blue, white and blue, with the state emblem (a triangle enclosing five volcanoes, in green, surmounted by a Phrygian cap and a rainbow, all encircled by the words 'República de Nicaragua' and 'América Central') in the centre of the white stripe. The capital is Managua.

Recent History

Nicaragua was under Spanish rule from the 16th century until 1821. It then became part of the Central American Federation until 1838. In 1912, at the Nicaraguan Government's request, US forces established bases in the country. They left in 1925 but returned in 1927, when a guerrilla group, led by Augusto César Sandino, was organized to oppose US intervention. The US forces finally left in 1933, when their role was assumed by a newly-created National Guard, commanded by Gen. Anastasio Somoza García. Sandino was assassinated in 1934, reputedly on Somoza's orders, but some of his followers ('Sandinistas') remained active in opposing the new regime. Somoza became Minister of War, seized power in a coup in 1935 and took office as President in 1936. He was succeeded in 1947 by one of his own nominees but quickly overthrew him and installed an uncle as President. When the latter died in 1950, Gen. Somoza resumed the Presidency and remained in power until his assassination by a Sandinista in September 1956. The Somoza family continued, however, to dominate Nicaraguan politics until 1979, with one of them ruling either directly as President or as Commander of the National Guard. The family also had extensive business interests and accumulated a considerable fortune.

In 1962 the left-wing Frente Sandinista de Liberación Nacional (FSLN, the Sandinista National Liberation Front, named after the former guerrilla leader) was formed with the object of overthrowing the Somozas by revolution. General Anastasio Somoza Debayle, son of the former dictator, became President in May 1967, holding office until April 1972. He retained his command of the National Guard. The National Congress was dissolved, and a triumvirate ruled until Gen. Somoza was re-elected President in September 1974. The FSLN, operating mainly in rural areas of northern Nicaragua, became increasingly active from 1970. Martial law was imposed following the earthquake of December 1972, which destroyed much of Managua and caused the deaths of an estimated 10,000 people. In 1977 Amnesty International reported systematic murder and torture by the regime. Influential groups, including businessmen and the Roman Catholic Church, spoke out against the Government. Military and political activity increased, despite the ending of martial law. A new offensive, begun in May 1979, left the FSLN in control of several areas.

In June the FSLN announced the formation of a provisional Junta of National Reconstruction, with five members (subsequently reduced to three). With the FSLN in command of many towns and poised for the final onslaught on Managua, President Somoza resigned and left the country on 17 July 1979. (He was assassinated in Paraguay in September 1980.) After the capital had fallen to the Sandinistas, the Junta and its Provisional Governing Council took power on 20 July as the Government of National Reconstruction. The 1974 constitution was abrogated, and the bicameral National Congress dissolved. The National Guard was also dissolved, being replaced by the 'Sandinista People's Army', officially established in August. Between 40,000 and 50,000 people were estimated to have died during the revolution. In August the Junta issued a 'Statute on Rights and Guarantees for the Citizens of Nicaragua', providing for basic personal freedoms and restoring freedom of the press and broadcasting. Civil rights were restored in January 1980. The holding of elections, however, was postponed to allow time for the reconstruction of the much-damaged country. The Government nationalized 40% of the country's industrial capacity, introduced agrarian reforms and embarked on a remarkably successful campaign to increase literacy. The population was mobilized into a militia.

On taking office, the Junta had issued a Basic Statute, providing for the creation of an appointed Council of State to act as an interim legislature. This body was first convened in May 1980. Its membership was increased from 47 to 51 in May 1981. Meanwhile, in March 1981, the Junta itself was reduced from five to three members. At the same time, Commdr Daniel Ortega Saavedra was appointed Co-ordinator of the Junta and of its new consultative body, the Council of Government.

In 1981 the political situation began to deteriorate. The opposition protested strongly over the postponement of elections and the increasing political hegemony of the FSLN. About 2,000 former members of the Nicaraguan National Guard, regarded as followers of ex-President Somoza (Somocistas), were operating out of camps in Honduras, with the support of the Honduran armed forces, and raiding Nicaraguan border posts as the first stage of a counter-revolution. Fighting escalated in 1982, and up to 60 deaths per month were reported.

Hasty attempts to integrate the estimated 120,000 English-speaking Indians along the isolated Atlantic coast drove them to join forces with the Somocistas. Steadman Fagoth Müller, the leader of the Miskitos (the largest Indian group), organized a rebellion in 1981, hoping to establish the province of Zelaya as an independent territory. In 1982 about 10,000 Indians were forcibly moved away from the border, and their villages were burnt. Many escaped into Honduras.

Meanwhile, Nicaragua's relations with the USA seriously worsened. In October 1980, while Jimmy Carter was US President, the USA agreed to provide Nicaragua with economic assistance valued at $75m. When Ronald Reagan succeeded President Carter in January 1981, he immediately 'froze' the remaining $15m. of this aid. In April the US Government announced that economic aid to Nicaragua had been suspended indefinitely because the Sandinista regime was supporting violent attempts to overthrow the Government of El Salvador.

With the advent of the Reagan Administration in the USA, there was increasing US involvement in opposition to Sandinista rule in Nicaragua. In 1981 the USA gave $10m. to support counter-revolutionary forces ('Contras'), and in 1982 the US Government allocated $19m. for covert operations by its Central Intelligence Agency (CIA) to attack the economic infrastructure of Nicaragua and to destabilize the regime, thereby halting the traffic in weapons to anti-Government guerrilla groups in El Salvador. Violation of Nicaraguan air-space by US spy-planes and a military build-up in Honduras led to fears of an invasion. In March 1982 the USA rejected a proposal by the Mexican Government for talks with Cuba and Nicaragua, with the aim of reducing tension in the region, but in April the USA offered Nicaragua an eight-point peace plan, including proposals for the termination of Somocista training camps in the USA and the resumption of US aid in return for ending support for left-wing guerrilla forces in El Salvador, a limitation on the size of the Nicaraguan armed forces and a commitment by the Sandinista regime to economic and political pluralism.

Earlier, in March 1982, the Sandinista Government had declared a state of emergency. This development was precipitated by the bombing of two bridges in northern Nicaragua. In July joint US-Honduran military exercises and air attacks from

Honduras on Nicaraguan petroleum installations led to a six-month extension of the state of emergency. Relations with Honduras improved slightly after May 1982, and discussions between military leaders took place.

In January 1983 Honduras and the USA launched a series of extensive military manoeuvres known as 'Big Pine'. The Sandinista Government was alarmed at the proximity of the manoeuvres to Nicaragua's northern border, and an invasion was anticipated. The military manoeuvres coincided with a new offensive by anti-Sandinista guerrillas based in Honduras. Attacks were directed against economic targets, border towns and Nicaraguan army outposts. In February about 1,400 guerrillas were thought to be active in Nicaragua and receiving assistance from the Honduran army. In April Edén Pastora Gómez, a hero of the revolution but now disillusioned with the Nicaraguan Government, announced that he would commence operations against Nicaragua from his base in Costa Rica. The guerrillas continued to receive substantial covert assistance from the CIA, which was thought to be seeking a union between two anti-Sandinista groups, the Fuerzas Democráticas Nicaragüenses (FDN) and the Alianza Revolucionaria Democrática (ARDE).

In July 1983 a clash occurred between Honduran and Nicaraguan naval vessels in the Gulf of Fonseca. Nicaragua announced the creation of a security zone extending 25 nautical miles (46 km) off both coastlines. In September guerrillas attacked Managua and Corinto, where their principal target was Nicaragua's fuel supply. In October the Government introduced a nine-point plan to improve internal security. In December the Sandinistas reaffirmed their support for the initiatives of the 'Contadora Group' (Colombia, Mexico, Panama and Venezuela), which was attempting to find peaceful solutions to the disputes involving Central America, and adopted a more conciliatory line towards the opposition. Measures included allowing greater freedom of the press and an amnesty for political opponents. The Government also made a commitment to hold elections by 1985. The USA remained sceptical about prospects for a settlement, and in January 1984 Nicaragua shot down a US helicopter which had gone astray in the Honduran border zone.

Greater radicalization of the Government, restrictions on political and trade union activity, repression of political opponents and tight censorship led to internal opposition, high-level resignations and conflict between the Government and the private sector in 1982. Despite the inclusion of many priests in the Government, relations with the Christian churches, especially the Protestant churches, deteriorated in 1982. In 1983 a deep rift developed in the Government's relations with the Roman Catholic Church. A radical, pro-Sandinista group of Nicaraguan Catholics was strongly critical of the institutional Church hierarchy, led by Miguel Obando y Bravo, the Archbishop of Managua, who represented middle-class opposition to the Sandinistas. In February religious demonstrations at Masaya claimed two victims. In December the Government announced that it wanted a dialogue with the Catholic Church.

In spite of the Sandinistas' professed willingness to hold talks with the Roman Catholic Church, relations deteriorated rapidly in April 1984, following the publication of a letter, signed by nine bishops, which condemned the internal political situation and called on the Government to include the Contras in a national dialogue. In June 10 foreign priests were expelled from Nicaragua for alleged anti-Government activities. However, following the elections in November (see below), the new Government indicated its intention to ease the conflict between Church and State, and in February 1985 both sides met for talks.

In December 1982 representatives of political parties were asked to draw up new laws regarding themselves, as a prelude for elections. In January 1984 the Government announced that a presidential election and elections to a Constituent Assembly would be held on 4 November 1984. The elections would be free and open, and voting would be based on a system of proportional representation. All political parties would be allowed access to the media and state funds. Members of the armed forces would be entitled to vote, and the minimum voting age was lowered to 16 years. The Constituent Assembly was to draw up a constitution within two years of taking office. An electoral law was passed in March 1984. In order to promote the legitimacy of the forthcoming elections to international observers, the Sandinistas endeavoured to secure the participation of the influential opposition coalition, the Coordinadora Demócrata Nicaragüense (CDN). In July the CDN confirmed that it would boycott the elections, but it continued to negotiate with the electoral tribunal until October. In August the Government restored the majority of the civil rights that had been suspended in September 1982, in order to permit parties to campaign without restrictions. The electoral campaign was conducted in an atmosphere of tension and was under constant threat of boycott by the opposition. In October 1984 the Government initiated a 'national dialogue' between 33 groups, including political parties, trade unions, the business sector and the Roman Catholic Church. The dialogue was suspended in December, after disagreement over the proposed agenda.

At the elections in November 1984, although opposition parties obtained more support than had been anticipated, the FSLN candidate, Daniel Ortega Saavedra, received 67% of the votes cast in the presidential election, and the party won 61 of the 96 seats in the National Constituent Assembly, which replaced the Council of State. The new Government took office in January 1985, under President Ortega (hitherto Co-ordinator of the Junta, which ceased to exist), and declared that it was committed to establishing a mixed economy and to seeking a peaceful solution to the conflict in Central America.

Meanwhile, in March 1984, the Nicaraguan Government had accused the CIA and the US Government of directing the FDN's campaign to mine ports along the Atlantic coast. To substantiate its protest, Nicaragua filed a case against the USA in the International Court of Justice. In November the Court upheld its initial ruling (passed in May) in favour of the Nicaraguan Government. Although the US Government refused to accept the court's jurisdiction, an important consequence of the Court's ruling was the US Congress's decision to delay the distribution of further aid to the Contras until February 1985.

In July 1984 the Nicaraguan Government agreed in principle to the Contadora group's peace initiative. The main obstacle to a full agreement was the Sandinistas' insistence upon the multilateral withdrawal of all foreign military advisers from Central America. In September the Government announced its willingness to sign the Contadora group's peace settlement, but the US Government rejected the agreement on the grounds that the forthcoming Nicaraguan elections would be unfair.

An escalation in the number of attacks by the Contras in October 1984 prompted the Sandinistas to anticipate a US-led invasion of Nicaragua prior to the elections. The Sandinistas' decisive victory at the elections in November was almost overshadowed by the subsequent rapid deterioration in relations with the USA after the US Government accused Nicaragua of receiving a consignment of MiG-21 advanced combat aircraft from the USSR. In response, the Nicaraguan Government alleged that the USA had repeatedly violated Nicaraguan airspace, and a fresh state of emergency was declared.The crisis was defused by the US Government's offer to resume talks with the Sandinistas, which had begun in June. In January 1985, however, the USA unilaterally broke off negotiations. In response to the *impasse* in relations with the US Government and the Contadora group, President Ortega launched an independent peace initiative in February. Under the terms of the initiative, Nicaragua announced that 100 Cuban military advisers would be expelled from Nicaragua, and offered to impose an indefinite moratorium on arms acquisitions. In March, however, the Nicaraguan plan was rejected by the USA, and President Reagan reaffirmed his Government's commitment to removing the Sandinista Government from office.

In April and June 1984 the Contras launched major offensives against the Sandinistas, which government forces were able to contain. The Contras were perceived to be operating in increasingly difficult conditions, in part because of the shortage of US aid, and in part because of a decline in Honduran support for the US Government's policy in Central America, which placed the FDN's Honduran-based forces under threat of expulsion. In November the Nicaraguan Minister of Telecommunications and Postal Services was killed in fighting against the Contras.

Government

Executive power is vested in the President, who is elected by popular vote for a six-year term. The President is assisted by

a Vice-President and an appointed Cabinet. Legislative power is held by the 96-member National Constituent Assembly, elected by universal adult suffrage, under a system of proportional representation, in November 1984. The Assembly, which replaced the Council of State, was to draw up a new constitution by 1987.

Defence

In July 1984 the professional armed forces were estimated to total 61,800, of whom 60,000 were in the army, 300 in the navy and 1,500 in the air force. Conscription was introduced for the first time in September 1983 and lasts for two years. The militia numbered about 60,000. Defence expenditure exceeded US $208.9m. in 1982. Nicaragua received military aid, amounting to $56m., from Eastern bloc countries in 1982.

Economic Affairs

Agriculture is the dominant activity, employing about 50% of the working population and providing about 75% of export earnings. Cotton, coffee, sugar, bananas and meat are the principal exports. Timber, maize, rice, tobacco and shellfish are also important. The agricultural sector was severely disrupted by the revolutionary war but, with the aid of large subsidies, production was restored in 1981 to pre-revolution levels. The state sector accounts for 20% of cotton, 17% of coffee and 43% of sugar production. In 1984 a sugar-processing plant was under construction at Malacatoya. This plant, it is hoped, will have an annual output of 200,000 tons of raw sugar for export. In May 1983 the USA announced that it was reducing imports of Nicaraguan sugar by 90%. Nicaragua earned $15.6m. from sugar exports to the USA in 1982. Coffee usually provides about 33% of Nicaragua's total export earnings. In 1981/82 production of sugar and coffee increased despite low world prices, and production of rice was sufficient for export to begin, but the area planted with cotton was at only about one-half of the pre-war level. Consumption of maize, beans and rice has risen by up to 40% since the war. In 1984 the production of basic grains was expected to increase to 7m. quintales (322,000 metric tons), equivalent to 82% of national consumption. In 1982 floods and drought caused about US $180m. of damage to crops. Output of cotton fell to 64,000 tons in 1981/82, and planting was delayed for the 1982/83 season. In October 1982 the withdrawal of the Standard Fruit Company caused a loss of $400,000 per week in foreign exchange earnings. Agricultural production fell by 8% in 1982, but increased by 14.3% in 1983, principally as a result of a record coffee crop of 62,361 tons. Further bad weather in May 1983 caused damage to agriculture, amounting to an estimated $500m. In 1984 the production of coffee and cotton was expected to fall by more than 20%, as a result of the guerrilla campaign against the agricultural sector and the consequent shortage of volunteer labour. In 1984 the Government announced plans to invest US $330m. in the agricultural sector.

Workable deposits of gold, silver, lead and zinc were discovered in 1968 in northern Nicaragua, and gold production rose to 72,000 troy ounces in 1982. A national energy programme, using alternative energy sources, aims to reduce imports of petroleum by 40%. Nicaragua's total petroleum requirement is 7,500 barrels per day (b/d), the majority of which is supplied by the USSR. In October 1983 petrol rationing was introduced, and consumer prices of fuel rose by 30%. In 1984 petroleum supplies were hampered by the mining of ports along the Atlantic coast by anti-Government guerrilla forces. A 35 MW geothermal electricity plant is now operational at Momotombo. In 1982 the USSR was helping to prospect for minerals and to develop the mining industry and hydropower. Petrobras of Brazil signed an agreement to explore for petroleum in Nicaragua.

Industry is on a modest scale, including a petroleum refinery, textile mills, tobacco, cement and soluble coffee plants, dairies and a wide range of processing plants. There are plans to develop the oil palm, rubber and cocoa industries in the province of Zelaya Sur. Lack of foreign exchange forced several factories to close after December 1981, and in February 1982 the Government introduced incentives for private manufacturers. In May 1982 industry was working at 60% of capacity, although France, Cuba, Libya and Mexico were investing in agro-industrial processing complexes. Growth in the industrial sector was 4.6% in 1983.

Although it has nationalized banking, insurance, mining, fishing and forestry, the revolutionary Government is encouraging the existence of private enterprise, which accounts for 60% of the economy. After the war, the State expropriated 1m. ha of land, of which 700,000 ha was converted into state farms and the rest transferred to peasant co-operatives. In the second stage of agrarian reform, begun in July 1981, more underutilized and idle land was expropriated. Productivity on state farms is high but it is planned that future expansion will be in the co-operative sector, in which 62,000 families operated 3,820 co-operatives (which may not be sold) in 1982. In 1983 the Government intended to redistribute 104,000 ha of land among 7,111 farmers. An additional 2,400 farmers were to receive titles to 94,400 ha of land in the interior and north of the country. The Government provides low-interest loans to both co-operatives and individual owners.

Following two years of positive growth in 1976 and 1977, the civil war paralysed industrial and commercial activity, and Nicaragua's gross domestic product (GDP) declined, in real terms, by 24.4% in 1979. Real GDP expanded by 30.6% in 1980 and by 2.5% in 1981. GDP fell by 8.2% in 1982, but increased by 4.3% in 1983. The principal successes of the revolution have been in the countryside, although it is estimated that 80% of agricultural production is controlled by the private sector. Fear of expropriation has created an insecure investment climate, and much capital has gone abroad. In 1983 Nicaragua had a total external debt of $2,800m., of which the commercial bank debt ($920m.) was rescheduled in 1981. Foreign reserves were exhausted by December 1981, accounting for shortages of petrol, beans, sugar and rice, which had to be rationed, and of other consumer goods. The current deficit on the balance of payments increased from $379m. in 1980 to $506m. in 1981, easing to $471m. in 1982 and to $443m. in 1983. Throughout 1982, wage levels were held down and government spending was sharply reduced. Floods in May 1982 caused $356m. of damage and forced the postponement or cancellation of industrial projects. In 1983 acts of economic sabotage caused losses amounting to $130m., equivalent to 30% of export earnings. In 1982 an estimated 24% of the labour force were unemployed. In 1983 net foreign exchange reserves were in deficit by $120m. Socialist policies and US opposition have eroded the confidence of foreign bankers, and the Government received no new loans from its foreign bank creditors in 1982. A moratorium on public sector debt service payments was requested in September 1982, and in December trade credits totalling $30m. were agreed in lieu. Argentina, Colombia and Peru also agreed to supply $75m. of credits. In March 1983 Bulgaria agreed to provide $140m. in finance over a period of three years.

In 1984 Nicaragua's foreign debt was in excess of US $3,500m. The cost of debt servicing was equivalent to 70% of the country's total export earnings, and further renegotiation of debts was anticipated by the Government in 1984. Inflation exceeded 50% in 1984. The continuing internal strife resulted in damage amounting to $255m. In 1984 revenue from exports was expected to be $461m. In February 1985, in response to the worsening economic crisis, the Government introduced a series of austerity measures, which included the establishment of a four-tier system of exchange rates (including a new commercial rate of US $1 = 20 córdobas, representing a currency devaluation of 50%), higher interest rates, increases in the cost of essential goods and a 'freeze' on government spending. In spite of assurances of financial assistance from Finland and Spain, Nicaragua received no significant new funding in 1984, and in November the World Bank suspended loans amounting to $2m., because of Nicaragua's failure to make repayments.

Transport and Communications

In 1984 there were 24,748 km of roads, including a 384-km north–south stretch of the Pan-American Highway. A 650-km inter-oceanic highway from Corinto, via Managua, to El Bluff is being constructed at a cost of US $1,000m. State railways (with a total length of 232 km) link Nicaragua's important towns, while private lines serve the banana plantations along the Pacific coast. In 1982 work had begun on a new deep-water port at El Bluff, on the Atlantic coast, and 10 existing ports are to be improved as part of a programme to increase handling capacity by 60%. Several rivers are navigable to small craft, and steamers serve towns on Lake Nicaragua. AERONICA, the

state airline, operates internal and international services from the Augusto C. Sandino international airport, near Managua. A new airport was under construction at Punta Huete, and was due to become operational in late 1985. A new airport at Bluefields was due to be completed by July 1985.

Social Welfare

In 1980 Nicaragua had 50 hospitals, with a total of 4,573 beds, and there were 1,562 physicians working in the country. The Government planned to establish a unified health service, and health and education received the largest allocations in the 1982 budget.

Education

In 1980 an estimated 75% of children aged seven to 12 years were enrolled at primary schools but only about 23% of those aged 13 to 17 attended secondary schools. Student enrolment reached 1,000,103 in 1981/82. Since 1979, primary and secondary education have been free and, officially, compulsory. There are many commercial schools and four universities. In 1984 about 36,000 students attended university. A five-month nationwide literacy campaign was launched in April 1980 with the help of 2,000 Cuban teachers. At the end of the campaign it was announced that the adult illiteracy rate had fallen from 52% to 12%. The proportion of GDP spent on education in 1981 was 4.25%.

Tourism

Nicaragua's tourist attractions include the mountainous region (with occasionally active volcanoes), the Huellas de Acahualinca, outside Managua, the mineral baths of Tipitapa, the Las Isletas archipelago and the abundant sea, lake and river fishing. The tourist industry has been badly affected by the internal conflict.

Public Holidays

1985: 1 May (Labour Day), 19 July (Liberation Day), 10 August (Managua local holiday), 14 September (Battle of San Jacinto), 15 September (Independence Day), 2 November (All Souls' Day), 25 December (Christmas).

1986: 1 January (New Year's Day), 27–28 March (Easter).

A considerable number of local holidays are also observed.

Weights and Measures

The metric system is officially used, although some Spanish and local units are also in general use.

Currency and Exchange Rates

100 centavos = 1 córdoba.

Exchange rates (31 December 1984):
£1 sterling = 11.65 córdobas;
US $1 = 10.05 córdobas.

Directory

The Constitution

Shortly after taking office on 20 July 1979, the Government of National Reconstruction abrogated the 1974 Constitution. On 22 August 1979 the revolutionary junta issued a 'Statute on Rights and Guarantees for the Citizens of Nicaragua', providing for the basic freedoms of the individual, religious freedom and freedom of the press, and abolishing the death penalty. The intention of the Statute was formally to re-establish rights which had been violated under the deposed Somoza regime. A fundamental Statute took effect from 20 July 1980, and remained in force until the Council of State drafted a political constitution and proposed an electoral law. Presidential and legislative elections were held on 4 November 1984. A new constitution is to be drawn up by 1987.

The Government

HEAD OF STATE

President: Commdr Daniel Ortega Saavedra (took office 10 January 1985).

Vice-President: Dr Sergio Ramírez Mercado.

CABINET

(March 1985)

Transport

RAILWAYS

Ferrocarril de Nicaragua: Plantel Casimiro Sotelo, Apdo 5, Managua, JR; tel. 22160; telex 1239; f. 1881; government-owned; main line from Managua to the Pacific port of Corinto via León and Chinandega, and from Managua to Granada on Lake Nicaragua; there are plans to construct a 400-km rail-link between Corinto and El Bluff; 232 km; Gen. Dir Lic. ROLANDO ESPINOSA RÍOS.

Ferrocarril de Pacífico de Nicaragua: CST J. Benito Escobar 6c. al Sur, 1c. al Oeste, Apdo 727, Corinto.

Instituto Ferroviario Nicaragüense: Managua, JR; Dir JOSÉ VALDIVIA.

ROADS

In 1984 there were some 24,748 km of roads and tracks. Of these 4,408 km were paved. The Pan-American Highway runs for 384 km in Nicaragua and links Managua with the Honduran and Costa Rican frontiers and the Atlantic and Pacific Highways connecting Managua with the coastal regions.

SHIPPING

Corinto, Puerto Sandino and San Juan del Sur, on the Pacific, and Puerto Cabezas, Bluefields, Puerto Arlen Siu and Puerto General Benjamín Zeledón on the Atlantic, are the principal ports. Corinto deals with about 60% of trade. A deep-water port is under construction at El Bluff.

Administración Portuaria de Corinto: Frente al Ferrocarril del Pacífico, Apdo 11, Corinto; tel. 211; f. 1956; port authority.

Naviera Nicaragüense, SA (Nanica): CST 8c. al Sur, 150 varas abajo, Apdo 909, Managua, JR; tel. 26861; telex 1011; regular services between Central America, Mexico, Panama and Europe; Man. Dir GUILLERMO SEQUEIRA ESPINOSA.

Several foreign shipping lines call at Nicaraguan ports.

CIVIL AVIATION

Aerolíneas Nicaragüenses (AERONICA): Contiguo Aeropuerto Internacional Augusto C. Sandino, Apdo 3688, Managua, JR; f. 1981; domestic services and international services to El Salvador, Costa Rica, Panama, Mexico and the USA; Pres. Commdr WILLIAM RAMÍREZ (Minister of Transport); Gen. Man. M. ROJAS; fleet: 1 Boeing 727-100, 1 Boeing 720B.

Tourism

Instituto Nicaragüense de Turismo (INTURISMO): Avda Bolívar Sur, Apdo 122, Managua, JR; tel. 25436; f. 1967; Minister-Dir HERTY LEWITES RODRÍGUEZ.

Asociación Nicaragüense de Agencias de Viajes (ANAVIT): Apdo 1045, Managua, JR; Pres. ANTONIO ESPINO.

NIGER

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of the Niger is a land-locked state in West Africa, with Algeria and Libya to the north, Nigeria and Benin to the south, Mali and Burkina Faso to the west, and Chad to the east. The climate is hot and dry, with an average temperature of 29°C (84°F). The official language is French, but numerous indigenous languages, including Hausa (spoken by about one-half of the population), Tuareg, Djerma and Fulani, are also used. About 97.5% of the population are Muslims, the most influential Islamic groups being the Tijaniyya, the Senoussi and the Hamallists. Most of the remainder of the population follow traditional beliefs, and there is a small Christian minority. The national flag (proportions 8 by 7) has three equal horizontal stripes, of orange, white and green, with an orange disc in the centre of the white stripe. The capital is Niamey.

Recent History

Formerly a part of French West Africa, Niger became a self-governing member of the French Community in December 1958 and was granted independence on 3 August 1960. Hamani Diori, Prime Minister since December 1958, became Head of State. He was elected President in November 1960, and re-elected in 1965 and 1970. His one-party Government, having repressed an attempted rebellion in 1963–64, seemed one of the most secure in Africa, and President Diori himself gained considerable international prestige as a spokesman for francophone Africa. He maintained very close links with France, and Niger also received aid from Nigeria and Libya. The discovery of uranium in Niger, and its exploitation by France, provided an opportunity for the economic development of the country, but the drought in the Sahel region in 1968–74, which affected Niger more severely than any other country, had serious economic and political consequences.

Amidst widespread civil disorder during the drought, and after a four-month education strike, the army staged an almost bloodless coup in April 1974. Diori was arrested, and Lt-Col (later Maj.-Gen.) Seyni Kountché, the Chief of Staff of the Armed Forces, became President. The new military Government suspended the Constitution, dissolved the National Assembly and announced that its main objectives were the elimination of corruption and the attainment of greater efficiency in dealing with the famine conditions which then prevailed.

The new Government's major preoccupation was planning an economic recovery after the Sahel drought. In the interest of national independence, it obtained the withdrawal of French troops and weakened French control of uranium exploitation. In February 1977 France and Niger concluded a new co-operation agreement which, it was claimed, eradicated all traces of paternalism in their relations.

In August 1975 the Vice-President of the ruling Conseil Militaire Suprême (CMS) was arrested, along with two other prominent figures, on a charge of plotting to seize power, and in January 1976 the Secretary of State for Information was detained. In March 1976 Maj. Moussa Bayere, dismissed from the Government in February, led an abortive coup. Nine of those implicated, including Bayere, were subsequently sentenced to death.

In 1977 and 1978, faced with the difficulties of renewed drought, the Government attempted to broaden the basis of its support, and in March 1978 released a number of political prisoners, including senior members of ex-President Diori's administration. In April 1980 ex-President Diori was released from prison. All members of the former administration are now free.

In April 1982 14 people, of whom 13 were Malian, were arrested at Arlit, apparently attempting to sabotage the uranium mines. They claimed to be working for the son of former President Diori. In May a three-week strike by students was resolved, following agreement in principle on recognition of the Niger Student Union by the Government.

The proportion of army officers in the Government was reduced in December 1977 as the unpopular and corrupt administration was gradually replaced. Further reorganizations led to a predominantly civilian Council of Ministers, and in January 1983 the post of Prime Minister was created. In October 1983 a coup attempt by officers, taking advantage of the President's absence (at the Franco-African summit in Vittel, France), was thwarted by ministers loyal to the Kountché regime. Three high-ranking officials who were believed to have instigated the plot fled the country, but several suspected civil servants and two ministers were arrested. Despite early suspicions of Libyan connections, the motive appeared to be military opposition to increasing 'civilianization' of the Kountché government. The subsequent government reshuffle in November resulted in a Council of Ministers composed entirely of civilians. In September 1984 the Ministry of Public and Semi-Public Companies was created, as part of the Government's economic recovery programme.

Niger's relations with the People's Republic of China were consolidated following President Kountché's official visit to that country in May 1984. In December 1984 the President visited the USA and received pledges for development aid.

Government

Since the military coup of April 1974, Niger has been ruled by a Supreme Military Council of army officers, and by a Council of Ministers appointed by the President. In a move towards greater democracy, the National Development Council (which had existed hitherto as an advisory body to the Government) was reconstituted in August 1983. Comprising 150 elected members, the National Development Council is the highest tier of a new system of institutions, known as the Development Society, which incorporates representatives of the Samariya youth movement and of the Co-operative Movement at various levels. The National Development Council is to draw up a national charter. Niger is divided into seven departments, each administered by an appointed prefect.

Defence

Niger's armed forces are on a small scale. In July 1984 there was an army of 2,150 men and paramilitary forces totalling 2,550 men. Arms and equipment come mainly from France. The air force consists of 70 men and a few transport planes. Estimated defence expenditure in 1982 was US $14.0m.

Economic Affairs

Since independence, Niger's economic growth has not kept pace with the increase in the country's population. According to estimates by the World Bank, Niger's GNP per head in 1982 was US $310 (at average 1980–82 prices), showing an average annual decrease of 1.5%, in real terms, since 1960. Real GDP was estimated to have fallen by 1% in 1982.

The economy is predominantly agricultural, and this sector accounted for about 44% of GDP in 1980. About 90% of the population are dependent on agriculture and the raising of livestock, although less than 10% of the land is cultivated. The principal subsistence crops are millet, sorghum, cassava and beans. The herds of cattle, sheep and goats are large but often of poor quality.

Much of the land is part of the Sahara, an arid desert, and more than 75% of the country receives an average annual rainfall of less than 250 mm (10 in). Persistent drought and the depredations of pests are the main problems. Desertification, aggravated by over-grazing and deforestation, has undermined the country's attempts to become self-sufficient in food. Increases in grain production have been insufficient to offset

the increase in population, estimated at around 2.5% per year. Niger was very seriously affected by the Sahelian drought in the early 1970s. In 1976/77 cereal production exceeded domestic requirements for the first time since 1970, but in 1978 there was a deficit of 50,000 tons. In 1979, however, Niger imported a total of only 20,000 tons of foodstuffs, and basic food imports became unnecessary in 1980, when livestock numbers almost reached pre-drought levels and production of the principal crops increased by about 10%, but lack of rainfall again led to a shortage of cereals in 1981. Renewed drought damaged livestock production in 1983, although cereal crops remained largely unaffected.

The Office des Produits Vivriers du Niger (Food Products Bureau) keeps reserves of cereals in an effort to ensure regular food supplies and to maintain standard prices across the country. However, the country's food stocks fell to 40,000 tons in 1984, compared with 200,000 tons in 1983, as a result of one of the worst harvests ever recorded in Niger. The severe drought affected both livestock and cereal production, and in November 1984 President Kountché launched an emergency appeal for food aid, following a cereal shortfall of 477,000 tons at the end of the 1983/84 season. The country also suffered as a result of the closure of the border with Nigeria in April 1984, which prevented much food aid from entering Niger and destroyed traditional livestock markets. A government campaign to encourage production of out-of-season crops (such as potatoes, haricot beans and cassava) was launched in 1984, in an effort to offset the cereal deficit. The country's principal cash crop was formerly groundnuts but production has not recovered to the pre-drought level. Cotton production has diminished regularly since 1979, but was expected to increase in 1983/84 as a result of an expansion of the area under cultivation from 1,627 ha in 1982/83 to 3,000 ha.

Uranium deposits, comprising 200,000 metric tons of proven reserves, were discovered in 1966 at Arlit, in the Aïr mountains of northern Niger, and production by French interests began in 1971. In 1974 the mines were nationalized, and in 1977 a new agreement with France increased Niger's share in their exploitation from 17% to 33%, and allowed the Government to set prices, which had been previously dictated by France. In 1978 a second mine was opened at Akouta, with Japanese investment. In 1981 Niger was the fifth largest uranium producer in the non-communist world, with an output of 4,585 metric tons. Revenue from uranium exports enabled a reduction in the tax threshold and a raising of the guaranteed minimum industrial wage in 1977 and 1978. Uranium provided about 75% of Niger's export earnings by 1980, but a drop in world prices led to a reduction in revenue, from 26,000m. francs CFA in 1979 to about 9,000m. in 1982. France remains Niger's principal customer, but the Government is actively seeking to diversify its markets, particularly towards North Africa and the Middle East; in December 1983 agreement was reached for Niger to supply uranium for Egypt's nuclear power programme. Lack of transport facilities hampers Niger's uranium development, but a 'uranium road' between the mines and the capital was completed in 1981. However, the slump in world demand has led to delay in plans to open up new deposits.

Cassiterite, a tin-bearing mineral, is mined in three locations. Mining of phosphate deposits, estimated at 250m. tons, 151 km west of Niamey began in 1978, and open-cast mining of coal at Anou Araren, where reserves are estimated to be 5m. tons, started in 1980. Petroleum deposits in the Madama Termit area, north-east of Lake Chad, were discovered in 1978.

Industry is on a small scale, and manufacturing and handicrafts accounted for 6.4% of GDP in 1980. In 1982 plans were announced for state investment in industries derived from agricultural produce and in the manufacture of construction materials and agricultural machinery, amounting to some 10,000m. francs CFA by 1985. Plans to reduce dependence on imported energy included the construction of an electricity generating station using local coal, and in 1982 the feasibility of a dam at Kandadji, providing irrigation for more than 140,000 ha and hydroelectricity at 125 MW capacity, was being studied by aid donors. A 60% increase in energy consumption was envisaged for the period 1980–85, and 156,400m. francs CFA is due to be invested in this sector during 1981–1990.

The 1979–83 development plan involved private investment in the mining sector and in a sugar refining complex, with state investment concentrating on rural development, social services and transport. In March 1983 the National Rural Development Fund was created in an effort to revitalize agricultural production. An Intermediate Consolidation Programme (1984–85) was implemented in February 1984. Public investment was to total 130,000m. francs CFA, compared with 384,500m. francs under the 1979–82 Plan. More than 70% of investment was to be financed by external sources, giving priority to the development of water resources and food self-sufficiency. Niger depends on foreign aid and investment, particularly from France, whose civil aid in 1982 amounted to 25,000m. francs CFA. The decline in revenue from uranium exports, owing to the collapse in world prices and falling sales, has led to a rapid increase in Niger's external debt, estimated to have reached 300,000m. francs CFA in October 1983. The fall in uranium revenue has led to severe difficulties in repaying investment loans acquired in previous years: Niger's debt service payments rose from 2,600m. francs CFA in 1979 to 33,000m. francs in 1983, and were forecast to reach a peak of more than 50,000m. francs CFA (after rescheduling) in 1988. Proposals for economic recovery, outlined in April 1983, included a massive reduction in imports of goods and services.

Under an IMF-supported austerity programme, adopted in mid-1983, Niger's budgetary deficit was reduced from 7.3% of GDP in 1982/83 to 4.7% in 1983/84, and the current external account deficit was limited to around 4% of GDP in 1983. In December 1983 the IMF approved a one-year stand-by arrangement, authorizing purchases of SDR 16m., and the creditor countries in the 'Club of Paris' subsequently agreed to reschedule part of Niger's foreign debt. A reform of the state and parastatal sector was begun in 1983, in conjunction with the World Bank. In accordance with IMF recommendations, the state-owned distribution network lost its monopoly on the import of basic commodities in October 1983, in a move towards a more open market economy. A general audit of 54 state and parastatal companies, carried out in early 1984, revealed widespread mismanagement and a cumulative net deficit of 29,000m. francs CFA over the 1980–83 period. The creation in September 1984 of a Ministry of Public and Semi-Public Companies highlighted the Government's concern at the problem, and in December it was announced that a number of parastatal companies were to be 'privatized'.

Transport and Communications

The construction of two railways is being studied; one to give access to the port of Cotonou, in Benin, and the other to Lomé, in Togo, via Ouagadougou (Burkina Faso). Two highways cross the country, from east to west and from north to south, giving access to neighbouring countries. Work on Niger's portion of the Trans-Saharan highway was scheduled to begin in 1985, with the upgrading of the Zinder–Agadez road. In 1981 there were 8,547 km of main roads, of which 32.5% were paved. Many road extension and improvement schemes are in progress, and a 648-km 'uranium road', from Agadez and Arlit to Tahoua, was opened in February 1981. The River Niger is navigable for 300 km within the country. In 1973 a river route between Gaya, in the south of Niger, and Port Harcourt, in Nigeria, was opened, giving access to the sea. In August 1983 a warehouse was opened in Lomé (Togo), and the port is to be used as a commercial outlet for land-locked Niger. The internal airways system is operated by Air Niger. The main international airport is at Niamey. There are plans for a satellite telecommunications network, financed by France.

Social Welfare

There is a guaranteed national basic wage. There are two hospitals, 38 departmental medical centres, 198 dispensaries and a number of mobile clinics. In 1981 the country had 118 physicians, one for every 47,000 people. The 1979–83 development plan included allocations for 118 rural dispensaries, for 40 clinics and maternity centres, and for the expansion of a system of village health teams to give basic treatment.

Education

Education is free but there are insufficient schools. The proportion of children of school age receiving education rose from 13% in 1977 to 17% in 1979. It was planned that by 1983 25% of Niger's primary-aged children would be in school. A univer-

sity was opened at Niamey in 1973, and the construction of the Islamic University of West Africa began at Say in 1976. Scholarships are provided for higher education in France and Senegal. In 1980, according to estimates by UNESCO, the adult illiteracy rate averaged 90.2% (males 86.0%; females 94.2%).

Tourism

There is an abundance of wild life, and hunting is the principal tourist attraction. Lake Chad also provides game fishing. In 1984 there were 26 hotels. Provision was made in the 1979–83 plan for the extension of tourist facilities, which by 1982 were to increase from 421 to 972 rooms. In 1984 tourist arrivals totalled 50,453. There is an international-class hotel of 250 rooms in Niamey.

Public Holidays

1985: 20 June (Id ul Fitr, end of Ramadan), 3 August (Independence Day), 27 August (Id ul Adha, Feast of the Sacrifice), 16 September (Islamic New Year), 25 November (Mouloud, Birth of the Prophet), 18 December (Republic Day).

1986: 1 January (New Year's Day).

Note: The Christian community in Niger also observes Easter, Whitsun, Ascension Day, Assumption, All Saints' Day and Christmas.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (31 December 1984):
1 franc CFA = 2 French centimes;
£1 sterling = 558.5 francs CFA;
US $1 = 482.25 francs CFA.

Directory

The Constitution

The 1960 Constitution was suspended following the military coup of April 1974. Niger is ruled by a Supreme Military Council of army officers, and by a Council of Ministers appointed by the President. It was envisaged that the National Development Council, elected in July 1983, would draw up a new charter and national constitution.

The Government

HEAD OF STATE

President of the Supreme Military Council: Maj.-Gen. Seyni Kountché (assumed power 15 April 1974).

COUNCIL OF MINISTERS

(February 1985)

President of the Council of Ministers, Minister of the Interior and Minister of National Defence: Maj.-Gen. Seyni Kountché.

Prime Minister: Hamid Algabid.

Minister of State for Finance: Boukari Adji.

Minister of State for Commerce and Transport: Amadou Nouhou.

Minister of State for Hydrology and the Environment: Yahaya Tounkara.

Minister of Information: Daouda Diallo.

Minister of National Education: Attaher Darkoye.

Minister of Posts and Telecommunications: Salaou Barmou.

Minister of Foreign Affairs and Co-operation: Ide Oumarou.

Minister of the Civil Service and Labour: Hadji Nadji.

Minister of Mines and Industries: Sani Koutoubi.

Minister of Rural Development: Dr Ari Toubo Ibrahim.

Minister of Higher Education and Research: Illa Maikassoua.

Minister of Public Works and Town Planning: Moumouni Yacouba.

Minister of Public and Semi-Public Companies: Lt-Col Mamadou Beidari.

Minister of Youth, Sports and Culture: Amadou Djibo.

Minister of Public Health and Social Affairs: Dr Abdou Moudi.

Minister of Justice: Allele El Hadj Habibou.

Minister-Delegate for the Interior: Amadou Fity Maiga.

Minister-Delegate to the Office of the Prime Minister, responsible for Planning: Almoustapha Soumeila.

There are two Secretaries of State, with responsibilities respectively for Planning and Rural Development.

MINISTRIES

All Ministries are in Niamey.

Legislature

ASSEMBLÉE NATIONALE

The National Assembly was dissolved following the military coup of 15 April 1974. A National Development Council was created in July 1974 to advise the government on the needs and potentialities of the country, and was reconstituted in August 1983, following elections for 150 regional delegates.

Political Organization

The military government installed by the coup of April 1974 ordered the suppression of all political organizations. The Parti progressiste nigérien was previously the only legal party.

Diplomatic Representation

EMBASSIES IN NIGER

Algeria: BP 142, Niamey; Ambassador: (vacant).

Belgium: BP 10192, Niamey; Ambassador: Jules Marchal.

TRADE UNIONS

Union des Syndicats des Travailleurs du Niger (USTN): BP 388, Niamey; f. 1960; divided into three sections for Maradi, Niamey and Zinder; affiliated to the African Trade Union Confederation; 31 affiliates; 15,000 mems; Sec.-Gen. ABDOULAYE MOHAMED.

Transport

ROADS

In 1981 there were 18,000 km of roads and tracks, of which 9,000 km were passable in all weather. Under the 1979–83 Development Plan 42,500m. francs CFA was to be spent on road improvements.

Société Nationale des Transports Nigériens: BP 135, Niamey; f. 1961; 53% state-owned; national road hauliers; cap. 1,250m. francs CFA; Dir AMADOU OUSMANE.

RAILWAYS

Organisation Commune Bénin-Niger des Chemins de Fer et des Transports (OCBN): BP 38, Niamey; BP 16, Cotonou, Benin; f. 1959; manages the Benin-Niger railway project (begun in 1978) in which Niger has a share; there are as yet no railways in Niger.

INLAND WATERWAYS

The River Niger is navigable from Gaya (Niger) to the coast at Port Harcourt, Nigeria, between September and March.

Société Nigérienne des Transports Fluviaux et Maritimes (SNTFM): BP 802, Niamey; cap. 64.6m. francs CFA; river and sea transport organization; 99% state-owned; Man. Dir BERTRAND DEJEAN.

CIVIL AVIATION

There is an international airport at Niamey and major airports at Agadez, Arlit, Diffa, Tahoua and Zinder.

Air Afrique: BP 84, Immeuble Air Afrique, Niamey; tel. 73-30-11; Niger has a 7% share in Air Afrique; see under Ivory Coast.

Air Niger: BP 865, Immeuble Sonara, Niamey; tel. 73-38-99; f. 1966; 95% state-owned; domestic and international services; fleet of 2 HS 748-2B; Pres. Minister of State for Commerce and Transport; Man. Dir Capt. BAGNAN SALLE.

Tourism

In 1980 tourist receipts amounted to US $3m. (UN estimate).

Direction du Tourisme et de l'Hôtellerie (DTH): Niamey.

Office National du Tourisme (ONT): BP 612, Niamey.

Société Nigérienne d'Hôtellerie (SONHOTEL): BP 11040, Niamey; tel. 73-23-87; telex 5239; f. 1977; state-owned hotel corporation; Man. Dir GAOURI OUSMANE.

NIGERIA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Federal Republic of Nigeria is a West African coastal state on the shores of the Gulf of Guinea, with Benin to the west, Niger to the north, Chad to the north-east, and Cameroon to the east and south-east. The climate is tropical in the south, with an average annual temperature of 32°C (90°F) and high humidity. It is drier and semi-tropical in the north. Average annual rainfall is more than 3,800mm (150 in) in parts of the south-east, but may be as low as 625mm (25 in). The official language is English. Hausa, Ibo and Yoruba are the principal languages spoken in the north, east and west respectively. Islam is the main religion in northern and part of western Nigeria. Some of the population follow animist beliefs and about one-quarter are Christians. The national flag (proportions 2 by 1) has three equal vertical stripes, of green, white and green. The capital is Lagos, but there are plans to construct a new capital near Abuja.

Recent History

The British dependencies of Northern and Southern Nigeria were merged in 1914. In 1947 the United Kingdom introduced a new Nigerian constitution, establishing a federal system of government based on three regions: Northern, Eastern and Western. The Federation of Nigeria became independent, within the Commonwealth, on 1 October 1960. In June 1961 the northern part of the British-administered Trust Territory of Cameroon was incorporated into the Northern Region. Legislation approved in August 1963 created a fourth region by dividing the Western Region. In October 1963 Nigeria became a republic. In January 1966 civil government was brought to an end by the otherthrow and death of two Regional Premiers and of the Federal Prime Minister, Alhaji Sir Abubakar Tafawa Balewa. A Supreme Military Council was set up by the Army Commander, Maj.-Gen. Johnson Aguiyi-Ironsi, who proposed to abolish the federal structure and to establish a unitary state. Political parties were banned in May. Inter-communal violence, in which many Ibos living outside their homeland in the Eastern Region were killed or forced to leave, resulted in dislocation of the country and the breakdown of central authority. Aguiyi-Ironsi was killed in July 1966, and his successor, Lt-Col (later Gen.) Yakubu Gowon, revived federalism.

Early in 1967 there was a rapid deterioration in relations between the Federal Government and the Military Governor of the Eastern Region, Lt-Col Chukwuemeka Odumegwu-Ojukwu, and in May Ojukwu announced the secession of the Eastern Region and its independence as the Republic of Biafra. War between the Federal Government and Biafra broke out in July 1967 and continued until January 1970, when, after Ojukwu's departure to the Ivory Coast, Biafra surrendered. Meanwhile, a 12-state structure, proposed by the Federal Government to replace the four regions, came into effect in April 1968.

Internal stability and increasing economic prosperity, derived from the rapid expansion of petroleum output, gave Nigeria an influential voice in African affairs and allowed it to pursue an open foreign policy. After revoking a promise to restore civilian rule by 1976 and failing to curb widespread corruption, Gen. Gowon faced mounting opposition, which culminated in his overthrow in a bloodless coup in July 1975. Brigadier (later Gen.) Murtala Ramat Muhammed, formerly Federal Commissioner for Communications, was nominated as Head of State by Nigeria's new military leaders. General Muhammed was killed in an abortive coup in February 1976 and was succeeded as Head of State by Lt-Gen. Olusegun Obasanjo, Chief of Staff of the armed forces. A programme to restore democracy and civilian rule by October 1979 was announced. In March 1976 the 12 existing states were replaced by 19, and the decision was taken to construct a new federal capital near Abuja, in central Nigeria. Local government councils were elected at the end of 1976, and a Constituent Assembly (mainly elected by these councils) was inaugurated in October 1977 to debate a proposed new constitution.

In September 1978 the constitution was issued, and the state of emergency, in force since 1966, was ended. At the same time, the 12-year ban on political activity was lifted, and by the following January five parties had registered. Federal, state and presidential elections were held in July and August 1979. In the federal elections the National Party of Nigeria (NPN) emerged as the party with the most widespread support, and its leader, Alhaji Shehu Shagari, was elected President. On 1 October the military regime transferred power to the newly-elected civilian authorities, according to its promise, and the new constitution came into effect.

The new Government adopted no dramatic changes of policy, and the first few months of President Shagari's rule were occupied with gaining a working majority in the House of Representatives and with setting up a balanced Cabinet. In 1981 Shagari had to contend with the collapse of the NPN's parliamentary alliance with the Nigerian People's Party (NPP). The latter subsequently formed an electoral coalition, the Progressive Parties' Alliance (PPA), with the United Party of Nigeria (UPN) and factions of the People's Redemption Party (PRP) and the Greater Nigeria People's Party (GNPP) in preparation for the 1983 six-tier elections, in which the President, State Governors, and members of the Senate, the House of Representatives, State Assemblies and local governments were to be chosen. As campaigning began in earnest, the PPA found itself split over the issue of choosing a presidential candidate. Ojukwu returned from exile in May 1982, and later aligned himself with the NPN.

Elections took place in August and September 1983, and were contested by six parties. In the presidential poll, President Shagari was returned for a second term of office, winning 12m. votes (47% of the total), more than 4m. ahead of his nearest rival, Chief Obafemi Awolowo. In the subsequent elections, the NPN took 13 of the 19 state governorships and won decisive majorities in the Senate and the House of Representatives, while voting for the State Assemblies and the local governments largely followed the pattern of the gubernatorial elections, with voters favouring the party whose candidate had been elected governor. The elections passed off relatively peacefully, although there were violent protests in Oyo and Ondo states, following the gubernatorial elections, and subsequent voting in these states had to be postponed indefinitely. After the elections, allegations of widespread ballot-rigging by the NPN and the Federal Electoral Commission were made by the opposition parties, who challenged some of the most contentious results in the Supreme Court and succeeded in having several reversed. President Shagari was sworn in for a second term on 1 October 1983. He effected an immediate Cabinet reshuffle in which the majority of the previous ministers were replaced.

On 31 December 1983 the civilian government was deposed in a bloodless military coup led by Maj.-Gen. Muhammadu Buhari, who had been Federal Commissioner for Petroleum in 1976–78. A military administration was set up (see Government), with Maj.-Gen. Buhari as Head of State; the National Assembly was dissolved and all political parties were banned. In February 1984 the new Supreme Military Council issued a decree which suspended all sections of the constitution relating to elective offices and representative institutions, and gave the Government the power to pass laws which could not be challenged in the courts. A further decree severely restricted the freedom of the press by allowing newspapers and radio stations to be closed, and journalists imprisoned, for 'inaccurate reporting', which is interpreted as anything likely to bring the Government into disrepute. Several well-known journalists have been sentenced under these provisions.

On taking power, the military authorities detained around 500 politicians and businessmen, including former President Shagari and his Vice-President, Dr Alex Ekwueme. Special military tribunals were set up to try these detainees for corruption, and during 1984 a series of former ministers and state governors were brought to trial. By the end of the year, some 15 former politicians had been convicted of receiving 'kickbacks' and embezzling public funds, and faced prison sentences of at least 21 years. Around ₦10m. of public money had been recouped.

There have been occasional outbreaks of religious rioting in recent years. The unorthodox Islamic teachings of Alhaji Muhammadu Marwa, known as Maitatsine, led to riots in the northern city of Kano in December 1980, when Maitatsine himself was killed. Followers of Maitatsine, who are regarded by other Muslims as heretics, caused further violence in October 1982, when riots spread from Maiduguri to Kaduna and Kano, resulting in about 200 deaths. The sect was banned in November 1982 but it was involved in renewed clashes, with around 720 people killed, in February and March 1984.

Nigeria has taken a leading role in African affairs and, as a prominent member of the OAU, sent peace-keeping troops to Chad. It condemns military intervention by both Western and Communist powers in the continent, and has been sharply critical of the white regimes in southern Africa. Relations with neighbouring countries were strained, however, after the mass expulsion, in January and February 1983, of more than 2m. illegal immigrants, mostly Ghanaians, as part of the austerity measures to protect the sagging Nigerian economy. In April 1983 a dispute over border demarcation led to fighting between Nigerian and Chadian troops stationed at Lake Chad. The border was closed between April and July, but the dispute was eventually settled peacefully by the two Governments.

In July 1984 relations between Nigeria and the United Kingdom were adversely affected by the attempted kidnapping in London of Umaru Dikko, formerly Minister of Transport in the Shagari administration. Dikko, a political exile and outspoken critic of the Buhari regime, was wanted for trial in Nigeria on charges of corruption. The Nigerian High Commission in London was strongly implicated in the kidnapping attempt, and this resulted in the British Government's expulsion of two Nigerian diplomats.

Government

Following the coup of December 1983, a military administration was established. The Supreme Military Council, which consists of 19 members (including the Head of State), appoints the members of the National Council of States and the Federal Executive Council, and determines policy. The Federal Executive Council (Cabinet) comprises the Head of State and 18 ministers (many of whom are civilians), and is responsible for federal administration. Each of the 19 states has a military Governor who appoints and presides over a State Executive Council. The National Council of States includes the Head of State, the State Governors and the Chiefs of Staff of the armed forces.

Defence

In July 1984 the army totalled 120,000 men, naval strength was 4,000 and the air force had 9,000 men. Military service is voluntary. Estimated defence expenditure in 1983 was ₦1,050m.

Economic Affairs

The huge rise in the price of petroleum after 1973 gave an extra impetus to the Nigerian economy. As a member of OPEC and the world's tenth largest producer of petroleum in 1981 and 1982, the benefits for Nigeria from the oil boom were enormous. The foreign exchange position was strengthened and the economy expanded at an estimated annual rate of 8% in real terms between 1971 and 1977; foreign aid was greatly reduced and large numbers of jobs created. Production of petroleum in 1975–80 averaged about 2.2m. barrels per day (b/d), while the value of output increased considerably, owing partly to OPEC-sponsored price increases and to reduced production in the Middle East. The Nigerian Government has a majority shareholding in Shell/BP, AGIP/Phillips, SAFRAP, Mobil and Texaco, and in 1979 BP interests were nationalized. There are petroleum refineries at Elesa Eleme, near Port Harcourt, and at Warri, while another, opened at Kaduna in 1980, should eliminate the need for imports of refined oil altogether. A petrochemicals plant, to be built at Port Harcourt at a cost of $2,000m., is due for completion around 1990. The plant will make Nigeria self-sufficient in raw plastic products. Nigeria has large reserves of natural gas which it plans to exploit. Contracts were awarded in 1983 for the construction of a 340-km pipeline to transport gas from Escravos, in the south-east, to Lagos, and for a $6,600m. liquefied natural gas export scheme. The fourth National Development Plan (1981–85) aimed to create a significant petrochemical industry.

Agriculture used to be the mainstay of the economy and in the 1960s provided 66% of the GDP. By 1981, because of the vast growth in the volume and value of petroleum output, agriculture's share had dropped to about 20% though it still employs about two-thirds of the working population, almost entirely on smallholdings. Actual production, particularly of cash crops such as groundnuts, declined during the period, affected by the civil war, by drought and disease, and by problems of distribution and payment which discouraged farmers. The situation was exacerbated by a demographic drift to urban areas in search of higher wages.

In 1980 President Shagari launched the 'Green Revolution', in an effort to reduce food imports and to diversify Nigeria's revenue base away from petroleum, as reserves will probably be seriously depleted by the end of the century. The project aimed at self-sufficiency in food crops by 1985, and to export them by 1987; it was to be supported by the establishment of agro-based industries.

There is extensive exploitation of forests for various timbers. Fishing provides a living for an estimated 1.5m. people, but large-scale trawling accounts for only 1% of catches, so that it has not been possible to develop fish processing as a major industry.

Minerals other than petroleum include tin, columbite (of which Nigeria supplies 95% of the world's industrial requirements), coal, iron ore, lead, zinc and uranium. The USSR is helping to build a major iron and steel complex at Ajaokuta, which is due to become fully operational in 1988. A further plant at Aladja opened in 1981, and steel rolling mills at Oshogbo and Katsina began operations in late 1982; a third mill at Jos was due to open in 1983. Industry is diversified, and there has been rapid expansion of manufacturing. 'Indigenization' has been energetically pursued, alien participation in many small businesses has been barred, and Nigerian majority shareholding in numerous larger firms made compulsory. Among the important branches of industry are brewing, aluminium products, motor vehicles, textiles, cigarettes, footwear, pharmaceuticals, pulp and paper and cement. However, manufactuirng contributed only 6% of GDP in 1980.

Nigeria suffers from a high rate of unemployment. In March 1984 there were 154,409 registered job seekers (a rise of 85% since 1982), although the true number of unemployed was probably much higher, and it was estimated that less than one-half of the labour force was in full-time employment. The average annual rate of inflation fell from 20.9% in 1981 to 7.5% in 1982, but rose again to 20% in 1983 and to an estimated 40% in 1984. GDP fell, in real terms, by 12% between 1981 and 1983, and by a further 1% in 1984. Stringent import controls brought the balance-of-payments deficit down from ₦3,800m. in 1982 to ₦2,100m. in 1983.

The 1981–85 Development Plan laid emphasis on development of agriculture, agro-based industries and the industrial infrastructure, projecting a drop in petroleum's contribution to GDP from 15.3% in 1980 to 11% by 1985. A total of ₦82,000m. was to be invested, and GDP was expected to rise by 8% annually. A vigorous policy of self-sufficiency was to be pursued, and the importance of education and housing for all was stressed. Expenditure was based on average oil production of 2.25m. b/d. Some of the larger capital projects thus had to be delayed or cancelled, owing to a deterioration in the economy, resulting from a surplus of petroleum on the world market in 1981. Nigerian production plummeted to 707,000 b/d in August, and price concessions became necessary. Austerity measures were introduced to contain the budget deficit and to halt the depletion of foreign reserves. Production recovered to 1.8m. b/d by December, but the United Kingdom's lower oil prices began

to undercut Nigeria's again, and in March and April 1982 production slumped to 938,000 and 900,000 b/d respectively. Monthly imports were outpacing exports by ₦500m., and Nigeria's reserves of foreign exchange stood at US $814m. in March, compared with $9,014m. one year earlier. Drastic measures were needed to reverse this decline, and in April a programme to cut imports by one-third, to ₦800m. per month, was introduced. It included a clamp-down on smuggling; the recall of all unused import licences; the suspension or permanent banning of certain types of import; increased pre-shipment inspection and tighter import procedures altogether. By May oil output recovered to 1.3m. b/d, which was the expected average for 1982. Foreign exchange reserves rose to $1,355m. in August, but monthly imports still stood at ₦950m. at the end of the year, with substantial delays in payment.

In February 1983 Nigeria reduced the price of its crude petroleum by $5.50 per barrel in order to undercut the United Kingdom's price. However, the loss of revenue that this incurred forced the Government to step up production in order to finance the 1983 budget. By July production was up to 1.7m. b/d, well above Nigeria's OPEC quota of 1.3m. b/d. Nigeria was subsequently put under pressure by other OPEC members to stay within its quota limit, and production did not exceed 1.3m. b/d for the rest of the year. However, in February and March 1984 production was over 1.5m. b/d. Nigeria applied to have its OPEC quota increased, and received permission to produce 1.4m b/d in August and 1.45m. b/d in September. As a result, the estimated average production in 1984 was 1.37m. b/d, up from 1.24m. b/d in 1983. During 1984 the Government also instigated a crackdown on petroleum smuggling, which is estimated to have released up to 100,000 b/d extra for export—and provided an annual $1,000m. in extra revenue. The Government's earnings from petroleum in 1984 were estimated at $11,429m., a rise of 12.5% on 1983.

The 1985 budget provided for total expenditure of ₦11,270m. and a budget deficit of ₦4,500m. Measures to improve government revenue include advance payment of customs duties, increased taxes and a levy on air tickets. The agricultural sector again received priority, with an allocation of 18% of the capital budget. The budget predicted a 1% growth in GDP in 1985, and the Government hoped to restrict the annual rate of inflation to around 30% (in January 1985 inflation was estimated at 50%).

During 1983 Nigeria was involved in negotiations with a consortium of international banks for a loan to assist in financing its short-term trade debts, which were estimated at $3,500m. in February of that year. Two loans were agreed, with a total value of $1,800m. In June Nigeria applied to the IMF for a three-year loan of $2,000m. However, negotiations were delayed by Nigeria's elections and by the Shagari Government's reluctance to accept any devaluation of the naira. The Buhari Government continued negotiations with the IMF throughout 1984, during which time Nigeria implemented several of the IMF's conditions. Travel allowances were abolished, imports were cut back, government expenditure was restricted, and the amount of money in circulation was reduced by withdrawing the naira notes then current and issuing new notes. This last measure also had the effect of curbing currency smuggling by rendering the former naira notes worthless abroad, and of pinpointing individuals hoarding large amounts of currency. The Government, however, continued to refuse any devaluation of the naira (an indispensable IMF condition) and, consequently, agreement had still not been reached by March 1985. Nigeria also faces considerable difficulties over its short-term debts as the Western export credit agencies have refused to reschedule these debts until the IMF loan is secured.

Transport and Communications

There are 3,523 km of railways, and in 1980 Nigeria had 107,990 km of roads. Nigeria has embarked on a major programme of road construction and maintenance, to which it allocated ₦8,863m. from the 1981–85 Development Plan. The narrow-gauge railway system is being extensively rebuilt, and the standard-gauge system extended throughout Nigeria. There are plans to construct a rail link between Port Harcourt and the Ajaokuta steel complex, but the project may be delayed for some time. Work on an overhead monorail was begun in Lagos in 1981. The Niger and other rivers are navigable. Nigeria's main ports for the shipment of petroleum are Bonny and Burutu. The principal seaports for general cargo are Lagos and Port Harcourt. An internal air network links the principal towns, and international services are provided by Nigerian Airways and foreign lines from Lagos and Port Harcourt. Each of the state capitals is eventually to have a modern airport, and five are to be of international standard.

The development of telecommunications was given priority in the 1975–80 Development Plan. There is a satellite earth station at Lanlate, and a second was to be built at Kaduna under the 1981–85 Development Plan.

Social Welfare

The National Provident Fund operates a system of benefits for sickness, retirement and old age. A scheme of retirement pensions and other benefits covers government employees. During 1974 the Federal Government introduced legislation to provide a workers' welfare scheme and a National Emergency Relief Agency. In 1979 Nigeria had 6,584 medical practitioners (80% Nigerians), 269 dental surgeons, 2,780 pharmacists, 29,515 nurses and 25,730 mid-wives. There were 9,270 health care institutions, with a total of 69,750 beds. The Basic Health Service Scheme, introduced in 1977, aimed to provide primary health care for the whole population. There were plans to incorporate traditional folk medicine into the modern health service. The Federal Government of President Shagari had pledged to build 2,000 housing units per year in each state.

Education

Education is partly the responsibility of the State governments, although the Federal Government has played an increasingly important role since 1970. According to estimates by the Federal Ministry of Education, adult illiteracy in 1984 averaged 65%. In 1980/81 there were 13,760,030 pupils in primary schools and 2,024,024 in secondary schools. There were about 93,740 students at the country's 24 universities in 1984. The Universal Primary Education scheme, launched in 1976, led to a huge increase in enrolment, although facilities, especially for secondary education, were still largely inadequate. Problems include shortages of schools and trained teachers. In 1980 there were 260 teacher-training colleges, with a total of 234,680 students. A new education system was introduced in 1982, involving six years of primary schooling, six years of secondary schooling (divided into two three-year phases), and four of higher education. Education is given high priority in budgets and development projects, and in 1981 seven new technological universities were planned. However, four of these were subsequently merged with older universities, leaving only three technological universities by 1985. A mass literacy campaign was launched in 1981. Technical training is important because of the shortage of skilled workers.

Tourism

Among Nigeria's potential attractions for visitors are the fine coastal scenery, the dense forests and a stimulating climate on the northern plateau. Nigerian traditional art has exceptional richness and diversity. The All Nigerian Festival of Arts and Culture is held annually in different states. Tourists receipts declined from US $97m. in 1977 to $25m. in 1979, but recovered to $55m. in 1980.

Public Holidays

1985: 20 June* (Id ul Fitr, end of Ramadam), 27 August* (Id ul Kabir, Feast of the Sacrifice), 1 October (National Day), 25 November* (Mouloud, Birth of the Prophet), 25, 26 December (Christmas).

1986: 1 January (New Year's Day), 28–31 March (Easter).

* Islamic religious festivals are dependent on lunar sightings, and may vary by one or two days from the dates given.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 kobo = 1 naira (₦).

Exchange rates (31 December 1984):
£1 sterling = 93.68 kobo;
US $1 = 80.83 kobo.

Area and Population

AREA, POPULATION AND DENSITY

Area (sq km)	923,768*
Population (UN estimates at mid-year)†	
1981	83,312,000
1982	86,126,000
1983	89,022,000
Density (per sq km) at mid-1983	96.4

* 356,669 sq miles.

† The Nigerian Census of 5–8 November 1963 recorded a total population of 55,670,055 but the UN estimated the mid-1963 population at 46.0 million. Another census was held in November 1973 but the results have been officially repudiated. The registration of voters by the Federal Electoral Commission in January–February 1978 recorded a total of 47,710,680 inhabitants of voting age (over 18 years), suggesting that the total population may be 95 million. The extent of possible overenumeration of voters is not known.

BIRTHS AND DEATHS

Average annual birth rate 50.3 per 1,000 in 1970–75, 49.8 per 1,000 in 1975–80; death rate 19.7 per 1,000 in 1970–75, 17.8 per 1,000 in 1975–80 (UN estimates).

PRINCIPAL TOWNS (estimated population at 1 July 1975)

Lagos (federal capital)	1,060,848	Ado-Ekiti	213,000

Directory

The Constitution

The Constitution of the Federal Republic of Nigeria, which came into effect on 31 December 1983, is based on the 1979 Constitution as altered by Decree 1, 1984, of the Federal Military Government, the Constitution (Suspension and Modification) Decree. Nigeria is a Federation of 19 States and a Federal Capital Territory. The 19 States are divided into local government areas.

THE EXECUTIVE

Executive authority is vested in the head of the Federal Military Government (FMG) and is exercised in consultation with a Supreme Military Council (SMC), of which he is President. The SMC meets at least once every three months and is charged with national policy, constitutional matters, national security, the appointment of the head of the FMG, Military Governors, Senior Commanders, members of the Council of State and of the Federal Executive Council.

The National Council of State, which deals with State matters, is presided over by the head of the FMG and includes the Chiefs of Staff, other members of the SMC and the Military Governors of the States.

The Federal Executive Council meets weekly under the head of the FMG. It includes the Chief of Staff (Supreme Headquarters), the Attorney-General (who is also Minister of Justice) and other Ministers who are appointed by the SMC. It determines and executes government policy within the framework laid down by the SMC.

The 19 states are governed by Military Governors, appointed by the SMC. Such appointments are changed from time to time and are military postings for the officers concerned. In each state the Military Governor is chairman of the State Executive Council which includes one senior officer from the army, navy and air force, the most senior police officer and commissioners (the state equivalent of ministers) appointed by the Military Governor. The Military Governor may establish local government authorities within his state.

THE JUDICIARY

The Judiciary comprises the Supreme Court, the Court of Appeal and the Federal High Court at federal level, and High Courts in each state. Judicial appointments below the Supreme Court are made by the Supreme Military Council on the advice of the Advisory Judicial Committee, with the Chief Justice of the Federation as Chairman. Certain states also have a Sharia Court of Appeal and others a Customary Court of Appeal, to hear civil cases in Islamic or Customary law respectively.

LEGISLATION

Federal laws are made by FMG decree. State laws are made by the Military Governor of the state by edict. Subjects for legislation are divided into exclusive and concurrent legislative lists. State edicts may be made only on concurrent subjects, and federal decrees prevail where there is a conflict. Existing laws remain in force unless altered by decree or edict.

OTHER PROVISIONS

The Constitution retains chapters on fundamental objectives and citizenship from the 1979 version, and most of the provisions on fundamental rights except those relating to detention and political activities. Other chapters have been modified or suspended to take account of the ban on poilitical activities. The Constitution may be amended by the Head of the FMG in consultation with the SMC.

Political Organizations

All political parties were banned in January 1984. Prior to the military coup, there were six organizations qualified for registration as political parties with the Federal Electoral Commission (FEDECO) by satisfying the rule that they should have functioning offices in at least 13 states and that their national executive committees should include members from at least 13 states.

National Party of Nigeria (NPN): Lagos; Nat. Chair. Adisa Akimloye.

Nigerian Advance Party (NAP): recognized by FEDECO 1982; Leader Tunji Braithwaite.

Progressive Parties' Alliance (PPA): f. 1982; alliance in which member parties were to remain separate until 1983 election, after which they planned to merge into a single party. Comprises:

Greater Nigeria People's Party (GNPP): Lagos; broke away from the Nigerian People's Party; Leader Alhaji Waziri Ibrahim; faction led by Mahmud Waziri broke away after 1979 elections.

Nigerian People's Party (NPP): 168 Murtala Mohammed Way, Ebute Metta; f. 1978; Leader Dr Nnamdi Azikiwe; Nat. Chair. Chief Adeniran Ogunsanya; 2,146,183 mems (1980).

People's Redemption Party (PRP): Lagos; faction broke away after 1979 elections; Leader Alhaji Hassan Yussef

Unity Party of Nigeria (UPN): Lagos; Leader Chief Obafemi Awolowo.

Transport

RAILWAYS

Length of railways: 3,523 km. A major project to rebuild the railways is under way, including a new 155-km line from Port Harcourt to Ajaokuta, site of the proposed iron and steel complex. The standard-gauge system is being extended throughout Nigeria. Work on sub-Saharan Africa's first overhead monorail system began in Lagos in 1981.

Nigerian Railway Corporation: Ebute Metta, Lagos; tel. 802000; telex 21020 f. 1955; Chair. Air Vice-Marshal W. I. Aleyideino; Admin. Alhaji Mahe Dange.

ROADS

In 1980 there was a road network totalling 107,990 km, of which 115 km were motorways, 29,625 km main roads and 17,815 km secondary roads; of the total almost 28% were paved.

Nigerian Road Federation: c/o Federal Ministry of Transport, Old Secretariat Bldgs, Marina, Lagos.

INLAND WATERWAYS

There are plans to develop the River Niger as a shipping route which include dredging for year-round navigability.

Inland Waterways Department: Federal Ministry of Transport, Old Secretariat Bldgs, Marina, Lagos; responsible for all navigable waterways.

SHIPPING

The principal ports are Lagos-Apapa, Tin Can Island, near Lagos, the Delta Port complex (including Warri, Koko, Burutu and Sapele ports), Port Harcourt and Calabar. The main petroleum ports are Bonny and Burutu. In 1981 the total volume of cargoes which passed through Nigeria's ports was 22.6m. metric tons, a rise of 5.2% over 1980.

Nigeria Shipping Federation: NPA Commercial Offices, Block 'A', Wharf Rd, POB 107, Lagos-Apapa; f. 1960; Chair. E. Martin; Gen. Man. D. B. Adekoya.

Nigerian Green Lines Ltd: Unity House, 13th Floor, 37 Marina, POB 2288, Lagos; 6 vessels totalling 57,900 g.r.t.; Chair. Alhaji W. L. Folawiyo.

Nigerian National Shipping Line Ltd: Development House, 21 Wharf Rd, POB 326, Lagos-Apapa; tel. 877262; telex 21253; f. 1959; govt-owned; operates cargo and limited fast passenger services between West Africa, the United Kingdom, the Mediterranean and the Far East; Chair. I. O. Dina; Gen. Man. O. Oladitan; Sec. J. O. Itodo.

Nigerian Ports Authority: 26–28 Marina, PMB 12588, Lagos; tel. 655020; f. 1955; has a 51% share in the Container Terminal Co; Chair. A. I. Wilson; Gen. Man. J. O. M. Bolanle.

CIVIL AVIATION

The principal international airports are Murtala Muhammad (at Ikeja, Lagos), Amino, Kano, Ilorin, Port Harcourt and Sokoto. Other airports at Kaduna, Enugu, Benin, Jos and Maiduguri are being redeveloped. Work on the first phase of the international airport at Abuja started in 1982, and two further airports are under construction at Akwe and Minna.

Aero Contractors Company of Nigeria: PMB 21090, Murtala Muhammad Airport, Ikeja, Lagos; f. 1959; air charter services; Man. Dir P. P. Belgeonne.

Central Airlines: Ilorin; f. 1981; domestic passenger services.

Intercontinental Airlines: 25 Adeniyi Jones Ave, Industrial Estate, PMB 21611, Ikeja; telex 26587; f. 1978; passenger and cargo charter flights, domestic and international; fleet of 3 Caravelle 3, 1 Boeing 707-320, 1 DC-6B, 1 HS 125; Chair. G. O. Onosode; Man. Dir Chief Victor Oje Vanni.

Kabo Air: 6773 Ashton Rd, POB 1850, Kano; tel. 5291; telex 77277; f. 1982; domestic services; fleet of 3 Caravelle 3, 2 Caravelle 11R.

Nigeria Airways: Airways House, POB 1024, Airways House, Ikeja, Lagos; telex 22646; f. 1958; wholly govt-owned; scheduled domestic and international cargo and passenger services to Angola, Belgium, Benin, Cameroon, the Congo, Ethiopia, France, The Gambia, the Federal Republic of Germany, Ghana, Greece, Guinea, India, Italy, the Ivory Coast, Kenya, Lebanon, Liberia, the Netherlands, Pakistan, Saudi Arabia, Senegal, Sierra Leone, Switzerland, Togo, the United Kingdom, the USA and Zaire; fleet consists of 2 Airbus A310, 2 DC-10, 3 Boeing 707-320C, 2 Boeing 727-200, 12 Boeing 737-200, 2 737-200C, 5 Fokker F.28-2000, 2 Fokker F.28-4000; Chair. Alhaji Aminu Sanusi; Man. Dir Capt. Ohiomah (acting).

Nigerian Airports Authority: Chair. Evans Enwerem; Man. Dir Alhaji A. Ahmed.

Okada Air: f. 1984; fleet of 3 BAC 1-11 300, 1 Boeing 707.

Tourism

Nigerian Tourist Board: POB 2944, Tafawa Balewa Sq. Complex, Lagos; tel. 737080; f. 1963; Chair. Alhaji Ibrahim Katune; Dir-Gen. Alhaji Gaeba Adamu Gumel.

OMAN

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Sultanate of Oman occupies the extreme east and south-east of the Arabian peninsula. It is bordered to the west by the United Arab Emirates (UAE), Saudi Arabia and the People's Democratic Republic of Yemen. A detached portion of Oman, separated from the rest of the country by UAE territory, lies at the tip of the Musandam peninsula, on the southern shore of the Strait of Hormuz. Oman has a coastline of more than 1,600 km (1,000 miles) on the Indian Ocean, and is separated from Iran by the Gulf of Oman. Oman's frontiers have never been clearly demarcated on the ground, but agreement exists on their general lines. At Muscat the mean annual rainfall is 100 mm and the mean temperature varies between 20°C (68°F) and 43°C (109°F). Rainfall is heavier on the hills of the interior, and the south-western province of Dhofar is the only part of Arabia to benefit from the summer monsoon. The official language is Arabic, though English is also spoken in business circles. The majority of the population are Ibadi Muslims; about one-quarter are Sunni Muslims. The national flag (proportions 2 by 1) has three horizontal stripes, of white, red (one-fifth of the depth) and green, with a vertical red stripe at the hoist. In the upper hoist is a representation, in white, of the state emblem, an Omani dagger crossed by two sabres and three links of a chain. The capital is Muscat.

Recent History

Officially known as Muscat and Oman until 1970, the Sultanate has had a special relationship with the United Kingdom since the 19th century. Full independence was recognized by a treaty of friendship with the United Kingdom on 20 December 1951, but the armed forces and police still have some British officers. Sultan Said bin Taimur succeeded his father in 1932 and maintained a strictly conservative and isolationist rule until July 1970, when he was overthrown by his son in a bloodless palace coup. The new Sultan, Qaboos bin Said, then began a liberalization of the regime, and increased spending on development.

A major problem in the early 1970s was a deterioration of relations between Oman and the neighbouring People's Democratic Republic of Yemen (PDRY), following conflict in Dhofar Province with a guerrilla organization, known from 1974 as the People's Front for the Liberation of Oman (PFLO), which the PDRY supported. Although a cease-fire was arranged by Saudi Arabia in March 1976, the situation remained tense.

The Iranian revolution of 1978–79 and the Gulf War between Iran and Iraq, which began in September 1980, have led to increased international awareness of Oman's strategic importance, particularly regarding the Strait of Hormuz, a narrow waterway at the mouth of the Persian (Arabian) Gulf, between Oman and Iran, through which about two-thirds of the world's sea-borne trade in crude petroleum passes. Other factors which increased tension in the area were the growth of Soviet influence in the PDRY, and the USSR's military intervention in Afghanistan in December 1979. In February 1980 Sultan Qaboos agreed, in principle, to the use by US forces of Masirah Island, off the east coast of Oman, as a military base in an emergency. In June 1980 Oman and the USA signed a defence pact whereby, in exchange for US military and economic aid and a US commitment to Oman's security, Oman would grant the use of port and air base facilities in the Gulf to US forces. The USA was to spend about US $320m. on the construction and improvement of military bases from 1981. Oman's acceptance of US assistance in defence aroused protests from the PDRY in 1981, but mediation by other Gulf states led to a 'normalization' agreement in 1982, and diplomatic relations between Oman and the PDRY were resumed in October 1983. In the 1984 budget, the Government of Oman proposed that 37.9% of total expenditure be used to develop defence.

Despite its links with the USA, Oman has been eager to establish a level of independence from any superpower through co-operation with neighbouring Arab countries. In May 1981 Oman joined with six other Middle Eastern countries to form the Gulf Co-operation Council (GCC, see p. 127) which, among other aims, planned to work towards a unified system of defence in the Gulf region. In October 1983 Oman was the site of the GCC's first joint military exercises, seen as the foundations of an independent 'rapid deployment force' for Gulf countries.

Oman has generally maintained a policy of 'non-interference' in foreign affairs. The Sultanate supported the UN Security Council's resolution of November 1983, calling for an end to military operations in the Gulf War, and joined with the GCC in urging Iran to refrain from interfering with traffic in the Strait of Hormuz. The principal concern, however, has been to further the country's own economic and social development.

Government

The Sultan rules with the advice of an appointed Cabinet. Oman has a Consultative Assembly of 55 nominated members, including 19 representatives of the Government. The Assembly's role is confined to comments on economic and social development, and recommendations of future policy. There are no political parties, and legislation is by decree. The country is divided into 41 wilayats (provinces), each under the jurisdiction of a wali, or provincial governor.

Defence

In July 1984 the Omani armed forces numbered 21,500, including 3,700 expatriate personnel. The army consisted of 16,500 men, the navy of 2,000, and the air force of 3,000 men. Military service is voluntary. Defence expenditure was budgeted at 677 million rials in 1984.

Economic Affairs

Oman is a largely barren country and can support only limited agriculture on the coastal plain and in a few irrigated valleys. However, the exploitation of petroleum, first discovered near Fahud in 1964, has transformed the economy and brought Oman a relatively high level of prosperity. According to estimates by the World Bank, Oman's gross national product (GNP) per head (at average 1980–82 prices) was US $6,090 in 1982. Between 1960 and 1970, it was estimated, Oman's gross domestic product (GDP) increased, in real terms, by 19.5% per year, one of the highest growth rates in the world. The comparable increase between 1970 and 1982 was 5.8% per year. In 1983 the increase in GNP was estimated to be 5.5%.

Since 1967, when it was first produced commercially, petroleum has dominated the economy. With an estimated 400,000m. barrels of identified reserves at the end of 1984, Oman could continue producing at 1984 levels until the early 21st century. In 1974 the Government took a 60% share in Petroleum Development Oman Ltd (PDO), the major concessionaire, and income from the petroleum industry provides almost all of government revenue. As Oman is not a member of OPEC, it is free from controls on production, although it does tend to follow pricing policy in line with the organization.

Oman's production of crude petroleum, which has fluctuated while existing oilfields were exhausted and new fields were developed, reached a then unprecedented level in 1976, when annual output totalled 135m. barrels, an average of 366,000 barrels per day (b/d). Output declined to 103m. barrels in 1980, but the inauguration of new fields raised production to 122.7m. barrels (336,000 b/d) by 1982. In an attempt to compensate for the overall drop in prices, caused by the world oil glut, Oman raised production to 400,000 b/d in August 1983, and output for the year totalled 141.9m. barrels. In 1984 the average rate of production was estimated at between 400,000 b/d and 410,000 b/d. In February 1985 Oman reduced its official oil price to $28

per barrel and announced its intention to raise the year's average output to 420,000 b/d. Exports of crude petroleum were expected to increase further with the upgrading of the main pipeline network, which by 1985 was expected to carry 650,000 b/d (unboosted flow) of crude oil. Active exploration for further reserves continued. Oman's first petroleum refinery came into operation in June 1982: its capacity of 50,000 b/d was sufficient to meet domestic demand for petrol.

In 1984 Oman's reserves of natural gas were estimated at 8,240,000m. cu ft (232,000m. cu m). Production was at the rate of more than 2,400m. cu m, mainly of associated gas, per year. In 1984 PDO announced a 10-year programme of exploration for reserves of unassociated gas, to release more petroleum for export. The expansion of gas liquefaction plants was expected to increase their capacity to 320m. cu ft per day by 1985. There were also plans to link all main towns into a national gas grid, again to save petroleum for export.

Government revenues from petroleum have provided investment for three five-year development plans, covering 1976–80, 1981–85 and 1986–90, which aimed to expand and diversify the country's economic base as a provision against an eventual exhaustion of hydrocarbon reserves. Compared with other Middle Eastern countries, Oman's petroleum reserves and production levels are quite small: these limitations, together with the country's chronic shortage of skilled manpower, did not favour the development of heavy industry on a large scale. One major project was the opening in July 1983 of a copper smelting and refining complex. Total output of refined copper in 1984 was estimated at 15,000 tons, and the complex accounted for 38% of total revenue from non-oil exports. In general, however, the Omani leadership has preferred to pursue development that catered for the country's own needs. Extensive investment in infrastructure and private industry after 1970 caused a boom in the construction industry, and two new cement plants began production in 1984. With a combined capacity of 850,000 tons per year, these plants were expected to provide about 60% of the country's needs. An industrial estate, the first phase of which was expected to provide 77 units for small industries, also opened in 1984. The Government provided interest-free loans as an incentive to private investors.

Other major targets for development have been education, housing, road development, welfare, defence and tourism. The 1981–85 development plan envisaged total expenditure of RO7,400m., of which RO3,300m. was to be allocated to development projects.

A primary target of the third development plan (1986—90) is agriculture. Although about 70% of the working population were engaged in agriculture in the early 1980s, the sector contributed only 2%–3% of Oman's GDP. Agriculture generally takes the form of subsistence farming by traditional methods, and is heavily dependent on irrigation. The major crops are dates, limes and lucerne (alfalfa), while there are also increasing numbers of sheep, goats, cattle and poultry. Some progress was made in the 1981–85 development plan, which allocated about RO43m. for the development and modernization of farming methods, particularly irrigation. By 1984 Oman was almost self-sufficient in tomatoes, cucumbers, onions and peppers. Distribution and marketing centres were already open in some places. There were plans to build an experimental dam.

Fishing would also continue to benefit from considerable aid: in 1983 about 3,000 fishermen received boats or engines from the Government, and several marine centres for marketing and distribution were being built. The annual catch generally totals about 60,000 metric tons, although it rose to an estimated 84,000 tons in 1982, and a 32% increase in exports was reported in 1983. By 1982 the Oman National Fisheries Company was operating four deep-sea trawlers and a processing and freezing plant.

Successful completion of Oman's development plans has depended on sustaining a high level of petroleum revenues. Since 1982 the drop in world petroleum prices has led to deficits in projected budgets. The greatest deficit was predicted in 1983, when it was expected to reach RO207m., falling to RO204m. in 1984. Budget estimates for 1985 predicted a 10% increase in revenues, as a result of increased petroleum production. Revenues were expected to reach RO1,719m., and expenditure was estimated at RO1,918m., narrowing the deficit to RO199m. The Government met the cost of continued development largely through a five-year international loan, worth US $300m., which was agreed in July 1983. A further international loan, worth US $400m., was taken out in early 1985.

Oman's major trading partner is Japan, which in 1983 provided 22% of imports and received 50% of exports of petroleum. Singapore took 13.9% of exports in 1983, but supplied only 1.9% of total imports. Major suppliers in that year included the United Kingdom, providing 18.6% of imports, and the UAE, which provided 17.5%. The USA took 8.4% of exports and supplied 7.7% of imports. Between 1982 and 1983, exports declined by 3.9%, totalling RO1,467.3m. in the latter year. Recorded imports also declined over the period, by 7%, to RO860.9m. Decreased revenues from petroleum have led to a reduction in the surplus on the current account of Oman's balance of payments since 1981. Between 1981 and 1982 the surplus fell by 32.7%, and a further fall of 26% occurred between 1982 and 1983, when the current surplus was US $85m.

Transport and Communications

Many new roads have been constructed since 1970. A highway of 362 km (225 miles) links Oman with Dubai, in the United Arab Emirates, and there is a coastal highway between Muscat and Mutrah. Mina Qaboos is the principal port, while the main terminal for oil tankers is at Mina al-Fahal. The Government has a share in Gulf Air, the Bahrain-based airline, and there are international airports at Seeb and Salalah. The continued improvement of transport facilities was a major feature of the 1981–85 development plan.

Social Welfare

Oman has a free National Health Service, and in 1984 there were 15 hospitals (with a total of 1,759 beds), 446 doctors and 1,386 nurses. There were also more than 140 clinics. A 500-bed hospital was expected to open in 1987.

Education

Great advances have been made in education since 1970, when Sultan Qaboos came to power. In 1970 Oman had only 16 primary schools, with 6,941 pupils, and education was provided only for children between six and 12 years of age. Although education is still not compulsory, attendance has greatly increased. Primary education begins at six years of age and lasts for six years. Secondary education, divided into two stages, lasts for a further six years. In 1981 the proportion of children between six and 12 years of age who received primary education was 56% (boys 69%; girls 43%). At the same time, enrolment of children aged 12 to 18 at secondary schools was an estimated 14% (boys 20%; girls 8%). In 1982 the total attendance at primary and secondary schools was equivalent to 51% of all school-age children (63% of boys; 37% of girls). In 1983/84 there was a total of 518 schools and educational institutes, with 166,844 students. Of a total of 7,822 teachers, 87% were seconded from other countries. A teacher-training institute opened in 1976, and commercial and agricultural schools were opened in 1979. There are also institutes of religious education. A university is due to open in 1986. About 9,582 adults followed adult courses in 1983/84.

Public Holidays

1985: 21 May* (Ramadan begins), 20 June* (Id ul Fitr, end of Ramadan), 27 August* (Id ul Adha, Feast of the Sacrifice), 16 September* (Islamic New Year) 25 September* (Ashoura), 18 November (National Day), 19 November (Birthday of the Sultan), 25 November* (Mouloud, Birth of the Prophet).

1986: 7 April* (Leilat al Meiraj, Ascension of the Prophet).

* These holidays are dependent on the Islamic lunar calendar and may vary by one or two days from the dates given.

Weights and Measures

The imperial, metric and local system are all used, although the metric system was officially adopted in 1974.

Currency and Exchange Rates

1,000 baiza = 1 rial Omani (RO).

Exchange rates (31 December 1984):
£1 sterling = 400.3 baiza;
US $1 = 345.4 baiza.

Statistical Survey

Source (unless otherwise stated): Oman Directorate General of National Statistics, Development Council, POB 881, Muscat; tel. 722806; telex 3384.

Area and Population

AREA

300,000 sq km (120,000 sq miles).

POPULATION

No census has ever been held in Oman, and estimates of the country's population are based on conjecture. For planning purposes, the population is assumed to be 2,000,000 (1984); Capital Area (Muscat to Seeb) estimated 50,000 (1981). Estimated number of gainfully employed 150,000: agriculture 109,000; fisheries 15,000; government 10,000; construction 6,000; petroleum, banking, services 5,000; others 5,000 (1972).

Agriculture

CROPS

Crops include dates, lucerne (alfalfa), limes, onions, wheat, bananas, mangoes, tobacco, sorghum, sweet potatoes, chickpeas and coconuts. By the end of 1983, a total of eight production farms had been established, and there were seven agricultural research stations, 32 extension centres and four nurseries. Vegetable and fruit production from these establishments totalled 143.8 tons in 1982, and 45.2 tons in 1983.

LIVESTOCK (1978/79 agriculture census result, '000 head)

Goats 1,165, Cattle 319.5, Sheep 138.3, Camels 229.3, Donkeys and Horses 43.0.

Fishing

('000 metric tons, live weight)

	1980	1981	1982

Directory

The Constitution

Oman has no written constitution. The Sultan has absolute power and legislates by decree. He rules with the assistance of an appointed Cabinet. The country has no legislature, but there is a Consultative Assembly of nominated members.

The Government

HEAD OF STATE

Sultan: Qaboos bin Said (assumed power on 24 July 1970, after deposing his father).

CABINET

(February 1985)

Prime Minister and Minister of Foreign Affairs, Defence and Finance: Sultan Qaboos bin Said.

Deputy Prime Minister for Security and Defence: Sayyid Fahar bin Taimour al-Said.

Deputy Prime Minister for Legal Affairs: Sayyid Fahad bin Mahmoud al-Said.

Deputy Prime Minister for Financial and Economic Affairs: Qais Abdul Munim al-Zawawi.

Special Representative of the Sultan and Governor of Muscat: Sayyid Thuwaini bin Shihab.

Minister of Diwan Affairs: Sayyid Hamad bin Hamud al-Said.

Minister of Justice and of Awqaf and Islamic Affairs: Sayyid Hilal bin Hamad al-Summar al-Said.

Minister of State for Foreign Affairs: Yousef bin al-Alawi Abdullah.

Minister of Information: Abdul Aziz bin Mohammed Rowas.

Minister of Electricity and Water: Khalfan bin Nasir al-Wuhaybi.

Minister of Posts, Telegraphs and Telephones: Ahmad Sowaidan al-Baluchi.

Minister of Communications: Sayyid Salim bin Nassir al-Busaidi.

Minister of Education and Youth Affairs: Yahya bin Mahfudh al-Mantheri.

Minister of Social Affairs and Labour: Sheikh Mustahil bin Ahmed al-Ma'shani.

Minister of Housing and Municipalities (also Public Works): Ahmad bin Abdulla al-Ghazali.

Minister of National Heritage and Culture: Sayyid Faisal bin Ali al-Said.

Minister of the Interior: Sayyid Badr bin Saud bin Hareb.

State Adviser on Interior Affairs: Sheikh al-Walid Zaha bin Hinai.

Minister of Commerce and Industry: Salim bin Abdullah al-Ghazali.

Minister of Petroleum and Minerals: Said bin Ahmed bin Said al-Shanfari.

Minister of Agriculture and Fisheries: Abdel Hafiz bin Salem bin Rajab.

Minister of Environment: Sayyid Shabib bin Taymur bin Faisal.

Minister of Health: Dr Mubarek bin Saleh al-Khadduri.

Governor of Dhofar and Minister of State: Sayyid Hilal bin Said bin Hareb al-Bousaidi.

Governor of the Capital and Chairman of Musandam Development Committee: Brig. Mutasim bin Hamad bin Nasr al-Bousaidi.

Ministry of Social Affairs and Labour: POB 560, Muscat; tel. 602444.

CONSULTATIVE ASSEMBLY

In October 1981 Sultan Qaboos issued a decree setting up a Consultative Assembly of 45 nominated members, of whom 17 were government officials. At the opening of its second session, in October 1983, the Assembly's membership was increased to 55, with 19 government officials. Members are nominated for a term of two years. The Assembly meets four times a year.

President: Hamoud bin Abdullah al-Harthi.

Development Banks

Oman Bank for Agriculture and Fisheries SAO: POB 6077, Ruwi; tel. 701761; telex 3046; f. 1981; short-, medium- and long-term finance for all activities in the public sector related to agriculture and fisheries; govt-owned; cap. p.u. RO9m. (June 1984); Chair. ABDUL-HAFIDH BIN SALEM BIN RAJAB (Minister of Agriculture and Fisheries); Gen. Man. SALAH ALDIN MOUELHI.

Oman Development Bank SAO: POB 309, Muscat; tel. 745577; telex 5179; f. 1976; cap. RO10m.; 40% Oman Govt, 40% foreign, 20% Omani private; Chair. MUHAMMAD BIN MUSA AL-YUSUF.

Oman Housing Bank OSC: POB 5555, Ruwi; tel. 704877; telex 5077; f. 1977; cap. RO20m.; 60.9% Oman Govt, 39% Govt of Kuwait, 0.1% Oman Devt Bank; total assets RO73m. (1983); Gen. Man. MAHMOUD ABU'TEEN.

INSURANCE

Al-Ahlia Insurance Co: Muscat; cap. p.u. RO2m.

Oman National Insurance Co SAO: POB 5254, Ruwi; tel.

702677; telex 5111; f. 1978; owned partly by Govt of Oman, and private shareholders; Gen. Man. JACK MCROBBIE.

Oman United Agencies LLC: POB 3985, Ruwi, Muscat; tel. 701299; telex 5215; f. 1978; representatives of several British insurance companies; assoc. of Gray, MacKenzie and Co Ltd; Man. Dir RICHARD W. T. TATHAM.

Trade and Industry

Oman Chamber of Commerce and Industry: POB 4400, Ruwi, Muscat; tel. 702259; telex 3389; Pres. Sheikh AHMAD MUHAMMAD BIN OMAIR; Dir-Gen. ALI AL-DAHAB.

DEVELOPMENT

Oman Cement Co SAO: POB 3560, Ruwi, Muscat; tel. 701512; telex 3290; development and production of cement; Chair. ALI DAUD; Vice-Chair. and Gen. Man. SULEIMAN BARKAT AHMED LAMKI.

Oman Flour Mills Co Ltd SAO: POB 3566, Ruwi; tel. 701033; telex 5422; f. 1976; sales US $25.9m. (1982); cap. p.u. $1.6m.; 60% govt-owned; produces 200 tons per day (t/d) of various flours and 10 t/d of animal feedstuffs; Chair. S. BHARAKAT AL-LAMKI; 81 employees.

Oman Mining Co Ltd SAO: POB 758, Muscat; tel. 603501; telex 5492; f. 1978; cap. RO5m.; 100% owned by Govt of Oman; development of copper mines; Chair. SALIM SHABAN.

Oman National Fisheries Co (ONFC): POB 5900, Ruwi, Muscat; tel. 772388; telex 3092; company responsible for commercial development of fishing, processing and marketing of marine products; Dir-Gen. ABDULLA HAMDAN (acting).

Petroleum

Petroleum Development Oman (PDO): POB 81, Muscat; tel. 608111; telex 5212; incorporated in Sultanate of Oman since 1980 by royal decree as limited liability company; 60% owned by Oman Govt, 34% by Shell, 4% by CFP and 2% by Partex; cap. RO8.6m.; production (Aug. 1984) approximately 400,000 b/d from 20 fields, linked by a pipeline system to terminal at Mina al-Fahal, near Muscat; Man. Dir H. M. BRINKHORST; 3,700 employees.

Amoco: holds two concession areas, totalling 49,000 sq km, in northern mountains; consortium composed of Amoco, Wintershall, DST and Von Rautenkrantz; also holds onshore concession area of 48,960 sq km in northern Oman; exploration is in progress.

Elf Aquitaine Oman: concession granted in 1975 for exploration in the onshore region of Butabul; area of 7,000 sq km; converted to a production sharing agreement in October 1976; 48% owned by Elf, 32% by Sumitomo and 20% by Wintershall; concessions also in Masirah bay area (since 1981); area of 27,000 sq km; and in offshore northern Oman (since 1973); area of 5,336 sq km, converted to production sharing agreement in 1976.

Japex Oman: operates a concession at Wahibah; operated by a consortium of Japanese companies in which Japan Petroleum Exploration Co has an 85% share; exploration is in progress.

Japan Petroleum Development (Oman): awarded concession in 1981; total area 15,000 sq km; operated by a consortium of Nippon Oil Co, Teikoku Oil Co, Mitsui Oil Exploration Co, Nissho-Iwai Corpn; drilling is under way.

National Gas Co SAO: POB 5030, Muscat; tel. 620705; f. 1979; cap. and res RO500,000; bottling of liquefied petroleum gas; Gen. Man. L. N. GIOCULDAS; 35 employees.

Occidental Petroleum Corpn (Occidental Oman): took over as majority shareholders in Suneinah concession from Gulf Oman Petroleum in 1983; total area of 9,717 sq km; drilling is under way.

Oman Refinery Co LLC: POB 6586, Ruwi; tel. 601200; telex 5123; Man. Dir JAMES PRITCHARD; 181 employees.

The Government is hoping that more petroleum will be found in Dhofar and has granted exploration rights over a large area of western and south-western Dhofar to BP, Deminex, AGIP, Hispanoil, Elf/Aquitaine I, the Adolph Lundin Group, Quintana/Gulf and Cluff Oil.

Transport

Directorate-General of Roads and Ports: POB 684, Ruwi, Muscat; tel. 702233; Dir-Gen. of Roads TARAK MOHAMMED AL-MANDARI; Dir of Maritime and Ports Affairs SALIM KHALFAN FATEH.

ROADS

Oman National Transport Co: POB 620, Muscat; tel. 610046; telex 5018; operates local, regional and long-distance bus services from Muscat; Chair. HAMUD IBRAHIM SUMAR; Gen. Man. GRAHAM FLETCHER.

A network of adequate graded roads links all the main centres of population and only a few mountain villages are not accessible by Land Rover. A rapid road construction programme began in 1970 and by the end of 1983 there were 3,222 km of asphalt road and 18,677 km of gravelled roads. The final link in the 362 km Dubai–Oman highway was finished in November 1977. A new coastal highway between Muscat and Mutrah was opened in November 1978. In Dhofar tarmac roads have been completed from Raysut through Salalah to Taqa. Roads between Seeb and Nizwa and Salalah and Thumrait have been completed. About 1,590 km of asphalt road were to be built during the 1981–85 Plan and a 780-km highway linking Muscat and Salalah is already in use.

SHIPPING

The port of Mina Qaboos, at the entrance to the Gulf, was built in 1974 and provides nine deep-water berths varying in length from 250 to 750 ft (76 to 228 m), with draughts of up to 34 ft (10.4 m), and three berths for shallow-draught vessels drawing 12 to 16 ft (3.7 to 4.9 m) of water. Two of the existing berths have been upgraded to a container terminal capable of handling 60 containers per hour and equipped with two 35-ton capacity gantry cranes. During 1983 1,527 ships called at the port, which was handling about 1.5m. tons of cargo.

Port Services Corporation Ltd: Mina Qaboos, POB 133, Muscat; tel. 734001-6; telex 5233; f. 1976; cap. p.u. RO2.4m.; jointly owned by the Govt of Oman and private shareholders; Chair. SAYED SALIM BIN NASSER AL-BUSAIDI; Pres. AWAD SALIM SHANFARI.

The oil terminal at Mina al Fahal can also accommodate the largest super-tankers on offshore loading buoys. Similar facilities for the import of refined petroleum products exist at Mina al Fahal and Riyam (near Muscat).

Mina Raysut, near Salalah, has been developed into an all-weather port, and, in addition to container facilities, has four deep-water berths and two shallow berths. Loading facilities for smaller craft exist at Sohar, Khaboura, Sur, Marbet and Salalah. In 1982 the port handled 254 ships and 436,000 tons of cargo.

CIVIL AVIATION

Domestic and international flights operate from Seeb International Airport, whose extended runway was opened in December 1979. Extensions to the terminal building were under way in 1984. During 1982 a total of 26,998 aircraft passed through the airport. Oman's second international airport at Salalah was completed in 1978. Most towns of any size have small air strips.

Directorate-General of Civil Aviation: POB 204, Muscat; tel. 610456; telex 3418; Dir-Gen. MOHAMMED RAJAB SULAIMAN AL-BAOMAR.

Gulf Aviation Ltd (Gulf Air): POB 138, Bahrain; telex 8255; f. 1950; jointly owned by the governments of Bahrain, Qatar, the United Arab Emirates and Oman; services linking Abu Dhabi, Bahrain, Doha, Dubai, Muscat, Salalah and Sharjah with Amman, Amsterdam, Athens, Baghdad, Bangkok, Bombay, Beirut, Cairo, Colombo, Delhi, Dhahran, Hong Kong, Jeddah, Karachi, the Republic of Korea, Kuwait, Larnaca, London, Manila, Paris, Ras al-Khaimah, Shiraz, Teheran and Tunis; fleet consists of 8 Boeing 737–200, 11 TriStar.

Oman Aviation Services Co SAO: POB 7042, Jibroo, Muscat; tel. 619232; telex 5424; f. 1981; cap. p.u. RO3m.; the Govt of Oman has a 35% share; air-charter, maintenance, handling and catering; Chair. SALIM BIN NASSIR AL-BUSAIDI; Gen. Man. R. S. MELDRUM.

PAKISTAN

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Islamic Republic of Pakistan lies in southern Asia, bordered by India to the east and by Afghanistan and Iran to the west. It has a short frontier with the People's Republic of China in the far north-east. The climate is dry and generally hot, with an average annual temperature of 27°C (80°F), except in the mountains, which have very cold winters. Temperatures in Karachi are generally between 13°C (55°F) and 34°C (93°F), with negligible rainfall. The national language is Urdu. Punjabi, Sindhi and Pushtu are also widely spoken, and English is extensively used. The state religion is Islam, embracing about 97% of the population, the remainder being mainly Hindus or Christians. The national flag (proportions 3 by 2) has a vertical white stripe at the hoist, while the remainder is dark green, with a white crescent moon and a five-pointed star in the centre. The capital is Islamabad.

Recent History

Pakistan was created in August 1947 by the partition of the United Kingdom's former Indian Empire into the independent states of India and Pakistan. It originally had two parts, East Pakistan and West Pakistan, separated by about 1,600 km (1,000 miles) of Indian territory. The new nation was formed in response to demands by the Muslim League (led by Muhammad Ali Jinnah) for a specifically Islamic state, to free Muslims from domination by the Hindu majority in the sub-continent. Partition led immediately to religious and frontier conflicts in which hundreds of thousands of lives were lost. Jinnah, also known as Quaid-i-Azam ('Great Leader'), became the first Governor-General of Pakistan but died in 1948. Since 1949 a cease-fire line has separated Pakistani and Indian forces in the disputed territory of Jammu and Kashmir.

From the time of partition, the eastern and western sections of Pakistan were united only by religion, with no geographical, economic or racial coherence. The majority of the population lived in the smaller wing, East Pakistan, but political and military power was concentrated in the West. The country, formerly a dominion with the British monarch as Head of State, became a republic on 23 March 1956. The port and peninsula of Gwadur, formerly administered by Muscat and Oman (now the Sultanate of Oman), were ceded to Pakistan in September 1958. Pakistan came under military rule in October 1958, when President Iskander Mirza abrogated the constitution, declared martial law, dismissed the national and provincial governments, and dissolved all political parties. General (later Field-Marshal) Muhammad Ayub Khan was appointed Martial Law Administrator. In 1960 he was elected President by the 'basic democracy' system which he had established. Widespread disorders led to Ayub Khan's resignation in March 1969. General Agha Muhammad Yahya Khan, the Commander-in-Chief of the Army, replaced him, and martial law was reimposed.

In December 1970 elections were held for an assembly which was to draw up a new constitution. For the first time the East Pakistanis were to be allowed a majority in the assembly. Sheikh Mujibur Rahman's Awami League, standing for autonomy, won an overwhelming majority in East Pakistan, while the Pakistan People's Party (PPP) won most seats in the West. Yahya Khan tried to persuade Sheikh Mujib to form a coalition government with the PPP, but negotiations broke down. In March 1971 the army was sent in to settle the matter by force. East Pakistan declared its independence as the People's Republic of Bangladesh, and civil war broke out. Indian suppport for Bangladesh increased, and in December 1971 the Indian army intervened, forcing the Pakistani army to surrender. Bangladesh's independence became a reality, and Yahya Khan resigned. Pakistan was confined to its former western wing. Military rule was ended, and Zulfiqar Ali Bhutto, the leader of the PPP, became President of the truncated Pakistan. After Bangladesh received widespread international recognition, Pakistan left the Commonwealth in January 1972. Pakistan recognized Bangladesh in February 1974.

In 1972 President Bhutto proposed the adoption of a new constitution, but in 1973 opposition parties of the right and left formed a United Democratic Front to demand amendments. An amended constitution came into force in August 1973, when Bhutto became executive Prime Minister. Fazal Elahi Chaudry, hitherto Speaker of the National Assembly, became constitutional President.

In February 1973 presidential rule was promulgated in Baluchistan, following an outbreak of tribal fighting. In April 1974 the Government announced the ending of army operations in Baluchistan, and declared an amnesty for political opponents, but fighting continued. Governor's rule was imposed on Baluchistan in December 1975, but was lifted a year later, and a new PPP Cabinet sworn in. At the beginning of 1975 violence increased in the North-West Frontier Province, a result of the activities of the 'Pakhtoonistan' separatist movement among the Pushtu-speaking population, supported by neighbouring Afghanistan.

Following accusations by the opposition Pakistan National Alliance (PNA) of vote-rigging in the elections for the National and Provincial Assemblies in March 1977, there was a breakdown of law and order, and martial law was imposed in Karachi, Lahore and Hyderabad. In July 1977 a bloodless military coup deposed Bhutto. A martial law regime was established, with Gen. Mohammad Zia ul-Haq, the Army Chief of Staff, as Chief Martial Law Administrator. President Chaudry remained in office as Head of State, and a four-member Military Council was formed. In September the seven-year-old state of emergency was ended in preparation for elections. Bhutto was imprisoned for allegedly ordering the murder of the father of a former political opponent, and additional charges were later brought against him. In March 1978 the Lahore High Court sentenced Bhutto to death for conspiracy to murder, and an appeal was lodged with the Supreme Court.

In January 1978 Gen. Zia appointed a 16-member Council of Advisers which was to be subordinate to the Military Council. In July the Council of Advisers was replaced by a Cabinet of 22 military and civilian members but, following the PNA's decision to participate in Government, a new civilian Cabinet took office in August 1978. At the same time, Gen. Zia pledged to hold elections by October 1979. President Chaudry resigned in September 1978, and his office was assumed by Gen. Zia.

During late 1978 the PPP repeatedly demanded an early election in the hope of winning a large majority and releasing Bhutto. However, the Supreme Court upheld the death sentence against Bhutto in February 1979, and he was hanged in April. After the resignations of the PNA members of the Cabinet later in the month, a new Cabinet was formed, composed mainly of military personnel and bureaucrats.

Local elections, held on a non-party basis, took place in September. Following the refusal by the two largest parties, the PPP and the PNA, to participate in the general election which was scheduled for the autumn, because of the conditions imposed, Gen. Zia announced in October the indefinite postponement of the polls.

In 1980 there was widespread dissatisfaction among politicians and lawyers concerning the severe restrictions which were imposed on the judiciary and on personal freedom through Gen. Zia's martial law orders of May 1980. Political activity, although officially banned since October 1979, continued. In March 1981 nine political parties, including the PPP, formed an alliance, the Movement for the Restoration of Democracy (MRD), calling for a return to parliamentary government. However, after the hijacking of a Pakistani airliner by PPP activists, the movement lost popularity. Several hundred opposition politicians were interned or placed under house arrest.

Also in March 1981, a new 23-member Federal Council was

formed, with a greatly enlarged civilian element, and provincial cabinets were established in the North-West Frontier Province, Punjab and Sind. The Government also promulgated an interim constitution which was to remain in force as long as Pakistan continued under martial law. In January 1982 a new advisory committee, the Majlis-i-Shura, was formally inaugurated to advise on religious questions until Pakistan had a new political system based on Islamic teachings.

In August 1983 President Zia announced that a general election would be held by March 1985, prior to the lifting of martial law and the restoration of constitutional democracy. Zia had announced a planned return to democratic rule six times since coming to power, but had always postponed the move on the grounds of national security.

The MRD, led by the PPP, launched a civil disobedience campaign in August 1983 to press for a return to parliamentary democracy on the basis of the 1973 constitution without amendments. This had its strongest support among the followers of the late President Bhutto, and the nationalists in Sind Province, where anti-Government protests resulted in numerous deaths. The campaign was called off in December after limited success, and many political leaders and activists were imprisoned or went into exile, including Benazir Bhutto, daughter of the former President and herself a leading PPP activist. In March 1984 student unions were banned in universities in an attempt to quell growing dissent, and, after four months of unrest, government-approved student councils were established.

In June 1984 prayer wardens were appointed in every village to encourage the growth of 'Islamic democracy'. Islamic banking, which is nominally interest-free, was to be made compulsory in July 1985. The ban on political reporting and the staging of 'show trials', along with the existing restrictions, seriously curtailed the effectiveness of the opposition. In December 1984 an unexpected referendum was held, which sought affirmation of the Islamization process and, indirectly, confirmation in office for a further five years for Gen. Zia. The referendum was boycotted by the MRD, but a turn-out of 62%, according to official sources, gave a 98% vote in favour of the proposal. There were, however, widespread allegations of electoral malpractice.

A general election (only the third in the country's history) was held on 25 February 1985 for a National Assembly, and elections to the four Provincial Assemblies followed on 28 February. Initially, Gen. Zia stipulated stringent conditions that, in effect, would have disqualified the opposition. However, he yielded to protests from the opposition and allowed the MRD leadership to meet, but it refused to participate in the elections. Hundreds of Gen. Zia's opponents were detained prior to the elections, which were held on a non-party basis. The extent of the new Assembly's powers was not specified, and nor was the manner in which the Prime Minister would be chosen. Despite the boycott, 53% of the electorate voted in the national elections and 59% in the provincial elections. Widespread disaffection with the regime was indicated by the defeat of several of Zia's Cabinet ministers and more than one-half of the members of the outgoing consultative committee, while the candidates of the fundamentalist Jamaat-i-Islami, the only pro-Government party to field its members as individuals, were heavily defeated. The largest groupings in the new assembly comprised members of the Pagaro Group of the Muslim League and former members of the PPP. The Provincial Assemblies elected an 87-member Senate, and the combined Senate and National Assembly met, as the new Majlis-i-Shura, on 23 March.

At the beginning of March, Gen. Zia announced sweeping constitutional amendments, designed to increase the power of the Presidency. They included the establishment of an 11-member National Security Council, headed by himself; powers to appoint and dismiss the Prime Minister, the Cabinet and provincial Chief Ministers; and powers to dissolve the National Assembly, to call elections and to send legislation back to the National Assembly for reconsideration. The amendments indemnified all of Gen. Zia's actions and prevented the Supreme Court from challenging his right to amend the Constitution. Martial law would be lifted in stages, and the President would rule as a civilian. The question of the revival of political parties was left to the National Assembly. In late March Muhammad Khan Junejo was appointed Prime Minister by Gen. Zia.

Pakistan became a member of the Non-Aligned Movement in 1979. General Zia has pursued a policy of maintaining close links with other Islamic states in the Middle East and Africa, which have provided considerable economic support to Pakistan, as has the People's Republic of China. Pakistan's controversial nuclear programme prompted the USA to cut off development aid in April 1979 but, as a result of the Soviet intervention in Afghanistan in December 1979, the USA agreed in 1981 to provide Pakistan with military and economic assistance valued at $3,200m. This agreement, in particular the sale of F-16 aircraft to Pakistan, caused relations with India to deteriorate as the Indian Government felt that it would upset the balance of power in the sub-continent and precipitate an arms race. In October 1981 Pakistan's attempt to rejoin the Commonwealth was blocked by India. Relations with Afghanistan were strained, as rebel Afghan tribesmen used areas inside Pakistan as bases for their activities, and the number of Afghan refugees in Pakistan exceeded 3m. in January 1985 (80% of refugees are in the North-West Frontier, while 20% are in Baluchistan). In 1982, 1983 and 1984 further attempts were made to begin talks between the Governments of Afghanistan, Pakistan and Iran, but these continued to be frustrated by disagreements on all sides.

During 1982 Gen. Zia attempted to improve foreign relations in the face of the continued Soviet presence in Afghanistan. In August the Khunjerab Pass on the Karakoram highway, linking China and Pakistan, was formally opened, and a joint Sino-Pakistani economic commission was established after Gen. Zia's visit to Beijing in October. In November he visited India for the first time and, although no lasting solution was reached over the Kashmir problem, it was agreed to promote economic ties. As well as Indonesia and Malaysia, Gen. Zia visited the USA to assure President Ronald Reagan that Pakistan would not develop nuclear weapons. In return, the military and economic aid package was confirmed, and the first F-16 aircraft was delivered in December. In 1983 relations with the USSR improved slightly, and the amount of Soviet aid to Pakistan increased. General Zia reaffirmed Pakistan's friendship with India on the death of Indira Gandhi in 1984, and personally attended her funeral.

Government

In July 1977 a martial law administration was established, and the 1973 constitution (which provided for a bicameral Federal Legislature, including a 216-member elected National Assembly, and a Prime Minister as the chief executive, elected by the Assembly) was put into abeyance until the holding of elections and the formation of a new government. In March 1981 President Zia promulgated a Provisional Constitutional Order which retained, wholly or in part, 119 articles of the 1973 Constitution.

In December 1984 a referendum effectively reaffirmed Gen. Zia in office for a further five years. In March 1985 a Prime Minister was appointed, by the President, to head the Cabinet. Following general and provincial elections in February 1985, the 237-member National Assembly and 87-member Senate, the latter elected by the four Provincial Assemblies, were to sit jointly as the Majlis-i-Shura. The National Assembly is elected for a five-year term, and the Senate for a six-year term. In March Gen. Zia substantially amended the 1973 Constitution to increase the power of the presidency. The Constitution was then revived, with the exception of 28 key provisions relating to treason, subversion, fundamental rights and the jurisdiction of the Supreme Court.

Pakistan comprises four provinces (each with an appointed Governor and provincial government), the federal capital of Islamabad and federally administered 'tribal areas'.

Defence

In July 1984 the armed forces totalled 478,600 men: 450,000 in the army, 11,000 in the navy and 17,600 in the air force. Paramilitary forces numbered 109,000. Estimated defence expenditure for 1984/85 was 30,370m. rupees. Military service is voluntary.

Economic Affairs

In 1982, according to estimates by the World Bank, Pakistan's gross national product (GNP) per head, measured at average

1980–82 prices, was US $380. It was estimated that GNP per head increased, in real terms, by 2.8% per year between 1960 and 1982. Agriculture is the mainstay of the economy, employing more than one-half of the working population and providing 23.5% of the country's gross domestic product (GDP) in 1983/84. Wheat, rice, sugar cane and cotton are the main crops. Agricultural production increased by 4.3% in 1983/84, compared with 4.8% in 1982/83, but growth was targeted to reach 10.2% in 1984/85. Pakistan's annual wheat harvest reached 12.4m. tons in 1982/83, but fell to 11.5m. tons in 1983/84. However, it reached an estimated 13m. tons, a record level, in 1984/85. Output of sugar cane, rice and cotton increased in 1982, but exports of these important crops declined because of falling international demand and the ending of the Pakistani rupee's link with the US dollar in January 1982, which led to the loss of around 10% to 15% of its value. Production of cotton lint fell to 2.9m. bales (each of 170 kg) in 1983/84 (because of inclement weather and a pest epidemic), compared with 4.8m. bales in 1982/83. The 1984/85 crop was expected to be a record 5.7m. bales, made possible by favourable weather, more extensive planting and greater use of insecticides. The value of cotton exports rose from Rs 2,938.2m. in 1981/82 to Rs 3,985.2m. in 1982/83, but fell to Rs 1,967.4m. in 1983/84. Rice exports reached Rs 5,688.4m. in 1983/84, compared with Rs 3,628.6m. in 1982/83 and Rs 4,128m. in 1981/82. In order to increase agricultural output, the Government has implemented policies aimed at reclaiming waterlogged land and reorienting agricultural credit in favour of small farmers.

Pakistan has a wide range of minerals, but mining is not greatly developed. The Government aims to exploit deposits of graphite and limestone, discovered in 1977, for export. In 1979 deposits of copper were discovered in Baluchistan, and there are coal deposits of some 477m. tons, mostly around Lakhra. Oilfields are being worked at Dhulian, Balkassar, Tut Doudal and Meyal, and there are gas deposits in Baluchistan. In January 1983 a 200-mile pipeline was opened to supply Baluchistan with natural gas. The large earth-filled Tarbela Dam, as well as providing irrigation, has a generating capacity of 700 MW, which was expected to double by 1985.

Nationalization of major industries began in 1972, but the Zia Government reversed this policy and has introduced a number of measures to restore levels of investment in the private sector. Industrial production grew by 7.7% in 1983/84 and was targeted to grow by 9.2% in 1984/85. Pakistan's first steel plant, built with Soviet aid at Bin Qasim near Karachi, began production in 1983.

Exports in 1983/84 rose by 7.6% to Rs 37,325.8m., compared with Rs 34,675.1m. in 1982/83, while imports grew by 12.5% from Rs 68,163.7m. to Rs 76,717.6m. The trade deficit, part of which was met by remittances from Pakistanis working abroad ($2,890m. in 1982/83 and $2,760m. in 1983/84), grew to Rs 39,391.8m. in 1983/84, from Rs 33,488.6m. in 1982/83. Crude petroleum and its derivatives together accounted for Rs 19,160.8m., representing 24.9% of the total import bill, in 1983/84. Construction work on an atomic power plant at Chasma began in 1984. The plant should eventually supply 20% of the country's energy needs.

Shortage of energy remained the outstanding drawback in plans to expand existing industries or to establish new ones. About 41% of the 1984/85 budget, and more than 50% of the development budget, was allocated to the creation of energy. Pakistan consumes the equivalent of 300,000 barrels per day (b/d) of petroleum, of which about one-third is imported. Of total energy consumption in 1983/84, natural gas provided 35.1%, electricity 18.8%, petroleum 38.8%, and coal 7.3%. Domestic production of petroleum grew to 28,000 b/d in 1983/84, and the Government intended to drill a further 16 new oil wells so that the targets of the Five-Year Plan for 1983–88 could be achieved by 1986/87.

Foreign aid is needed to offset the trade deficit and, since the Soviet occupation of Afghanistan, aid has been received from the World Bank consortium, the IMF, the USA, Japan and other donors. Total foreign aid to Pakistan was expected to be $1,820m. in 1984/85, compared with $1,440m. in 1983/84 and $966m. in 1982/83. The 26% increase in aid was indicative of international endorsement of Pakistan's economic policies.

In 1979 movement towards an 'Islamic economy' was announced. In June 1980 zakat (poor-tax at the rate of 2.5% annually on banks' deposits and savings accounts) was deducted from all savings accounts, and in 1983 ushr (tax on agricultural produce at the rate of 5%) was also implemented. In January 1981 Pakistan introduced interest-free banking, which was to become compulsory for all banks in July 1985. The rate of inflation was 9.6% in 1983/84, and was expected to fall to 6% in 1984/85, according to government figures.

The 1978–83 Five-Year Plan laid emphasis on greater production of basic foodstuffs, including improvements in the rural infrastructure, improved manpower to enable Pakistanis to work abroad and a larger role in industry for the private sector. An annual average GDP growth of 6.5% was achieved. In July 1983 the Sixth Five-Year Plan was announced, with total proposed expenditure of Rs 495,000m., of which Rs 116,500m. was to be devoted to increasing domestic energy supplies. It was hoped to achieve an annual GDP growth rate of 6.5%, as in 1978–83. Emphasis was also given to increasing agricultural exports, to improving communications and to raising literacy rates. The growth of GDP, in real terms, slowed from 5.8% in 1982/83 to 4.5% in 1983/84, but it was expected to reach 8.5% in 1984/85.

Transport and Communications

At mid-1983 Pakistan had 42,749 km (26,563 miles) of roads with a concrete or bitumen surface, and a further 52,130 km (32,392 miles) of roads with a gravel or macadam surface. The 'Friendship Highway' through the Himalayas, linking northern Pakistan with Xinjiang in China, was completed in mid-1978, and the Khunjerab Pass on the Karakoram highway was formally opened in August 1982. A 1,540-km Karachi–Peshawar road, costing $700m., is under consideration as part of the Five-Year Plan for 1983–88. Modernization of Pakistan's railway system was due to be completed by 1984. The principal port is Karachi. A second port 32 km (20 miles) away, Port Mohammad bin Qasim, started partial operation in 1980. International air transport is provided by Pakistan International Airways Corporation (PIA) and numerous foreign airlines.

Social Welfare

Social welfare services are run mainly through Development Schemes and Urban Community Projects. Government support is given to voluntary bodies which provide social relief. The National Council of Social Welfare provides care for children, women, delinquents and handicapped people. An Old-Age Benefits Scheme was inaugurated in 1976, managed by the State Life Insurance Corporation. In 1976 the Government doubled the birth control budget, and planned the sterilization of 7% of couples by the 1980s. In 1979 Pakistan had 50,936 hospital beds, and in 1980 there were 23,594 registered physicians (not all resident or working in Pakistan).

Education

Universal free primary education is a constitutional right but less than one-half of Pakistan's children actually receive it, and education is not compulsory. Primary education begins at five years of age and lasts for five years. Secondary education, beginning at the age of 10, lasts for up to seven years. In 1981 the total enrolment at primary and secondary schools was equivalent to 28% of all school-age children (37% of boys; 18% of girls). In 1982/83 there were 6,023,000 children enrolled at primary schools and 2,648,000 at middle and secondary schools. The Government's target was to achieve universal primary education for boys by 1983, and for girls by 1987. All institutions except missions are nationalized. From 1976 agrotechnical subjects were introduced into the school curriculum, and 25 trade schools were established in 1976. There are 15 universities. Adult illiteracy declined from 79.3% in 1972 to 73.8% (males 64.0%; females 84.8%) in 1981.

Tourism

The Himalayan hill stations of Pakistan provide magnificent scenery, a fine climate and excellent opportunities for field sports, mountaineering and winter sports. The country received 313,708 foreign visitors in 1982.

Public Holidays

1985: 1 May (Labour Day), 21 May* (Ramadan begins), 20 June* (Id ul Fitr, end of Ramadan), 14 August (Independence

Day), 27 August* (Id ul Azha, Feast of the Sacrifice), 6 September (Defence of Pakistan Day), 11 September (Anniversary of Death of Quaid-i-Azam), 16 September* (Muharram, Islamic New Year), 25 September* (Ashura), 19 November* (Allama Iqbal Day), 25 November* (Eid-i-Milad-un-Nabi, Birth of the Prophet), 25 December (Birthday of Quaid-i-Azam and Christmas), 26 December (Boxing Day)†.

1986: 23 March (Pakistan Day, proclamation of republic in 1956), 28 March (Good Friday)†, 31 March (Easter Monday)†.

* Dates of Islamic religious holidays are subject to the sighting of the moon.

† Optional holidays for Christians only.

Weights and Measures

The metric system has been officially introduced. Also in use are imperial and local weights, including:

1 maund = 82.28 lb (37.32 kg).
1 seer = 2.057 lb (933 grams).
1 tola = 180 grains (11.66 grams).

Currency and Exchange Rates

100 paisa = 1 Pakistani rupee.

Exchange rates (31 December 1984):
£1 sterling = 17.811 rupees;
US $1 = 15.368 rupees.

Directory

The Constitution

The Constitution was promulgated on 10 April 1973, and amended in 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1983 and 1985. Parts of the Constitution are in abeyance.

GENERAL PROVISIONS

The Preamble upholds the principles of democracy, freedom, equality, tolerance and social justice as enunciated by Islam. The rights of religious and other minorities are guaranteed.

The Islamic Republic of Pakistan consists of four provinces—Baluchistan, North-West Frontier Province, Punjab and Sind—and the tribal areas under federal administration. The provinces are autonomous units.

Fundamental rights are guaranteed and include equality of status (women have equal rights with men), freedom of thought, speech, worship and the press and freedom of assembly and association. No law providing for preventive detention shall be made except to deal with persons acting against the integrity, security or defence of Pakistan. No such law shall authorize the detention of a person for more than one month.

PRESIDENT

The President is Head of State and acts on the advice of the Prime Minister. He is elected at a joint sitting of the Federal Legislature to serve for a term of five years. He must be a Muslim. The President may be impeached for violating the Constitution or gross misconduct.

FEDERAL LEGISLATURE

The Federal Legislature consists of the President, a lower and an upper house. The lower house, called the National Assembly, has 207 members elected directly for a term of five years, on the basis of universal adult suffrage, plus 20 women members and 10 members representing minorities. The upper house, called the Senate, has 87 members who serve for six years, with one-third retiring every two years. Each Provincial Assembly is to elect 19 Senators. The tribal areas are to return eight and the remaining three are to be elected from the Federal Capital Territory by members of the Provincial Assemblies.

There shall be two sessions of the National Assembly and Senate each year, with not more than 120 days between the last sitting of a session and the first sitting of the next session.

The role of the Senate in an overwhelming majority of the subjects shall be merely advisory. Disagreeing with any legislation of the National Assembly, it shall have the right to send it back only once for reconsideration. In case of disagreement in other subjects, the Senate and National Assembly shall sit in a joint session to decide the matter by a simple majority.

GOVERNMENT

The Constitution provides that bills may originate in either house, except money bills. The latter must originate in the National

Assembly and cannot go to the Senate. A bill must be passed by both houses and then approved by the President, who may return the bill and suggest amendments. In this case, after the bill has been reconsidered and passed, with or without amendment, the President must give his assent to it.

PROVINCIAL GOVERNMENT

In the matter of relations between Federation and Provinces, the Federal Legislature shall have the power to make laws, including laws bearing on extra-territorial affairs, for the whole or any part of Pakistan, while a Provincial Assembly shall be empowered to make laws for that Province or any part of it. Matters in the Federal Legislative List shall be subject to the exclusive authority of the Federal Legislature, while the Federal Legislature and a Provincial Assembly shall have power to legislate with regard to matters referred to in the Concurrent Legislative List. Any matter not referred to in either list may be subject to laws made by a Provincial Assembly alone, and not by the Federal Legislature, although the latter shall have exclusive power to legislate with regard to matters not referred to in either list for those areas in the Federation not included in any Province.

Four provisions seek to ensure the stability of the parliamentary system. First, the Prime Minister shall be elected by the National Assembly and he and the other Ministers shall be responsible to it. Secondly, any resolution calling for the removal of a Prime Minister shall have to name his successor in the same resolution which shall be adopted by not less than two-thirds of the total number of members of the lower house. The requirement of two-thirds majority is to remain in force for 15 years or three electoral terms, whichever is more. Thirdly, the Prime Minister shall have the right to seek dissolution of the legislature at any time even during the pendency of a no-confidence motion. Fourthly, if a no-confidence motion is defeated, such a motion shall not come up before the house for the next six months.

All these provisions for stability shall apply *mutatis mutandis* to the Provincial Assemblies also.

A National Economic Council, to include the Prime Minister and a representative from each province, shall advise the Provincial and Federal Governments.

There shall be a Governor for each Province, appointed by the President, and a Council of Ministers to aid and advise him, with a Chief Minister appointed by the Governor. Each Province has a provincial legislature consisting of the Governor and Provincial Assembly.

The executive authorities of every Province shall be required to ensure that their actions are in compliance with the Federal laws which apply in that Province. The Federation shall be required to consider the interests of each Province in the exercise of its authority in that Province. The Federation shall further be required to afford every Province protection from external aggression and internal disturbance, and to ensure that every Province is governed in accordance with the provisions of the Constitution.

To further safeguard the rights of the smaller provinces, a Council of Common Interests has been created. Comprising the Chief Ministers of the four provinces and four Central Ministers to decide upon specified matters of common interest, the Council is responsible to the Federal Legislature. The constitutional formula gives the net proceeds of excise duty and royalty on gas to the province concerned. The profits on hydroelectric power generated in each province shall go to that province.

OTHER PROVISIONS

Other provisions include the procedure for elections, the setting up of an Advisory Council of Islamic Ideology and an Islamic Research Institute, and the administration of tribal areas.

AMENDMENTS

Amendments to the Constitution shall require a two-thirds majority in the National Assembly and endorsement by a simple majority in the Senate.

In 1975 the Constitution (3rd Amendment) Bill abolished the provision that a State of Emergency may not be extended beyond six months without the approval of the National Assembly and empowered the Government to detain a person for three months instead of one month.

In July 1977, following the imposition of martial law, several provisions, including all fundamental rights provided for in the Constitution, were suspended.

An amendment of September 1978 provided for separate electoral registers to be drawn up for Muslims and non-Muslims.

In October 1979 a martial law order inserted a clause in the Constitution establishing the supremacy of military courts in trying all offences, criminal and otherwise.

On 26 May 1980, the President issued a Constitution Amendment Order, which amended Article 199, debarring High Courts from making any order relating to the validity of effect of any judgment or sentence passed by a military court or tribunal granting an injunction; from making an order or entering any proceedings in respect of matters under the jurisdiction or cognizance of a military court or tribunal, and from initiating proceedings against the Chief Martial Law Administrator or a Martial Law Administrator.

By another amendment of the Constitution, the Federal Shariat Court was to replace the Shariat Benches of the High Courts. The Shariat Court, on the petition of a citizen or the Government, may decide whether any law or provision of law is contrary to the injunction of Islam as laid down in the Holy Koran and the Sunnah of the Holy Prophet.

In March 1981 the Government promulgated Provisional Constitutional Order 1981, whereby provision is made for the appointment of one or more Vice-Presidents, to be appointed by the Chief Martial Law Administrator, and a Federal Council (*Majlis-i-Shura*) consisting of persons nominated by the President. All political parties not registered with the Election Commission on 13 September 1979 were to be dissolved and their properties made forfeit to the Federal Council. Any party working against the ideology, sovereignty or security of Pakistan may be dissolved by the President.

The proclamation of July 1977, imposing martial law, and subsequent orders amending the Constitution and further martial law regulations shall not be questioned by any court on any grounds.

All Chief Justices and Judges shall take a new oath of office. New High Court benches for the interior of the provinces shall be set up and retired judges are debarred from holding office in Pakistan for two years. The powers of the High Courts shall be limited for suspending the operation of an order for the detention of any person under any law provided for preventative detention, or release any person on bail, arrested under the same law.

The Advisory Council of Islamic Ideology, which was asked by the Government to suggest procedures for the election and further Islamization of the constitution, recommended non-party elections, separate electorates, Islamic qualifications for candidates and a federal structure with greater devolution of power by changing the present divisions into provinces.

Under the Wafaqi Mohtasib Order 1982, the President appointed a Wafaqi Mohtasib (Federal Ombudsman) to redress injustice committed by any government agency.

In March 1985 the President, Gen. Zia ul-Haq, promulgated the Revival of the 1973 Constitution Order, which increased the power of the President by amendments such as those establishing a National Security Council, powers to dismiss the Prime Minister, the Cabinet and provincial Chief Ministers, and to call elections, and indemnity clauses to ensure the power of the President. The constitution was then revived with the exception of 28 key provisions relating to treason, subversion, fundamental rights and jurisdiction of the Supreme Court.

The Government

HEAD OF STATE

President: Gen. MOHAMMAD ZIA UL-HAQ (assumed office 16 September 1978, confirmed in office by referendum in December 1984, for a five-year term commencing 23 March 1983).

Federal Legislature

MAJLIS-I-SHURA

The Majlis-i-Shura was established in 1982 as a consultative committee, acting in an advisory capacity to evolve a democratic system in accordance with the requirements of Islam, to advise the Government on possible legislation, to discuss Five-Year plans and budgets, etc. Following the general and provincial elections of February 1985, the Majlis-i-Shura was to comprise the National Assembly (the lower house) and the Senate (the upper house).

National Assembly

The 237-member National Assembly is elected for five years. It comprises 207 directly-elected Muslim members, 20 women members elected by the Assembly, and an additional 10 seats are reserved for minorities.

Speaker: SYED FAKHER IMAM.

Senate

The Senate comprises 87 members, who are elected by the four provincial legislatures. Its term of office is six years, with one-third of the members relinquishing their seats every two years.

Chairman: GHULAM ISHAQ KHAN.

Provinces

Pakistan comprises the four provinces of Sind, Baluchistan, Punjab and the North-West Frontier Province, plus the Federal capital and 'tribal areas' under federal administration.

Governors:

Sind: Lt-Gen. JAHAN DAD KHAN.

Baluchistan: Lt-Gen. K. K. AFRIDI.

Punjab: Lt-Gen. GHULAM GILANI KHAN.

North-West Frontier Province: Lt-Gen. FAZLE HAQ.

Political Organizations

Political activities were suspended from July 1977, following the imposition of martial law, although some political activity was subsequently allowed. In October 1979, following the postponement of the general elections scheduled for November, all political activity was banned. The elections of February 1985 were held on a non-party basis.

Since its foundation in 1981, the **Movement for the Restoration of Democracy (MRD),** an alliance of opposition parties which calls for a return to democracy, the restoration of civil rights and the revival of the 1973 constitution in full, has become increasingly active, and comprised 11 parties in early 1985; Convener MALIK MOHAMMAD QASIM.

Jamaat-i-Islami: Mansoorah, Multan Rd, Lahore; f. 1941; aims at the establishment of an Islamic state; right-wing; Pres. MIAN TUFAIL MUHAMMED; Sec.-Gen. QAZI HUSSAIN AHMAD.

Jamiatul-Ulema-e-Pakistan (JUP): f. 1968; advocates progressive (Sunni) Islamic principles; Pres. MAULANA SHAH AHMAD NOORANI; Sec.-Gen. MAULANA ABDUS SATTAR NIAZI.

Labourers' and Farmers' Party: rurally based; mem. MRD; Leader FATHEYAB ALI KHAN.

National Democratic Party (NDP): f. 1975 following ban on National Awami Party; demands civil liberties; mem. MRD; Pres. SHERBAZ KHAN MAZARI; Leader ABDUL WALI KHAN; Sec.-Gen. ZAHORUL HEQUE.

Pakistan Musawat Party: f. 1978; advocates popular rule; Chair. MOHAMMAD HANIF RAMAY.

Pakistan National Alliance (PNA): f. 1977 as an alliance of nine political parties; Tehrik-i-Istiqlal broke away in 1977, as did the Jamiatul-Ulema-e-Pakistan and the National Democratic Party in 1978; the Jamaat-i-Islami was expelled in 1979; Pres. MAULANA MUFTI MAHMUD; Gen.-Sec. Prof. GHAFOOR MUFTI AHMAD; the Alliance now comprises the following groups:

All Pakistan Jammu and Kashmir Conference: f. 1948; advocates free plebiscite in the whole of Kashmir; Pres. SARDAR SIKANDAR HAYAT KHAN.

Jamiatul-Ulema-e-Islam (JUI): advocates constitution in accordance with Sunni Islamic teaching; fmr mem. MRD; Pres. MAULANA FAZLUR RAHMAN.

Pakistan Democratic Party (PDP): f. 1969; aims to uphold democratic and Islamic values; mem. MRD; Leader NAWABZADA NASRULLAH KHAN; Sec.-Gen. Sheikh NASIM HASAN.

Pakistan Khaksar Party: f. during British rule, dissolved 1947, later revived; upholds Islamic values and emphasizes military training for all persons; Pres. MOHAMMAD ASHRAF KHAN.

Pakistan Muslim League: Muslim League House, 33 Davis Rd, Lahore; split into two groups in 1979:

Pagaro Group: Pres. MIR MARDAN SHAH, the Pir SAHIB Pagaro.

Chatta Group: mem. MRD; Pres. KAWAJA KHAIRUDDIN.

Pakistan National Party (PNP): Karachi; f. 1979 from breakaway group of the NDP; advocates higher degree of decentralization; mem. MRD; Chair. MIR GHAUS BAKHSH BIZENJO; Sec.-Gen. SYED QASWAR GARDEZI.

Pakistan People's Party (PPP): f. 1967; advocates Islamic socialism, democracy and an independent foreign policy; mem. MRD; Chair. Begum NUSRAT BHUTTO; Leader GULAM MUSTAFA JATOI (acting); Secs-Gen. Dr GHILAM HUSAIN; Gen. (retd.) TIKKA KHAN (acting).

Progressive People's Party: f. 1978 after breaking away from the PPP; Chair. MAULANA KAUSAR NIAZI.

Qaumi Mahaz Azadi (National Liberation Front): left-wing; mem. MRD; Sec.-Gen. IQBAL HAIDER.

Tehrik-i-Istiqlal (TIP) (Solidarity Party): f. 1968; upholds democratic and Islamic values; mem. MRD; Pres. Air Marshal (retd.) ASGHAR KHAN; Sec.-Gen. MUSHEER AHMAD PESH IMAM.

Other parties that joined the MRD in February 1981 were the **Kashmir Muslim Conference** and the **Pakistan Republican Party.**

Religion

ISLAM

Islam is the state religion. The majority of the population are Sunni Muslims, while about 10% are of the Shi'a sect and 4% are of the Ahmadi sect.

CHRISTIANITY

There is a small minority of Christians, including c. 424,000 Roman Catholics in 1978.

HINDUISM

Hindus make up 1.6% of the population.

BAHÁ'Í FAITH

National Spiritual Assembly: POB 7420, Karachi 3; tel. (21) 716429.

The Press

In 1980 there were 115 daily newspapers and 327 weeklies and bi-weeklies. The first Urdu-language newspaper, the daily *Urdu Akhbar*, was founded in 1836. After 1947, with the establishment of Pakistan and the introduction of modern equipment, the more influential English-language newspapers, such as *Dawn* and *The Pakistan Times*, were firmly established, while several new Urdu newspapers, for example *Nawa-i-Waqt* and *Daily Jang*, became very popular. The Urdu press comprises 797 newspapers, with *Daily Jang*, *Musawat* (under suspension), *Imroze*, *Nawa-i-Waqt*, *Jasarat* and *Mashriq* being the most influential. The largest daily is *Daily Jang*. Although the English-language press reaches only 2% of the population and totals 128 publications, it is influential in political, academic and professional circles.

The press has always been subject to government scrutiny and 'guided reporting', especially in political matters. After the July 1977 coup the martial law administration closed down two daily papers. In October 1979 press censorship was imposed and publication of *Musawat*, *Sadaqat* and other opposition papers was suspended. In December 1981 censorship was lifted from literary and educational books and magazines, and in January 1982 pre-censorship on daily newspapers was also lifted. Pre-censorship continued, however, on political, semi-political and non-literary weeklies, monthlies and periodicals.

PRINCIPAL DAILIES

Rawalpindi

Related Territories

The status of Jammu and Kashmir has remained unresolved since the 1949 cease-fire, whereby the area was divided into sectors administered by India and Pakistan separately. Pakistan administers Azad (Free) Kashmir and the Northern Areas as *de facto* dependencies, being responsible for foreign affairs, defence, coinage, currency and the implementation of UN resolutions concerning Kashmir.

AZAD KASHMIR

Area: 11,639 sq km (4,494 sq miles).

Population: 1,980,000 (1981 census).

Administration: Government is based on the Azad Jammu and Kashmir Interim Constitution Act of 1974. There are four administrative districts: Kotli, Mirpur, Muzaffarabad and Poonch.

Legislative Assembly: consists of 42 members: 40 directly elected and two women nominated by the other members.

Azad Jammu and Kashmir Council: consists of the President of Pakistan as Chairman, the President of Azad Kashmir as Vice-Chairman, five members nominated by the President of Pakistan, six members by the Legislative Assembly, and the Pakistan Minister of Kashmir Affairs and Northern Affairs (ex officio): Maj.-Gen. (retd) Abdur Rahman Khan.

NORTHERN AREAS

Area: 72,520 sq km (28,000 sq miles).

Population: 562,000 (1981 census).

Administration: There are three administrative districts: Baltistan, Diamir and Gilgit. The Northern Areas Council consists of 16 elected members, headed by a Commissioner who is appointed by the Pakistan Government.

PANAMA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of Panama is a narrow country situated at the southern end of the isthmus separating North and South America. It is bounded to the west by Costa Rica and to the east by Colombia in South America. The Caribbean Sea is to the north, and the Pacific Ocean to the south. Panama has a tropical maritime climate (warm, humid days and cool nights). There is little seasonal variation in temperatures, which average 23°C–27°C (73°F–81°F) in coastal areas. The rainy season is from April until December. Spanish is the official language. Almost all of the inhabitants profess Christianity, and the great majority are Roman Catholics. The national flag (proportions 3 by 2) is composed of four equal rectangles: on the top row the quarter at the hoist is white, with a five-pointed blue star in the centre, while the quarter in the fly is red; on the bottom row the quarter at the hoist is blue, and the quarter in the fly is white, with a five-pointed red star in the centre. The capital is Panamá (Panama City).

Recent History

Panama was under Spanish rule from the 16th century until 1821, when it became independent as part of Gran Colombia. Panama remained part of Colombia until 1903, when it declared its separate independence with the support of the USA. In that year the USA bought the rights to build the Panama Canal, which was opened in 1914. The early years of independence were characterized by frequent changes of government. President José Antonio Remón was assassinated in 1955 and was succeeded as President by Ernesto de la Guardia, elected in 1956. His successor was Roberto Chiari (1960–64), followed by Marco Aurelio Robles (1964–68). In May 1968, following a bitterly fought campaign, the presidential election was won by Dr Arnulfo Arias Madrid, the candidate of the Unión Nacional (including his own Partido Panameñista). Dr Arias Madrid had been President for two previous terms, in 1940–41 and 1949–51, but both had ended in his forcible removal from power. He took office for a third term in October 1968 but, after only 11 days, he was deposed by the National Guard, led by Col (later Brig.-Gen.) Omar Torrijos Herrera, who accused President Arias of planning to establish a dictatorship. The National Assembly was dissolved, and political activity suspended. Political parties were banned in February 1969. Elections were held in August 1972 for a National Assembly of Community Representatives. In October the Assembly conferred extraordinary powers on Gen. Torrijos as Chief of Government for six years. Considerable agrarian reform was undertaken during Gen. Torrijos's administration.

The terms of the treaty by which the Panama Canal Zone was ceded to the USA in 1903 have bedevilled relations between the two countries ever since. In 1974 agreement was reached on principles for a new treaty by which the USA would surrender its jurisdiction over the Canal Zone, but negotiations continued for a further three years. Discontent arising from the Government's handling of the negotiations, combined with deteriorating living standards, culminated in student riots in 1976. Intensified negotiations in 1977 resulted in two new Canal treaties, which were approved by 66% of voters in a referendum. The US Senate ratified the two treaties, and in October 1979 they finally came into effect. Panama assumed control of the former Canal Zone, which was abolished. The Canal was placed under a joint body, the Panama Canal Commission, on which the USA will retain majority representation until 1989. US military forces, who numbered about 10,000 in 1982 and who were involved in training officers from the armed forces of many Latin American countries, will remain in Panama until the year 2000, and the USA will be entitled to defend the Canal's neutrality thereafter.

In August 1978 elections for a new National Assembly took place. In October the new representatives elected Dr Arístides Royo to be President for a six-year term. General Torrijos resigned as Chief of Government but retained the post of Commander of the National Guard, and effectively maintained his hold on power until his death in an air crash in July 1981. President Royo failed to gain the support of the National Guard, and in July 1982 he was forced to resign by Col Rubén Darío Paredes, who had ousted Col Florencio Flores as Commander-in-Chief in March. The Vice-President, Ricardo de la Espriella, was installed as President, and, under the direction of Col Paredes, strengthened the position of business interests and pursued a more pro-Western policy.

In April 1983 a series of amendments to the Constitution were approved by referendum. However, in spite of new constitutional moves to limit the power of the National Guard, *de facto* power remained with the armed forces, whose position was strengthened by a decision in September to unite all security forces within one organization. In June, anticipating a shift in the balance of power towards the presidency, Col Paredes announced his resignation from the National Guard. In August he confirmed that he would stand as presidential candidate for the Partido Revolucionario Democrática (PRD) in the elections scheduled for 1984. In September, however, Col Paredes withdrew his candidature after he lost support among the National Guard. He had declared his opposition to the regimes in Cuba and Nicaragua, and had attempted to influence the Cabinet reshuffle of President de la Espriella. As a consequence of these actions, Col Paredes earned the disapproval of his successor, Brig. (later Gen.) Manuel Antonio Noriega Morena.

In mid-September an attempted coup against the President and Brig. Noriega was believed to have occurred, but this was officially denied. In November the Vice-President, Dr Jorge Illueca, was criticized for making an unauthorized speech to the UN General Assembly (of which he was President) in which he had denied Panama's participation in the proposed revival of the Central American Defence Council, a regional military alliance, to oppose Nicaragua. In February 1984, however, Dr Illueca was appointed President after the sudden resignation of President de la Espriella, who was believed to have been ousted from power by the National Guard because he had opposed the armed forces' manipulation of the elections. President Illueca acted swiftly to confirm that presidential and legislative elections would be held on 6 May 1984.

The principal candidates in the presidential contest were Dr Nicolás Ardito Barletta, the candidate of the PRD (who had been Minister of Planning in 1973–78 and was supported by the National Guard), and Dr Arnulfo Arias Madrid, the veteran politician whose three terms as President had all ended in coups (the latest in October 1968). Dr Arias Madrid was the candidate of the Partido Panameñista Auténtica (PPA), and was a long-standing opponent of the National Guard. During the election campaign, it was rumoured that the National Guard was preparing to use electoral malpractice in order to secure a victory for Dr Ardito Barletta. The rumours were denied by Gen. Noriega, who affirmed that the President-elect would receive the full backing of the National Guard. Although the elections passed without incident, the subsequent 10-day delay before the publication of the results was marked by violent clashes between rival groups of supporters, in which one person was killed. In addition, the rumours of electoral malpractice appeared to be substantiated by the confusion which surrounded the counting of the votes. Both of the leading contenders claimed victory, and some 2,124 allegations of electoral fraud were made to the Supreme Electoral Tribunal. In spite of independent observers' evidence indicating extensive electoral fraud, Dr Ardito Barletta was eventually declared President-elect, defeating Dr Arias Madrid by a narrow margin of 1,713 votes. Dr Arias Madrid led several demonstrations in

protest at the results, and trade union organizations threatened to take strike action. During the swearing-in ceremony of President Ardito Barletta in October, members of the National Guard clashed with supporters of the PPA, but divisions within the opposition grouping reduced the likelihood of further protests. Nevertheless, the controversy over the election results persisted throughout 1984, reinforcing the signs of internal instability that had emerged following the elections, and resulting in the polarization of public opinion.

The new Government took office in October 1984, committed to arresting Panama's worsening economic decline. In November a series of austerity measures, introduced by the Government, provoked criticism and protests from many quarters, including the business sector. The strength of public opposition to the Government's policies prompted the Legislative Assembly to repeal a controversial section of the measures. By February 1985 President Ardito Barletta faced mounting public hostility to his policies, while leaders of the National Guard sought to distance themselves from the ruling party.

Under both Gen. Torrijos and President Royo, Panama enjoyed good relations with Cuba, the Sandinistas in Nicaragua and the opposition front in El Salvador. Colonel Paredes forged closer links with the USA and abandoned the traditional radical anti-US rhetoric. In 1982 Panama was the centre of several attempts to resolve regional conflicts. In January 1983, after a meeting on the Panamanian island of Contadora, the Foreign Ministers of Panama, Colombia, Mexico and Venezuela called for multilateral negotiations to settle local disputes. Panama has demonstrated a firm commitment to the Contadora Group's peace initiatives in Central America, and several conferences between the group and other Latin American Governments were held in Panama during 1983. Following the election of President Ardito Barletta in 1984, the Panamanian Government announced plans to hold joint military exercises with the USA in 1985. This decision provoked considerable criticism, as it was perceived to be potentially prejudicial to Panama's role in the Contadora Group. Earlier in 1984, relations between Panama and the USA had appeared strained, following the disclosure in July that the US Army School of the Americas, an inter-American military college at Fort Gulick in the former Canal Zone, was to be closed in September 1984. The decision formed part of a wider dispute between the USA and Panama over the Panama Canal treaties. President Ardito Barletta confirmed his Government's intention to seek modifications to the treaties.

Government

Legislative power is vested in the unicameral Legislative Assembly (which replaced the National Assembly of Community Representatives in 1984), with 67 members elected for five years by universal adult suffrage. Executive power is held by the President, also directly elected for a term of five years, assisted by two elected Vice-Presidents and an appointed Cabinet. Panama is divided into nine provinces and three autonomous Indian Reservations. Each province has a governor, appointed by the President.

Defence

In October 1983 the Legislative Council approved proposals to convert the 9,500-strong National Guard into a National Defence Force, with three branches. In January 1984 the budget allocation for defence was $88m.

Economic Affairs

Receipts from the Panama Canal and international capital inflows help to offset Panama's traditional trade deficit, which reached $775m. in 1981, falling to $689m. in 1982, and to $681m. in 1983. Services provided 72.7% of the country's gross domestic product (GDP) in 1983, with the Panama Canal Commission contributing 7.1%. Revenues from the Canal reached a record level of $326m. in 1982. Tolls were increased by 9.8% in March 1983 to offset expected losses of $55m.–$60m. after the opening of the 130-km trans-Panamanian oil pipeline (capacity 830,000 b/d) in October 1982. Panama has developed its potential as an international finance centre, based on the full transferability of its currency (the balboa), the country's favourable tax laws and the absence of state controls. In 1984 134 international banks were domiciled in Panama. In 1983 such banks employed 8,500 people and contributed about 9% of GDP. The off-shore business, foreign exchange, money and reinsurance markets have expanded, and the sector as a whole grew by 22% in 1981. The Colón Free Zone, with an area of 49 ha (121 acres), has become an internationally important trading location, with a turnover of $749.6m. in 1983. Another 200 ha (500 acres) are to be incorporated. In 1981 two-thirds of the zone's exports were going to Latin American countries, whose economic difficulties were preventing them from making payments in US dollars. Stocks in the zone were being run down, and some companies were experiencing cash-flow problems. The volume traded fell by 25% in 1982, and continued to decline in the first half of 1983, falling by 29% from the level of turnover in January–June 1982.

Agriculture, forestry and fishing together employed 28.3% of the working population, but provided only 9.1% of GDP, in 1983. The principal cash crops are bananas, sugar cane and coffee, while the major food crops are rice, maize and beans. The agricultural sector grew by 1% in 1980 but declined by 1.2% in 1981, partly owing to low prices. Output increased by 4.4% in 1982 but a period of drought, from November 1982 to June 1983, undermined domestic production in 1983. In 1984 exports of sugar declined by 29.2%, following a fall in production. Government price controls on rice, meat, potatoes and eggs have discouraged private investment in foodstuffs. Panama's harvest of bananas is about 1m. metric tons per year, but the industry has entered a critical phase, with falling prices and the prospect of redundancy for 3,000 workers. In 1983 the IDB granted a loan of $7m. for agricultural projects. An additional 25,000 ha of land was to be brought into cultivation, representing an increase of 42% in cultivated land. Fishing, especially for shrimps, is growing in importance, and Panama claims to be the world's third largest exporter of shrimps. Prospects for fish production were improved with the completion of a new port and fishing terminal at Vacamonte in 1979. There are extensive timber resources, notably mahogany.

Manufacturing activities, accounting for 8.7% of GDP in 1983, include a petroleum refinery, breweries, producers of cement and other construction material, sugar mills, paper and food processing. Growth in the manufacturing sector was 5.6% in 1982, but it was hindered by the depressed internal market. Construction experienced dramatic growth, of 17%, in 1982, principally as a result of the transisthmian pipeline and hydroelectric schemes. The Canal Zone treaties released 1,000 sq km for free trade use in 1979. Between 1979 and 1982, public and private investment for the development of the free trade zone totalled $75m. A government scheme known as 'Maquila' aims to promote labour-intensive light assembly operations and broaden the base of the zone. Panama has a petroleum refining capacity of 100,000 b/d, and in 1981 received a $6.5m. loan from the World Bank to finance further oil exploration surveys in the Gulf of Panama. The project to exploit the Cerro Colorado copper deposits, which have potential reserves of 1,300m. metric tons, was postponed indefinitely in 1982. In order to reduce Panama's dependence on petroleum, the Government is encouraging the development of hydroelectric projects. With the opening of the La Estrella and Los Valles plants in 1980, hydroelectric power supplied 70% of Panama's energy needs. This proportion was expected to increase to over 90%, following the opening of the 300 MW La Fortuna scheme in April 1984. In 1983 the World Bank, the IDB and various national suppliers agreed to provide financing of $773m. to construct a hydroelectric dam at Changuinola, to be operational in 1989.

Panama is regarded as a prosperous and stable country in a troubled region. It has a more diversified economy and a higher standard of living than many of its neighbours. In recent years, however, the economy has suffered from low world prices for Panama's commodity exports, the declining prosperity of the Colón Free Zone, the highly depressed state of the Latin American market and the conflicts in the region. GDP growth fell from 7% in 1979 to 4.2% in 1981 but rose to 5.5% in 1982. In 1983 GDP growth declined to 0.4%. No growth was expected in 1984. The current balance of payments showed a surplus of $56m. in 1981, a deficit of $150m. in 1982, and a surplus of $194m. in 1983. A shortfall in tax revenue, combined with the burden of interest payments, forced a 12% reduction in capital expenditure in 1982. The public sector deficit was reduced from 19% of GDP in 1976 to 6% in 1984. A further reduction, to 4.3%, was anticipated for 1985. The Government undertook a

programme of denationalization in 1983, which caused the level of unemployment to rise, and in 1984 it was estimated to be 40% of the labour force. Real wages declined in 1981 and 1982. Inflation fell from 4.6% in 1982 to 1.5% in 1983.

In May 1983 Panama began negotiations to raise new credit lines and to reschedule payments on its external debt. In June the IMF allocated SDR 150m., to be drawn over a period of 18 months. Panama received a loan of $65m. from the World Bank, and in September reached agreement with 142 commercial-bank creditors on a refinancing package and a further loan of $278m. In 1984 the US Government allocated a loan of $54m. to Panama, to cover its budget deficit.

In November 1984 the new Government's attempts to revive the economy had an inauspicious start. A series of austerity measures that were proposed by the Government (including a two-year 'freeze' on salaries for employees in the public sector, the introduction of a 7% tax on all services, and reductions of $20m. in government expenditure) met with widespread opposition. The proposed tax on services was withdrawn after protests from the private sector. The failure of the austerity package resulted in the postponement of negotiations with the IMF on a two-year stand-by agreement in January 1985. In March the foreign debt stood at $3,700m., one of the highest debts per head of population in the world. The Government expected to reschedule $717m. of the $995m. in loan repayments which fall due in 1985–86.

Transport and Communications

There is a government-owned railway, and the transisthmus railway, serving the former Canal Zone, became part of the system in 1979. In 1984 there were about 8,612 km of roads. The Pan-American Highway runs from the Costa Rican frontier, through Panama City, to Chepo, and will eventually reach the Colombian border. The Atlantic and Pacific coasts are linked by the 82-km Panama Canal, a major international sea route, which can take ships with beams of up to approximately 32.3 m (106 ft) and lengths of up to about 290 m (950 ft), roughly equivalent to ships with a maximum capacity of 65,000–70,000 dwt. Improvements to the Canal are expected to increase the transit capacity to 42 vessels per day, and it should be able to meet expected traffic demand beyond the year 2000. Nevertheless, the USA, Panama and Japan are holding talks on the possibility of undertaking a complete study of alternatives to the present waterway. Panama's merchant fleet is the fourth largest in the world, with a total displacement of 42.2m. gross tons in 1983. Most of the vessels are foreign-owned but registered in Panama. There are plans to construct two new ports at a cost of 75.5m. balboas. Panama is well served by international airlines.

Social Welfare

The social security system provides health and retirement benefits. Both employers and employees contribute to the scheme, which is government-operated. In 1981 Panama had 592 medical centres, 6,698 hospital beds and 1,791 physicians, excluding the 761 hospital beds and 184 physicians in the private sector. In 1975 a new social security bill was published, proposing an increase in social security taxes to finance higher retirement pensions and improved medical treatment. In 1981 the national social security system covered 1,035,774 people.

Education

The education system is divided into elementary, secondary and university schooling, each of six years' duration. Education is free up to university level, and is officially compulsory between six and 15 years of age. Primary education begins at the age of six, and secondary education at the age of 12. In 1982 the enrolment at primary schools of children in the relevant age-group was 92%, while secondary enrolment was 49% (boys 45%; girls 53%). There are three universities, with regional centres in the provinces. About 15% of the national budget is allocated to education. Adult illiteracy in 1980 was 12.9%, one of the lowest rates in Central America.

Tourism

Panama's attractions include Panama City, the ruins of Portobelo and 800 sandy tropical islands, including the resort of Contadora, one of the Pearl Islands in the Gulf of Panama, and the San Blas Islands, lying off the Atlantic coast. The number of foreign visitors to Panama declined from 370,369 in 1982 to 334,751 in 1983, partly as a result of regional instability.

Public Holidays

1985: 1 May (Labour Day), 15 August (Assumption; Panama City only)*, 11 October (Revolution Day), 1 November (National Anthem Day)*, 2 November (All Souls' Day)*, 3 November (Independence from Colombia), 4 November (Flag Day)*, 5 November (Independence Day; Colón only), 10 November (First Call of Independence), 28 November (Independence from Spain), 8 December (Immaculate Conception, Mothers' Day), 25 December (Christmas).

1986: 1 January (New Year's Day), 9 January (National Martyrs' Day), 11 February (Shrove Tuesday), 28 March (Good Friday).

* Official holiday: banks and government offices closed.

Weights and Measures

Both the metric and the imperial systems of weights and measures are in use. In 1972 the Government announced the gradual extension of the metric system to replace all other systems by 1982.

Currency and Exchange Rates

100 centésimos = 1 balboa (B).

Exchange rates (31 December 1984):
£1 sterling = 1.159 balboas;
US $1 = 1.000 balboa.

Directory

The Constitution

Under the terms of the amendments to the Constitution that were approved by a referendum in April 1983, the 67 members of the unicameral Legislative Assembly (replacing the National Assembly of Community Representatives) are elected by popular vote every five years. Executive power is exercised by the President of the Republic, who is also elected by popular vote for a term of five years. Two Vice-Presidents are elected by popular vote to assist the President. The President appoints the Cabinet. The armed forces are barred from participating in elections.

The Government

President: Dr Nicolás Ardito Barletta (took office 11 October 1984).
First Vice-President: Lic. Eric Arturo del Valle.
Second Vice-President: Dr Roderick L. Esquivel.
Commander-in-Chief of the National Guard: Gen. Manuel Antonio Noriega Morena.

CABINET
(March 1985)

Minister of the Interior and Justice: Lic. Carlos de Sedas.
Minister of Foreign Affairs: Lic. Fernando Cardoze Fábrega.
Minister of Public Works: Ing. Roberto López Fábrega.
Minister of Finance and the Treasury: Dr Menalco Solís.
Minister of Agricultural Development: Ing. Ariel Barnett.
Minister of Commerce and Industry: Lic. José Bernardo Cárdenas.
Minister of Public Health: Dr Carlos Brandaris.
Minister of Labour and Social Welfare: Lic. Luis Anderson.
Minister of Education: Lic. Manuel Solís Palma.
Minister of Housing: Arq. David Samudio.
Minister of Planning and Economic Policy: Dr Ricaurte Vásquez.
Minister of the Presidency: Lic. José Agustín Espino.
Controller-General: Ing. Francisco A. Rodríguez.

MINISTRIES

All Ministries are in Panama City.

President and Legislature

PRESIDENT

Election, 6 May 1984

Candidate	Votes
Nicolás Ardito Barletta (PRD)	300,748

Gen. (retd) Rubén Darío Paredes (PNP)	15,976

Other candidates were José Renán Esquivel (Frente Popular Unido—Frenu), Carlos Iván Zúñiga (Papo), Carlos del Cid (PPP) and Ricardo Barria (PST).

ASAMBLEA LEGISLATIVA

General Election, 6 May 1984

Party	Seats
Unión Nacional Democrática (Unade)*	40
Alianza Democrática Opositora (ADO)†	27
Total	67

* A centre-right coalition comprising the Frente Amplio Popular, the Partido Laborista, the Partido Liberal Nacional, the Partido Panameñista, the Partido Republicano and the Partido Revolucionario Democrático.
† A coalition comprising the Movimiento Liberal Republicano Nacionalista, the Partido Demócrata Cristiano and the Partido Panameñista Auténtico.

Political Organizations

In the elections to the National Assembly of Community Representatives in August 1972 and August 1978, no candidate was allowed to represent a political party. However, as of October 1978 the Government allowed political parties to function. The elections of May 1984 were contested by several political parties.

Movimiento Liberal Republicano Nacionalista (MOLIRENA): Panama City; officially registered in 1981; conservative grouping; 50,779 mems; Leader César Arrocha Graell.

Partido Demócrata Cristiano (PDC): Apdo 6322, Panamá 5; f. 1960; 35,785 mems; received 20.6% of the votes in the 1980 legislative elections; Pres. Ricardo Arias Calderón; Sec.-Gen. Arq. Raúl E. Figueroa.

Partido Laborista (PALA): Panama City; f. 1982; right-wing; Dir Carlos Eleta Almarán.

Partido Liberal Nacional (PLN): Apdo 8420, Panamá 7; 46,882 mems; Leader ARNULFO ESCALONA RÍOS.

Partido Panameñista Auténtico (PPA): Panama City; f. 1938; nationalist, anti-communist party; 70,000 mems; Leader Dr ARNULFO ARIAS MADRID.

Partido Republicano (PR): Panama City; right-wing; 40,000 mems.

Partido Revolucionario Democrático (PRD): Apdo 2650, Panamá 9A; f. 1979; supports policies of the late Gen. Omar Torrijos Herrera; combination of Marxists, Christian Democrats and some businessmen; 206,000 mems; Pres. BERTA TORRIJOS DE AROSEMENA; Vice-Pres. Dr JORGE MEDRANO.

The following parties were declared non-existent in November 1984:

Frente Amplio Popular (FRAMPO): Panama City; f. 1979; supported the late Gen. Omar Torrijos Herrera; 36,295 mems; Leader RENATO PEREIRA.

Partido Acción Popular (Papo): Panama City; grouping of social democrats and centrists; 33,485 mems; Leader CARLOS IVÁN ZÚÑIGA.

Partido Nacionalista Popular (PNP): Panama City; f. 1983; 31,035 mems; Leader OLIMPO SÁEZ.

Partido Panameñista (PP): Panama City; splinter group from PPA; Leaders LUIS SUÁREZ, ALONSO PINZÓN.

Partido del Pueblo de Panamá (PPP): Panama City; f. 1943; Moscow-line communist party; supports the PRD; 36,000 mems; Gen. Sec. RUBÉN DARÍO SOUSA.

Partido Revolucionario de los Trabajadores (PRT): Panama City; left-wing; 30,000 mems.

Partido Socialista de los Trabajadores (PST): Trotskyist; mem. of Freno (see below); 30,000 mems.

The following parties have not obtained legal status:

Frente Nacional Opositora (Freno): f. 1979; opposition front composed of the following parties:

Movimiento Independiente Democrático (MID).

Partido Demócrata Socialista (PDS): left-of-centre party.

Partido Laborista Agrario (PLA): Panama City; f. 1940; populist, conservative party.

Partido Socialdemocrático Panameño: Leader WINSTON ROBLES.

Movimiento Revolucionario No Alineado: Panama City.

Partido Acción Nacional (PAN): Panama City.

Partido Federalista Nacionalista Popular (PFNP): Panama City.

Partido Independiente de la Clase Obrera (PICO): Panama City; workers' party.

Judicial System

The judiciary in Panama comprises the following courts and judges: Corte Suprema de Justicia (Supreme Court of Justice), with nine judges appointed for a ten-year term; Tribunales Superiores de Distrito Judicial (High Courts); 27 Jueces de Circuito (Circuit Judges) and 74 Jueces Municipales (Municipal Judges).

Panama is divided into three judicial districts. In the first functions the first High Court which deals with civil cases in the provinces of Panamá, Colón and Darién and the second, which deals with criminal cases in the same provinces. The third and fourth High Courts, in the second judicial district, both deal with civil and criminal cases. The third court is based in Penonomé and has jurisdiction over the provinces of Veraguas and Coclé, while

the fourth is based in Las Tablas. The fifth High Court is in the third judicial district and is based in David City.

President of the Supreme Court of Justice: Lic. Gonzalo Rodríguez Márquez.

Religion

In the constitution it is stated that there is freedom of worship and it is also recognized that the Roman Catholic Church is the religion of the majority of the population.

Minorities include the Protestant, Anglican and Jewish faiths.

Trade and Industry

Colón Free Zone (CFZ): Avda Roosevelt, Apdo 1118, Colón; f. 1948 to manufacture, import, handle and re-export all types of merchandise; some 300 companies were established by 1976. Well-known international banks, including the Bank of London and South America, operate in the CFZ where there are also customs, postal and telegraph services. The total CFZ turnover in 1983 was $749.6m. The main exporters to the CFZ are Japan, the USA, Hong Kong, Taiwan, Sweden and Brazil. The main importers from the CFZ are Brazil, Venezuela, Ecuador, Netherlands Antilles and Colombia. In view of the rapid expansion in turnover of the Zone in recent years the total area, 49 ha, is to be extended to 56

ha. After completion of this enlargement, the movement of goods is expected to increase by approximately 51.4% a year; Gen. Man. Lic. JORGE ESTENOZ.

CHAMBER OF COMMERCE

Cámara de Comercio, Industrias y Agricultura de Panamá: Avda Cuba 33a-18, Apdo 74, Panamá 1; tel. 25-4615; telex 2434; f. 1915; Pres. J. J. VALLARINO; Dir ADOLFO J. ARROCHA.

INDUSTRIAL ORGANIZATIONS

Cámara Oficial Española de Comercio: Apdo 1857, Panamá 1; Pres. IGNACIO MALLOL; Sec.-Gen. ATILIANO ALONSO.

Cámara Panameña de la Construcción: Apdo 6793, Panamá 5; Pres. ROBERTO ROY.

Codemín: Panama City; state mining organization; Dir JAIME ROQUEBERT.

Consejo Nacional de Inversiones (CNI): Apdo 2350, Panama City; Exec. Dir. Ing. MARIO TYPALDOS.

Corporación Azucarera La Victoria: Apdo 1228, Panamá 1; state sugar corporation; Man. ROBERTO RICHA.

Corporación del Bayano: Apdo 6-3802, Estafeta El Dorado, Panamá 2; f. 1978; state agriculture, forestry and cattle-breeding corporation; Dir ISAAC SÁNCHEZ.

Corporación Financiera Nacional—COFINA: Apdo 6-2191, El Dorado, Panama City; f. 1976 to develop state and private undertakings in productive sectors; Dir Lic. PEDRO SOTOMAYOR.

Dirección General de Industrias: Apdo 9658, Panamá 4; government body which undertakes feasibility studies, analyses and promotion; Dir-Gen. Arq. CARLOTA MARISÍN BIEBERACH; Deputy Dir-Gen. INELA MAPP.

Sindicato de Industriales de Panamá: Avda Ricardo J. Alfaro, Apdo 6-4798, Estafeta El Dorado, Panama City; tel. 67-4666; telex 2262; f. 1945; Pres. Ing. GEORGE RICHA.

EMPLOYERS' ORGANIZATIONS

Consejo Nacional de la Empresa Privada (CONEP): Apdo 1276, Panamá 1; Dir JOSÉ CARDONA MÁS.

Consejo Nacional para el Desarrollo de la Mediana Empresa: Panama City; f. 1983; advisory and consultative board to the Ministry of Commerce and Industry.

Panamanian Association of Business Executives—APEDE: Apdo 1331, Panamá 1; Exec. Dir DOMINGO DE OBALDÍA.

TRADE UNIONS

In 1981 the Labour Code promulgated in 1977 was amended, establishing the right to strike and increasing compensation for dismissal. Collective bargaining is permitted and employers must pay workers' salaries during the whole period of a legal strike.

Confederación de Trabajadores de la República de Panamá—CTRP (Confederation of Workers of the Republic of Panama): Apdo 8929, Panamá 5; f. 1956; admitted to ICFTU/ORIT; Sec.-Gen. RICARDO MONTERREY CALDERÓN; 62,000 mems from 13 affiliated groups.

Central Istmeña de Trabajadores—CIT (Isthmian Labour Confederation): Vía España 16, Of. 5, Apdo 6308, Panamá 5; f. 1971; Sec.-Gen. JULIO CÉSAR PINZÓN.

A number of unions exist without affiliation to a national centre.

Transport

RAILWAYS

Chiriquí National Railroad: Apdo 12B, David City, Chiriquí; government-owned; operates 126 km of track from Puerto Armuelles to David, via Concepción, with a branch line south to Pedregal; Gen. Man. C. AUGUSTO SINCLAIR.

Chiriquí Land Co: Apdo 6-2637, Estafeta El Dorado, Panama City; tel. 78-8240; telex 3282292; operates two lines which run in Costa Rica: the Northern Line (Almirante, Bocas del Toro) with 243 km and the Southern Line (Puerto Armuelles, Chiriquí) with 133 km; purchased by the government in 1978; Gen. Man. J. ORDMAN.

Panama Railroad: Ferrocarril de Panamá, Apdo 2023, Balboa; government-owned and operated mainly as a tourist attraction and for cargo transport; operates 76 km; Pres. Dr A. ROYO; Man. E. WILLIAMS.

ROADS

In 1984 there were about 8,612 km of roads. The two most important highways are the Pan-American Highway and the Boyd-Roosevelt or Trans-Isthmian, linking Panama City and Colón. The Pan-American Highway to Mexico City runs for 545 km in Panama. There is a highway to San José, Costa Rica. In 1981 a $31.7m. road rehabilitation project was begun, aided by a $19m. loan from the World Bank.

SHIPPING

The Panama Canal opened in 1914 and in 1981 handled 4.7% of all the world's seaborne trade. It is 82 km long and ships take an average of 8 hours to pass through the Canal. Terminal ports are Balboa on the Pacific and Cristóbal on the Caribbean. A major project to enlarge the Gaillard Cut, in order to allow unrestricted two-way traffic, is currently under consideration.

Dirección General Consular y de Naves: Ministerio de Hacienda y Tesoro, Apdo 5245, Panamá 5; tel. 25-9277; telex 368-2597; government-controlled general consular and shipping directorate; Dir-Gen. HUGO TORRIJOS RICHA.

Panama Canal Commission: Balboa Heights, Panama City; tel. 52-3165; telex 3034; in October 1979 the Panama Canal Commission, a US Government agency, was established to perform the mission, previously accomplished by the Panama Canal Company, of managing, operating and maintaining the Panama Canal. The Commission will operate the Canal until 31 December 1999, when the waterway will be turned over to the Government of Panama. The supervisory board of the Commission consists of five US and four Panamanian citizens. Until 31 December 1989, the Administrator will be a US citizen and from 1 January 1990, until 31 December 1999, the Administrator will be a Panamanian citizen; Administrator DENNIS P. MCAULIFFE; Deputy Administrator FERNANDO MANFREDO BERNAL, Jr.

Autoridad Portuaria Nacional: Box 8062, Panamá 7; tel. 69-5444; telex 2765; national port authority; Dir-Gen. Lic. RAÚL BROSTELLA.

There are deep-water ports at Puerto Armuelles, Bocas del Toro, Almirante, Balboa, Vacamonte, Cristóbal and Aguadulce.

The Panamanian merchant marine is the fourth largest in the world and, in 1983, 42.2m. gross tons of ships were registered under the Panamanian flag.
A number of lines make regular calls at Panamanian ports.

CIVIL AVIATION

Tocumen international airport was inaugurated in June 1978; a 137-acre industrial zone is to be located within its perimeter.

Air Panama International, SA: Avda Justo Arosemena y Calle 34, Apdo 8612, Panamá 5; telex 368665; f. 1967; services from Panama City to Colombia, Ecuador, Mexico, Peru, the USA and Venezuela; Pres. Lic. PEDRO ROGNONI; fleet: 3 Boeing 727-100.

Compañía Panameña de Aviación SA (COPA): Avda Justo Arosemena y Calle 39, Apdo 1572, Panamá 1; f. 1944; services from Panama City to Colombia, Costa Rica, El Salvador, Haiti, Guatemala, Jamaica and Nicaragua; Chair. and Pres. Dr MARIANO J. OTEIZA; Gen. Man. ENRIQUE ESCALA; fleet: 1 Lockheed Electra L-188, 1 Boeing 737-100.

Internacional de Aviación, SA (Inair): Vía Brasil y Calle 50, Edif. 49A, Apdo 4509, Panamá 5; telex 2689; f. 1967; passenger and cargo services between Belize, Brazil, Chile, Colombia, Mexico, Peru, USA and Venezuela; Chair. GEORGE F. NOVEY; Gen. Man. GUILLERMO A. LARA; fleet: 2 DC-8-50F, 1 Convair 880, 1 Douglas DC-6B.

Tourism

Instituto Panameño de Turismo (IPAT): Edif. del Citibank, 5°, Vía España y Elvira Méndez, Apdo 4421, Panamá 5; tel. 63-6500; telex 3359; f. 1970; Dir-Gen. ALFREDO ALEMÁN.

Asociación Panameña de Agencias de Viajes y Turismo (APAVIT): Apdo 2533, Panamá 3; tel. 63-6500.

PAPUA NEW GUINEA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Independent State of Papua New Guinea lies east of Indonesia and north of the north-eastern extremity of Australia. It comprises the eastern section of the island of New Guinea (the western section of which is Irian Jaya, part of Indonesia) and about 600 smaller islands, including the Bismarck Archipelago (mainly New Britain, New Ireland and Manus) and the northern part of the Solomon Islands (mainly Bougainville and Buka). The climate is hot and humid throughout the year, with an average maximum temperature of 33°C (91°F) and an average minimum of 22°C (72°F). Rainfall is heavy on the coast but lower inland: the annual average varies from about 1,000 mm (40 in) to 6,350 mm (250 in). There are more than 700 languages but Pidgin and, to a lesser extent, standard English are also spoken. The indigenous population is largely pantheistic but there are sizeable communities of Christians, mainly Anglican, Roman Catholic and Ecumenist congregations. The national flag (proportions 4 by 3) is divided diagonally from the upper hoist to the lower fly: the upper portion displays a golden bird of paradise on a red ground, while the lower portion has five white five-pointed stars, in the form of the Southern Cross constellation, on a black ground. The capital is Port Moresby.

Recent History

Papua New Guinea was formed by the merger of the Territory of Papua, under Australian rule from 1906, with the Trust Territory of New Guinea, a former German possession which Australia administered from 1914, first under a military government, then under a League of Nations mandate, established in 1921, and later under a trusteeship agreement with the United Nations. Parts of both territories were occupied by Japanese forces from 1942 to 1945.

A joint adminstration for the two territories was established by Australia in July 1949. The union was named the Territory of Papua and New Guinea. A Legislative Council was established in November 1951 and was replaced by a House of Assembly, with an elected indigenous majority, in June 1964. The territory was renamed Papua New Guinea in July 1971. It achieved internal self-government in December 1973 and full independence on 16 September 1975, when the House of Assembly became the National Parliament.

Michael Somare, who from 1972 served as Chief Minister in an interim coalition government, became Prime Minister on independence. He remained in office until 1980, despite widespread allegations of inefficiency in government ministries and of discrimination against the Highland provinces. The first elections since independence were held in June and July 1977, and Somare's Pangu Pati formed a governing coalition, first with the People's Progress Party and later, following a major Cabinet reshuffle in October 1978, with the United Party.

In March 1980 the Government lost a vote of confidence, the fourth in 15 months, and Sir Julius Chan, the leader of the People's Progress Party and a former Deputy Prime Minister, succeeded to the premiership. Somare became Prime Minister again in August 1982, following a general election in June. In 1983, in spite of a general policy of decentralization, the Somare Government effected a constitutional change to provide the central authorities with greater control of the provincial governments as a means of preventing abuse and misuse of their powers. As a result, Somare was able to suspend the Enga provincial government in February 1984, and two others later in the year, for financial mismanagement. In December 1984 Somare announced a number of changes in his Cabinet.

In 1984 more than 9,000 refugees crossed into Papua New Guinea from the Indonesian province of Irian Jaya, as a consequence of operations by the Indonesian army against Melanesian rebels of the pro-independence Free Papua Movement (OPM). For many years, relations between Papua New Guinea and Indonesia had been strained over the conflict in Irian Jaya, not least because the independence movement drew sympathy from many among the largely Melanesian population of Papua New Guinea. However, a new border treaty, signed in October 1984, was expected to improve security in the region, and attempts were made to repatriate the refugees, based on assurances by the Indonesian Government that there would be no reprisals against those who returned. By February 1985, however, these attempts had met with very little success.

The Papua New Guinea Defence Force sent about 250 troops to Vanuatu in August 1980 after it acceded to independence, to assist with crushing the secessionist rebellion on Espiritu Santo.

Government

Executive power is vested in the British monarch, represented locally by a Governor-General, who is appointed on the recommendation of the Prime Minister and acts on the advice of the National Executive Council (the Cabinet), led by the Prime Minister. Legislative power is vested in a unicameral National Parliament, with 109 members elected by universal adult suffrage for a term of five years. The Cabinet is responsible to Parliament. Local government represents more than 90% of the population through more than 160 councils. As part of its policy of decentralization, the Government had set up provincial governments in each of the 20 provinces by 1978.

Defence

Papua New Guinea's national Defence Force comprises two infantry battalions, one engineer battalion and other support units, a squadron of five patrol boats and two landing craft, and a fleet of four Nomad and six C-47 aircraft. Total strength of the armed forces was 3,232 in July 1984. Defence expenditure for 1983 was an estimated K26.9m.

Economic Affairs

Papua New Guinea's economy is based on its primary industries. More than two-thirds of the working population are engaged in subsistence agriculture, growing mainly roots and tubers, or small cash crop farming. After minerals, the country's principal exports are agricultural products, particularly copra, cocoa and coffee beans, timber and tuna fish.

A comparatively new development is the exploitation of Papua New Guinea's extensive mineral resources, chiefly copper, gold, silver and, more recently, petroleum. The main source of copper and gold is the island of Bougainville, where copper mining began in 1972. The development of a new mine at Ok Tedi, in the Star Mountains on the mainland, was expected to place Papua New Guinea third among the world's gold-producing countries, after South Africa and the USSR. Production of gold at Ok Tedi began in May 1984, and two further stages, involving the mining of gold and copper together and of copper alone, were scheduled to begin in 1987 and 1989 respectively. However, in February 1985 the Papua New Guinea Government, which held 20% of the shares in the project, gave its private partners in the scheme one month's notice of closing the mine, without compensation, claiming that their failure to construct facilities for the extraction of copper indicated an unwillingness to proceed with the second and third stages of the scheme. The private partners argued that the current prices of copper and gold were too low to make the original schedule of development worthwhile, but the Government maintained its commitment to a continuous long-term project, and threatened to take other partners. Negotiations between the two sides were taking place in February.

The potential of other large gold deposits, at nearby Porgera and on Lihir Island (in New Ireland province), were being assessed in 1984, and a site by the Ramu River, to the north-

east of Ok Tedi, is estimated to contain major deposits of chromite, cobalt and nickel. Copper is the country's main export, accounting for 53.9% of earnings in 1983. Plans to assess the viability of extracting petroleum and natural gas, discovered at a site between Nomad in Western province and Tari in the Southern Highlands, were announced in 1984. In these sectors, as in the development of hydroelectricity, foreign investment, particularly by Japan, Australia and the USA, is of paramount importance.

Forestry is a sizeable activity, and exports of sawn timber have increased steadily. Fishing, mainly for prawns, tuna and perch, and secondary manufacturing, of beer, concrete, gases, paint and steel galvanizing, are developing sectors, although, once again, foreign capital is indispensable. In 1983 an expanding sugar industry in the Ramu Valley exported its first shipment of sugar, and provided the raw material for the production of ethyl alcohol (ethanol) as an alternative fuel. Another new venture in its initial stages in 1984 was a silk industry: silk will be processed for use by cottage weavers and for export through the new National Sericulture Station. The output of the manufacturing sector declined by about 5% in 1982.

Japan is the second overall trading partner (after Australia) but takes the largest share (34.3% in 1983) of Papua New Guinea's exports. It is the major customer for copper ore and timber products. The USA, the Federal Republic of Germany, Singapore and the United Kingdom also have substantial trade with Papua New Guinea.

The Government's long-term policy aims at stability and self-reliance. Producers have been protected, to a large extent, by the stabilization funds which the Government has accumulated, and favourable world prices for copper, gold and some agricultural products created a generally healthy balance-of-payments position from 1970 until the end of 1979. The average annual rate of inflation was just over 5% from 1970 to September 1978, and the kina was revalued by 5% in December 1979 in an effort to maintain the balance-of-payments position. However, lower prices for Papua New Guinea's export commodities caused three consecutive annual deficits on the balance of payments in 1980–82, and a trade deficit of K192.1m. in 1982. In 1983 increases in the prices of some agricultural commodities helped the value of exports to rise by 21.8%, reducing the trade deficit to K75.4m. A devaluation of the Australian dollar in March 1983 prompted an immediate devaluation of the kina by 5.5%. Inflation rose from 6.9% in 1982 to an estimated 7.8% in 1983, while GDP increased by an estimated 2% in 1983. The budget for 1983 sought to reduce public spending in real terms by 5%, and a further cut of 3% was planned for 1984. To assist in effecting these cuts, more than 3,000 civil servants were to be made redundant. The budget for 1985 envisaged an increase in expenditure of 5.9% in real terms, taking advantage of higher agricultural commodity prices, which were expected to persist in 1985.

A strong positive influence on the Papua New Guinea economy is direct Australian aid, which accounted for 59% of budget revenue before independence, and was still to contribute 31.7% in 1985. Aid from Australia was due to be reduced, in real terms, by 5% per year under its 1981–86 programme, to amount to $A1,326m. In June 1983, however, it was announced that no such cut would be made in 1982/83, and that in the ensuing three years aid would be reduced in real terms, by 1%, 2% and 3% respectively.

Transport and Communications

In 1981 there were 18,500 km of roads, including 1,020 km of urban roads and 4,800 km of highway and trunk roads. There are 11 international ports, and regular passenger and cargo shipping services link Papua New Guinea with Australia, New Zealand, the USA and various Pacific territories. There are less frequent services to Asian ports and a cargo-only service to Europe. Papua New Guinea has an internal air service, with more than 400 airports and airstrips throughout the country, and an international airport at Port Moresby. A television service was due to be introduced in September 1985.

Social Welfare

There were four major base hospitals and 16 others, 11 urban clinics, 286 health centres and 1,752 aid posts in 1979, staffed by 200 doctors, 204 medical assistants and 3,091 nurses and aid-post orderlies. Christian missions also provide medical and health services with government assistance.

Education

Education is available from pre-school to tertiary level but shortages of staff, facilities and finance permit only about 58% of children to attend community (primary) school. About one-third of these continue to secondary level. Curricula are increasingly designed to permit school-leavers to return profitably to the rural areas in which more than 90% of the population live. School fees have recently been introduced. In 1983 there were 2,224 community schools, 111 secondary schools and 92 vocational and technical colleges. Tertiary education is provided by the University of Papua New Guinea and the University of Technology. There are also teacher training colleges and higher institutions which cater for specific professional training. Estimated expenditure on education in 1982 was K101.1m.

Tourism

Papua New Guinea has many potential attractions for visitors, including spectacular scenery and abundant wildlife, but tourism is only a minor industry. In 1982 there were 32,505 visitor arrivals, of whom 16,445 were tourists, mainly from Australia, New Zealand, Japan and the USA.

Public Holidays

1985: 10 June (Queen's Official Birthday), 16 September (Independence Day and Constitution Day), 25–26 December (Christmas).

1986: 1 January (New Year), 28–31 March (Easter).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 toea = 1 kina (K).

Exchange rates (31 December 1984):
£1 sterling = 1.091 kina;
US $1 = 94.1 toea.

Directory

The Constitution

The present Constitution came into effect on 16 September 1975, when Papua New Guinea became independent. The main provisions of the Constitution are summarized below:

PREAMBLE

The national goals of the Independent State of Papua New Guinea are: integral human development, equality and participation in the development of the country, national sovereignty and self-reliance, conservation of natural resources and the environment and development primarily through the use of Papua New Guinean forms of social, political and economic organization.

BASIC RIGHTS

All people are entitled to the fundamental rights and freedoms of the individual whatever their race, tribe, places of origin, political opinion, colour, creed or sex. The individual's rights include the right to freedom, life and the protection of the law, freedom from inhuman treatment, forced labour, arbitrary search and entry, freedom of conscience, thought, religion, expression, assembly, association and employment, and the right to privacy. Papua New Guinea citizens also have the following special rights: the right to vote and stand for public office, the right to freedom of information and of movement, protection from unjust deprivation of property and equality before the law.

THE NATION

Papua New Guinea is a sovereign, independent state. There is a National Capital District which shall be the seat of government.

The Constitution provides for various classes of citizenship. The age of majority is 19 years.

HEAD OF STATE

Her Majesty the Queen of Great Britain and Northern Ireland is Queen and Head of State of Papua New Guinea. The Head of State appoints and dismisses the Prime Minister on the proposal of the National Parliament and other ministers on the proposal of the Prime Minister. The Governor-General, Chief Justice and members of the Public Services Commission are appointed and dismissed on the proposal of the National Executive Council. All the privileges, powers, functions, duties and responsibilities of the Head of State may be had, exercised or performed through the Governor-General.

GOVERNOR-GENERAL

The Governor-General must be a citizen who is qualified to be a member of Parliament or who is a mature person of good standing who enjoys the respect of the community. No one is eligible for appointment more than once unless Parliament approves by a two-thirds majority. No one is eligible for a third term. The Governor-General is appointed by the Head of State on the proposal of the National Executive Council in accordance with the decision of Parliament by simple majority vote. He may be dismissed by the Head of State on the proposal of the National Executive Council in accordance with a decision of the Council or of an absolute majority of Parliament. The normal term of office is six years. In the case of temporary or permanent absence, dismissal or suspension he may be replaced temporarily by the Speaker of the National Parliament until such time as a new Governor-General is appointed.

THE GOVERNMENT

The Government comprises the National Parliament, the National Executive and the National Judicial System.

National Parliament

The National Parliament, or the House of Assembly, is a single-chamber legislature of members elected from single-member open or provincial electorates and not more than three nominated members who are appointed on a two-thirds absolute majority vote of Parliament. The National Parliament has 109 members elected by universal adult suffrage. The normal term of office is five years. There is a Speaker and a Deputy Speaker, who must be members of Parliament and must be elected to these posts by Parliament. They cannot serve as Ministers concurrently.

National Executive

The National Executive comprises the Head of State and the National Executive Council. The Prime Minister, who presides over the National Executive Council, is appointed and dismissed by the Head of State on the proposal of Parliament. The other ministers, of whom there shall be not fewer than six nor more than a quarter of the number of members of the Parliament, are appointed and dismissed by the Head of State on the proposal of the Prime Minister. The National Executive Council consists of all the ministers, including the Prime Minister, and is responsible for the executive government of Papua New Guinea.

National Judicial System

The National Judicial System comprises the Supreme Court, the National Court and any other authorized courts. The judiciary is independent.

The Supreme Court consists of the Chief Justice, the Deputy Chief Justice and the other judges of the National Court. It is the final court of appeal. The Chief Justice is appointed and dismissed by the Head of State on the proposal of the National Executive Council after consultation with the Minister responsible for justice. The Deputy Chief Justice and the other judges are appointed by the Judicial and Legal Services Commission. The National Court consists of the Chief Justice, the Deputy Chief Justice and no less than four nor more than six other judges.

The Constitution also makes provision for the establishment of the Magisterial Service and the establishment of the posts of Public Prosecutor and the Public Solicitor.

THE STATE SERVICES

The Constitution establishes the following State Services which, with the exception of the Defence Force, are subject to ultimate civilian control.

National Public Service

The Public Service is managed by the Public Services Commission which consists of not fewer than four members appointed by the Head of State on the proposal of the National Executive Council. The Commission is responsible to the National Executive Council.

Police Force

The Police Force is subject to the control of the National Executive Council through a Minister and its function is to preserve peace and good order and to maintain and enforce the law.

Papua New Guinea Defence Force

There shall be no office of Commander-in-Chief of the Defence Force. The Defence Force is subject to the superintendence and control of the National Executive Council through the Minister of Defence. The functions of the Defence Force are to defend Papua New Guinea, to provide assistance to civilian authorities in a civil disaster, in the restoration of public order or during a period of declared national emergency.

The fourth State Service is the Parliamentary Service.

The Constitution also includes sections on Public Finances, the office of Auditor-General, the Public Accounts Commission and the Ombudsman Commission, and the declaration of a State of National Emergency.

USA POB 1492, Port Moresby; tel. 211455; telex 22189; Ambassador: Paul Fisher Gardner.

Judicial System

The Supreme Court is the highest judicial authority in the country. Appeals to it may be made from decisions of a single judge sitting as the National Court. District Courts deal with summary and non-indictable offences. In addition, Local Courts deal with minor offences, including matters regulated by native custom, and are open to all races. They have limited jurisdiction in land matters. Wardens' Courts have jurisdiction over civil cases respecting mining or mining lands and offences against mining laws. Cases involving land are heard by the Land Titles Commission from which appeals lie to the National Court. Children's Courts deal with cases involving minors.

Supreme Court of Papua New Guinea: Chief Justice Sir Buri Kidu.

Religion

The belief in magic or sorcery is universal even among the significant proportion of the population that has adopted Christianity. The indigenous population is mainly pantheistic. There are many missionary societies.

CHRISTIANITY

The Anglican Communion

Papua New Guinea Development Bank: POB 6310, Boroko; f. 1967; statutory govt agency; cap. $A25.7m.; Chair. Mel Togolo; Man. Dir Vai Reva.

Savings and Loan Societies

Registry of Savings and Loan Societies: POB 121, Port Moresby; 111 savings and loan societies; 107,526 mems; total funds 58.6m., loans outstanding 43.0m., investments 8.3m. (June 1983).

INSURANCE

There are branches of several Australian and United Kingdom insurance companies in Port Moresby, Rabaul, Lae and Kieta.

Trade and Industry

INDUSTRIAL AND DEVELOPMENT ORGANIZATIONS

Bougainville Copper Ltd: Panguna, North Solomons Province; subsidiary of the Rio Tinto-Zinc group; Chair. D. C. Vernon; Man. Dir Paul Quodling.

Cocoa Board of Papua New Guinea: POB 532, Rabaul; tel. 921354; telex 92935; f. 1974.

Commonwealth Development Corpn: Office of the Representative for Papua New Guinea, POB 6249, Boroko, National Capital District; telex 23351.

Copra Marketing Board: Port Moresby; markets all copra in Papua New Guinea; consists of a chair. and mems representing producers, and the Dept of Primary Industry; Chair. Jim Grose.

Department of Industrial Development: PO Wards Strips, Waigani; f. 1983 as govt body to function as the sectoral dept for all matters concerning the development and regulation of secondary and tertiary industries.

Department of Primary Industry: Port Moresby; aims to improve and to provide technical assistance for agriculture, fisheries and marine products, forestry and animal husbandry; also to encourage production of commodities for export.

Food Marketing Corporation Pty Ltd: POB 1811, Lae; f. 1976; govt-owned; handles distribution of fruit and vegetables throughout the country; 6 brs; auth. cap. K5m.

Higaturu Oil Palms Ltd: POB 28, Popondetta, Northern Province; f. 1976; jointly owned by The Commonwealth Development Corpn (UK) and the Papua New Guinea govt; major producer of palm oil.

Investment Corporation: Hunter St, POB 155, Port Moresby; f. 1975; govt body formed to support local enterprise and to purchase shares in foreign businesses operating in Papua New Guinea.

National Investment and Development Authority (NIDA): f. 1975; a statutory body charged with the promotion, supervision and regulation of foreign investment; the first contact point for foreign investors for advice on project proposals and approvals of applications for registration to carry on business in the country; NIDA contributes to planning for investment and recommends priority areas for investment to the govt; also co-ordinates the evaluation and registration of investment proposals; Chair. Wep Kanawi; Exec. Dir Stephen Mark.

New Britain Palm Oil Development Ltd: Kimbe, West New Britain; f. 1967; jointly owned by the govt and Harrisons and Crosfield (London); major producer of palm oil and supplier of high quality oil palm seed; Gen. Man. J. A. Vugts.

Papua New Guinea Coffee Industry Board: POB 137, Goroka; tel. 721207; telex 72647; Chair. John P. Munnull; Exec. Officer Ricky M. Mitio.

Pita Lus National Silk Institute: Kagamuga, Mt Hagen; f. 1978; govt silk-producing project.

CHAMBERS OF COMMERCE

Papua New Guinea Chamber of Commerce and Industry: POB 265, Lae; telex 44217; Pres. John Girling; Exec. Dir John Cruikshank.

Papua New Guinea Federation of Commerce and Industry: Port Moresby; f. 1982; Pres. Leo Ume.

Port Moresby Chamber of Commerce and Industry: POB 1764, Port Moresby; tel. 214587.

TRADE UNIONS

The Industrial Organizations Ordinance requires all industrial organizations which consist of no fewer than 20 employees or four employers to register. In 1977 there were 56 registered industrial organizations, including a general employee group registered as a workers' association in each province and also unions covering a specific industry or profession.

Papua New Guinea Trade Union Congress: POB 1103, Lae; Pres. Henry Moses; Sec. Nou Kari.

The following are among the major trade unions:

Bougainville Mining Workers' Union: POB 777, Panguna, North Solomons Province; Pres. Henry Moses.

Central Province Building and Construction Industry Workers' Union: POB 265, Port Moresby.

Central Province Transport Drivers' and Workers' Union: POB 265, Port Moresby.

Employers' Federation of Papua New Guinea: POB 490, Port Moresby; f. 1963; Pres. B. A. Flynn; Exec. Dir M. W. Wells; 80 mems.

Papua New Guinea Journalists' Association: POB 1359, Boroko; f. 1977; Pres. Tarcissius Bobola; Sec. John Harangu.

Papua New Guinea Teachers' Association: POB 6546, Boroko; f. 1971; Pres. Herman Kabai; Nat. Sec. Timwapa Davidi; 12,800 mems.

Papua New Guinea Waterside Workers' and Seamen's Union: Port Moresby; f. 1979; an amalgamation of four unions.

Police Association of Papua New Guinea: POB 903, Port Moresby; f. 1964; Pres. Sgt-Maj. Semel Buka; Gen. Sec. John A. Shields; 4,596 mems.

Port Moresby Council of Trade Unions: POB 265, Boroko; Gen. Sec. John Kosi.

Port Moresby Miscellaneous Workers' Union: POB 265, Boroko.

Printing and Kindred Industries Union: Port Moresby.

Public Employees Association: POB 965, Boroko; tel. 252955; telex 22382; f. 1974; 28,000 mems; Pres. Napoleon Liosi; Gen. Sec. Kapia Aria.

Transport

ROADS

In 1981 there were 18,500 km of roads in Papua New Guinea, of which 4,800 km were classified as highways or trunk roads and

1,020 km as urban roads. Work was in progress in 1985 to construct a transnational highway linking Port Moresby with the Highlands and the north coast. The 1978 budget provided K16.08m. for roads.

SHIPPING

Papua New Guinea has 16 major ports and a coastal fleet of about 300 vessels.

New Guinea Australia Line Pty Ltd: POB 145, Port Moresby; tel. 212377; f. 1970; operates regular container services between Australia, Papua New Guinea, Vanuatu and Solomon Islands; Chair. Ron Smith.

Papua New Guinea Shipping Corporation: POB 543, Port Moresby; tel. 211174; telex 22269; f. 1977; govt-owned; operates two PNG Line (PNGL) vessels, providing a container/break-bulk service to San Francisco and Los Angeles (USA) and all main ports in Papua New Guinea; Chair. P. F. Nicholls.

Papua Shipping and Stevedoring Co: operates a shipping service, stevedoring and the delivery of cargo between Papua New Guinea, the Pacific region and other overseas ports.

Shipping companies operating container/break bulk services to Papua New Guinea include NGAL/PNGL/CONPAC consortium every nine days from Australia and Solomon Islands; Niugini Express Lines (two a month) and Karlander New Guinea Line (monthly) from Australia; Bank Line, which operates 28-day services from the UK and Continent via Pacific Islands and returning via Mediterranean; China Navigation Co, which operates a monthly service from the Philippines, Hong Kong, Taiwan and Singapore to several Pacific islands; Sofrana-Unilines, which connects Papua New Guinea with Solomon Islands and New Zealand; Pacific Forum Lines, monthly from New Zealand via Fiji; NYK Line and Mitsui-OSK operates a 20-day service from Japan; Daiwa Line operates a monthly service from Australia and Pacific Islands.

CIVIL AVIATION

There is an international airport at Port Moresby and over 400 other airports and airstrips throughout the country.

Air Niugini: POB 7186, Boroko; tel. 259000; telex 22225; f. 1973; the govt-owned national airline; operates scheduled internal cargo and passenger services from Port Moresby to 20 destinations in Papua New Guinea and international services to Brisbane, Cairns and Sydney (Australia), Auckland (New Zealand), Irian Jaya (Indonesia), Solomon Islands, the Philippines, Hong Kong and Singapore; Chair. B. Philemon; Gen. Man. M. Iangalio; fleet of 2 Boeing 707-338C, 4 Fokker F-28, 3 de Havilland DHC-7, 1 Airbus A300B4-203.

Douglas Airways Pty Ltd: POB 1179, Boroko; tel. 253499; telex 22145; f. 1961; domestic services; Man. Dir Dennis Douglas; fleet of 8 Britten Norman Islanders, 1 Beech Baron, 1 Partenaria, 1 Beech Queenair, 2 Britten Norman Trislanders.

Talair Pty Ltd: POB 108, Goroka; tel. 721355; telex 72660; f. 1952; charter/scheduled services to 140 destinations in Papua New Guinea; Man. Dir R. D. Buchanan; Gen. Man. Ken Fenske; fleet of 7 Embraer Bandeirante, 9 Twin Otters, 9 Cessna 402, 5 Beech-Barons, 25 BN2 Islanders, 1 BN3A Trislander; 3 Cessna 207, 7 Cessna 206, 2 Beech Queenair, 1 Metroliner, 3 Pilatus BN2A.

Tourism

Office of Tourism: Marea House, Port Moresby; tel. 272160.

PARAGUAY

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of Paraguay is a land-locked country in central South America. It is bordered by Bolivia to the north, by Brazil to the east, and by Argentina to the south and west. The climate is sub-tropical. Temperatures range from an average maximum of 34.3°C (93.7°F) in January to an average minimum of 14°C (51°F) in June. The official language is Spanish, but the majority of the population speak Guaraní, an indigenous Indian language. Almost all of the inhabitants profess Christianity, and about 90% adhere to the Roman Catholic Church, the country's established religion. There is a small Protestant minority. The national flag (proportions 2 by 1) has three equal horizontal stripes, of red, white and blue. It is the only national flag with a different design on each side, having a varying emblem in the centre of the white stripe: the obverse side bears the state emblem (a disc containing the five-pointed 'May Star', in gold, surrounded by a wreath), while the reverse side carries the seal of the Treasury (a lion supporting a staff, surmounted by the red 'Cap of Liberty'). The capital is Asunción.

Recent History

Paraguay was ruled by Spain from the 16th century until it became independent in 1811. Since 1814 the country has been ruled by a succession of dictators. In 1865 Paraguay was involved in a disastrous war against Brazil, Argentina and Uruguay (the Triple Alliance), resulting in the loss of more than one-half of its population. Paraguay also suffered heavy losses in the Chaco Wars of 1928–30 and 1933–35 against Bolivia, but won the bulk of the disputed territory when the boundary was fixed in 1938. General Higinio Morínigo established an authoritarian regime in 1940 but the return of a number of political exiles in 1947 sparked off a civil war in which supporters of the right-wing National Republican Party (Partido Colorado) defeated the Liberals and the Partido Revolucionario Febrerista, leading to the overthrow of Gen. Morínigo in June 1948. This was followed by a period of great instability until Gen. Alfredo Stroessner Mattiauda, the Army Commander-in-Chief, assumed power by a military coup in May 1954. He nominated himself for the presidency, as the Colorado candidate, and was elected unopposed in July to complete his predecessor's term of office. In 1955 the President assumed extensive powers and established a state of siege. General Stroessner, supported by the Partido Colorado and the armed forces, was re-elected President by large majorities in 1958, 1963, 1968, 1973, 1978 and 1983.

In February 1978 President Stroessner lifted the state of siege, in force since he came to power, in all areas except Asunción. The number of political prisoners in the country had fallen sharply by 1980, but the assassination of the former Nicaraguan dictator, Gen. Anastasio Somoza Debayle, in Asunción in September 1980 caused President Stroessner to fear for the security of his own position, and the state of siege was reimposed. There has been continued harassment of leaders of the political opposition and of peasant and labour groups. The then Christian Democrat leader, Luis Alfonso Resck, was arrested and expelled from the country in June 1981, and Domingo Laíno, leader of the Partido Liberal Radical Auténtico, was deported in December 1982. Since Ronald Reagan took office as President of the USA in 1981, Paraguay has been under less pressure from the US Government to curb abuses of human rights, and the use of torture against detainees has reportedly become widespread once more. It has been estimated that more than 60% of all Paraguayans live outside the country.

Regular purges of the Partido Colorado membership, careful division of the spoils of office between the ruling party and the armed forces, and the support of the business community have enabled Stroessner to become the longest-serving dictator in Latin America. In 1982, however, the advanced age of many of the members of the Council of Ministers, combined with economic policies that alienated the private sector, resulted in increasing political discord. Government employment was conditional on membership of the Partido Colorado. Most of the opposition parties boycotted the presidential and legislative elections of February 1983. This enabled Stroessner to obtain more than 90% of the votes cast at the presidential election, and in August he formally took office for a further five-year term. The elections, however, served only as a temporary distraction from the increasingly pressing issues of economic decline, mounting unemployment and popular discontent with the inflexible, institutional form of government. The emergence of an independent trade union movement, and of dissident factions within the Partido Colorado, revealed the extent of the Government's unpopularity.

Following his re-election, President Stroessner made only minor changes to his Council of Ministers. In May 1983 the Government instigated a campaign of repression against students and trade unionists. Members of the opposition Liberal parties were openly critical of Gen. Stroessner. There was, however, some hope of a moderation in government policy when, in January 1984, Gen. Stroessner granted an amnesty to politicians in exile, with the notable exception of Luis Alfonso Resck and Domingo Laíno. It was believed that the President had been prompted into adopting a more conciliatory line in order to arrest the decline in his popularity, following the victory of Dr Raúl Alfonsín in Argentina's presidential election and the general agitation within Paraguay for an improvement in human rights. In February opposition parties held demonstrations in Asunción for the first time in 30 years.

In March 1984 the Government ordered the closure of the independent newspaper, *ABC Color*, on the grounds that it had been used for a campaign of subversion. The closure was widely condemned, and prompted rumours that the Government was planning to reverse its policy of permitting some measure of liberalization. The subsequent treatment of several opposition leaders, including members of the Movimiento Popular Colorado (MOPOCO) and the Movimiento de Autenticidad Colorada (MAC), appeared to substantiate this speculation. In June three members of the MAC were detained for unspecified reasons, and in January 1985 four leaders of the MOPOCO began a hunger strike in protest at their arrest by the authorities.

Throughout 1984 there was mounting interest in the issue of the eventual succession to President Stroessner. The President of the Supreme Court, Luis María Argaña, emerged as the most probable contender for the Presidency. Argaña was thought to enjoy the support of President Stroessner, who was reported to favour the younger *populista* tendency within the Partido Colorado, rather than the older *tradicionalista* element.

Government

Under the 1967 Constitution, legislative power is held by the bicameral National Congress, whose members serve for five years (subject to dissolution by the President). The Senate has 30 members and the Chamber of Deputies 60 members. Elections to the Congress are by universal adult suffrage. The party receiving the largest number of votes (since 1947 the Partido Colorado) is allotted two-thirds of the seats in each chamber, the remaining seats being divided proportionately among the other contending parties. Executive power is held by the President, directly elected for five years at the same time as the Congress. He governs with the assistance of an appointed Council of Ministers.

Paraguay is divided into 19 departments, each administered by a governor who is appointed by the President.

Defence

The armed forces totalled 16,900 men in July 1984. There was an army of 12,500 and an air force of 1,900 men. The navy, which operates on the rivers, had 2,500 men, including 500

marines. There are 1,500 men in the internal security force. Military service, which is compulsory, lasts for 18 months in the army and for two years in the navy. Defence expenditure in 1982 was estimated to be 14,000m. guaraníes.

Economic Affairs

Agriculture (including livestock) and forestry usually contribute more than 30% of Paraguay's GDP. The agricultural sector employed 42.7% of the working population in 1982, compared with 51% in 1972. The EEC's restrictions on meat imports, and Argentina's restrictions on timber imports since 1975, severely affected the traditional pattern of Paraguay's exports. In 1982 output of rough timber declined by 15.4%, as the Itaipú hydroelectric project (see below) approached completion. Exports of timber earned US $19.1m. in 1983. Raw cotton and oil-seeds for industrial use, mainly soya beans, have become Paraguay's leading exports since 1976. In March 1982 the official price paid to producers for cotton, which accounts for about 50% of export income, was cut by 27% to below the cost of production, thereby severely reducing the standard of living of the peasant growers. In 1983 exports of cotton, soya beans and wool were valued at $71m., $75.7m. and $78.9m. respectively. The area under cultivation for soya beans was expected to increase by 63% in 1984. Other significant crops are cassava, sugar cane, maize, tobacco and rice. Severe flooding and heavy rainfall during the first months of 1983 caused extensive damage to crops, but a record wheat harvest of 107,319 tons was recorded. The IDB has agreed to provide $34.5m. for the rehabilitation and reconstruction of regions damaged by flooding. In 1984 the IDB approved a loan of $37.5m. to the agricultural sector, a proportion of which was to be used for land reclamation. The issue of land distribution has remained unresolved: 13.7% of the peasant population are landless or possess less than 1 ha of land. A further 42% of peasants own less than 5 ha. In 1984 record crops of cotton and soya beans were achieved. As a result of increased production, the agricultural sector recorded real growth of 9% in 1984.

Industrial activity has developed rapidly in recent years, assisted by the influx of foreign capital. However, the output of the manufacturing and construction sectors declined by 4.5% in 1982, as public and private investment were reduced. The principal industries are cotton ginning, timber, leather processing and the processing of vegetable oils. In October 1981 work began on a cement plant with a capacity of 600,000 metric tons per year, financed by a French company. Under an economic co-operation agreement with Brazil, Paraguay's first steel plant was under construction at Villa Hayes in 1982. An industrial estate at Puerto Presidente Stroessner and a fertilizer plant in Alto Paraná were also planned. In 1984 the manufacturing sector grew by 4.1%.

Paraguay became self-sufficient in electric energy in 1976, with the completion of the 190 MW Acaray hydroelectric complex. The Itaipú complex on the River Paraná, a joint Brazilian–Paraguayan project with a capacity of 12,600 MW, was inaugurated in March 1984 and commenced operations in October. Paraguay's energy consumption in 1982 was one-fifth of the capacity of just one of the 18 turbines that it shares with Brazil, to which it has therefore agreed to sell its spare capacity. Demand in Brazil, however, has slumped, and a low price was agreed and fixed for 50 years. This has reduced Paraguay's ability to repay debts which were incurred by the project. Work on the 4,000 MW joint Argentine-Paraguayan plant at Yacyretá was delayed in 1981 as a result of disagreement with the World Bank over the allocation of an engineering contract. Argentina's economic crisis in 1982 was expected to delay the project for up to another five years, leaving unemployed the 15,000 workers who had been made redundant when the Itaipú project was completed. Costs for the Yacyretá project are now estimated to be in excess of $10,500m. A number of construction companies and finance houses collapsed in 1982 after borrowing heavily in anticipation of a Yacyretá boom which failed to occur. Another Paraguayan-Argentine project, the 4,600 MW complex at Corpus, was settled in 1979 by a treaty signed by Paraguay, Argentina and Brazil on the use of the waters of the Paraná. However, the future of the project is in doubt following further delays. In 1981 a state-owned oil company, Petróleos Paraguayos, was formed to assist in developing the country's embryonic petroleum industry (the single refinery had increased output by only 50% in its 15 years of existence). A joint Argentine-Paraguayan commission is to investigate whether the Palomar Largo oilfield extends into Paraguay.

The Paraguayan economy was formerly the fastest-growing in Latin America, with an average annual GDP growth rate of 11.4% from 1977 to 1980, and 8.5% in 1981. This economic expansion was due to the activity generated by the Itaipú project. In 1982, however, investment tailed off as the Itaipú project neared completion. Between 1978 and 1982 capital inflows went into speculation, real estate and massive imports of consumer goods. Investment in industry was minimal. GDP was estimated to have fallen by 2.5% in 1982 and by 5% in 1983. Reserves of foreign exchange increased by 26% in 1980 but by only 4% in 1981. In December 1983 reserves were $614.6m., but by September 1984 they had fallen to $488.3m., a fall of 20.6% in nine months. Exports have stagnated, and Paraguay's long-maintained refusal to devalue the guaraní resulted in a widening of the trade deficit to $226.7m. in 1983. The introduction in July 1982 of a dual exchange rate for the guaraní resulted in a flight of capital and accelerating inflation. Attempts to stabilize the currency until after the elections proved counter-productive. Exchange houses were closed, disrupting foreign trade operations, and contraband increased. It was estimated that illegal trade accounted for 60% of the total by 1984, and that only one-quarter of total soya production was exported legally. The current deficit on the balance of payments increased steadily, from $58.7m. in 1977 to $387.7m. in 1982, but eased to $247.4m. in 1983. The public sector budget deficit rose from 5,000m. guaraníes in 1981 to an estimated 8,000m. in 1982. Unemployment rose from 4.6% of the labour force in 1981 to 13.9% in 1983. In 1983 imports were valued at $478.3m., while exports fell to $251.6m. The inflation rate was estimated to be 26.4% in 1984.

Although the Paraguayan economy has experienced a dramatic decline since 1982, the country's foreign debt is only $1,580m., one of the lowest such debts in South America. In June 1984 the guaraní was devalued by 33.3%, with the official exchange rate adjusted from 160 to 240 guaraníes per US dollar. In an attempt to reactivate the economy, the budget for 1985 gave priority to the productive sectors, especially agriculture and industry. In 1984 GDP grew by 2.9%.

Transport and Communications

In 1983 there were 441 km of railways in use, and 11,320 km of roads, of which 2,094 km were paved. The Pan-American Highway runs for more than 700 km in Paraguay, while the Trans-Chaco Highway extends from Asunción to Bolivia. The River Paraguay is navigable from Asunción to Concepción, and beyond for small vessels, and there is considerable traffic along the River Paraná through Argentina to the Atlantic Ocean at Buenos Aires and Montevideo. A 1,370-metre bridge linking the western and eastern areas of the country, divided by the River Paraguay, was opened in 1978. In 1980 Paraguay and Brazil agreed on a rail link, which will run from Asunción to Guaíra on the border, and was scheduled for use in 1984. The modern airport at Asunción (Aeropuerto Presidente Stroessner) was completed in 1980 at a cost of $74 m., and another international airport is to be built at Puerto Presidente Stroessner. The Government has announced plans to expand the shipping fleet, and to improve and modernize the railway system.

Social Welfare

In 1975 Paraguay had 143 hospital establishments, with a total of 3,816 beds, and in 1979 there were 1,700 physicians working in the country. In 1980 the Ministry of Public Health planned the building of rural hospitals and health centres. The Government plans to develop a health centre near Asunción at a cost of $82m. The welfare of Paraguay's indigenous Indians is the responsibility of the National Indian Institute (INDI).

Education

Education is, where possible, compulsory for six years, to be undertaken between seven and 14 years of age, but there are insufficient schools, particularly in the remote parts of the country. Primary education begins at the age of seven and lasts for six years. Secondary education, beginning at 13 years of age, also lasts for six years. In 1979 an estimated 86% of children in the relevant age-group attended primary schools, while secon-

dary enrolment was 21%. In 1983 there were 3,690 primary schools and 658 secondary schools; there is one state and one Roman Catholic university. In 1983 adult illiteracy averaged 15.7%.

Tourism

Tourism is undeveloped but, with the growth of air transport and the construction of new international highways and hotel developments, efforts are being made to promote it. In the period January–July 1984 a total of 40,508 tourists visited Paraguay.

Public Holidays

1985: 1 May (Labour Day), 14, 15 May (Independence Day celebrations), 16 May (Ascension), 6 June (Corpus Christi), 12 June (Peace of Chaco), 15 August (Founding of Asunción), 25 August (Constitution Day), 29 September (Battle of Boquerón), 12 October (Day of the Race, anniversary of the discovery of America), 1 November (All Saints' Day), 8 December (Immaculate Conception), 25 December (Christmas Day).

1986: 1 January (New Year's Day), 3 February (San Blás, Patron Saint of Paraguay), 1 March (Heroes' Day), 27 April (Maundy Thursday), 28 April (Good Friday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 céntimos = 1 guaraní (G).

Exchange rates (31 December 1984):
£1 sterling = 278.16 guaraníes;
US $1 = 240.00 guaraníes.

Statistical Survey

Finance

CURRENCY AND EXCHANGE RATES

Monetary Units
100 céntimos = 1 guaraní (G).

Denominations
Coins: 1, 5, 10 and 50 guaraníes.
Notes: 1, 5, 10, 50, 100, 500, 1,000, 5,000 and 10,000 guaraníes.

Sterling and Dollar Equivalents (31 December 1984)
£1 sterling = 278.16 guaraníes;
US $1 = 240.00 guaraníes;
1,000 guaraníes = £3.595 = $4.167.

Exchange Rate
Between 1960 and 1984 the official buying (export) rate was US $1 = 123.60 guaraníes, and the selling (import) rate US $1 = 126.00 guaraníes. In July 1982 a 'parallel' rate of US $1 = 160 guaraníes, applicable to non-essential imports, was introduced. This became the principal market rate in March 1984. A new rate of US $1 = 240 guaraníes was established in June 1984.

Directory

The Constitution

A new Constitution for the Republic of Paraguay was promulgated on 25 August 1967. It took effect after the presidential election of 11 February 1968.

The preamble to the Constitution states that Paraguay is an independent republic whose form of government is representative democracy. The powers accorded to the legislature, executive and judiciary are exercised separately and independently. The official religion of Paraguay is Roman Catholicism.

All citizens of Paraguay are equal before the law and have the right to freedom of conscience, travel, residence and religion. The freedom of association is guaranteed as is the right of workers to organize and strike. Political parties are free to operate providing they do not advocate the destruction of the republican representative system. All Paraguayans may vote in elections after the age of eighteen. No laws may be retrospective in application.

The legislature (National Congress) is composed of the Senate and the Chamber of Deputies. The Senate is made up of at least 30 members, the Chamber of Deputies of at least 60 members. The party gaining a majority of votes in the presidential election obtains two-thirds of the seats in both the Senate and the Chamber of Deputies. Legislation concerning national defence and international agreements may be initiated in the Senate. Financial, electoral and municipal legislation may be initiated in the Chamber of Deputies. Both chambers of Congress are elected for a period of five years subject to dissolution.

Executive power is discharged by the President of the Republic, who must be a Roman Catholic. He is elected by direct vote for a five-year term of office. The President formulates legislation and enacts it. He is the commander-in-chief of the armed forces and may dissolve Congress.

The Supreme Court is composed of five members who are appointed for five years by the President. The Supreme Court has the power to declare legislation unconstitutional.

In 1977 Article 173 of the Constitution was amended to enable the President to stand for more than two consecutive terms of office.

The Government

HEAD OF STATE

President: Gen. Alfredo Stroessner Mattiauda (assumed power 5 May 1954; elected President 11 July 1954; re-elected 1958, 1963, 1968, 1973, 1978 and 1983).

COUNCIL OF MINISTERS

(March 1985)

Minister of the Interior: Dr Sabino Augusto Montanaro.

Minister of Foreign Affairs: Dr Carlos Augusto Saldívar.

Minister of Finance: Gen. César Barrientos.

Minister of Education and Religion: Dr Carlos Ortiz Ramírez.

Minister of Industry and Commerce: Dr Delfín Ugarte Centurión.

Minister of Public Works and Communications: Gen. Juan Antonio Cáceres.

Minister of National Defence: Gen. Gaspar Germán Martínez.

Minister of Public Health and Social Welfare: Dr Adán Godoy Jiménez.

Minister of Justice and Labour: Dr José Eugenio Jacquet.

Minister of Agriculture and Livestock: Ing. Hernando Bertoni.

MINISTRIES

Ministry of Agriculture and Livestock: Pte Franco 472, Asunción.

Total	1,021,597	100.0

CONGRESO NACIONAL

Election, 6 February 1983

Party	Seats	
	Senate	Chamber of Deputies
Partido Colorado	20	40
Partido Liberal Radical	6	13
Partido Liberal	4	7

Political Organizations

In 1980 a law was passed allowing military officers to join political parties and in 1981 legislation was passed stipulating that, to be eligible for elections, a political party must have at least 10,000 members and a presence in one-third of the country's electoral districts. Only existing parties (i.e. not coalitions) may nominate presidential candidates.

Asociación Nacional Republicana—Partido Colorado (National Republican Party): Asunción; f. 19th century, ruling party since 1940; affiliation is obligatory for all civil servants; 1.3m. mems; Chair. Dr Juan Ramón Chávez; First Vice-Pres. Dr Sabino Augusto Montanaro; Sec. Mario Abdo Benítez.

Movimiento de Autenticidad Colorada (MAC): dissident faction of Asociación Nacional Republicana; Leader Alcibiades Melgarejo.

***Partido Liberal:** Asunción; f. 1961; Leader Dr Hugo Fulvio Celauro.

***Partido Liberal Teeté (PLT):** Asunción; f. 1961; legally recognized opposition party; Pres. Prof. Carlos A. Levi.

***Partido Liberal Radical (PLR):** Yegros y Manuel Domínguez, Asunción; f. 1961; legally recognized token opposition party; Leader Dr Enzo Doldán.

Acuerdo Nacional Paraguayo: Asunción; f. 1978; opposition front including:

Movimiento Popular Colorado (MOPOCO): Asunción; f. 1959; dissident group from Partido Colorado; Leaders Miguel Ángel González Casabianca, César Stumps.

Partido Demócrata Cristiano (PDC): Colón 871, Casilla 1318, Asunción; f. 1960; has called for its members to cast blank votes in all elections and is, therefore, not officially recognized; 38,000 mems; Pres. Alfredo Rojas León; Vice-Pres Florencio Riveros Vásquez, Juan Descalzo Buongermini.

***Partido Liberal Radical Auténtico (PLRA):** Asunción; f. 1978; left-of-centre party; Leaders Dr Domingo Laíno (in exile), Juan Manuel Benítez Florentín, Hermes Rafael Saquier, Miguél Angel Martínez Yaryef; Sec. Gen. Miguel Abdón Saguier.

Partido Revolucionario Febrerista (PRF): Casa del Pueblo, Manduvira 552, Asunción; f. 1936; social democratic party; affiliated to the Socialist International; the only legally-recognized extra-parliamentary party; Leaders Alarico Quiñónez (conservative wing), Dr Euclides Acevedo (radical wing); Gen. Sec. Ricardo Lugo Rodriguez.

Partido Liberal Unificado: Asunción; f. 1977; not officially recognized.

* Note: The original Partido Liberal was the ruling party until 1940 and was dissolved in 1942. It was re-established in 1961, but most members left to form the PLR. The party has split further and the largest faction is the PLRA.

The leaders of the banned Organización Político Militar (OPM) and the Partido Comunista Paraguayo (PCP, pro-Moscow Communist Party) are in exile.

PERU

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of Peru lies in western South America, bordered by Ecuador and Colombia to the north, by Brazil and Bolivia to the east, and by Chile to the south. Peru has a coastline of more than 2,300 km (1,400 miles) on the Pacific Ocean. The climate varies with altitude, average temperatures being about 11°C (20°F) lower in the Andes mountains than in the coastal plain. The rainy season is between October and April, with heavy rainfall in the tropical forests. Temperatures in Lima are usually between 13°C (55°F) and 28°C (82°F). The two official languages are Spanish and Quechua. Almost all of the inhabitants profess Christianity, and the great majority are Roman Catholics. The national flag (proportions 3 by 2) has three equal vertical stripes, of red, white and red, with the state coat of arms (a shield, with a golden cornucopia in the lower half and a llama and a cinchona tree in the upper half, all encircled by a wreath of laurel) in the centre of the white stripe. The capital is Lima.

Recent History

There have been human settlements in Peru for more than 10,500 years. The last of the indigenous Indians' ruling civilizations, the Inca empire, was ended when Spanish colonists arrived in the early 16th century, attracted by the legendary mineral wealth of the region. Since independence from Spain, finally achieved in 1826, Peruvian politics have been characterized by alternating periods of civilian administration and military dictatorship.

Peru's oldest political party with a mass following is the Alianza Popular Revolucionaria Americana (APRA), founded in 1924. For more than 50 years, the party was led by its founder, Dr Víctor Raúl Haya de la Torre. After organizing demonstrations against the dictatorial regime of President Augusto Bernardino Leguía in the early 1920s, Haya de la Torre was arrested and exiled. From 1923 to 1930 he lived in Mexico, where he established APRA. The party was founded as a nationalist revolutionary movement, aimed at fighting imperialism throughout Latin America. It spread to several South American countries but became a significant party only in Peru, where it was established in 1930, when President Leguía was deposed and Haya de la Torre returned from exile. However, the Peruvian Aprista Party, as it was also known, was banned between 1931 and 1945 and again in 1948–56. There is a long-standing tradition of hostility between the armed forces and APRA. During the 1930s the Apristas, then strongly Marxist in character, were responsible for widespread disturbances, including uprisings by peasants and urban workers. Although it has never won the presidency (which Haya de la Torre contested in 1931, 1962 and 1963), APRA has been the dominant party in recent Peruvian history.

In July 1945 Dr José Luis Bustamante y Rivera became President, replacing Dr Manuel Prado y Ugartache, who had held office since 1939. President Bustamante strove to keep a balance between APRA, which was the largest party in Congress, and the conservative groups which controlled commercial activity in the capital, Lima. However, he was deposed in October 1948 by a right-wing military rebellion, led by Gen. Manuel Odría, a former Minister of the Interior, who formed a military junta and banned APRA, which was accused of attempting to foment revolution. In July 1950 Gen. Odría took office as President, having been the sole candidate in an election from which APRA was excluded. He remained in power until July 1956, when he was succeeded by ex-President Prado, a moderate conservative, who had been elected with support from APRA, which was legalized again. By this time, APRA had evolved into a moderate left-of-centre and anti-communist party, although its programme continued to emphasize the aim of improving conditions for Peru's rural population, particularly the indigenous Indians.

At the next presidential and congressional elections, in June 1962, there were numerous allegations of fraud and other irregularities. In the presidential poll, the APRA leader, Dr Haya de la Torre, obtained the largest share of the total vote but less than the one-third required for direct election. Accordingly, it was left to Congress to choose the successful candidate. Although Haya de la Torre withdrew in favour of Gen. Odría, the former President and candidate of the conservative Unión Nacional Odríista (who had obtained third place in the June poll), the armed forces staged a coup in July, and the elections were annulled. Power was seized by a military junta, led by Gen. Ricardo Pérez Godoy, Chairman of the Joint Chiefs of Staff, who assumed the functions of Head of State. In March 1963, however, Gen. Pérez was deposed in a bloodless coup, being replaced by Gen. Nicolás Lindley López, hitherto second-in-command.

As previously announced, presidential and congressional elections were held in June 1963 in preparation for a return to constitutional rule. The presidential election was won by Fernando Belaúnde Terry, a wealthy architect, who had been runner-up in 1956 and 1962. Belaúnde, who gained 39.0% of the vote in 1963, was the joint candidate of his own party, the reformist Acción Popular (AP), and the Partido Demócrata Cristiano (PDC). Dr Haya de la Torre won 34.3%, while Gen. Odría was again third. APRA, however, was the largest party in the Chamber of Deputies, with 58 of the 140 seats, compared with 50 for the AP-PDC coalition. President Belaúnde took office for a six-year term in July 1963, when military rule ended.

President Belaúnde's first term of office was notable for frequent ministerial crises, but in the early years of his administration, despite the handicap of an opposition-controlled Congress, the Government enacted far-reaching legislation, including measures to promote agrarian reform. Following internal unrest and an economic crisis in 1967, President Belaúnde was deposed by a bloodless military coup in October 1968, when power was assumed by a Revolutionary Government of the Armed Forces. The coup was led by Gen. Juan Velasco Alvarado, the Army Chief of Staff, who was proclaimed President. The new leader dissolved Congress and formed an all-military Council of Ministers.

Radical reforms and austerity measures created internal unrest and dissension within the armed forces. In August 1975 President Velasco was overthrown and replaced by Gen. Francisco Morales Bermúdez, who had been Prime Minister since February. In July 1976 President Morales carried out a ministerial reshuffle in which most of the leading instigators of the 1968 revolution were removed. The new Government implemented several measures which were interpreted as a move to the right.

In July 1977 President Morales announced plans for the restoration of civilian rule. Accordingly, a national election (the first for 15 years) was held in June 1978 to choose the members of a Constituent Assembly, which was to draft a new constitution in preparation for the holding of presidential and congressional elections. In the election to the Constituent Assembly, APRA emerged as the largest party, winning 35% of the votes and gaining 37 of the 100 seats. Ex-President Belaúnde's AP boycotted the poll. At its first session in July, the Assembly elected the 83-year-old Dr Haya de la Torre, who had never previously held public office, to be its President. The Assembly adopted a new constitution in July 1979 and then dissolved itself. The constitution provided for elections by universal adult suffrage, granting illiterate persons the right to vote for the first time. Haya de la Torre, who was to have been APRA's candidate in the presidential election, died in August 1979.

Presidential and congressional elections were held in May 1980. The presidential election, contested by 15 candidates, was won decisively by ex-President Belaúnde, with 45.4% of the total votes, ahead of the APRA candidate's 27.4%. At the same time, the AP won an outright majority in the Chamber of Deputies (with 98 of the 180 seats, compared with APRA's 58)

and also became the largest party in the Senate. Power was transferred to the new civilian authorities in July 1980, when President Belaúnde took office again and the new constitution came into force.

President Belaúnde embarked on a programme of economic liberalization and began to reverse many of the reforms of the Velasco period, such as land reform, co-operative farming, worker participation in industry and nationalization of foreign companies. Terrorist activity, perpetrated by a Maoist group, the Sendero Luminoso ('Shining Path'), began in 1980 in the department of Ayacucho and intensified in 1982 to include selected killings of government officials and armed clashes with the police, as well as sabotage. After an assault on the prison in Ayacucho in March 1982, in which 230 inmates were freed, a state of emergency was declared in the area. In August a 30-day emergency was declared in Lima after bomb damage to electricity pylons caused a black-out in Lima and several other towns. Hundreds of suspects were detained without charge under an anti-terrorist law which had been enacted in 1981. In December the army was sent to the emergency zone to collaborate with the police in operations against the guerrillas.

During the first months of 1983 a dramatic increase in the number of violent deaths occurred. Between January and April it was reported that 455 people had been killed. An increase in violations of human rights was also reported. The murder of eight journalists in Uchuraccay in January provoked great controversy. It was confirmed that the army had encouraged peasants in remote areas to form anti-guerrilla bands, which may have been responsible for the murder of the journalists and for subsequent massacres in Lucanamarca and Huancasancos. In May the terrorists launched major attacks on Ayacucho and Lima. In response, the Government declared a state of emergency for 60 days and suspended civil rights. The state of emergency was extended in July but was lifted after 104 days. Following the attacks, President Belaúnde announced that Peru would consider seeking foreign assistance to combat the problem of terrorism. In October and November the campaign for municipal elections was disrupted by terrorist attacks. In January 1984 terrorists attacked the military base at Las Barbones. In April the Sendero Luminoso resumed its bombing campaign in Lima. In addition, there were signs that the guerrillas had expanded their activities to Tingo María, the principal coca-producing region of Peru. Reports indicated that the Sendero Luminoso was deriving a substantial proportion of its funds from producers of illicit drugs, chiefly cocaine (a stimulant derived from the leaves of the coca plant). Members of the Sendero Luminoso were also believed to be operating from bases in northern Argentina.

In June 1984 the Sendero Luminoso launched a major campaign in the Ayacucho region. The terrorists' main targets were bridges, police posts and villages. Several bombs exploded in the town of Ayacucho, and clashes between the army and guerrillas at Trujillo resulted in 16 deaths. At the village of Paicca 45 peasants were murdered. In response to the escalation in violence, the Government announced in July a new campaign to eradicate terrorism and the drugs trade. The armed forces were given complete authority over all anti-insurgency operations within the 13-province emergency zone.

In accordance with the state of emergency which had been declared in June, the army arrested thousands of suspects throughout Peru in an attempt to curb attacks by terrorists. During two weeks of violent clashes in July 160 people were killed, the majority of whom were peasants. Evidence of the Government's uncompromising policy towards the Sendero Luminoso was demonstrated by the sudden dismissal of the military commander for the emergency zone and the appointment of a 'hard-line' successor. Public discontent at the increasingly turbulent internal situation was exacerbated in August by the discovery of 89 bodies in a clandestine grave near the town of Huanta. Subsequent discoveries of other mass graves, at Pacayacu and Huancayo, prompted calls for a review of the seemingly unlimited powers exercised by the armed forces within the emergency zone. In spite of the Government's insistence that members of the Sendero Luminoso were responsible for the massacres, it was widely believed that both sides were guilty of atrocities in the region.

In September 1984 more than 2,000 people were detained by the police in Lima, following bomb attacks. In October the state of emergency was lifted throughout the country, with the exception of the emergency zone. In early 1985 a wave of bombings, directed against government buildings and the residence of the Minister of Labour, were thought to herald the start of the terrorists' campaign to disrupt the forthcoming presidential and legislative elections. Although the armed forces launched several successful attacks against the Sendero Luminoso in early 1985, the Government had lost considerable support, both within Peru and in other countries, because it was thought to have sanctioned the dramatic deterioration in human rights which occurred in 1984, by extending the powers of the armed forces. In December 1984 it was reported that more than 2,000 people had disappeared without trace in the emergency zone since 1982, and that more than 5,000 people had been killed in the course of the internal conflict.

Frequent demonstrations and strikes, in protest at the worsening economic situation (coupled with the Government's failure to deal effectively with the Sendero Luminoso), contributed to the AP's heavy defeat in the municipal elections of November 1983. The elections represented an important test for the popularity of both the Government and its policies. However, the results indicated that APRA had made significant gains throughout the country, winning 35% of the national vote. Dr Alfonso Barrantes Lingán, the leader of the left-wing coalition, Izquierda Unida, was elected mayor of Lima. In April 1984 the Prime Minister resigned after disagreements on economic policy. Sandro Mariátegui, a former Minister of Finance, was appointed to head the new Council of Ministers. In June some 500,000 public employees went on strike in protest at the economic recession and low wages. The strike prompted fears that the Government's policy of economic austerity would result in increased social unrest. In October President Belaúnde announced a major government reshuffle, which included seven new appointments to ministerial posts. Dr Luis Pércovich Roca, formerly Minister of the Interior, was appointed Prime Minister.

In January 1985 the campaign for the presidential and legislative elections, due to be held on 14 April, commenced. The leading contender for the presidency was thought to be Alan García Pérez, the Secretary-General of APRA. Other presidential candidates included the mayor of Lima, Dr Barrantes Lingán of the Izquierda Unida, and Dr Javier Alva Orlandini, the Secretary-General of the ruling party, the AP. If no candidate obtained the required minimum level of support at the presidential election in April, a second round of voting was to be held in June 1985.

The long-standing border dispute with Ecuador over the Cordillera del Cóndor erupted into a war in January 1981. A cease-fire was declared a few days later, under the auspices of the guarantors of the Rio de Janeiro Protocol of 1942, which had awarded the area, affording access to the Amazon river basin, to Peru. The border was eventually reopened in April. Further skirmishes occurred in the border zone in January 1982 and again in January 1983.

Government

Under the 1980 constitution, executive power is vested in the President, elected for a five-year term by universal adult suffrage. The President governs with the assistance of an appointed Council of Ministers. Legislative power is vested in a bicameral National Congress, comprising a Senate and a Chamber of Deputies, also directly elected for five years. The President, the two Vice-Presidents and the 60 Senators are elected nationally. Members of the Chamber are elected by constituencies: 40 members represent the province of Lima while the remaining 140 represent the province of Callao and the other departments.

Defence

Military service is selective and lasts for two years. In July 1984 the armed forces numbered 135,500 men (including 71,000 conscripts): an army of 75,000, a navy of 20,500 (including 2,200 marines) and an air force of 40,000. There are paramilitary forces numbering 26,500 men. Defence expenditure for 1982 was budgeted at 1,345,000m. soles.

Economic Affairs

Agriculture, forestry and fishing together employed 37.4% of the working population in 1981, but contributed only 14% of

Peru's gross domestic product (GDP) in 1983. The principal crops are sugar cane, potatoes, maize, rice, other cereals, cotton and coffee. The cultivation of coca for the production of cocaine, an illicit drug, earns an estimated US $3,000m. per annum. Revenue from exports of coca is believed to exceed that of legal exports. In 1981 an agreement was signed with the USA to eliminate coca planting over an area of 60,000 ha and to replace it with oil palms. Livestock is raised, particularly in the mountains. Sugar exports, suspended in 1979, were resumed in 1982. In 1981 about 80% of agricultural enterprises were operating at a loss as selling prices remained stagnant. In 1983 agricultural production was severely affected by heavy rains and flooding in northern Peru, landslides in central Peru and drought in Puno and the southern cities. Production fell by more than 12% in 1983, and damage to crops and revenue was estimated to be US $900m. The annual output of raw sugar declined from 613,000 metric tons in 1982 to 446,000 tons in 1983, but was expected to reach 600,000 tons in 1984. The potato harvest fell from 1.8m. tons in 1982 to less than 1.2m. tons in 1983, but was expected to be 1.4m. tons in 1984. Production of paddy rice was expected to increase from 791,000 tons in 1983 to 850,000 tons in 1984. The IDB and USAID have granted loans to Peru to assist with rehabilitation and reconstruction projects. A pilot jungle development project, involving rotational agro-forestry, is planned on a site covering 3m. ha in Pichis-Palcazu.

Fishing is an important activity, and Peru's catch was formerly the largest in the world. Fishing for anchoveta, previously the main species caught by Peruvian fishing boats, was virtually suspended in 1976, on account of depleted stocks, but resumed in 1982, when abundant stocks were reported. Emphasis has been placed on increasing the amount of fish for human consumption rather than for the more wasteful production of fishmeal and oil. The total catch increased from 2.7m. metric tons in 1981 to 3.4m. tons in 1982. In 1981 Peru's production of canned fish doubled, and there were 70 canning plants in the country. However, the sudden return of the warm-water current (known as El Niño) to the coastal waters devastated the fishing industry in 1983. Total catch for the year declined to 1.4m. tons, while exports of fishmeal earned only $79.3m., compared with $202.4m. in 1982.

Peru has extensive deposits of minerals, including copper, silver, petroleum, iron ore, coal, phosphates and potash. Peru became the world's fourth largest copper exporter in 1977, and is the fourth largest producer of silver. In 1983 the mining sector contributed about 8% of GDP and 39% of foreign exchange earnings. Mining output increased by 10% in 1982. The Caramarquilla zinc refinery was completed in 1981, and the Cobriza copper mine was expected to reach full production in October 1982. Mine production of copper declined from 369,000 metric tons in 1982 to 336,000 tons in 1983, but output was expected to increase to 374,300 tons in 1984. In 1983 the Government announced that it planned to increase annual silver production from 4.2m. troy oz to 6.9m. oz. In 1984 the Government announced the discovery of extensive deposits of uranium in the department of Puno. A new gold mine at Aurifera Cayara was due to start operations in mid-1984.

Peru has proven reserves of 707m. barrels of crude petroleum, and the petroleum industry is controlled by a state agency, Petroperú, following the nationalization of Gulf Oil's assets in 1975. Peru's average output of petroleum declined from 200,000 barrels per day (b/d) in 1981 to 171,700 b/d in 1983. By May 1984 output had increased to 185,000 b/d. The Nor-Peruano pipeline, extending 852 km (529 miles) across the Andes mountains and with a capacity of 200,000 b/d, was completed in 1977, and further pipelines from the oilfields of the north-east became operational in 1978. In 1976 foreign oil companies were allowed to explore in Peru for the first time since 1973 and, following the introduction of attractive new oil investment regulations in 1981, agreements were made between Petroperú and three major foreign companies to carry out further exploration and development. The northern coastal oilfields are to be rehabilitated at an estimated cost of $65m. In 1984 the petroleum industry suffered from a lack of new exploration. Peru must maintain production levels at 180,000 b/d in order to meet its domestic demand. The energy sector needs considerable development, as nearly 75% of the population are without electricity. Peru's exploitable hydroelectric potential is estimated at 58,000 MW. The $500m. Mantaro project, to transfer water from the River Amazon to the River Rimac to meet Lima's water requirements and to provide electricity, which was due to begin in 1984, may be abandoned on account of the economic crisis.

The output of the manufacturing sector declined by 2.3% in 1982, and was expected to contract by a further 5% in 1983. Widespread bankruptcies were anticipated in the sector during 1983. Foreign competition was affecting domestic production of buses and lorries. Several vehicle assembly units were working short-time, and Volvo suspended operations altogether. US import tariffs were expected to reduce textile exports. The construction sector expanded by 2.3% in 1982, but declined by 21.3% in 1983.

The economy has suffered seriously since 1975 because of the fall in value of Peru's exports, an increase in imports and the extremely costly nationalization programme which was implemented by the left-wing military Government. A fall in the price of minerals reduced export revenue by 75% between 1980 and 1982. Non-traditional exports fell by 30% in 1981. A lowering of tariffs caused an influx of cheap imported goods in 1981. There was a current deficit of US $1,728m. on the 1981 balance of payments, compared with a surplus of $62m. in 1980. A three-year extended facility of $700m. was agreed with the IMF in March 1982, conditional on a reduction in the budget deficit from 7% of GDP in 1981 to 4.2% in 1982. Many development projects were postponed, food subsidies were removed and taxes increased. Despite incentives offered by the Government, foreign companies showed little interest in investment. By June 1982 the sol was depreciating at 5.6% per month, increasing the cost of debt servicing, which represented 52% of export earnings in 1981. A record number of loans were contracted in 1982.

In 1983 high interest rates on Peru's external debt of $12,800m., combined with adverse weather conditions, resulted in a crisis for the Peruvian economy. The impact of the warm-water current caused damage amounting to an estimated 5% of gross national product in 1983. Peru's GDP, measured in constant prices, rose by 0.9% in 1982, but declined by 11.8% in 1983. The average annual rate of inflation increased from 64.4% in 1982 to 111.2% in 1983. Under-employment was believed to affect 60% of the labour force. Real wages declined by 25%. During 1983 the value of the sol depreciated by 56.3% against the US dollar.

As a result of the sharp decline in the economy, Peru was unable to meet the targets of its $700m. 'extended facility' with the IMF. Payment of credits amounting to $460m. was delayed by the IMF, the World Bank and other commercial bank creditors. In April 1984, however, Peru reached agreement with the IMF on further funding of $340.9m., conditional upon a reduction in the budget deficit of the public sector to 3.8% of GDP in 1984, compared with 10.3% in 1983.

As a result of the sharp decline in the economy, Peru was unable to meet the targets of its $700m. 'extended facility' with the IMF. Payment of credits amounting to $460m. was delayed by the IMF, the World Bank and other commercial bank creditors. In April 1984, however, Peru reached agreement with the IMF on further funding of $340.9m., conditional upon a reduction in the budget deficit of the public sector to 3.8% of GDP in 1984, compared with 10.3% in 1983. In May it was reported that the Government was divided over the terms of the agreement stipulated by the IMF, which were regarded by some as too severe. Following the disclosure that Peru would be unable to meet the economic targets established by the IMF for 1984, in December the IMF suspended the disbursement of further credits to Peru. Although the Government planned to resume talks with the IMF in January 1985, it was thought unlikely that an agreement on additional financing would be reached before the general elections in April 1985. In January Peru commenced payment of $52m. in overdue interest to commercial bank creditors. At the beginning of 1985 Peru was five months in arrears in interest payments on its foreign debt of $12,600m.

Peru is a member of ALADI (see p. 171), the Andean Group (p. 95), SELA (p. 218), the OAS (p. 191) and the IDB (p.156).

Transport and Communications

Transport is made difficult by the terrain, and internal air services are an important means of travel. There were 3,877 km

of railways in 1983 and 56,940 km of roads in 1976. The road system is centred on the 3,400 km-long Peruvian section of the Pan-American Highway, which is crossed by the Trans-Andean Highway, running from Lima. A new 480-km road, part of the Trans-Andean Highway, connects Lima and Callao with the headwaters of the River Amazon. There are plans to extend the Central and Southern railways. European shipping lines call regularly at Peruvian ports, the chief of which is Callao. Three domestic airlines provide internal and international services, while a number of foreign airlines also serve Peru.

Social Welfare

Social insurance is compulsory, and benefits cover sickness, disability and old age. There are separate systems for wage-earners and salaried employees. Labour legislation guarantees conditions of employment. A new social security pension law, introduced in 1974, established a single unified scheme for all employees. An emergency health care plan, implemented in 1981, included the inauguration of a nutrition fund to help young and expectant mothers, and the construction of 100 health centres in rural areas and shanty towns. Spending on health accounts for about 4% of government expenditure. In 1977 Peru had 437 hospital establishments, with a total of 29,934 beds, and in 1979 there were 11,682 physicians.

Education

Reforms that were introduced after the 1968 revolution have instituted a three-level educational system. The first is for children up to six years of age in either nurseries or kindergartens. The second level, basic education, is free and, where possible, compulsory between six and 15 years of age. Primary education lasts for six years. Secondary education, beginning at the age of 12, is divided into two stages, of three and two years respectively. Total enrolment at primary and secondary schools in 1980 was equivalent to 88% of all school-age children. Higher education includes the pre-university and university levels. There is also provision for adult literacy programmes and bilingual education. In 1972 adult illiteracy averaged 27.5% (males 16.7%; females 38.2%), but in rural areas the rate was 50.9%. Facilities are still limited but great emphasis is being laid on improving and extending the educational system. There are 25 national and 10 private (two Catholic) universities.

Tourism

Tourism is centred around Lima, with its Spanish colonial architecture, and Cuzco, with its pre-Inca and Inca civilization, notably the 'lost city' of Machu Picchu. Lake Titicaca, lying at an altitude of 3,850m above sea-level, and the Amazon jungle region to the north-east also form popular resorts, and tourist authorities plan to develop fishing, trekking and mountaineering holidays. In 1983 Peru received 273,324 foreign visitors.

Public Holidays

1985: 1 May (Labour Day), 29 June (SS Peter and Paul), 28, 29 July (Independence), 30 August (St Rose of Lima), 8 October (Battle of Angamos), 1 November (All Saints' Day), 8 December (Immaculate Conception), 25 December (Christmas Day).

1986: 1 January (New Year's Day), 27 March (Maundy Thursday), 28 March (Good Friday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centavos = 1 sol.

Exchange rates (31 December 1984):
£1 sterling = 6,601.64 soles;
US $1 = 5,695.98 soles.

Directory

The Constitution

A new Constitution was drafted by a Constituent Assembly, elected for the purpose on 18 June 1978 and dissolved after its completion. The Constitution was adopted on 12 July 1979 but was not signed by left-wing members of the Assembly. It came into force on 28 July 1980. The main provisions of the Constitution are summarized below:

THE EXECUTIVE POWER

Executive power is vested in the President, elected for a five-year term by universal adult suffrage. The successful presidential candidate must obtain at least 36% of the vote, and a second round of voting is held if necessary. The President has power to submit draft bills, to review laws drafted by Congress and, if delegated by Congress, to enact laws himself. He appoints a Council of Ministers and can dissolve the Chamber of Deputies in certain circumstances.

THE LEGISLATIVE POWER

The constitution provides for a bicameral Congress elected for a five-year term by universal adult suffrage. The Senate contains 60 members elected on a regional basis, and the former Presidents of constitutional Governments as life Senators. The 180 members of the Chamber of Deputies are elected by a system of proportional representation. Congress is responsible for passing the budget, for approving loans and international treaties and for drafting and passing bills. The Chamber of Deputies may question and censure the Cabinet and its individual members.

THE ELECTORAL SYSTEM

All citizens who are more than 18 years of age, including illiterates, are eligible to vote.

THE JUDICIAL POWER

The constitution provides for the establishment of a National Court of the Judiciary, a Ministry of Justice and a nine-member constitutional court.

The constitution states that 'the economic order of the republic is based on the principle of social justice, which recognizes work as the main source of wealth and as the means of self-realization of human beings'. The state promotes economic and social development by raising productivity, using resources rationally and distributing income justly. Private initiative is allowed within the framework of a social market economy, but monopolies, oligopolies, hoarding and restrictive practices are expressly forbidden.

Clauses abolishing the death penalty, limiting the jurisdiction of military tribunals and recognizing certain human and political rights, including the right to strike, were immediately effective.

The Government

HEAD OF STATE

President: Fernando Belaúnde Terry (sworn in 28 July 1980).
First Vice-President: Dr Fernando Schwalb López-Aldana.
Second Vice-President: Dr Javier Alva Orlandini.

The Press

DAILIES

The press was nationalized in 1974 and returned to private ownership in 1980, although all newspapers were in severe financial straits. In 1981 Congress introduced legislation providing for compensation payable to newspaper companies for the deterioration of their capital stock during the six-year closure.

Pardo 275–279, Lima 18; tel. 479984; telex 25301; f. 1979; to offer technical assistance to exporters, organizes Peruvian participation in trade fairs abroad and seeks out new export markets through its promotion offices in several countries; Pres. Leslie Pierce; Gen. Man. María Jesús Hume.

Instituto Nacional de Planificación: Calle Siete 229, Rinconada Baja, La Molina, Apdo 2027, Lima 1; tel. 358141; f. 1962; national planning institute; Head Edgardo Quintanilla Quintanilla.

Proinversión: Lima; f. 1981; agency to supervise public investment projects; Pres. Roberto Dañino; Exec. Dir Drago Kisic.

State Corporations

The 1980–85 economic programme of the new civilian Government plans further denationalization of the economy; several nationalized enterprises will become autonomous limited liability companies.

Centromin SA (Empresa Minera del Centro del Perú): Avda Javier Prado Este cuadra 21 San Borja, Casilla 2412, Lima 1; tel. 356070; telex 20009; f. 1974; mining corporation; Exec. Pres. Ing. Félix Remy Alvarez Calderón; Gen. Man. Ing. Alfonso Zuzunaga.

Corpac (Corporación Peruana de Aeropuertos y Aviación Comercial, SA): Aeropuerto Internacional Jorge Chávez, Avda Elmer Faucett, Lima; tel. 529570; telex 26055; commercial aviation; Pres. Lt-Gen. Ricardo Maertens Lorente; Gen. Man. Ing. Jorge Basurto.

Electroperú: Centro Cívico, Paseo de la República 144, Lima 1; tel. 310664; telex 25680; electricity; Exec. Pres. Ing. Eduardo Caillaux Angulo; Gen. Man. Humberto Zelaya Sotomayor.

Enci (Empresa Nacional de Comercialización de Insumos): Bernardo Monteagudo 210, Lima 17; tel. 629049; telex 25892; f. 1974; controls the import, export and national distribution of agricultural and basic food products; Exec. Pres. Ing. Ismael Benavides de la Quintana; Gen. Man. Eduardo de la Rosa Cárdenas.

Entelperú (Empresa Nacional de Telecomunicaciones SA): Las Begonias 475, San Isidro, Apdo 2600, Lima 27; tel. 423553; telex 25522; f. 1969; telecommunications; Pres. Julio Jiménez Castro; Gen. Man. Carlos Chian Chong.

Epsep (Empresa Peruana de Servicios Pesqueros): Avda Javier Prado Este 2465, 4°, San Luis, Lima 30; tel. 362630; telex 25498; edible fish; Pres. Antonio Hudtwalcker Texeira; Gen. Man. Antonio Romano Thantawatae.

Minero Perú (Empresa Minera del Perú): Bernardo Monteagudo 222, Apdo 4332, Lima 17; tel. 620740; telex 25598; f. 1970; state-owned mining company; Pres. Ing. César Jaime Fernández; Gen. Man. Raúl Otero Bossano.

Minpeco (Minero Perú Comercial): Avda Javier Prado Este esq. Avda Aviación 2401, 6°–15°, Urb. San Borja, Casilla 5876, Lima 41; tel. 413591; telex 20015; f. 1976 as the state mining marketing agency to be responsible for the sale of non-traditional mining products; in 1980 it was announced that Minpeco was to lose its monopoly; Pres. Dr Alfonso Brazzini; Gen. Man. Dr Martín Bustamante Moreyra.

Pescaperú (Empresa Nacional de Pesca): Avda Javier Prado Este 2465, San Luis, Lima 30; Apdo 2881, Lima 100; tel. 363630; telex 25601; f. 1973; took over Epchap in 1979; fishmeal and fish processing; Pres. Federico Uranga Bustos.

Petroperú (Empresa de Petróleos del Perú): Paseo de la República 3361, San Isidro, Apdo 3126/1081, Lima 27; tel. 411919; telex 20303; f. 1969; petroleum; Pres. Dr Fernando Zúñiga y Rivero; Gen. Man. Ing. Augusto Morales Zevallos.

Siderperú (Empresa Siderúrgica del Perú): Avda Tacna 543, 12°, oficina 121, Lima 1; tel. 283450; telex 20270; f. 1958; iron and steel; Pres. Neme Mohanna Manzur; Gen. Man. Dr Antonio Martínez Gonzáles.

Other state corporations include **Enapuperú** (Ports), **Enata** (Tobacco), **Endepalma** (Palm products), **Fertiperú** (Fertilizers) and **Hierroperú** (Iron ore mining).

EMPLOYERS' ASSOCIATIONS

Asociación Automotriz del Perú: Dos de Mayo 299, Apdo 1248, Lima 27; f. 1926; association of importers of motor cars and accessories; 360 mems; Pres. Alejandro Arias Bellido; Gen. Man. Luis E. Cáceres.

Asociación de Ganaderos del Perú (Association of Stock Farmers of Peru): Pumacahua 877, 3°, Jesús María, Lima; f. 1915; Gen. Man. Ing. Miguel J. Fort.

Comité de Minería de la Cámara de Comercio e Industria de Arequipa: Casilla 508, Arequipa; mining association; Pres. F. Ch. Willfort.

Instituto Peruano del Café: f. 1965; representatives of government and industrial coffee growers.

Sociedad de Industrias: Pres. Ernesto Lanata.

Sociedad Nacional de Minería y Petroleo: Nicolás de Piérola 917, Apdo 2984, Lima; tel. 276556; f. 1940; Pres. Luis Picasso Perata; Gen. Man. Javier Barco Saravia; mine owners' association; 70 mems.

Sociedad Nacional de Pesquería (SNP): Lima; f. 1976; private sector fishing interests.

TRADE UNIONS

The right to strike was restored in the Constitution of July 1979. In 1982 the Government recognized the right of public employees to form trade unions.

Frente Sindical Democrático (FSD): Lima; f. 1980; comprises:

Central de Trabajadores de la Revolución Peruana (CTRP): Lima.

Confederación General de Trabajadores del Perú (CGTP): Plaza 2 de Mayo 4, Lima; communist-led; affiliated to the PCP; Pres. Isidoro Gamarra Ramírez; Sec.-Gen. Valentín Pacho.

Confederación Nacional de Trabajadores (CNT): Lima; affiliated to the PPC.

Confederación de Trabajadores Peruanos (CTP): Lima; affiliated to APRA; Gen. Sec. Julio Cruzado Ezcurra.

Federación de Bancarios (FEB) (Union of Bank Employees): Leader Antonio Zúñiga.

FNTMMP (Federation of Peruvian Mine-workers): 60,000 mems.

Movimiento de Trabajadores y Obreros de Clase (MTOC). There are a number of independent unions including: Comité para la Coordinación Clasista y la Unificación Sindical, Confederación de Campesinos Peruanos (CCP; Sec.-Gen. Andrés Luna Vargas), Confederación Nacional Agraria (Pres. Felipe Humán Yayahuanca).

Confederación Nacional de Comunidades Industriales (CONACI): co-ordinates worker participation in industrial management and profit-sharing.

Transport

RAILWAYS

In 1983 there was a total of 3,877 km of track. A programme to develop a national railway network (Sistema Nacional Ferroviario) is under way, aimed at increasing the length of track to about 5,000 km initially. The Government also plans to electrify the railway system and extend the central and southern railways.

Ministerio de Transportes y Comunicaciones: Avda 28 de Julio, Lima; tel. 319206; telex 25511; Ministry of Transport and Communications.

Empresa Nacional de Ferrocarriles del Perú (Enafer-Perú): Ancash 207, Apdo 1379, Lima; f. 1972; nationalized; 1,628 km open; Chair. León Escurra; Gen. Man. J. Sarmiento; operates the following lines:

Ferrocarril del Centro del Perú (Central Railway): Ancash 201, Apdo 301, Lima; 493 km open; Man. A. Soto H.

Ferrocarril del Sur del Perú Enafer SA (Southern Railway): Avda Tacna y Arica 200, Apdo 194, Arequipa; tel. 215350; telex 51071; 1,167 km open; also operates steamship service on Lake Titicaca; Man. A. Rivera.

Tacna–Arica Ferrocarril (Tacna–Arica Railway): Avda Albarracín 484, Tacna; 62 km open.

Empresa Minera del Centro del Perú—División Ferrocarriles (fmrly Cerro de Pasco Railway): Augusto N. Wiese 891, Apdo 2412, Lima 1; tel. 275210; telex 20009; 212 km; Supt Cyril Kocerha V.

Ferrocarril Pimentel: Pimentel, Chiclayo; 56 km open; cargo services only; Pres. R. Montenegro; Man. Luis de la Piedra Alvizuri.

Private Railways

Ferrocarril Ilo–Toquepala–Cuajone: Apdo 2640, Lima; 219 km open; owned by the Southern Peru Copper Corporation for transporting copper only; Man. H. R. Shipes.

Ferrocarril Supe–Barranca–Alpas: Barranca; 40 km open; Dirs Carlos García Gastañeta, Luis G. Miranda.

ROADS

In 1976 there were 56,940 km of roads in Peru, of which 5,949 km were asphalted and 11,929 km surfaced. The Pan-American Highway runs southward from the Ecuadorean border along the coast to Lima and the 800 km. Trans-Andean Highway runs from Lima to Pucallpa on the River Ucayali via Oroya, Cerro de Pasco, and Tingo María.

SHIPPING

Most trade is through the port of Callao but there are seven deep-water ports in northern Peru, including Salaverry, Pacasmayo and Paita, and four in the south, including the iron ore port of San Juan. New river ports at Pucallpa and Yurimaguas are under construction, aimed at improving communications between Lima and Iquitos. There are plans to construct a naval base at Chimbote.

Empresa Nacional de Puertos (Enapuperú): Terminal Marítimo del Callao, Edif. Administrativo 3°, Apdo 260, Callao; government agency administering all coastal, river and lake ports; Chair. Capt. Jorge Arnillas de la Cotera.

Asociación Marítima del Perú: Pasaje S. Acuña 127, Of. 805, Lima; f. 1957; association of 33 international and Peruvian shipping companies; Pres. Luis Felipe Villena Gutiérrez.

Comisión Nacional de Marina Mercante: Ministerio de Marina, Avda Salaverry s/n, Jesús María, Lima; f. 1962; promotes the development of the merchant navy; Pres. Minister of the Navy; Sec.-Gen. Capt. Carlos Badani Souza Peixoto.

Compañía Peruana de Vapores: Gamarra 680, Chucuito, Casilla 208, Callao; tel. 659510; telex 20103; f. 1906; government-owned; operates five regular services, to US Gulf, US Atlantic, Far East, Canada, Japan, Chile, Argentina, Brazil, New Zealand, Australia and Europe; Pres. Rodrigo Cepeda Yzaga; Gen. Man. Francisco Calisto Morey; 19 vessels; 319,295 dwt.

Consorcio Naviero del Perú: POB 929, Edif. El Sol, 6°, Paseo de la República 3587, Lima 27; tel. 410565; telex 25396; Man. H. Sommerkamp; 5 vessels.

Naviera Amazonica Peruana, SA: Garcilaso de la Vega 911, 10°, Apdo 72, Lima 1; tel. 311505; telex 25393; Pres. L. Alzamora; Exec. Dir Oscar Ubilluz; 4 vessels.

Naviera Humboldt SA: Edif. Pacífico–Washington, 8°–10°, Natalio Sánchez 125, Lima 1; tel. 314005; telex 20281; f. 1970; cargo services; Exec. Pres. Enrique Agois Paulsen; Man. Dir Adolfo León y León; 6 vessels.

Petróleos del Perú (Petroperú): Paseo de la República 3361, San Isidro, Lima; tel. 411919; telex 21065; f. 1969; Pres. Fernando Zúñiga y Rivero; Gen. Man. Augusto Morales Z.; 7 oil-tankers.

A number of foreign lines call at Peruvian ports.

CIVIL AVIATION

Peru's major international airport is Jorge Chávez Airport near Lima but it is planned to build another international airport, also near Lima, leaving the present airport free for domestic services. Another important international airport is Colonel Francisco Secada Vignetta Airport near Iquitos.

Domestic Airlines

Aeroperú: Jirón Cailloma 818, 11°, Apdo 1414, Lima; telex 25428; f. 1973 as the national airline but in 1981 the Government sold off 65% of the company; operates internal services and international routes to Argentina, Bolivia, Brazil, Chile, Colombia, Ecuador, Mexico, Panama, Venezuela and the USA; Pres. Carlos Velarde Cabello; Gen. Man. Joseph McCormick; fleet: 4 DC-8-62, 1 Boeing 727-100, 1 Boeing 727-100C, 3 Fokker F.28-1000, 2 F.27-600.

Aeronaves del Perú, SA: Avda Bolognesi 139, 16°, Edif. Centro, Ejecutivo Pardo, Apdo 58, Lima 18; tel. 463531; telex 21213; f. 1965; scheduled cargo services between Lima and Miami via Iquitos, Bogotá and Panama City and to Santa Cruz and São Paolo; charter flights; Man. Dir MARILYN F. DE ZANATTI; fleet: 3 DC-8.

Compañía de Aviación Faucett: Jirón Unión 926, Plaza San Martín, Apdo 1429, Lima; telex 25225; f. 1928; scheduled internal passenger services, cargo services to Miami via Panama City and passenger and cargo charters; Pres. LUIS LEÓN RUPP; fleet: 2 Boeing 707-320C, 2 Boeing 727-100C, 1 BAC 1-11/500, 1 BAC 1-11/475.

Tourism

PRINCIPAL TOURIST ORGANIZATIONS

Dirección General de Turismo: Ministerio de Industria, Turismo e Integración, Calle 1 Oeste, Corpac, San Isidro, Lima 27; Dir-Gen. JAVIER RIOS BURGA.

Empresa Nacional de Turismo (Enturperú): Javier Prado Oeste 1358, San Isidro, Lima; f. 1964; Gen. Man. ALBERTO ROMERO F.

Fondo de Promoción Turística (FOPTUR): Avda República de Panamá 3055, 16°, San Isidro, Apdo 100–56, Lima 27; tel. 419778; telex 21363; f. 1979; Chair. and Gen. Man. CARLOS VELARDE E.

Atomic Energy

Instituto Peruano de Energía Nuclear (IPEN): Avda Canadá 1470, Urb. Santa Catalina, La Victoria, Apdo 1687, Lima; is to promote, co-ordinate, advise and represent the development of nuclear energy and its applications in Peru; the first experimental 10 MW reactor at Huarangal was due to begin operation in July 1986; Pres. Gen. JUAN BARREDA DELGADO; Exec. Dir Col JOSÉ MALDONADO.

Centro Superior de Estudios Nucleares (CSEN): Lima; specialist centre for nuclear sciences and technology; uses the research facilities of IPEN and co-operates with various universities; Acad. Adviser Dr BENJAMIN MARTICORENA CASTILLO.

THE PHILIPPINES

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Republic of the Philippines lies in the western Pacific Ocean, east of mainland South-East Asia. The island of Kalimantan (Borneo) is to the south-west, and New Guinea to the south-east. The principal islands of the Philippine archipelago are Luzon, in the north, and Mindanao, in the south. Between these two (which together account for 66% of the country's area) lie the 7,000 islands of the Visayas. The climate is maritime and tropical. It is generally hot and humid, except in the mountains. There is abundant rainfall and the islands are frequently in the path of typhoons. Of the many languages, the most widely spoken in 1960 were Cebuano (by 24.1% of the population), Tagalog (21.0%), Iloco (11.7%) and Panay-Hiligaynon (10.4%). Pilipino, based on Tagalog, is the native national language. English is widely spoken, but the use of Spanish has declined. About 90% of the population are Christians (85% Roman Catholics) and 7% Muslims. The national flag (proportions 2 by 1) has two equal horizontal stripes, of blue and red, with a white triangle, enclosing a gold 'Sun of Liberty' (with eight rays) and three five-pointed gold stars (one in each corner), at the hoist. The capital is Manila, on the island of Luzon.

Recent History

The Philippines became a Spanish colony in the 16th century. During the Spanish–American War, the independence of the Philippines was declared on 12 June 1898 by Gen. Emilio Aguinaldo, leader of the revolutionary movement, with the support of the USA. By the Treaty of Paris, signed in December 1898, Spain ceded the islands to the USA. A new constitution, ratified by plebiscite in May 1935, gave the Philippines internal self-government and provided for independence after 10 years. During the Second World War the islands were occupied by Japanese forces from 1942 to 1945 but, after Japan's surrender, US rule was restored. The Philippines became an independent republic on 4 July 1946, with Manuel Roxas as its first President. A succession of Presidents, under the control of US economic interests and the Filipino land-owning class, did little to help the peasant majority or to curb disorder and political violence.

At elections in November 1965 the incumbent President, Diosdado Macapagal of the Liberal Party, was defeated by Ferdinand Marcos of the Nacionalista Party. Rapid development of the economy and infrastructure followed. President Marcos was re-elected in 1969. His second term was marked by civil unrest and economic difficulties. During the early 1970s there was also an increase in guerrilla activity, by the New People's Army (NPA), the armed wing of the outlawed Communist Party of the Philippines (CPP), in the north of the country, and by the Moro National Liberation Front (MNLF), a Muslim separatist movement, in the south.

In September 1972, before completing his (then) maximum of two four-year terms of office, President Marcos declared martial law in order to deal with subversive activity and to introduce drastic reforms. The bicameral Congress was suspended, opposition leaders were arrested, the private armies of the landed oligarchs were disbanded, stringent press censorship was introduced and Marcos began to rule by decree. A new constitution, proposing that the country be renamed Maharlika (a Tagalog word meaning 'noble'), was approved in November 1972 by a constitutional convention. In January 1973, after discussion by 'citizens' assemblies', the constitution was ratified by President Marcos. It provided for a unicameral National Assembly and a constitutional President, with executive power held by a Prime Minister, to be elected by the Assembly. Pending the full implementation of the constitution, transitional provisions gave the incumbent President (Marcos) the combined authority of the presidency (under the 1935 constitution) and the premiership, without any fixed term of office. Under martial law, the definitive provisions of the new constitution remained in abeyance.

A referendum in July 1973 approved President Marcos's continuation in office beyond his elected term. Another referendum, in February 1975, approved the continuation of martial law, enabling Marcos to rule by decree. A referendum in October 1976 approved the further continuation of martial law and the adoption of constitutional amendments, including a provision for the formation of an interim assembly. In December 1977 a fourth referendum approved another extension of Marcos's presidential term.

Criticism of President Marcos became more widespread after November 1977, when a sentence of death was imposed by a military tribunal on the principal opposition leader, Benigno Aquino, Jr (a former senator), for alleged murder, subversion and the possession of firearms. President Marcos allowed a stay of execution and brought about some relaxation of martial law in 1977. Elections to the interim Batasang Pambansa (National Assembly) were held in April 1978. Opposition parties were allowed to participate but the pro-government Kilusan Bagong Lipunan (KBL or New Society Movement), founded in 1978 by Marcos and former members of the Nacionalista Party, won 151 of the Assembly's 165 elective seats. The Assembly was inaugurated in June, when President Marcos was confirmed as Prime Minister. Martial law remained in force and the President retained the power to legislate by decree. In September 1979 an amnesty for 1,500 political prisoners was announced. Local elections, the first to be held in eight years, took place in January 1980, resulting in sweeping victories for KBL. In May Aquino was released from prison to undergo medical treatment in the USA, where he renewed his opposition to Marcos's regime. During 1980 there were several terrorist attacks and, as a result, Marcos ordered the arrest of 30 opposition figures, including the exiled Aquino.

Negotiations with the MNLF in December 1976 produced a cease-fire agreement, and Marcos agreed to the establishment of an autonomous Muslim region in the south. A referendum in the 13 provinces concerned (only five of which have Muslim majorities) rejected the MNLF plan and violence broke out again in Mindanao and Sulu, escalating into civil war during 1977. Elections were held in Mindanao in May 1979, in an attempt to establish partial autonomy in the region, but they were boycotted by the MNLF, and KBL won an overwhelming victory. Following the elections, regional Legislative Councils were set up in West and South Mindanao. Hostilities intensified again in early 1981, resulting in almost 2,000 deaths in the southern provinces. However, apart from sporadic incidents, by 1984 the MNLF was no longer considered to be a military threat.

In January 1981 martial law was lifted and hundreds of prisoners were freed. However, Marcos retained most of his former powers. A referendum in April approved constitutional amendments which permitted President Marcos to renew his mandate by direct popular vote and to nominate a separate Prime Minister. An Executive Committee, led by the Prime Minister, was formed to take over the powers of the President in the event of his death, incapacity or resignation (among amendments approved by plebiscite in January 1984, the position of Vice-President was restored, to replace the Executive Committee). In June 1981, amid allegations of electoral malpractice, President Marcos was returned to office for a six-year term. In July the Finance Minister, César Virata, was appointed Prime Minister. In April 1982 the United Nationalist Democratic Organization, an alliance of opposition groups, formed an official coalition.

In August 1983 Benigno Aquino, returning to the Philippines after three years' self-imposed exile in the USA, was shot dead on arrival at Manila airport. His alleged assassin, Rolando Galman, was killed immediately by military guards. A five-

member commission of inquiry, nominated by the Government to investigate the assassination, was inaugurated in November 1983. The commission's majority report, published in October 1984, concluded that Aquino's murder had been a military conspiracy and that he had been killed by one of the military guards escorting him at the airport. As a result, 26 people (including one civilian and Gen. Fabian Ver, Chief of Staff of the Armed Forces, as well as two other generals) were formally charged with conspiracy to murder both Aquino and Galman (who had been rejected unanimously as the murderer, as was alleged initially by the Government). Gen. Ver, who was relieved as Chief of Staff in October 1984, was to be tried in a special court.

After Aquino's death, the opposition became united in its criticism of Marcos, and numerous demonstrations against his Government have been held. In spite of a call to boycott the elections to the Batasang Pambansa in May 1984 by some members of the opposition, public participation in the election was high and, after numerous accusations by the opposition of cheating and ballot-rigging by Marcos, the opposition won 59 of the 183 elective seats, compared with 14 in 1978. An estimated 50 to 100 people were thought to have died during the election campaign.

In February 1985 the Government acknowledged officially that the threat from the NPA had become serious, following evidence that its influence had become significantly more widespread, covering large areas of Mindanao, part of northern Luzon island and some of the larger central islands. The military strength of the NPA was thought to be about 20,000 men in 1984. During 1983 and 1984 there was increased violence in the south, and in early 1985, to help government forces to resist the insurgency, the USA announced that it would give more military aid to the Philippines.

While the foreign policy of the Philippines has traditionally been in support of the USA, the Marcos Government moved towards a policy of non-alignment during the 1970s, establishing diplomatic relations with its communist neighbours. In June 1983 a new agreement on the maintenance of the US naval and air bases in the Philippines until 1989 was signed, confirming the Philippines' sovereignty over the base areas and providing for military and economic assistance worth US $900m. The Philippines is a member of ASEAN (see p. 106).

Government

Between 1972 and January 1981 the Philippines was under martial law, and the definitive provisions of the 1973 Constitution (see under Constitution) were not implemented. Transitional provisions gave the incumbent President, Ferdinand Marcos, full executive powers, without any fixed term of office. In January 1981 martial law was lifted, although amendments to the 1973 Constitution, providing for presidential powers to rule by decree, were retained. The President is also Commander-in-Chief of the armed forces and governs with the assistance of a Prime Minister and an appointed Cabinet. The interim Batasang Pambansa (National Assembly), provided for by amendments to the transitional provisions of the Constitution (approved in October 1976), was convened in June 1978. It assumed formal legislative powers in January 1981. A full Batasang Pambansa was elected in May 1984. It has 200 members, of whom 183 were directly elected for a six-year term. Candidates for the remaining 17 seats are appointed by the President. Local government is by 'citizens' assemblies' (Barangays) and 12 regional councils under the Ministry of Local Government.

Defence

The total strength of the armed forces in July 1984 was 104,800, comprising an army of 60,000, a navy of 28,000 and an air force of 16,800. There is also a constabulary of 43,500 and a civil home defence force of 65,000. Defence expenditure for 1985 was an estimated 6,342m. pesos.

Economic Affairs

Agriculture, forestry and fishing employed 52% of the working population but provided only 22% of the country's gross domestic product (GDP) in 1983. The principal exports include coconut oil, copra, timber and sugar. These commodities, however, are vulnerable to fluctuating prices on the world market and to domestic shortages and adverse weather; in 1983 there was a drought as well as serious typhoon damage. The Philippines is the world's largest producer and exporter of coconuts and coconut products, which in 1982 provided 12% of total export earnings. The country supplies more than 70% of world trade in coconut oil. Exports of this commodity declined in value by 24.8% in 1982, owing to depressed prices and a temporary export levy on coconuts, but increased by 28.6% in 1983. Coconut oil is being used increasingly in domestic chemical production and for fuel, in combination with diesel oil, thus reducing the volume available for export. Exports of copra from the Philippines were temporarily banned in 1982 to preserve domestic supply; production was badly hit by drought and typhoons in 1983, and export volume fell dramatically, from 190,000 metric tons in 1982 to 12,000 tons in 1983, causing steep price rises. Following droughts, the already depressed sugar market was supported by foreign sugar supplies in 1983, to enable the Philippines to fulfil export quotas under the terms of the International Sugar Agreement. The country's output of raw sugar was estimated at 2.5 metric tons in 1983, but was expected to fall to 2.1m. tons in 1984, following curbs on production. In 1984, following IMF recommendations, the Government abolished the state sugar-trading monopoly. In December 1984 the world market price for raw sugar fell to its lowest level since 1970.

The Philippines has steadily increased rice yields to achieve near self-sufficiency in this crop, with the help of the Masagana development scheme, which has improved irrigation, fertilizers and research into rice and maize production. The country achieved a small exportable surplus of rice between 1978 and 1982 but, following a long drought in 1982/83, rice imports were again necessary in 1984. The output of paddy rice reached a record 8.2m. metric tons in 1983. Total agricultural output increased by 1.2% in 1984.

Manufacturing accounted for 24.8% of GDP in 1983. The principal industries are food processing, electronic and electrical equipment, chemicals, petroleum refining and textiles. The manufacturing sector recorded growth of 2.2% in 1983 but the continuation of many major projects is now in doubt, owing to the financial crisis.

Copper remains one of the country's largest export earners, while gold and nickel are becoming increasingly important. In 1982, however, most mineral production was badly hit by falling prices, with copper especially depressed, and in 1984 the Government put restrictions on copper exports. Total capacity was increased with the opening of the Leyte copper mines in early 1983.

In 1978 significant deposits of petroleum were confirmed off the island of Palawan, and commercial production began in 1979. However, its contribution to domestic consumption is small, and the Philippines remains heavily dependent on imported petroleum. In 1974 about 90% of total petroleum requirements were imported; by 1982 the figure was 73.5% and the first drop in oil imports was recorded, owing to an ambitious five-year energy programme of conservation and energy substitution, launched in 1981. Locally-produced energy supplied 30.4% of the country's total needs in 1982. In 1983 geothermal energy met 5% of domestic needs. By 1985 geothermal power, coal and hydroelectricity are expected to account for about 16%, 15% and 14% respectively of total energy requirements. A 620-MW nuclear power plant, intended to contribute to local energy requirements, had not opened by early 1984.

The economy suffered dramatically from the political repercussions of the assassination of Benigno Aquino in August 1983. The rate of inflation, which had reached 42% in 1974, fell to an annual average of 12.5% in 1981, of 10.3% in 1982 (as a result of a price stabilization policy) and was only 6.1% in the year to May 1983; however, by October 1984 it had risen to 64%, caused by the extensive flight of capital out of the country immediately after the assassination. Reserves of gold and foreign exchange, which stood at $2,260m. in June 1983, fell to a record low of $247m. in October 1984, recovering to $921m. in December. By October 1983 the Philippines' foreign debt had reached $25,600m., and the Government faced a serious balance-of-payments crisis, following the loss of confidence in its handling of the economy. With no foreign exchange available

to finance the import of raw materials necessary for industry, many local businesses suffered irrevocably; in 1984 2,134 companies had to shut down (of which 195 closed completely), and more than 86,000 employees were laid off (nearly one-half permanently). Following the Philippines' failure to meet repayments of debt principal, due in October 1983, the IMF granted four successive 90-day moratoria. In order to obtain further loans and the rescheduling of its debts, the Government introduced a severe austerity programme. In October 1983, following IMF guidelines, the peso was devalued by 21.4% against the US dollar (it had previously been devalued in June 1983 by 7.3% in an attempt to ease the balance-of-payments deficit). In June 1984 the peso was allowed to 'float', amounting to an effective devaluation of 22.2%. Other measures that were needed to satisfy the IMF's demands included the imposition of limits on the growth of liquidity, the relaxation of exchange controls (from December 1984 banks no longer had to trade at the official exchange rate), changes in taxation, a rise in interest rates and cut-backs in planned budget expenditure in order to meet an IMF target of a budget deficit equivalent to 1.5% of the country's gross national product (GNP).

As a result of these measures, the IMF agreed in October 1984 to a stand-by credit of SDR 615m., enabling the Philippines to obtain fresh loans of $925m., new trade credits worth $3,300m. and the rescheduling of commercial debts of $5,750m. Bilateral debts of $1,100m., owed to a group of international banks, were also rescheduled over a 10-year period. The conditions of the agreement with the IMF included a new tax structure, the 'floating' of the peso, price rises for consumer goods and services (which were expected to raise the rate of inflation for 1984 to about 70%), and liberalization of agriculture and trade.

The Philippines has recorded a deficit on the current account of its balance of payments in every year since 1974. The deficit was $2,215m. in 1981, $3,211m. in 1982, $2,758m. in 1983 and an estimated $1,500m. in 1984. The decline in 1984 was due partly to a fall of about 20% in import costs. Export earnings fell in 1983 for the third successive year, to $4,971m., compared with $5,012m. in 1982. However, the value of imports has been falling since 1982, and in 1983 declined by 2.4% to $7,486m. This contributed to a narrowing of the trade deficit, from $2,655m. in 1982 to $2,512m. in 1983. The Philippines' principal trading partners are the USA and Japan, which in 1983 accounted for 28.3% and 18.3% respectively of total trade. GNP increased by an annual average of 7%, in real terms, during the 1970s, but the growth rate declined to 3.7% in 1981, to 2.7% in 1982 and to 1.3% in 1983. In 1984 GNP fell by an estimated 5.5% in real terms, owing mainly to greatly reduced activity in manufacturing. GNP per head was $658 in 1983.

The 1983–87 Five-Year Plan, which aimed for an annual growth rate of 6.5%, has been made largely redundant by the economic crisis. Following IMF recommendations, an amended plan will put increased emphasis on agriculture, rather than import-substitution industries. As a result, agriculture's share of budget expenditure rose from 18% in 1984 to about 25% in 1985. Public investment has been reduced, and labour-intensive and small-scale projects will receive more encouragement.

Transport and Communications

In December 1982 the Philippines had 154,684 km of surfaced roads. The railway network is principally on the island of Luzon, with 1,028 track-km, and an isolated line of 116 km on Panay Island. Bus services provide the most widely used form of inland transport. Shipping plays a considerable role in carrying passengers and cargo between the islands. There are 94 national and 528 municipal ports. Philippine Airlines maintains domestic and international air services, and there are two major international airports at Manila and Mactan, in Cebu.

Social Welfare

Government social insurance provides cover for retirement and compensation for dependants in cases of loss of life. Employed persons contribute to the scheme from their wages. Public health services, such as inoculation and vaccination, are provided free in the State Dispensaries. In 1981 the Philippines had 1,584 hospitals (of which 487 were government hospitals and 1,097 were privately run), with a total of 74,167 beds. In 1980 there were 6,063 government-employed physicians.

Education

There is free compulsory education up to elementary level, and up to secondary level in some areas. Total enrolment in elementary schools in 1981/82 was 8.5m., while secondary school enrolment was 3.5m. Instruction is in both English and Pilipino. There are 63 universities and over 1,000 colleges. Among the population aged 10 and over, the average illiteracy rate in 1975 was 10.7%. In the 1985 budget 6,149m. pesos were allocated to education.

Tourism

Tourism has become a significant sector of the Philippines' economy. In 1980 the number of foreign visitors exceeded 1m. However, that total declined to 860,550 in 1983. The principal attractions are the warm climate, the tropical setting of the islands and the cosmopolitan city of Manila.

Public Holidays

1985: 1 May (Labour Day), 12 June (Independence Day, anniversary of 1898 declaration), 4 July (Filipino-American Friendship Day, anniversary of Independence in 1946), 21 September (Thanksgiving Day, Barangay Day), 1 November (All Saints' Day), 30 November (Bonifacio Day, National Heroes' Day), 25 December (Christmas Day), 30 December (Rizal Day).

1986: 1 January (New Year's Day), 27 March (Maundy Thursday), 28 March (Good Friday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centavos = 1 Philippine peso.

Exchange rates (31 December 1984):
£1 sterling = 22.901 pesos;
US $1 = 19.759 pesos.

Directory

The Constitution

A new Constitution for the Republic of the Philippines was ratified by the President on 17 January 1973. It was amended in October 1976, April 1981 and January 1984.

Note: When President Marcos proclaimed the ratification of the new constitution, he also announced the suspension of the interim Batasang Pambansa (National Assembly), originally envisaged by the constitution, and the continuation of martial law, in force since September 1972. In a referendum held in July 1973 a majority voted that President Marcos should continue in office after 1973 and complete the reforms he had initiated under martial law, and in further referenda, held in February 1975 and October 1976, a majority voted that martial law should be continued. The October 1976 referendum also approved amendments to the transitional provisions of the constitution. In January 1981 martial law was lifted, although Marcos retained many of his former powers to rule by decree. In April 1981 and January 1984 the constitution was amended after a national plebiscite. The following is a summary of the main features of the constitution.

BASIC PRINCIPLES

Sovereignty resides in the people; defence of the State is a prime duty and all citizens are liable for military or civil service; war is renounced as an instrument of national policy; the State undertakes to strengthen the family as a basic social institution, promote the well-being of youth, maintain adequate social services, promote social justice, assure the rights of workers and guarantee the autonomy of local government.

Other provisions guarantee the right to life, liberty and property, freedom of abode and travel, freedom of worship, freedom of speech, of the press and of petition to the Government, the right of habeas corpus except in cases of invasion, insurrection or rebellion, and various rights, before the courts.

THE PRESIDENT

The President is elected by direct universal suffrage for a six-year term; he shall be Head of State and Chief Executive of the Republic and shall formulate the guidelines of national policy; he ceases to be a member of the Batasang Pambansa; he must be at least 50 years of age; he may not receive any emolument other than that entitled to as the President; he can dissolve the Batasang Pambansa, call general elections and, when appropriate, recommend and accept the resignation of the Cabinet; during his tenure he shall be immune from lawsuit. The President is Commander-in-Chief of the armed forces; he may suspend the writ of habeas corpus and proclaim martial law.

THE BATASANG PAMBANSA

Legislative power is vested in the Batasang Pambansa, which shall be composed of not more than 200 members; members are elected for six years and must be natural-born citizens, at least 25 years of age, literate and registered voters in their district. All citizens of the Philippines over the age of 18 years, not disqualified by law, resident in the Philippines for at least one year and in their voting district for at least six months, are eligible to vote.

The first regular elections were held on the second Monday of May 1984, and will be held every six years thereafter; the Batasang Pambansa convenes on the fourth Monday of July for its regular session; it elects a Speaker from among its members; it elects the Prime Minister from among its members on the nomination of the President.

Various provisions define the procedures of the Batasang Pambansa and the rights of its members, among them that the Batasang Pambansa may withdraw its confidence in the Prime Minister by a majority vote; that no bill shall become law until it has passed three readings on separate days; that every bill passed by the Batasang Pambansa shall be presented to the President for approval, upon the withholding of which, the Batasang Pambansa may reconsider a bill and, by a majority vote of two-thirds, enable it to become law.

THE PRIME MINISTER AND CABINET

Executive power is exercised by the President with the assistance of the Cabinet; the Prime Minister is nominated by the President, and elected from the members of the Batasang Pambansa by a majority vote; he is head of the Cabinet. The President may nominate a Deputy Prime Minister who shall be elected by the Batasang Pambansa. The President shall appoint the members of the Ministries, and the Prime Minister shall have supervision over them.

The position of Vice-President shall be restored to replace the President in the event of his demise, incapacity or resignation, until the election of a new President.

THE JUDICIARY

The Supreme Court is composed of a Chief Justice and 14 Associate Justices, and may sit *en banc* or in two divisions.

LOCAL GOVERNMENT

The Batasang Pambansa shall enact a local government code which shall establish a more responsive and accountable local government structure.

CONSTITUTIONAL COMMISSIONS

These are the Civil Service Commission, the Commission on Elections and the Commission on Audit. The Commission on Elections enforces and administers all laws relating to the conduct of elections and registers and accredits political parties.

THE NATIONAL ECONOMY

The Batasang Pambansa shall establish a National Economic and Development Authority which shall recommend co-ordinated social and economic plans to the Batasang Pambansa and all appropriate governmental bodies. Various provisions relating to the public interest in economic matters are set forth.

AMENDMENTS

Amendments and revisions to the constitution may be proposed by the Batasang Pambansa upon a vote of three-quarters of its members, or by a constitutional convention. Any amendment or revision is valid when ratified by a majority of votes cast in a plebiscite.

The Government

HEAD OF STATE

President: Ferdinand Edralin Marcos (inaugurated 30 December 1965; re-elected November 1969, term of office extended by referendum July 1973; re-elected June 1981).

Legislature

BATASANG PAMBANSA

Under the amended transitional provisions of the 1973 constitution, an interim Batasang Pambansa, with some members elected and some appointed by the President, was convened in June 1978. A full Batasang Pambansa was elected in May 1984.

Speaker: Nicanor Yniguez.

General Election, 14 May 1984

	Seats
New Society Movement	114
Coalition Opposition*	59
Independents	10
Representatives of sectoral organizations†	17
Total	200

* Comprises Nacionalista Party (Roy faction), PDP-Laban, Mindanao Alliance, Concerned Citizen Aggrupation, Pinahig-usa, Pusyon Visaya.

† Appointed by the President.

Political Organizations

After the proclamation of martial law in September 1972, no political parties were authorized to operate. The ban was lifted in January 1978 and elections for an interim Batasang Pambansa were held in April. Taking part were the New Society Movement, Lakas Ng Bayan—Laban and Pusyon Visaya Party. All political parties were allowed to take part in the general election of May 1984, following the lifting of martial law in 1981.

Labour Party of the Philippines: f. October 1983 by labour and peasant organizations; Chair. of Exec. Cttee Maniloto Paran, Joseph Strachan.

Mindanao Alliance: Cagayan de Oro, Mindanao; f. 1978; supports economic development of Mindanao and the protection of civil and human rights; Leader Gov. Homobono Adaza.

New Society Movement (Kilusan Bagong Lipunan—KBL): f. 1978 by supporters of the fmr Nacionalista Party and the Marcos govt; Leader Ferdinand E. Marcos.

Union for Democracy and Liberty: f. 1979; Leader Jovito Salonga.

United Nationalist Democratic Organization (UNIDO): f. 1982, regd as a political party 1983; coalition of 12 opposition groups; Pres. Salvador P. Laurel; Sec.-Gen. Abraham Sarmiento; includes the following political parties:

Lakas Ng Bayan—Laban (People's Power Movement—Fight): f. 1978; opposition grouping comprising many mems of the fmr Liberal Party and other anti-Marcos elements, led by Benigno S. Aquino, Jr until his assassination in August 1983; boycotted the 1980 provincial, municipal and local elections in protest against martial law; merged with the PDP in February 1983; Chair. Lorenzo Tanada.

Liberal Party: Manila; f. 1946; represents the centre-liberal opinion of the fmr Partido Nacionalista, which split in 1946; boycotted the 1980 provincial, municipal and local elections in protest against martial law; Pres. Sen. Gerardo Roxas.

Nacionalista Party: Manila; f. 1907; represents the right wing of the fmr Partido Nacionalista, which split in two in 1946; split into two factions in 1981; Pres. (majority faction) José Laurel; Pres. (minority faction) José Roy.

Judicial System

Supreme Court: Composed of a Chief Justice and 14 Associate Justices. The Court sits *en banc* and in two divisions. Cases involving the constitutionality of a treaty, law or executive agreement are decided *en banc*. To declare a treaty, law or executive agreement unconstitutional, or to impose the death penalty, at least 10 Justices must concur. In other cases heard *en banc*, the concurrence of at least eight Justices is required for a decision. Cases heard by division are decided by the concurrence of at least five Justices; if the required number is not obtained, the Chief Justice sits with the division concerned.

The Court's powers include the supervision of the administration of all courts and their personnel; the promulgation of rules on pleading, practice and procedure in all courts; admission to the practice of law and the integration of the Bar which, however, may be repealed, altered or supplemented by the Batasang Pambansa.

In August 1981 the Court of Appeals and lower courts were abolished and replaced by special trial and new appeal courts. There are 13 Regional Trials Courts, created to replace the Courts of First Instance. President Marcos was given the power to appoint new judges.

Chief Justice: Enrique M. Fernando.

Intermediate Appelate Court: Consists of a Presiding Appelate Justice and 49 Associate Appelate Justices.

Presiding Justice: Ramon Gaviola.

Religion

Over 90% of the population are Christians, predominantly Roman Catholics. There is an Islamic community, and an estimated 43,000 Buddhists. Animists and persons professing no religion number approximately 400,000.

Imam: Hadji Madki Alonto, Governor of Lanao del Sur.

BAHÁ'Í FAITH

National Spiritual Assembly: POB 4323, Manila; tel. 500404; mems resident in 7,344 localities.

The Press

The Philippines had a large and diverse press, with about 15 metropolitan dailies and 175 weeklies, before the imposition of martial law by President Marcos in September 1972, when all newspapers and radio stations were shut down. A number of reporters, editors and publishers were arrested, and before publication could be resumed the government's Mass Media Council (MMC) had to screen staff and give its authorization. The strict controls on content and comment were gradually relaxed, and the MMC was replaced in May 1973 by a Media Advisory Council (MAC), composed of representatives of the various media. In November 1974 controls were further relaxed with the abolition of the MAC and its replacement by the all-civilian Philippine Council for Print Media (PCPM). In January 1981 this too was abolished, coinciding with the lifting of martial law.

Finance

(cap. = capital; p.u. = paid up; dep. = deposits; m. = million; brs = branches; amounts in pesos)

BANKING

The Central Bank of the Philippines supervises the entire financial system. The structure consists of: (1) the banking system: commercial banks, thrift banks (savings and mortgage banks, stock savings and loan associations and private development banks), regional unit banks (rural banks), and specialized and unique government banks; (2) non-bank financial intermediaries: investment houses and companies, securities dealers, financing com-

panies, fund managers, pawnshops and lending investors. In 1984 there were 36 commercial banks, 45 private development banks, eight savings banks and 13 investment banks. Only four foreign banks are permitted by law to operate full branches. Legislation passed in September 1976 permitted the establishment of offshore banks in the Philippines. By mid-1982 25 foreign banks had been authorized to operate offshore banking units.

Rural Banks

Small private banks established with the encouragement and assistance (both financial and technical) of the government in order to promote and expand the rural economy in an orderly manner. Conceived mainly to stimulate the productive capacities of small farmers, small merchants and small industrialists in rural areas, and to combat usury, their principal objectives are to place within easy reach and access of the people credit facilities on reasonable terms and, in co-operation with other agencies of the government, to provide advice on business and farm management and the proper use of credit for production and marketing purposes. The nation's rural banking system consisted of 1,156 units in December 1984.

Trade and Industry

CHAMBERS OF COMMERCE AND INDUSTRY

Philippine Chamber of Commerce and Industry: Chamber of Commerce Foundation Bldg, Magallanes Drive, Intramuros, Metro Manila 2801; tel. 403082; telex 27181; f. 1977 by merger of the Chamber of Commerce of the Philippines and the Philippine Chamber of Industries; Pres. FELIX MARAMBA, Jr; Dir-Gen. QUINTIN S. DOROMAL.

Chamber of Agriculture and Natural Resources of the Philippines: 5th Floor, Rico House, Amorsolo St, Legaspi Village, Makati, Metro Manila; Pres. ALFREDO MONTELIBANO.

Chamber of International Trade: Room 904, L&S Bldg, No. 1, 1414 Roxas Blvd, Ermita, Metro Manila; Pres. RAMON P. TAMBUNTING.

European Chamber of Commerce of the Philippines Inc.: POB 763, 6th Floor, Jardine Davies Bldg, 222 Sen. Gil J. Puyat Ave, Makati, Metro Manila; tel. 854747; telex 45170; f. 1978; 185 mems; Pres. H. J. SCHUMACHER; Vice-Pres A. GILMOUR, J. A. M. ROMME.

Federation of Filipino-Chinese Chambers of Commerce and Industry Inc.: POB 23, 6th Floor, Federation Center, Muelle de Binondo St, Metro Manila; Pres. RALPH NUBLA.

STATE TRADING CORPORATIONS

Construction and Development Corpn of the Philippines (CDCP): TFC Bldg, 355 Gil J. Puyat Ave Ext., Makati, Metro Manila; tel. 876061; telex 45538; f. 1966; 90% govt-owned since 1983; Pres. and Chair. ROBERTO V. ONGPIN.

National Steel Corpn: 377 Gil J. Puyat Ave Ext., Makati, Metro Manila; tel. 897061; telex 22523; f. 1974; steel mfrs; Pres. José Ben R. LARAYA; Chair. ROBERTO V. ONGPIN.

Philippine Cement Corpn (Philcemcor): Cocho-Gonzales Bldg, Makati, Metro Manila.

Philippine International Trading Corpn (PITC): Tordesillas St, Salcedo Village, Makati, Metro Manila; tel. 8189801; telex 63745; f. 1973; govt-owned stock corpn to conduct bulk trade in general merchandise, agri-based products, industrial and construction goods, raw materials, semi-finished and finished goods; export services; buying agent; Pres. JAIME C. GONZALEZ.

Philippine Sugar Commission (Philsucom): Quezon City, Metro Manila; f. 1977; govt organization conducting research into, and development and marketing of, sugar; Chair. of Board of Commrs ROBERTO S. BENEDICTO; Vice-Chair. JOSÉ A. UNSON.

Wenagro Industrial Corpn: 92 Mindanao Ave, Quezon City, Metro Manila; producer and exporter of Philippine products; took over Philippine Exporters Trading Corpn (PETCOR) in 1980; Man. Dir FRANCISCO C. WENCESLAO.

DEVELOPMENT ORGANIZATIONS

National Economic and Development Authority (NEDA): Amber Ave, Pasig, Metro Manila; tel. 6931776; f. 1973; central planning and policy formulation body of the Philippines, to ensure the optimum utilization of scarce resources and to increase economic efficiency; Dir-Gen. VICENTE VALDEPEÑAS, Jr.

National Development Co (NDC): Goodland Bldg, 377 Buendia Ave Ext., Makati, Metro Manila; f. 1919; govt-owned corpn engaged in the organization, financing and management of subsidiaries and corpns incl. commercial, industrial, mining, agricultural and other enterprises which may be necessary or contributory to the economic development of the country, including joint industrial ventures with other ASEAN countries; Chair. ROBERTO V. ONGPIN; Gen. Man. ANTONIO L. CARPIO.

Private Development Corpn of the Philippines (PDCP): PDCP Bldg, Ayala Ave, Makati, Metro Manila; f. 1963 with World Bank assistance; assists private enterprise development in the Philippines, especially of capital markets and managerial skills; Chair. ROBERTO T. VILLANUEVA; Pres. VICENTE R. JAYME.

EMPLOYERS' ASSOCIATIONS

Employers' Confederation of the Philippines: Chamber of Commerce Foundation Bldg, Magallanes Drive, Intramuros, Manila 2801; telex 27181; f. 1975; Pres. AURELIO PERIQUET, Jr; Exec. Dir ANTONIO A. INOCENTES.

Filipino Shipowners' Association: Magsaysay Bldg, T. M. Kalaw St, Ermita, Metro Manila; tel. 598662; f. 1950; 33 mems; Pres. MIGUEL A. MAGSAYSAY; Exec. Sec. HERMELO E. CABAUATAN.

Philippine Cigar and Cigarette Manufacturers' Association: Heritage Condominium Bldg, Metro Manila; Pres. RALPH NUBLA.

Philippine Coconut Producers' Federation, Inc: 2nd and 3rd Floors, Lorenzo Bldg, cnr Taft Ave and Vito Cruz, Metro Manila; Pres. MARIA CLARA L. LOBREGAT.

Philippine Copra Exporters' Association Inc: 943 Gabaldon Bldg, J. Llanes Escode St, Ermita, Metro Manila; Pres. MANUEL J. IGUAL.

Philippine Sugar Association: Room 1402, 14th Floor, Pacific Bank Bldg, 6776 Ayala Ave, Makati, Metro Manila; tel. 8151279; f. 1922; 16 mems; Pres. MANUEL ELIZALDE; Exec. Vice-Pres. and Treas. EDGARDO F. Q. YAP.

Pulp and Paper Manufacturers' Association Inc: Room 606, Katigbak Bldg, A. Mabini St, cnr T. M. Kalaw St, Ermita, Manila; f. 1959; Pres. FRANCISCO P. MONGE.

Sugar Producers' Co-operative Marketing Association, Inc: 7th Floor, Kalayaan Bldg, cnr Salcedo and de la Rosa Sts, Makati, POB 3839, Metro Manila; Pres. A. U. BENEDICIO; Sec., Dir CIRO LOCSIN.

Textile Mills Association of the Philippines, Inc (TMAP): Alexander House, 132 Amorsolo St, Legaspi Village, Makati, Metro Manila; f. 1956; 34 mems; Pres. RAMON L. SIY.

Textile Producers' Association of the Philippines, Inc: Rm 513, Downtown Center Bldg, 516 Quintin Paredes St, Binondo, Metro Manila; Pres. ALFREDO ESCAÑO; Exec. Sec. ROBERT L. TAN.

TRADE UNION FEDERATIONS

In 1983 there was a total of 1,659 trade unions registered with the Minstry of Labor and Employment, with about 4.73m. members.

Associated Marine Officers and Seamen's Union of the Philippines (AMOSUP): Seaman's Center, cnr Cabildo and Sta Potenciana Sts, Intramuros, Metro Manila; f. 1960; 23 affiliated unions and 15,000 mems; Pres. GREGORIO S. OCA.

Confederation of Citizens Labor Unions (CCLU): 312 Forum Bldg, Rizal Ave, cnr Lope de Vega St, Sta Cruz, Manila; f. 1951; 49 affiliated unions and 45,766 mems; Pres. LEON O. TY.

Federation of Free Farmers (FFF): 41 Highland Drive, Blue Ridge, Quezon City; f. 1953; 200,000 mems; Pres. JEREMIAS MONTEMAYOR.

Federation of Free Workers (FFW): 2nd and 4th Floors, S. M. Lazo Bldg, cnr J. Nakpil and Taft Ave, Malate, Metro Manila; f. 1950; affiliated to the Brotherhood of Asian Trade Unionists and the WCL; 390 affiliated unions and 134,500 mems; Pres. JUAN C. TAN; Exec. Vice-Pres. EFREN P. ARANZAMENDEZ.

Katipunang Manggagawang Pilipino (KMP-TUCP) (Trade Union Congress of the Philippines): 7th Floor, Cardinal Bldg, 999 Pedro Gil, cnr F. Agoncillo, Ermita, Manila; tel. 508293; f. 1975; 1.5m. mems; Pres. DEMOCRITO T. MENDOZA; Exec. Vice-Pres. ANDRES L. DINGLASAN, Jr; Gen. Sec. ERNESTO F. HERRERA; 35 affiliates including:

Alliance of Land Transport Workers Organization of the Philippines (ALLTOP): 13th and Boston Sts, Port Area, Manila; tel. 481691; f. 1983; 50,000 mems; Pres. ROBERTO M. OCA, Jr; Sec. BETTY BASNILLO.

National Congress of Unions in the Sugar Industry of the Philippines (NACUSIP): Seventh St, Capitol Subdivision, Bacolod City; 18 affiliated unions and 25,062 mems; Pres. ZOILO V. DELA CRUZ, Jr.

National Labour Union (NLU): 3199 Magsaysay Blvd, Manila; f. 1929; Pres. EULOGIO R. LERUM; Sec. ANTONIO V. POLICARPIO; 106 affiliated unions and 43,270 mems.

Philippine Congress of Trade Unions (PHILCONTU): Elliptical Rd, cnr Maharlika St, Diliman, Quezon City, Metro Manila; 13 affiliated unions and 480,200 mems; Pres. DEMOCRITO MENDOZA.

Philippine Transport and General Workers' Organization-ITF (PTGWO-ITF, TUCP): 13th and Boston Sts, Port Area, Manila; tel. 481691; f. 1953; 99 affiliated unions and 35,000 mems; Pres. ROBERTO M. OCA, Jr; Sec. PACIFICO V. CULVA.

Philippines Trade Union Council (PTUC): Suite 528, FEMII Bldg, Aduana St, Intramuros, Manila; f. 1954; 10 affiliated federations and 291,952 mems; affiliated to ICFTU; Pres. AURELIO S. INTERTAS; Gen. Sec. GABRIEL M. GATCHALIAN.

Port Workers Union of the Philippines (PWUP): 13th and Boston Sts, Port Area, Manila; tel. 481691; f. 1979; 15,000 mems; Pres. ROBERTO M. OCA, Jr; Sec. DEOGRACIAS T. DAGUM.

National Association of Trade Unions (NATU): Suite 401, San Luis Terraces, T. M. Kalaw St, Ermita, Manila; f. 1954; 75 affiliated unions and 30,000 mems; Pres. MARCELINO LONTOK, Jr.

Philippines Association of Free Labour Unions (PAFLU): 1233 Tecson Ave, cnr J. Abad Santos Ave, Tondo, Manila; f. 1977; 43 affiliated unions and 27,143 mems; Pres. ONOFRE P. GUEVARA; Exec. Sec. WILFRIDO GUEVARA.

Trade Unions of the Philippines and Allied Services (TUPAS): Suite 203–204, Med-dis Bldg, Solana St, cnr Real St, Intramuros, Manila; tel 493449; 515 affiliated unions and 250,000 mems; Pres. NAPOLEON MACULADA; Sec.-Gen. BONIFACIO TUPAS.

Transport

RAILWAYS

Light Rail Transit System (Metrorail): Manila; man. by Light Rail Transit Authority (LRTA) and operated by Meralco Transit Org. (METRO); electrically-driven mass transit system; south line began operations December 1984 (Baclaran to Manila), north line (Manila to Monumento) was due to open June 1985.

Philippine National Railways: 943 Claro M. Recto Ave, Metro Manila; tel. 209375; f. 1892; govt-owned; over 1,028 km of tracks (1982); the northern line runs from Manila to San Fernando, La Unión and the southern line from Manila to Camalig, Albay; a Camalig-Legaspi line is under construction; Chair. JOSÉ DANS; Gen. Man. SEBASTIAN B. ARRASTIA.

Phividec, Inc: POB 300, Lapuz, Iloilo City, Panay; tel. 74806; f. 1906 as Panay Railways, Inc; operates an isolated line (116 km) from Iloilo to Roxas on Panay Island; Chair. ROBERTO S. BENEDICTO; Gen. Man. CARLOS V. SIBUG.

ROADS

In December 1982 there were 154,684 km of roads in the Philippines, of which 87,545 km were earth roads and 45,597 km were surfaced roads.

Ministry of Public Works and Highways: 2nd St, Port Area, Manila; tel. 408371.

Philippine Motor Association: 683 Aurora Blvd, Quezon City; POB 999, Manila; tel. 7215761; f. 1931; Pres. CONRADO R. AYUYAO; Vice-Pres. ANDRES NARVASA.

SHIPPING

Philippine Ports Authority (PPA): 5th Floor, BF Condominium, Aduana St, Intramuros, Metro Manila; tel. 479204; telex 40404; f. 1977; supervises all 94 national ports, 528 municipal ports and 240 regd private ports; Gen. Man. E. S. BACLIG, Jr.

Domestic Lines

Aboitiz Jebsen Bulk Transport Corpn: 110 Legaspi Bldg, Legaspi St, Makati, Metro Manila; tel. 875061; f. 1966; 11 vessels; services world-wide; Pres. JON R. ABOITIZ; Exec. Vice-Pres. and Man. Dir ELIAS KOPPEN.

Aboitiz Shipping Corpn: 169 Juan Luna St, Cebu City; tel. 72511; telex 64363; 30 vessels; Pres. J. ABOITIZ; Chair. LUIS ABOITIZ.

American President Lines Ltd: 2nd Floor, Mary Bachrach Bldg, Port Area, Metro Manila; tel. 498831; container services between the USA, Canada, the Caribbean, Asia and the Middle East; Dir Capt. BONIFACIO LOMOTAN, Jr.

Candano Shipping Lines, Inc.: 6th Floor, Victoria Bldg, 429 United Nations Ave, Ermita, Metro Manila; tel. 503306; inter-island chartering, cargo shipping; Pres. and Gen. Man. JOSÉ CANDANO.

Carlos A. Gothong Lines, Inc.: Pier 10, North Harbour, Metro Manila; tel. 214141; Vice-Pres. JOAQUIN G. MUNEZ.

Eastern Shipping Lines, Inc: ESL Bldg, 54 Anda Circle, Port Area, Manila; tel. 401081; telex 40712; f. 1957; owners/managers of 15 vessels; services to Japan; brs in Tokyo, Yokohama, Kobe and Osaka; Pres. JAMES L. CHIONGBIAN; Exec. Vice-Pres. ERWIN L. CHIONGBIAN; Vice-Pres. and Gen. Man. Capt. AMADO V. ROMILLO.

Escaño Lines: Pier 16, North Harbour, Tonde, Metro Manila; tel. 217682; three cargo vessels and four passenger vessels; Pres. JUANITO MACACHOR.

Lorenzo Shipping Corpn; Pier 10, North Harbour, Manila; tel. (02) 203435; 18 vessels; Pres. JOSÉ GO, Sr.

Luzteveco (Luzon Stevedoring Corpn): Tacoma and Second Sts, Port Area, POB 582, Manila; tel. 492131; telex 40261; f. 1909; two brs; freight-forwarding, air cargo, world-wide shipping, broking,

stevedoring, salvage, chartering and oil drilling support services; fleet of 70 tugs, 165 barges and 10 cargo vessels; Pres. JOVINO G. LORENZO; Vice-Pres. AMBROSIO J. MAKALINTAL, Jr.

Maritime Co of the Philippines: 105 Dasmariñas St, POB 805, Metro Manila; tel. 404401; eight cargo liners, eight reefer ships; Chair. and Pres. JOSÉ P. FERNANDEZ; Vice-Pres. and Gen. Man. WILLIAM R. PALOU.

National Galleon Shipping Corpn: Knights of Rizal Bldg, Bonifacio Drive, Port Area, Manila; tel. 473631; five multi-purpose cargo and three general cargo vessels; services to Hong Kong, Taiwan, Korea, USA; Pres. PANFILO W. CASTRO, Jr.

Northern Lines Inc: FEMII Bldg, Aduana St, Intramuros, Metro Manila; tel. 409571; telex 27434; 10 bulk carriers and conventional vessels; services world-wide; Gen. Man. RICARDO ZARAGOZA.

Philippine Ace Lines Inc: POB 3567, Ground Floor, Mary Bachrach Bldg, cnr Chicago and 24th Sts, Port Area, Metro Manila; tel. 492434; telex 40175; five vessels; cargo and liner services to Japan, Europe, South America and the USA; Pres. RUFINO GUY SU SIM; Man. Dir LOPE O. ANGANGCO.

Philippine President Lines, Inc: PPL Bldg, 1000–1046 United Nations Ave, Metro Manila; tel. 509011; telex 27719; 10 cargo vessels; trading world-wide; Chair. EMILIO T. YAP; Pres. EMILIO C. YAP, Jr.

PNOC Shipping and Transport Corpn: 7th Floor, S & L Bldg, 1500 Roxas Blvd, Ermita, Metro Manila; tel. 574781; telex 64393; f. 1979; subsidiary of the Philippine National Oil Corpn; domestic tanker and bulk oil transportation services; 16 tankers, 18 barges and 12 tugs; Pres. G. Z. VALASCO; Vice-Pres. and Gen Man. E. F. VERANO.

Sulpicio Lines, Inc: 415 San Fernando St, Binondo, Metro Manila; tel. 477675; Vice-Pres. EUSEBIO S. GO.

Sweet Lines Inc: 41 Arellano Blvd, Cebu City; tel. 92401; telex 2397; f. 1937; 6 passenger and multi-purpose vessels; Pres. L. POH; Vice-Pres. ALFRED CASA LIM.

Transocean Transport Corpn: 8th Floor, Magsaysay Bldg, 520 T. M. Kalaw St, Ermita, Manila; tel. 506611; telex 40560; 14 vessels; Pres. and Gen. Man. MIGUEL A. MAGSAYSAY; Vice-Pres. EDUARDO U. MANESE.

United Philippine Lines, Inc: UPL Bldg, Santa Clara St, Intramuros, POB 127, Metro Manila; tel. 498961; services to Japan, Hong Kong and USA; Pres. RENATO TANSECO.

William Lines, Inc: Gotlaco Bldg, P. Burgos St, POB 147, Cebu City; tel. 92471; telex 48031; f. 1949; 12 brs; passenger and cargo inter-island services; 20 passenger/cargo vessels; Pres. V. S. CHIONGBIAN; Chair. W. L. CHIONGBIAN.

CIVIL AVIATION

In 1984 there were 86 airports in the Philippines. In addition to the international airports at Manila and Mactan (Cebu), there are four alternative international airports: Laoag City, Ilocos Norte; Davao City; Zamboanga City; Puerto Princesa City.

Bureau of Air Transportation: Manila International Airport, Pasay City, Metro Manila D-3110; tel. 8321961; in charge of technical and operational side of aviation, establishes policies, rules and regulations for the efficient operation and control of civil aviation; Dir-Gen. JESUS Z. SINGSON.

Aero Filipinas: Aero Filipinas Bldg, Old Manila International Airport, MIA Avenue, Pasay City, Metro Manila; telex 45592; f. 1981; passenger charter flights from Manila to Dubai, Hong Kong, Iraq, Japan, Jordan, Malaysia, Qatar and Singapore; Chair. ERNESTO MAGBOO; Pres. JOSÉ C. ALVAREZ; fleet of 2 Boeing 707.

Philippine Airlines Inc (PAL): PAL Bldg, Legaspi St, Legaspi Village, Makati, POB 954, Metro Manila; tel. 8188174; f. 1941; domestic and international services to Australia, Bahrain, the People's Republic of China, France, the Federal Republic of Germany, Greece, Hawaii, Hong Kong, Indonesia, Italy, Japan, Republic of Korea, Malaysia, the Netherlands, Pakistan, Papua New Guinea, Singapore, Switzerland, Taiwan, Thailand, UK and USA; Chair. EDUARDO Z. ROMUALDEZ; Pres. and CEO ROMAN CRUZ, Jr; fleet of 4 DC-10-30, 6 HS-748, 12 BAC 1-11-500, 7 Nihon YS-11, 4 B-747, 2 B-727, 5 A-300.

Tourism

Ministry of Tourism: Agrifina Circle, Rizal Park, POB 3451, Manila; tel. 599031; telex 40183; f. 1973; operates the Philippine Tourism Authority; Gen. Man. BERNARDO VERGARA.

Atomic Energy

The opening of the Philippines' first nuclear power station, at Morong (Bataan Province) with a capacity of 620 MW, scheduled for January 1985, was delayed following an inspection of the plant.

Philippine Atomic Energy Commission: Don Mariano Marcos Ave, Diliman, Quezon City, D-505; f. 1958; the official body, under the National Science and Technology Authority, dealing with nuclear energy activities. It has a 1,000 kW swimming pool reactor for research, training and production of radioisotopes. Its research centre conducts studies in agriculture, biology, medicine, chemistry, physics and nuclear engineering. It provides technical services utilizing nuclear techniques to research agencies, educational institutions and hospitals. Technical assistance is received mainly from International Atomic Energy Agency, United States Agency for International Development, Colombo Plan and through bilateral agreements with other nations. Commr MANUEL EUGENIO; Assoc. Commrs ALEJANDRO VER ALBANO, GUILLERMO CORPUZ.

PUERTO RICO

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Commonwealth of Puerto Rico comprises the large island of Puerto Rico, together with Vieques, Culebra and many smaller islands, lying about 80 km (50 miles) east of Hispaniola (Haiti and the Dominican Republic) in the Caribbean Sea. The islands have a maritime-tropical climate, with an average annual temperature of 24°C (75°F) and a normal range between 17°C (63°F) and 36°C (97°F). The official language is Spanish, but English is also widely spoken. Almost all of the inhabitants profess Christianity, and about 85% are Roman Catholics. The Commonwealth flag (proportions 5 by 3) has five alternating red and white horizontal stripes of equal width, with a blue triangle, in the centre of which is a five-pointed white star, at the hoist. The capital is San Juan.

Recent History

Puerto Rico was ruled by Spain from the 16th century until 1898, when it was ceded to the USA at the conclusion of the Spanish–American war, and administered as an 'unincorporated territory' of the USA. In 1917 Puerto Ricans were granted US citizenship, and in 1947 Puerto Rico was given the right to elect its own Governor. The Partido Popular Democrático (PPD) won the elections to the Senate in 1940 and gained control of the House of Representatives in 1944. In July 1952, with the US Congress, it promulgated a Constitution whereby Puerto Rico was given the Status of a 'Commonwealth', or Estado Libre Asociado, in its relation to the USA, and became self-governing.

The PPD remained in power until 1968, when, following a split within the party, the Partido Nuevo Progresista (PNP) gained a small majority in the House of Representatives. This followed a plebiscite in 1967, when 60.5% of voters had ratified a continuation of Commonwealth status in preference to independence (0.6%) or incorporation as a State of the USA (38.9%). In the general elections of 1972 the PPD, under the leadership of Rafael Hernández Colón, regained the governorship and legislative control from the PNP, only to lose them again in 1976. The victorious PNP was led by Carlos Romero Barceló, an advocate of statehood, who became Governor in January 1977.

Romero Barceló, who had promised a referendum on statehood if re-elected for a further term in 1980, abandoned this plan following the election, in which he defeated former Governor Hernández Colón by a margin of only 3,500 votes in a poll of 1.6m., and the opposition PPD gained control of the Senate and the House of Representatives. During 1981 eight Cabinet Secretaries and numerous senior government officials resigned, leading to rumours of dissension within the PNP and dissatisfaction with Romero Barceló's leadership. In February 1983 these divisions, between supporters and opponents of Romero Barceló, became more distinct. The Vice-President of the party, Angel Viera Martínez, refused to support Romero Barceló as a candidate for re-election as Governor and also asked him to relinquish his presidency of the PNP. Romero Barceló's supporters countered by removing Viera from his position as PNP leader in the House of Representatives, and forcing his resignation from the party. The other PNP candidate for the gubernatorial nomination, Hernán Padilla Ramírez, the Mayor of San Juan, broke with the party and formed a new political grouping, the Partido de Renovación Puertorriqueño (PRP).

The 1984 gubernatorial election, in which Romero Barceló, Hernández Colón, Padilla Ramírez and Fernando Martín García of the pro-independence Partido Independentista Puertorriqueño (PIP) were candidates, was contested mainly on economic issues. There were, however, damaging allegations of corruption within the Romero Barceló administration, and the conduct of the Government's investigation of the killing by police of two radical students in 1978 also emerged as a major campaign issue. Hernández Colón won the election by a narrow margin, with the PPD retaining control of both legislative chambers by substantial majorities.

The question of eventual independence for Puerto Rico has been a politically sensitive issue for over 50 years. With the PPD supporting the continuation and enhancement of Commonwealth status and the PNP advocating Puerto Rico's inclusion as a State of the USA, mainstream party encouragement of independence aims has come mainly from the PIP and other left-wing groups. A small, and occasionally violent, terrorist faction, the Fuerzas Armadas de Liberación Nacional (FALN), also exists, operating principally from the US mainland and with little apparent support on the island.

In 1978, following a two-year postponement because of objections by the USA, a debate on Puerto Rican independence was held by the UN Decolonization Committee, which approved a resolution recognizing 'the inalienable right of the Puerto Rican people to self-determination and independence' and called for the US to withdraw from Puerto Rico prior to any plebiscite on the island's future. In August 1981 the Committee resolved that the UN General Assembly should consider whether Puerto Rico should be viewed as a 'non self-governing territory' whereby the US could be required to submit to a yearly review of its treatment of the island. In September 1982, however, the General Assembly overwhelmingly defeated a Cuban-sponsored motion to confer colonial status on Puerto Rico. In August 1984 the Committee passed a further resolution supporting independence for the island.

Government

Executive power is vested in a Governor, elected by universal adult suffrage for a four-year term. The Governor is assisted by an appointed Cabinet of 15 Secretaries. Legislative power is held by the bicameral Legislative Assembly, comprising the Senate (with 27 members) and the House of Representatives (51 members). The members of both chambers are elected by direct vote for four-year terms. A Resident Commissioner, also elected for a four-year term, represents Puerto Rico in the US House of Representatives, but is permitted to vote only in committees of the House. Puerto Ricans are citizens of the USA, but those resident in Puerto Rico, while able to participate in national primary elections, may not vote in presidential elections.

Defence

The USA is responsible for the defence of Puerto Rico. The US Navy has training facilities on the island of Vieques. Puerto Rico has a paramilitary National Guard, which is funded mainly by the US Department of Defense.

Economic Affairs

Puerto Rico has few natural resources, although deposits of copper and nickel have been located. Prospects exist for petroleum exploration, and in 1980 the US Government gave Puerto Rico jurisdiction to 18.5 km (10 nautical miles) offshore. Government-financed exploration of potential onshore petroleum deposits was announced in 1981. An intensive government-sponsored programme of industrialization has ended the country's economic dependence on agriculture, and manufacturing has become the main source of income, with pharmaceuticals, petrochemicals, processed food products, textiles, clothing, electrical and electronic equipment and rum as the main products.

In the agricultural sector, income from dairy produce and other livestock products has overtaken earnings from sugar cane, the territory's principal crop. Tobacco, coffee, pineapples, tropical plants, coconuts and sugar products, such as rum and molasses, are also important. Puerto Rico's imports of food have, however, remained at a high level (amounting to more than 50% of the island's food consumption in 1978), and

supplementary measures to improve agricultural land use have included the replanting of some sugar areas with rice, the introduction of plantain trees over large areas of unproductive hill land, and the cultivation of fresh vegetables and fruit for export. Commercial fishing is conducted on a small scale.

The high level of foreign investment in recent years, encouraged by tax incentives and by duty-free access to the USA, has levelled off since the 1970s, although the USA has continued as the predominant source of Puerto Rican imports and the principal market for the island's exports. The attraction of Puerto Rico to foreign investors as a source of cheap labour has declined since 1977, with the phased introduction of US wage minima to the island. In 1983 the minimum hourly rate in industry was $3.35, rising to $5 in skilled sectors such as electronics.

In 1978 the Government introduced a new programme of industrial incentives, aimed at encouraging domestic reinvestment of profits and long-term capital investment. Additional incentives were extended to agriculture in 1982, and to tourist hotels in 1983. A free foreign trade zone near Mayagüez was to be augmented by a second in the San Juan port area, following US Government permission in 1982.

The US federal aid programme accounted for 30.7% of the island's GNP in 1984, and, despite the threat of federal spending cuts, expenditure on entitlement programmes, such as food assistance and social security, has increased. In 1984 about 50% of the population were receiving food stamps, the most widely-used welfare programme. In 1984 it was hoped that, as the recession in the USA ended, economic aid would once more increase. Puerto Rico is very densely populated, with a persistent unemployment problem. The unemployment rate reached a peak of 25% in January 1983 but declined to 22% in 1983, and to 21% in 1984, when 62% of the population were reported to be living below the official US poverty line, compared with 15.2% on the mainland USA.

Transport and Communications

The only railway on Puerto Rico is owned by the sugar corporation. In 1982 there were 13,762 km (8,551 miles) of paved roads. The territory has nine major ports, of which San Juan, Ponce and Mayagüez are the most important. Internal and international air services are provided by more than 30 domestic US and foreign lines.

Social Welfare

Puerto Rico is included in the US social security programme, and also has a local system covering health, accidents, disability and unemployment. In 1979 the territory had 129 hospital establishments, with a total of 13,172 beds, and in 1980 there were 4,057 physicians.

Education

The public education system is centrally administered by the Department of Education. Education is compulsory for children between six and 16 years of age. In the academic year 1983/84 there were 712,889 pupils attending public day schools and 85,194 pupils attending accredited private schools. The 12-year curriculum is subdivided into six grades of elementary school, three years at junior high school and three years at senior high school. Vocational schools at the high school level and kindergartens also form part of the public education system. Instruction is conducted in Spanish but English is a required subject at all levels. There are 34 public and private institutions of higher education. The State University system consists of three principal campuses and six regional colleges.

Tourism

Tourism has traditionally provided a major source of income ($681m. in 1983/84). Puerto Rico's attractions include mountain scenery in the interior, fine beaches and game fishing in coastal waters. In 1983/84 the territory received almost 1.5m. visitors, of whom over 75% were from the USA.

Public Holidays

1985: 27 May (Memorial Day), 24 June (San Juan Day), 4 July (US Independence Day), 16 July (Birthday of Luis Muñoz Rivera), 27 July (Birthday of José Celso Barbosa), 26 August (Constitution Day), 2 September (Labor Day), 14 October (for Columbus Day), 11 November (Veterans' Day), 19 November (Discovery of Puerto Rico), 28 November (Thanksgiving Day), 25 December (Christmas).

1986: 1 January (New Year's Day), 6 January (Epiphany), 11 January (Birthday of Eugenio María de Hostos), 17 February (for Birthday of George Washington), 22 March (Emancipation of the Slaves), 28 March (Good Friday), 16 April (Birthday of José de Diego).

Weights and Measures

The US system is officially in force. Some old Spanish weights and measures, as well as the metric system, are used in local commerce.

Currency and Exchange Rate

United States currency:
100 cents = 1 US dollar.

Exchange rates (31 December 1984):
£1 sterling = US $1.159.

Directory

The Constitution

RELATIONSHIP WITH THE USA

On 3 July 1950 the Congress of the United States adopted an Act (Public Law No. 600) which was to allow 'the people of Puerto Rico to organize a government pursuant to a constitution of their own adoption'. This Act was submitted to the voters of Puerto Rico in a referendum and was accepted in the summer of 1951. A new Constitution was drafted in which Puerto Rico was styled as a commonwealth, or estado libre asociado 'a state which is free of superior authority in the management of its own local affairs', though it remained in association with the United States. This Constitution, with its amendments and resolutions, was ratified by the people of Puerto Rico on 3 March 1952, and by the Congress of the United States on 3 July 1952; and the Commonwealth of Puerto Rico was established on 25 July 1952.

Under the terms of the political and economic union between the United States and Puerto Rico, United States citizens in Puerto Rico enjoy the same privileges and immunities as if Puerto Rico were a member state of the Union. Puerto Rican citizens are citizens of the United States and may freely enter and leave that country.

The Congress of the United States has no control of, and may not intervene in, the internal affairs of Puerto Rico.

Puerto Rico is exempted from the tax laws of the United States. While it has no representation in the United States Congress, the Puerto Rican Resident Commissioner to the United States, directly elected for a four-year term, enjoys the privileges of membership, without voting, of the House of Representatives of the United States Congress.

There are no customs duties between the United States and Puerto Rico. Foreign products entering Puerto Rico—with the single exception of coffee, which is subject to customs duty in Puerto Rico, but not in the United States—pay the same customs duties as would be paid on their entry into the United States.

The United States social security system is extended to Puerto Rico except for unemployment insurance provisions. Laws providing for economic co-operation between the Federal Government and the States of the Union for the construction of roads, schools, public health services and similar purposes are extended to Puerto Rico. Such joint programmes are administered by the Commonwealth Government.

Amendments to the Constitution are not subject to approval by the US Congress, provided that they are consistent with the US Federal Constitution, the Federal Relations Act defining federal relations with Puerto Rico, and Public Law No. 600. Subject to these limitations, the Constitution may be amended by a two-thirds vote of the Puerto Rican Legislature and by the subsequent majority approval of the electorate.

The Constitution starts with a definition of democracy and continues with a Bill of Rights.

BILL OF RIGHTS

No discrimination shall be made on account of race, colour, sex, birth, social origin or condition, or political or religious ideas. Suffrage shall be direct, equal and universal for all over the age of 18. Public property and funds shall not be used to support schools other than State schools. The death penalty shall not exist. The rights of the individual, of the family and of property are guaranteed. The Constitution establishes trial by jury in all cases of felony, as well as the right of habeas corpus. Every person is to receive free elementary and secondary education. Social protection is to be afforded to the old, the disabled, the sick and the unemployed.

THE LEGISLATURE

The Legislative Assembly consists of two houses, whose members are elected by direct vote for a four-year term. The Senate is composed of 27 members, the House of Representatives of 51 members. Senators must be over 30 years of age, and Representatives over 25 years of age. The Constitution guarantees the minority

parties additional representation in the Legislature, which may fluctuate from a quarter to a third of the seats in each House.

The Senate elects a President and the House of Representatives a Speaker from their respective members. The sessions of each house are public. A majority of the total number of members of each house constitutes a quorum. Either house can initiate legislation, though Bills for raising revenue must originate in the House of Representatives. Once passed by both Houses, a Bill is submitted to the Governor, who can either sign it into law or return it, with his reasons for refusal, within ten days. If it is returned, the Houses may pass it again by a two-thirds majority, in which case the Governor must accept it.

The House of Representatives, or the Senate, can impeach one of its members for treason, bribery, other felonies and 'misdemeanours involving moral turpitude'. A two-thirds majority is necessary before an indictment may be brought. The cases are tried by the Senate. If a representative or senator is declared guilty, he is deprived of his office and becomes punishable by law.

THE EXECUTIVE

The Governor, who must be at least 35 years of age, is elected by direct suffrage and serves for four years. Responsible for the execution of laws, the Governor is commander-in-chief of the militia and has the power to proclaim martial law. At the beginning of every regular session of the assembly, in January, the Governor presents a report on the state of the treasury, and on proposed expenditure. The Governor chooses Secretaries of Departments as assistants, subject to the approval of the Legislative Assembly. These are led by the Secretary of State, who replaces the Governor at need.

LOCAL GOVERNMENT

The island is divided into 78 municipal districts for the purposes of local administration. The municipalities comprise not only urban areas but also the surrounding neighbourhood. They are governed by a mayor and a municipal assembly, both elected for a four-year term.

The Government

HEAD OF STATE

Governor: Rafael Hernández Colón (inaugurated 2 January 1985).

EXECUTIVE

(March 1985)

Governor: Rafael Hernández Colón.

Secretary of State: Héctor Luis Acevedo.

Political Organizations

Partido Comunista Puertorriqueño (PCP) (Puerto Rican Communist Party): San Juan; f. 1934; advocates independence and severence of ties with the USA.

Partido Independentista Puertorriqueño (PIP) (Puerto Rican Independence Party): 963 Roosevelt Ave, San Juan; f. 1946; moderate left-wing; seeks immediate independence for Puerto Rico as a socialist democratic republic; c. 6,000 mems; Leader Rubén Berríos Martínez.

Partido Nuevo Progresista (PNP) (New Progressive Party): POB 5192, Puerta de Tierra Station, San Juan, 00906; f. 1967; advocates eventual inclusion of Puerto Rico as a federated state of the USA; c. 225,000 mems; Pres. Carlos Romero Barceló; Sec. Rafael Rodríguez Aguayo.

Partido Popular Democrático (PPD) (Popular Democratic Party): 403 Ponce de León Ave, Puerta de Tierra, POB 5788, San Juan, 00906; tel. (809) 724-1984; telex ITT 0601; f. 1939; liberal; advocates social reform; supports continuation and improvement of the present Commonwealth status of Puerto Rico; c. 660,000 mems; Pres. and Leader Rafael Hernández Colón.

Partido de Renovación Puertorriqueño (PRP) (Puerto Rican Renewal Party): San Juan; f. 1983; breakaway group from the PNP; Leader Hernán Padilla Ramírez.

Partido Socialista Puertorriqueño (PSP) (Puerto Rican Socialist Party): 256 Padre Colón St, Río Piedras, San Juan, 00925; f. 1971; seeks independence and the establishment of a socialist republic; c. 6,000 mems; Pres. Carlos Gallisá; Leader and Sec.-Gen. Juan Mari Bras.

The Fuerzas Armadas de Liberación Nacional (FALN) (Armed Forces for National Liberation) and other entities favouring Puerto Rican independence are not organized or registered as political parties and advocate the achievement of independence through non-electoral means.

Judicial System

The Judiciary is vested in a Supreme Court and other courts as may be established by law. The Supreme Court is composed of a Chief Justice and six Associate Justices, appointed by the Governor with the consent of the Senate. The lower Judiciary consists of Superior and District Courts and Municipal Justices equally appointed.

There is also a Federal District Court, whose judges and attorney are appointed by the President of the United States.

Chief Justice of the Supreme Court: José Trías Monge.

Federal District Judges: Raymond L. Acosta, Héctor M. Laffite, Juan Pérez-Giménez, Gilberto Gierbolini-Ortiz, Carmen Consuelo Cerezo, Jaime Pieras, Jr.

US Attorney for the District of Puerto Rico: Daniel López-Romo.

Religion

There is no established church in Puerto Rico. About 85% of the population belong to the Roman Catholic Church. The Protestant churches represented include the Episcopalian, Baptist, Presbyterian, Seventh-day Adventist, Lutheran and Christian Science. There is a small Jewish community in San Juan.

CHRISTIANITY

The Roman Catholic Church

Archbishop of San Juan: Cardinal Luis Aponte Martínez, Arzobispado, POB S-1967, San Juan, 00903; tel. (809) 727-7373.

Other Christian Churches

Evangelical Council of Puerto Rico: POB C, Río Piedras Station, 00928; Pres. Rev. Miguel A. Morales; Exec. Sec. Félix M. Cintrón-Cruz.

BAHÁ'Í FAITH

Spiritual Assembly: POB 11603, Santurce Station, 00910; tel. (809) 727-8740.

JUDAISM

Jewish Community Center: 903 Ponce de León Ave, Santurce Station, San Juan, 00907; f. 1953; conservative congregation with 250 families; Rabbi (vacant).

The Press

Puerto Rico has good readership of its few newspapers and magazines, as well as of mainland United States periodicals. However, radio and television are well organized, maintaining mainland US standards, and offer a popular alternative. Several newspapers have large additional readerships among the immigrant communities in New York.

Unión de Trabajadores de la Industria Elétrica y Riego: San Juan; Pres. LUIS LAUSELL HERNÁNDEZ; 6,000 mems.

Transport

RAILWAYS

There are no passenger railways in Puerto Rico.

Ponce and Guayama Railway: Aguirre, 00608; owned by the Corporación Azucarera de Puerto Rico; transports sugar cane over 96 km of track route; Exec. Dir JOSÉ A. MASINI; Gen. Man. C. V. RODRÍGUEZ.

ROADS

The system of paved roads totalled 13,762 km (8,551 miles) in 1982. A modern highway system links all cities and towns along the coast and cross-country. In response to the demand for road expansion due to industrial growth, the Highways Authority was created in 1965 to design and build roads, highways and bridges.

SHIPPING

There are nine major ports in the island, the principal ones being San Juan, Ponce and Mayagüez. San Juan, one of the finest and longest all-weather natural harbours in the Carribbean, is the principal port of entry for foodstuffs and raw materials and for shipping finished industrial products. Ocean passenger traffic is limited to tourist cruises of which there are more than 700 vessels per year. Other ports include Guayama, Guayanilla, Guánica, Yabucoa, Aguirre, Aguadilla, Fajardo, Arecibo, Humacao and Arroyo.

Puerto Rico Maritime Shipping Authority (Navieras): San Juan; govt-owned; weekly cargo services to US Atlantic and Gulf ports, US Virgin Islands, Haiti, Dominican Republic.

Puerto Rico Ports Authority: POB 2829, San Juan, 00936-2829; tel. (809) 723-2260; telex 9464; manages and administers all ports and port facilities in Puerto Rico; Exec. Dir CARLOS SOLER AQUINO.

Agents for Foreign Lines

Antilles Shipping Corporation: POB 3827, San Juan, 00904; f. 1955; agents for over 50 cos in liners, tankers, barges and cruise ships; Pres. HANS HEITKONIG; Vice-Pres. HANS MEIJER.

B. & C. Shipping Co, Inc (Marítima Santo Domingo): POB 5126, Puerta de Tierra Station, San Juan 00906.

Caribe Shipping Company: POB 3267, San Juan, 00904; agents for numerous shipping cos, cruise lines and cargo ships.

Colón y Villalón, Inc: POB 5224, Puerta de Tierra Station, San Juan, 00906.

Continental Shipping, Inc: POB S-2467, San Juan, 00903.

Costa Line (Puerto Rico) Inc: POB 4351, San Juan, 00905.

Fred Imbert, Inc: POB 4424, San Juan, 00905; agents for Belfran Line, Fabre Line, French Line, Horn Line, Kawasaki Kisen Kaisha Ltd, Suriname Navigation Co Ltd.

Intermar Shipping Inc: POB 3408, San Juan, 00904.

International Shipping Agency, Inc: POB 2748, San Juan, 00903; agents for: Compañía Transatlántica Española, Nippon Yusen Kaisha Line, Saguenay Shipping, Transportación Marítima Mexicana, Delta Steamship Co-Líneas Agromar, Compagnie Maritime d'Affrètement, Trans Freight Lines.

Puerto Rico Marine Line, Inc: POB S-3472, San Juan, 00904.

San Juan Mercantile Corporation: POB 4352, San Juan, 00905; f. 1923; agents for: Seaboard Shipping Co, "K" Line, Paal Wilson, Westship International Inc, The East Asiatic Co Inc, Continental Line, Montemar SA.

Universal Shipping Corporation: POB 737, San Juan, 00902.

CIVIL AVIATION

There are international airports at San Juan and Aguadilla.

Puerto Rico is served by the following airlines: Aerovías Quisqueyanas (Dominican Republic), Air France, Air Jamaica, ALM (Netherlands Antilles), American Airlines (USA), Avianca (Colombia), British Caledonian, BWIA (Trinidad), Delta (USA), Eastern Air Lines (USA), Iberia (Spain), Mexicana, Pan Am (USA), Viasa (Venezuela) and others.

Tourism

Puerto Rico Hotel and Tourism Association: 1120 Ashford Ave, Santurce, 00907; tel. (809) 725-2944; 100 mems; Pres. JAG MEHTA; Exec. Vice-Pres. MIGUEL A. DOMENECH.

Puerto Rico Tourism Company: POB BN, Banco de Ponce, San Juan, 00936.

Puerto Rico Tourist Bureau: POB 3968, San Juan.

Tourism Development Corporation: POB 3072, San Juan Station, San Juan, 00903; f. 1970; Exec. Dir FRANCES RÍOS DE MORÁN.

Atomic Energy

Puerto Rico Nuclear Center: c/o University of Puerto Rico, POB 4984-G, San Juan, 00931; tel. (809) 765-6590; f. 1957; operated by the University of Puerto Rico for the US Atomic Energy Commission; graduate-level research and training centre for Latin Americans and advanced training in radiation therapy, radiological physics, clinical uses of radioisotopes, radioecology, radiobiology and virology, radiation chemistry and physics; Dir LAWRENCE RITCHIE.

QATAR

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The State of Qatar occupies a peninsula, projecting northwards from the Arabian mainland, on the west coast of the Persian (Arabian) Gulf. It is bordered, to the south, by Saudi Arabia and the United Arab Emirates. The archipelago of Bahrain lies to the north-west. On the opposite side of the Gulf lies Iran. The climate is exceptionally hot in the summer, when temperatures may reach 49°C (120°F), with high humidity on the coast. Conditions are relatively mild in the winter. Rainfall is negligible. The official language is Arabic, though English is also spoken in business and official circles. Almost all of the inhabitants are adherents of Islam. Native Qataris, who form less than one-third of the total population, belong mainly to the strictly orthodox Wahhabi sect of Sunni Muslims. The national flag (proportions 30 by 11) is maroon, with a broad vertical white stripe at the hoist, the two colours being separated by a serrated line. The capital is Doha.

Recent History

Qatar was formerly dominated by the Khalifa family of nearby Bahrain. The peninsula became part of Turkey's Ottoman Empire in 1872, but Turkish forces evacuated Qatar at the beginning of the First World War (1914–18). The United Kingdom recognized Sheikh Abdullah al-Thani as Ruler of Qatar, and in 1916 made a treaty with him, providing British protection against aggression in return for supervision of Qatar's external affairs. A 1934 treaty extended fuller British protection to Qatar.

In October 1960 Sheikh Ali al-Thani, who had been Ruler of Qatar since 1949, abdicated in favour of his son, Sheikh Ahmad al-Thani. In 1968 the British Government announced its intention to withdraw British forces from the Persian Gulf area by 1971. As a result, Qatar attempted to associate itself with Bahrain and Trucial Oman (now the United Arab Emirates) in a proposed federation. In April 1970 the Ruler, Sheikh Ahmad, announced a provisional constitution for Qatar, providing for a partially elected consultative assembly. Effective power remained, however, in the monarch's hands. In May 1970 the Deputy Ruler, Sheikh Khalifa al-Thani (a cousin of Sheikh Ahmad), was appointed Prime Minister. After the failure of attempts to agree terms for union with neighbouring Gulf countries, Qatar became fully independent on 1 September 1971, when the Ruler took the title of Amir. The 1916 treaty was replaced by a new treaty of friendship with the United Kingdom.

In February 1972 a bloodless coup by Sheikh Khalifa, the Crown Prince and Prime Minister, deposed the Amir during his absence abroad. Claiming support from the royal family and the armed forces, Sheikh Khalifa proclaimed himself Amir, while retaining the premiership. He has since adopted a policy of wide-ranging social and economic reform. The previous extravagance and privileges of the royal family have been curbed. Qatar is closely allied with Saudi Arabia, with which it signed a bilateral defence agreement in 1982, and is usually considered to be one of the more moderate Arab states. In 1979 Qatar opposed the Camp David agreements between Egypt and Israel. Qatar has supported Iraq since the outbreak of its conflict with Iran in September 1980. The country also supports the peace proposals for the Middle East which were adopted by the Arab summit conference at Fez, Morocco, in September 1982.

In early 1981 Qatar joined the newly-established Gulf Co-operation Council (GCC, see p. 127). By May 1983 member countries were implementing new GCC regulations, including the abolition of import tariffs between member states, reduced restrictions on travel between GCC countries and more favourable investment conditions for business. Co-operation in defence is also an important aim, and in 1983 and 1984 Qatari forces participated in the GCC's 'Peninsula Shield' joint military exercises. In November Qatar was the venue of a three-day GCC summit meeting, at which the establishment of a unified defence system was a major topic of discussion. Qatar also hosted the GCC summit of November 1984, at which a major concern was the restoration of peace between Iran and Iraq. Although Qatar's own defences are weak, it did not seem as vulnerable as some of its neighbours to the effects of increased hostility in the Gulf war during early 1984.

Government

Qatar is an absolute monarchy, with full powers vested in the Amir as Head of State. A provisional constitution took effect in 1970. Executive power is exercised by the Council of Ministers, which is appointed by the Head of State, who is also Prime Minister. An Advisory Council was set up in April 1972, with 20 nominated members, and was expanded to 30 members in December 1975. Qatar has no legislature or political parties.

Defence

In July 1984 the armed forces comprised 6,000 men: an army of 5,000, a navy of 700 and an air force of 300. Estimated defence expenditure for 1984/85 was QR1,186.6m.

Economic Affairs

Qatar is largely an arid and barren country, with stony or sandy soil that is unsuitable for arable farming. In the past, the inhabitants traditionally depended on pearl-diving, fishing and nomadic herding of livestock. Qatar was formerly one of the poorest and most desolate regions of Arabia, but the exploitation of large reserves of high-quality petroleum, both onshore and offshore, has dramatically transformed the economy of the peninsula. In recent years Qatar has become one of the richest countries in the world, measured in terms of average income. In 1980 and 1981 Qatar's gross national product (GNP) per head, measured at average 1979–81 prices, was estimated by the World Bank to be US $28,950 and $27,720, respectively: in each year this was the highest figure in the world. Reduced petroleum output and lower prices caused a marked decline, by 1982, to $21,880 per head (at average 1980–82 prices), although this remained the world's second highest figure. GNP per head is estimated to have increased, in real terms, by an average of 2.6% per year between 1960 and 1980. In the 1970–80 period, rapid expansion of the population, mainly due to an influx of immigrant labour, produced a decline in GNP per head of 0.2% per year. Current indicators reflect the vital role played by petroleum in Qatar's economy: between 1979 and 1981, gross domestic product (GDP) is estimated to have grown by an average of 28% per year in real terms. In 1982 and 1983, however, reduced revenues from petroleum led to a decline of 12.3% and 15.5%, respectively.

Exploration for petroleum began in Qatar in 1937, and the first discovery was made in 1939. As a result of the Second World War (1939–45), further development was delayed. Oilfield activities resumed after the war, and a drilling programme was completed by 1949, when production of crude petroleum began. The Government secured a 100% interest in crude oil operations in early 1977. Petroleum provided 84.5% of government income in 1982. At 1984 levels of production, Qatar's petroleum reserves, calculated at 4,500m. barrels, were expected to be exhausted by the year 2024, and a policy of industrial diversification is being pursued.

Qatar's production of petroleum reached a peak in 1973, when output was 208.2m. barrels. It fluctuated in subsequent years, falling to 158.8m. barrels in 1977. Production recovered to 184.8m. barrels in 1979, but fell, as a result of the world oil glut, to 147.8m. barrels in 1981. Prices remained high over these years, so government revenues were sustained. By 1982, however, world oil prices had begun to fall. Output for the year

totalled 119.7m. barrels, and petroleum revenue fell to QR 14,939m., compared with QR 17,322m. in 1981.

As a member of OPEC, Qatar is bound to observe the organization's recommendations on petroleum production levels and pricing. In March 1983 a production 'ceiling' of 300,000 barrels per day (b/d) was accorded to Qatar. However, throughout the year, weak markets prevented the country from attaining this level. Production ran at 210,000 b/d in the early months of the year, rising only to 298,000 b/d in the later months, when barter agreements had been reached, whereby money owing for work on development projects could be replaced by crude petroleum. Total output for the year was only 107.3m. barrels, and revenues from exported petroleum fell by 43.7% from the 1982 level. Production during the first half of 1984 was substantially increased, reaching 507,000 b/d in June. This was partly due to the effect of increased aggression in the Gulf War, which dissuaded some importers from buying petroleum from oil-producing countries located further up the Gulf. In October, however, when over-production and falling prices led to a temporary lowering of production quotas by OPEC countries, Qatar agreed to produce no more than 280,000 b/d.

Development projects in 1982 and 1983 were delayed, as reduced revenues led to reductions in capital expenditure. In 1984 and 1985, however, increased revenues, following the expansion in production of petroleum, were to be used to finance major development. One particularly important plan was to exploit offshore reserves of natural gas, thought to be among the world's largest, in the North Field. The development of these reserves is crucial to Qatar's future, as existing sources of gas are expected to last only until 1988. By 1984 several 'downstream' and other industrial ventures had been established in Qatar. The manufacture of liquefied natural gas (LNG) and fertilizers, plus the petrochemical industry, all recorded some growth during 1983. Construction of an ethane recovery plant, to be completed in 1985, was under way. This would protect the petrochemical industry from an excessive dependence on petroleum for its supply of feedstock. A new petroleum refinery, with a capacity of 50,000 b/d, was inaugurated in 1983. Steel, cement and construction have also become important activities, although all suffered in 1983 from the relative recession affecting the Gulf region. A primary objective in development was to diversify the country's economic base against dependence on petroleum. The non-oil sector contributed 54.9% of GDP in 1983, compared with 45.7% in 1982, but this increase in significance was seen to result more from inactivity in the petroleum sector than from growth elsewhere.

As Qatar's only source of water is an aquifer in the north of the country, which by 1984 was becoming seriously overdrawn, progress in agriculture is dependent upon the expansion and development of new methods of irrigation, using treated sewage or desalinated water. By 1984, however, some progress had been made in the cultivation of vegetables, with local production meeting about 60% of domestic demand for vegetables and animal feed, and some vegetables were exported to other Gulf countries. Fishing in Qatar accounted for about 80% of domestic consumption in that year. Progress has been achieved in developing the country's infrastructure, including a new general hospital, airport building, electricity and desalination plants, roads and a variety of government buildings. The programme of development was undergoing rationalization during 1983, when actual capital expenditure fell to QR 2,978m., compared with QR 3,742m. in 1982. Higher levels of petroleum production led to a projected increase of 26.8% in capital expenditure, to QR 4,069m., in 1984. One possible project was the construction of a steam turbine station and desalination plant, together costing US $2,500m., at Al-Wusail. In both 1983 and 1984, budget deficits were predicted: in 1983 this was actually smaller than forecast, totalling QR 505m., but in 1984 the deficit was expected to reach QR 3,682m. This would be financed from the country's reserves.

Qatar's major trading partner in 1983 was Japan, which provided 21.8% of imports and took 46.9% of exports of crude petroleum. The Federal Republic of Germany provided 16.7% of imports, and the USA 9.1%. Other important purchasers of crude petroleum were Italy (7.4%) and France (6.5%). The surplus on the current account of Qatar's balance of payments narrowed from a peak of QR9,679m. in 1980 to QR1,491m. in 1983.

Transport and Communications

Surfaced roads link northern Qatar with Doha and the oil centres of Dukhan and Umm Said. There is a connection with the road network of Saudi Arabia, and a link with Abu Dhabi in the United Arab Emirates. The main ports are Doha and Umm Said. Qatar has a share in Gulf Air, the Bahrain-based airline, and there is an international airport at Doha.

Social Welfare

Free health services are provided to all residents, whether Qatari or non-Qatari, and fixed monthly allowances are paid to widows, divorcees, orphans and the elderly. Government hospitals had 747 beds in 1979, and there were 307 physicians working in the country in 1980. The Hamad General Hospital has 660 beds.

Education

Education is free at all levels, although not compulsory, and has been expanding at a rapid rate since the inception of a state educational system in 1956. Primary education begins at six years of age and lasts for six years. Secondary education, beginning at the age of 12, also lasts for six years, divided into two equal cycles. In 1982 the enrolment at primary schools was 91% of children in the relevant age-group (93% of boys; 89% of girls), while secondary enrolment was 59% (boys 54%; girls 65%). In the academic year 1982/83 there were 3,851 students at the University of Qatar, while 1,099 students were sent abroad on scholarships. A newly constructed campus for the University, just outside Doha, was dedicated in February 1985. It is planned that the campus will eventually accommodate 6,000 students.

Public Holidays

1985: 21 May* (Ramadan begins), 20 June* (Id ul Fitr, end of Ramadan), 27 August* (Id ul Adha, Feast of the Sacrifice), 3 September (National Day), 16 September* (Islamic New Year).

1986: 22 February (Anniversary of the Amir's Accession), 7 April* (Leilat al Meiraj, Ascension of the Prophet).

* Religious holidays, which are dependent on the Islamic lunar calendar, may differ by one or two days from the dates given.

Weights and Measures

The metric system has been adopted legally, but imperial measures are still used.

Currency and Exchange Rates

100 dirhams = 1 Qatar riyal (QR).

Exchange rates (31 December 1984):
£1 sterling = 4.219 riyals;
US $1 = 3.640 riyals.

Statistical Survey

AREA AND POPULATION

Area: 11,437 sq km (4,416 sq miles).

Population (survey, October 1981): 244,534 (males 155,578; females 88,956), of whom approximately 70,000 were native Qataris. In 1983 the population was estimated at 270,000, a density of 23.6 people per sq km.

Capital: Doha (estimated population 180,000 at January 1980).

Births and Deaths (1983): Live births 8,261; Deaths 621.

Labour Force (persons aged 15 years and over, October 1981): Employed 111,264 (males 102,335; females 8,929); Unemployed 1,521 (males 1,320; females 201).

AGRICULTURE, ETC.

Principal Crops ('000 metric tons, 1982): Cereals 1.4; Vegetables 17.9; Fruit and Dates 9.5; Forage crops 42.

Livestock (FAO estimates, '000 head, 1982): Horses 3; Cattle 10; Camels 10; Sheep 51; Goats 57; Poultry 380 (Source: FAO, *Production Yearbook*).

Livestock Products ('000 metric tons, 1982): Meat 2.4; Cows' milk and dairy products 6.2; Sheep's milk 2*; Goats' milk 9*; Eggs 0.3. * FAO estimates.

Fishing (catch in metric tons, 1982): Marine fishes and crustaceans 2,315.

MINING

Production (1983): Crude petroleum ('000 barrels): 107,300 (offshore 47,200, onshore 60,100); Liquefied natural gas (metric tons): Ethane-rich gas 419,000, Propane 305,000, Butane 216,000, Condensate: 184,000.

INDUSTRY

Production ('000 barrels, 1981): Liquefied petroleum gas 82.9; Super petrol 16.4; Premium petrol 1,127.8; Jet fuel 480.6; Kerosene 33.0; Diesel oil 1,110.6; Cement 257,000 metric tons; Electricity 2,756.9 million kWh; Nitrogenous fertilizers (year ending 30 June) 264,500 metric tons (nitrogen content).

FINANCE

Currency and Exchange Rates: 100 dirhams = 1 Qatar riyal (QR). *Coins:* 1, 5, 10, 25 and 50 dirhams. *Notes:* 1, 5, 10, 50, 100 and 500 riyals. *Sterling and Dollar Equivalents* (31 December 1984): £1 sterling = 4.219 riyals; US $1 = 3.640 riyals; 100 Qatar riyals = £23.70 = $27.47. *Exchange Rate:* Since June 1980 the rate has been fixed at US $1 = QR3.64.

Budget (QR million): 1983/84 (actual figures): *Revenue:* 11,521 (incl. crude petroleum 9,745); *Expenditure:* 12,026 (recurring 9,048, major projects 2,978); 1984/85 (estimates): *Revenue:* 11,971 (incl. crude petroleum 10,349); *Expenditure:* 15,653 (recurring 11,584).

International Reserves (US $m. at 31 December 1983): IMF special drawing rights 9.1; Reserve position in IMF 38.9; Foreign exchange 336.1; Total 384.1. Figures exclude gold reserves ($34.6m. at 31 December 1982). (Source: IMF, *International Financial Statistics*).

Money Supply (QRm. at 31 December 1983): Currency outside banks 1,068.3; Demand deposits at commercial banks 2,556.1; Total money 3,624.4.

Gross Domestic Product by Economic Activity (estimates, QR million at current prices, 1983): Agriculture, forestry and fishing 200; Mining and quarrying 10,714; Manufacturing 1,389; Electricity, gas and water 108; Construction 1,666; Trade, restaurants and hotels 1,559; Transport, storage and communications 499; Finance, insurance and real estate 2,111; Other services 5,119; Total 23,365.

Balance of Payments (estimates, QR million, 1983): Exports f.o.b. 12,002; Imports c.i.f. −5,299; Trade balance 6,703; Services and private transfers (net) −5,212; Current balance 1,491; Capital movements (net) −3,660; Total −2,169.

EXTERNAL TRADE

Principal Commodities (QR million, 1983): *Imports c.i.f.:* Food and live animals 673.4; Chemicals 260.9; Basic manufactures 1,038.9; Machinery and transport equipment 2,328.6; Miscellaneous manufactured articles 678.7; Total (incl. others) 5,298.7. *Exports f.o.b.:* Crude petroleum 10,893; Liquefied gas 655; Total (incl. others) 12.002.

Principal Trading Partners (QR million, 1983): *Imports:* France 261.3; Federal Republic of Germany 435.1; Italy 266.1; Japan 1,156.5; United Kingdom 885.0; USA 482.5; Total (incl. others) 5,298.7. *Exports* (petroleum only): France 708.0; Federal Republic of Germany 403.0; Italy 806.0; Japan 5,119.7; Spain 620.9; Total (incl. others) 10,893.

TRANSPORT

Shipping (international sea-borne freight traffic, '000 metric tons, 1983): *Vessels handled:* 833 (incl. 163 tankers); *Goods loaded:* Crude petroleum 13,247.2; Other cargo 1,674.5. *Goods unloaded:* 1,776.9.

COMMUNICATIONS MEDIA

Radio Receivers: 120,000 in use (1982).

Television Receivers: 125,000 in use (1982).

Telephones: 81,778 (1982).

Book Titles Published: 337 (incl. 219 school textbooks) in 1980.

Daily Newspapers: 4 in 1984.

Non-daily Newspapers: 16 in 1982.

EDUCATION

Pre-primary (1982): 28 schools; 131 teachers; 3,178 pupils.

Primary (1982): 106 schools; 2,508 teachers; 34,805 pupils.

Secondary (1982): 2,139 teachers (2,053 in general education, 86 in vocational education); 18,864 pupils (18,346 general, 518 vocational).

Higher (1982): 215 teachers; 4,015 students.

Directory

The Constitution

A provisional constitution was adopted on 2 April 1970. Executive power is vested in the Amir, as Head of State, and exercised by the Council of Ministers, appointed by the Head of State. The Amir is also assisted by an appointed Advisory Council of 20 members (increased to 30 in December 1975), whose term was extended for six years in May 1975, for a further four years in May 1978, and for a further four years in 1982. All fundamental democratic rights are guaranteed. In December 1975 the Advisory Council was granted power to summon individual ministers to answer questions on legislation before promulgation. Previously the Advisory Council was restricted to debating draft bills and regulations before framing recommendations to the Council of Ministers.

The Government

HEAD OF STATE

Amir: Sheikh KHALIFA BIN HAMAD AL-THANI (assumed power 22 February 1972).

COUNCIL OF MINISTERS
(February 1985)

Prime Minister: Sheikh KHALIFA BIN HAMAD AL-THANI.

Heir Apparent, Minister of Defence and Commander-in-Chief of the Armed Forces: Maj.-Gen. Sheikh HAMAD BIN KHALIFA AL-THANI.

Minister of Finance and Petroleum: Sheikh ABDUL-AZIZ BIN KHALIFA AL-THANI.

Minister of Foreign Affairs: Sheikh SUHAIM BIN HAMAD AL-THANI.

Minister of Education, Culture and Youth: Sheikh MUHAMMAD BIN HAMAD AL-THANI.

Minister of Public Health: KHALED BIN MUHAMMAD AL-MANA.

Minister of the Economy and Commerce: Sheikh NASSIR BIN KHALID AL-THANI.

Minister of Electricity and Water: Sheikh JASSIM BIN MUHAMMAD AL-THANI.

Minister of Justice: (vacant).

Minister of the Interior: Sheikh KHALID BIN HAMAD AL-THANI.

Minister of Industry and Agriculture: Sheikh FAISAL BIN THANI AL-THANI.

Minister of Public Works: KHALID BIN ABDULLAH AL-ATIYYAH.

Minister of Information: ISSA GHANIM AL-KAWARI.

Minister of Municipal Affairs: (vacant).

Minister of Labour and Social Affairs: ALI BIN AHMAD AL ANSARI.

Minister of Transport and Communications: ABDULLAH BIN NASSIR AL-SUWAIDI.

Minister of State for Foreign Affairs: Sheikh AHMED BIN SAIF AL-THANI.

Adviser to the Amir: Dr HASAN KAMEL.

MINISTRIES

Yemen Arab Republic: POB 3318, Doha; tel. 671050; telex 5130; Chargé d'affaires: ABDUL HAMID HIZAM AL-TOUKI.

Judicial System

Justice is administered by five courts (Higher Criminal, Lower Criminal, Commercial and Civil, Labour and the Court of Appeal) on the basis of codified laws. In addition the Sharia Court decides on all issues regarding the personal affairs of Muslims, and civil disputes where the parties elect to have them adjudicated upon, by recourse to Islamic Law of the Holy Quran and the Prophet's Sunna or tradition. Non-Muslims are invariably tried by a court operating codified law. Independence of the judiciary is guaranteed by the provisional Constitution.

Presidency of Sharia Courts and Islamic Affairs: POB 232, Doha; tel. 321044; telex 4629; Pres. ABDUL BIN SAID AL-MAHMOUD.

Chief Justice: AL-FATEH AWOUDA.

Religion

The indigenous population are Muslims of the Sunni sect, most being of the strict Wahhabi persuasion.

BANKING ASSOCIATION

Qatar Banks' Association: c/o QMA, POB 1234, Doha.

INSURANCE

Alkhaleej Insurance Co SAQ: POB 4555, Doha; tel. 414151; telex 4692; f. 1978; authorized and cap. p.u. 6m. (1983); all classes; Gen. Man. Rifat Rateb Abdo.

Qatar General Insurance and Reinsurance Co SAQ: POB 4500, Doha; tel. 417800; telex 4742; cap. QR15m.; all classes.

Qatar Insurance Co SAQ: POB 666, Doha; tel. 426186; telex 4216; f. 1964; cap. 24m.; the government has a majority share; Man. Fathi I. Gabr; brs in Dubai and Riyadh.

COMMERCE

Qatar Chamber of Commerce: POB 402, Doha; tel. 423677; f. 1963; 13 mems appointed by decree; Pres. Ahmed Muhammad al-Sowaidi; Dir-Gen. Kamal Ali Saleh.

Trade and Industry

DEVELOPMENT

Industrial Development Technical Centre (IDTC): POB 2599, Doha; tel. 832121; telex 4323; government-owned; conducts research, development and supervision of new industrial projects; Dir-Gen. Mohammed Said Mish'al.

STATE ENTERPRISES

Qatar General Petroleum Corporation (QGPC): POB 3212, Doha; tel. 491491; telex 4343; f. 1974; cap. QR4,000m.; the State of Qatar's interest in companies active in petroleum and related industries has passed to the Corporation. In line with OPEC policy, the government agreed a participation agreement with the Qatar Petroleum Company and Shell Company of Qatar in 1974 to secure Qatar's interest and obtained a 60% interest in both. In late 1976, under two separate agreements, the government secured a 100% interest in both companies. The Qatar Petroleum Producing Authority (QPPA) was established in 1976 as a subsidiary, wholly owned by the Corporation, to carry out all operations previously conducted by the two companies. In February 1980 the QPPA was merged with the Corporation.

Qatar General Petroleum Corporation wholly or partly owns: National Oil Distribution Co (NODCO), Qatar Fertilizer Co Ltd (QAFCO), Qatar Petrochemical Co Ltd (QAPCO), Compagnie Petrochemique du Nord (COPENOR), Arab Maritime Petroleum Transport Co Ltd, Arab Petroleum Pipelines Co (SUMED), Arab Shipbuilding and Repair Yard Co, Arab Petroleum Services Co and Arab Petroleum Investments Corpn (APICORP); Chair. Sheikh Abdul-Aziz bin Khalifa al-Thani (Minister of Finance and Petroleum); Man. Dir Ali Muhammad Jaidah; Deputy Man. Dir Sheikh Rashid O. al-Thani.

National Oil Distribution Co (NODCO): POB 10033, Umm Said; tel. 770651; telex 4324; operates a refinery with a capacity of 12,000 b/d; responsible for the nationwide distribution of petroleum products; a new refinery (capacity of 50,000 b/d) was inaugurated in 1983; wholly owned by QGPC; Gen. Man. Mahmoud H. el-Hifnawi.

Qatar Fertilizer Co (QAFCO) SAO: POB 10001, Umm Said; tel. 770252; produces about 1,800 tons of ammonia and 2,000 tons of urea per day; QGPC has a 75% share, Norsk Hydro holds the remaining 25%; Chair. Mohammed Said Mish'al; Man. Dir Ingulf Skogestad.

Qatar Gas Co: POB 2954, Doha; tel. 86252; telex 4500; utilizes and extracts natural gas liquids from associated gas; QGPC owns 70% of the shares, Shell International holds the remaining 30%; Chair. Mohammed al-Amin Ali Orabi.

QGPC (Onshore Operations): Doha; tel. 343287; telex 4253; produces and exports crude petroleum from the Dukhan oilfield and processes and exports natural gas liquids from the onshore and offshore oilfields in Qatar; also responsible for the internal distribution of fuel gas; back-up services and personnel are provided by the Dukhan Service Co; production in 1983 was 60m. barrels; Man. Dir Ali Muhammad Jaidah; Exec. Man. A. K. Howard.

QGPC (Offshore Operations): POB 47, Doha; tel. 422511; telex 4201; state-owned organization for offshore oil/gas exploration and production; average production is over 260,000 b/d; production in 1982 was 62.7m. barrels; Man. Dir Ali M. Jaidah; Exec. Man. Menno Schepers; Deputy Exec. Man. Ahmed Hassan Bilal.

Qatar Petrochemical Co (QAPCO): POB 756, Doha; tel. 321105; telex 4361; f. 1974; QGPC has an 84% share; the remaining 16% is held by CdF Chimie (France); total assets QR2,600m.; operation of petrochemical plant at Umm Said (tel. 770111; telex 4871) producing 280,000 tons of ethylene, 140,000 tons of low-density polyethylene, and 46,000 tons of solid sulphur per year; Gen. Man. Yves Michaux.

Qualigas: Doha; f. 1984 to develop North Dome field of unassociated gas; QGPC has a 70% share; BP and Cie Française des Pétroles hold 7.5% each; Chair. Sheikh Abdul-Aziz Bin Khalifa al-Thani (Minister of Finance and Petroleum).

Qatar Flour Mills Co: POB 1444, Umm Said; tel 770452; f. 1969; production started in 1972 of about 30,480 metric tons of wheat flour per year; Chair. Sheikh Jaber bin Mohammed al-Thani.

Qatar General Poultry Establishment: POB 3606, Doha; tel. 740042; telex 4348; produces between 1m. and 2.5m. broiler chickens, and between 10m. and 25m. eggs, per year; Dir Rateb al-Dababneh.

Qatar National Cement Co: POB 1333, Umm Bab; tel. 412691; telex 4337; f. 1965; produces about 330,000 tons of Portland cement per year; expansion was under way in 1984; Chair. Ahmed A. Rahman al-Mana; Man. Dir Rashid M. al-Mannai.

Qatar Steel Co (QASCO): POB 10090, Steel Mill, Umm Said; tel. 770011; telex 4606; the plant was completed in 1978, and produces about 450,000 tons of reinforced steel bars per year; the Government owns a 70% share, with Kobe Steel (20%) and Tokyo Boeki (10%); Chair Mohammed Said al-Mishal; Gen. Man. Motomi Kano.

Transport

ROADS

There are some 1,080 km (671 miles) of surfaced road linking Doha and the petroleum centres of Dukhan and Umm Said with the northern end of the peninsula. A 105-km (65-mile) road from Doha to Salwa was completed in 1970, and joins one leading from Al Hufuf in Saudi Arabia, giving Qatar land access to the Mediterranean. A 418-km (260-mile) highway, built in conjunction with Abu Dhabi, links both states with the Gulf network. Road construction is a continual process.

PIPELINES

Petroleum is transported by pipeline from the oilfields at Dukhan to the loading terminal at Umm Said. Natural gas is brought by pipeline from Dukhan to Doha, where it is used as fuel for a power station and water distillation plant.

SHIPPING

Qatar National Navigation and Transport Co Ltd (QNNTC): POB 153, Doha; tel. 22245; telex 4206; f. 1957; 100%-owned by Qatari nationals; sole shipping agents for all dry cargo and passenger vessels.

Doha Port: In 1981 there were 4 berths of 9.14 m depth and 5 berths of 7.5 m depth. Total length of berths is 1,699 m.

Umm Said Harbour: The Northern Deep Water Wharves consist of a deep-water quay 730 m long with a dredged depth alongside of 15.5 m; and a quay 570 m long with a dredged depth alongside of 13.0 m. The General Cargo Wharves consist of a quay 400 m long with a dredged depth alongside of 10.0 m. The Southern Deep Water Wharves consist of a deep water quay 508 m long with a dredged depth alongside of 13.0 m.

Department of Ports: POB 313, Doha; tel. 414626; telex 4378; Dir of Ports Abdulrehman Jaber Muftah.

CIVIL AVIATION

Doha international airport is equipped to receive jumbo jets; its runway was extended to 15,000 ft in 1970. Plans for a new civil airport, to have one of the longest runways in the world (14,993 ft), were postponed in early 1980. In 1980 a total of 522,000 passengers used the airport.

Department of Civil Aviation: POB 3000, Doha; tel. 321290; telex 4306; Dir of Civil Aviation Omran al-Kawari.

Gulf Air Co Ltd: POB 3394, Doha; tel. 321677; jointly owned by Bahrain, Qatar, the UAE and Oman (see Oman—Civil Aviation).

Gulf Helicopters: POB 811, Doha; tel. 433991; telex 4353; owned by Gulf Air Co GSC; fleet of six Bell 212; Chair. Abdulla bin Hamad al-Attiya.

RWANDA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Rwandese Republic is a land-locked state in central Africa, just south of the equator, bounded by Zaire to the west, by Uganda to the north, by Tanzania to the east and by Burundi to the south. The climate is tropical, although tempered by altitude. It is hot and humid in the lowlands, but cooler in the highlands. The average annual rainfall is 785 mm (31 in). The main rainy season is from February to May. French and Kinyarwanda, the native language, are both in official use. About one-half of the population follow animist beliefs. Most of the remainder are Christians, mainly Roman Catholics. There are Protestant and Muslim minorities. The national flag (proportions 3 by 2) has three equal vertical stripes, of red, yellow and green, with a black letter R in the centre of the yellow stripe. The capital is Kigali.

Recent History

Rwanda became part of German East Africa in 1899. In 1916, during the First World War, it was occupied by Belgian forces from the Congo (now Zaire). From 1920 Rwanda was part of Ruanda-Urundi, administered by Belgium under a League of Nations mandate and later as a UN Trust Territory. Tribal dissensions have long been rife, and in 1959 led to a rebellion and the proclamation of a state of emergency. In September 1961 it was decided by referendum to abolish the monarchy and to establish a republic. Internal autonomy was granted in 1961 and full independence followed on 1 July 1962. Tribal strife broke out again in December 1963, and large-scale killings (estimated at 20,000) were carried out by the Hutu against their former overlords, the Tutsi. During 1964–65 large numbers of displaced Rwandans were resettled in neighbouring countries. In 1969 Grégoire Kayibanda, the country's first President, was re-elected, and all 47 seats in the Legislative Assembly were retained by the governing party, the Mouvement démocratique républicain (also known as Parmehutu).

At the end of 1972 tension between Hutu and Tutsi flared up again and continued throughout February 1973. In July 1973 the Minister of Defence and head of the National Guard, Maj.-Gen. Juvénal Habyarimana, led a bloodless coup against President Kayibanda, proclaimed the Second Republic and established a military administration known as the Committee for National Peace and Unity. This ruled until August, when a new Council of Ministers, with Maj.-Gen. Habyarimana as President, was formed. The normal legislative processes were held in abeyance, and all political activity was banned until July 1975, when a new ruling party, the National Revolutionary Movement for Development (MRND), was formed. Its establishment was preceded by an extensive government reshuffle in which several military ministers were replaced by civilians. The first national congress of the MRND was held in January 1976.

A national referendum in December 1978 approved a new constitution, aimed at returning the country to normal government in accordance with Maj.-Gen. Habyarimana's declaration in 1973 to end the military regime within five years. Elections were held to the National Development Council in December 1981. In October 1982 Rwanda closed its border with Uganda after an influx of 45,000 refugees, most of whom were Rwandan exiles fleeing Ugandan persecution. A further 32,000 refugees collected in camps on the Ugandan side of the border. In March 1983 Rwanda agreed to resettle more than 30,000 refugees, but Ugandan persecution of ethnic Rwandans continued, and in December 1983 thousands crossed into Tanzania. In July 1984 it was reported that Uganda and Tanzania had signed an agreement on the repatriation of 10,000 refugees to Uganda.

In December 1983 Habyarimana was re-elected President. Elections to the National Development Council in the same month were followed by a government reshuffle in January 1984.

Government

Executive power is exercised by the President, assisted by an appointed Council of Ministers, and legislative power is held by the President in conjunction with an elected National Development Council. The country is divided into 10 Prefectures and subdivided into 143 communes or municipalities, each administered by a governor, who is appointed by the President and assisted by an elected council of local inhabitants. In December 1978 a referendum approved a new constitution, intended to return the country to civilian government (see section on Constitution). Rwanda is a one-party state.

Defence

All armed services form part of the army. In July 1984 the total strength of the army was 5,150 (including 150 air force personnel), and paramilitary forces totalled 1,200 men. Estimated defence expenditure in 1982 was US $30m.

Economic Affairs

About 90% of the working population are engaged in agriculture, mainly at subsistence level, but the agricultural sector's contribution to Rwanda's gross domestic product (GDP) declined from 47.5% in 1980 to only 30.7% in 1981. Development is hampered by the high density of Rwanda's population, which is increasing at an annual rate of about 2.5%, and the great distance from the sea. Since 1977 the amount of new land made available yearly for subsistence crops has declined, while the yield from many worked areas is falling, owing to erosion and over-intensive traditional farming methods. However, a determined programme of reafforestation was proceeding at a rate of 10,000 ha per year in 1983. The principal cash crops are coffee, tea and pyrethrum, of which the most important is coffee, which provided 65.7% of total export earnings in 1983. An ambitious programme to increase the output of tea began in 1970, and in 1978 the African Development Fund provided a loan of US $1.1m. for the Ramba-Gaseke tea project, to expand the plantation and to set up a factory. Tea contributed 11.3% of total export earnings in 1983. The Government is trying to expand pyrethrum growing, and in 1980 opened a pyrethrum flower refinery. By 1977 rice plantations had been established in the marshy plains, while sugar cane plantations were being developed as new agricultural ventures. Hides and skins are also exported.

Minerals, particularly cassiterite (tin ore), are the main export after coffee. There are also reserves of tungsten, gold, tantalite and beryl, and work has begun on the exploitation of natural gas reserves beneath Lake Kivu, which are believed to be among the largest in the world. Manufacturing is on a small scale. Apart from the processing of foodstuffs, there are small textile, brewing, chemical and engineering interests, but development of these is very slow. Rwanda's first metal-processing factory, a tin-smelting plant at Karuruma, opened in 1981, and plans were being made in 1982 to build tungsten and iron foundries at Kigali. Rwanda depends almost entirely on hydroelectric power for its energy requirements. By 1980 about one-tenth of the country's estimated potential of 200 MW had been harnessed. All but one of the seven thermal plants were closed down in 1979, when the national electricity supply was connected to the Mururu station in Zaire, which now provides more than one-half of Rwanda's electricity. A large hydroelectric scheme (the Ruzizi-II project) on the Rwanda–Zaire border, being developed jointly with Burundi and Zaire, was due to be completed in 1987.

The priorities of Rwanda's second Development Plan, covering 1977–81, were to achieve self-sufficiency in foodstuffs and the modernization of agriculture, the improvement of land links with other countries and the restructuring of the educational system. In the industrial sector the aim was to increase production by 16.5% and to create 40,000 new jobs. The aims of

the third Development Plan (1982–86) were generally similar to those of the second Plan, with GDP expected to rise by about 6% per year and agricultural production by 3.3% annually.

Rwanda's principal trading partners are neighbouring African states, Belgium and other EEC countries, Japan and the USA. About 90% of Rwandan exports and imports are carried via Uganda to the coast at Mombasa, in Kenya, and the temporary closure of the border in 1976 and during the 1978–79 Tanzania–Uganda war severely disrupted trade. In 1981 Rwanda joined a number of other southern and eastern African countries in forming a Preferential Trade Area (see p. 218).

Development loans from abroad were equivalent to about 24% of ordinary budget revenue in 1980, while 33% of budget expenditure was allocated to development. As a signatory to the Lomé Convention (see p. 149), Rwanda receives aid from the EEC. Other sources of assistance include Belgium, France, the Federal Republic of Germany, the Arab League, UN agencies and various development banks and corporations. The Economic Community of the Great Lakes Countries (CEPGL), founded by Rwanda, Burundi and Zaire in 1976, established a joint development bank in 1980. In 1977 Rwanda, Burundi and Tanzania formed an organization (later joined by Uganda) to develop the water, power and mineral resources of the Kagera river basin.

Transport and Communications

There are no railways, although in 1984 plans were being considered for the construction of a line passing through Uganda, Rwanda and Burundi, to connect with the Kigoma–Dar es Salaam line in Tanzania. A programme of asphalting the main roads is being undertaken, with foreign aid, and there are asphalted highways linking Rwanda with Burundi, Uganda and Tanzania. In 1983 there were 6,820 km of roads, of which 2,120 km were main roads and 539 km were metalled. The rivers are not navigable but there is traffic on Lake Kivu. There are four airfields and two international airports, at Kigali-Kanombe and Kamembe.

Social Welfare

State schemes cover family allowances, accidents and pensions. All wage-earners must take part in the Social Security Scheme. The Government-assisted Native Welfare Fund provides community centres and medical services. Religious missions also provide socio-medical services. In 1980 Rwanda had 248 hospital establishments, with a total of 7,889 beds, and there were 164 physicians working in the country.

Education

Since the initiation of the wide-ranging Schools Reform Programme in 1979, primary education has been free and, officially, compulsory for all children between seven and 14 years of age. Schools are run by the State and by Missions but provided education for only 761,955 pupils at primary schools in 1983/84 (the 1981/82 figure, of 743,067, included 68% of children in the primary age-group), while pupils at secondary schools numbered 14,761. The national university, with campuses at Butare and Ruhengeri, enrolled 1,317 students in 1982/83, and a further 603 Rwandans went to universities abroad. In 1984 27.5% of the state budget was allocated to education.

Tourism

Tourism is developing slowly. Attractions include national parks, Lake Kivu and fine mountain scenery. In 1980 1,160 hotel beds were available in Rwanda.

Public Holidays

1985: 1 May (Labour Day), 16 May (Ascension), 27 May (Whit Monday), 1 July (National Holiday, anniversary of independence), 5 July (National Peace and Unity Day, anniversary of 1973 coup), 15 August (Assumption), 25 September (Kamarampaka Day, anniversary of 1961 referendum), 26 October (Armed Forces Day), 1 November (All Saints' Day), 25 December (Christmas).

1986: 1 January (New Year), 28 January (Democracy Day), 31 March (Easter Monday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 Rwanda franc.

Exchange rates (31 December 1984):
£1 sterling = 121.45 Rwanda francs;
US $1 = 104.79 Rwanda francs.

Directory

The Constitution

A new Constitution for the Rwandese Republic was approved by referendum on 17 December 1978. The following is a summary of the main provisions.

THE REPUBLIC

Rwanda is a democratic, social and sovereign State. There is equality among citizens, who exercise national rights through their representatives.

CIVIL RIGHTS

Fundamental liberties, as defined in the Declaration of Human Rights, are guaranteed.

THE EXECUTIVE

Executive power is exercised by the President, to whom the Government is responsible. He is elected for a five-year term of office and may be re-elected. The President shall be immune from censure and prosecution and the Secretary-General of the Mouvement révolutionnaire national pour le développement, the sole legal party, may act as his successor in the case of his incapacity. The President, who nominates and dismisses Ministers, presides over the Council of Ministers; negotiates and terminates all treaties; promulgates laws; exercises the prerogative of mercy; and is the Commander-in-Chief of the Armed Forces.

LEGISLATIVE POWER

Exercised jointly by the President and the National Development Council, elected by universal adult suffrage. The Council may censure the head of government by a vote passed by four-fifths of its members but may not dismiss him. Such a vote would oblige the Government to change its policies or its ministers.

The Government

HEAD OF STATE

President: Maj.-Gen. Juvénal Habyarimana (assumed power 5 July 1973; elected President on 24 December 1978 and re-elected on 19 December 1983).

COUNCIL OF MINISTERS
(February 1985)

President of the Council of Ministers and Minister of National Defence: Maj.-Gen. Juvénal Habyarimana.

Minister at the Presidency: Siméon Nteziryayo.

Minister in Charge of Institutional Relations: Edouard Karemera.

Minister of the Interior and of Community Development: Thomas Habanabakize.

Minister of Justice: Jean-Marie Vianney Mugemana.

Minister for the Civil Service and Vocational Training: François Habiyakare.

Minister of Finance and the Economy: Jean-Damascène Hategekimana.

Minister of Industry, Mines and Crafts: Mathieu Ngirira.

Minister of Agriculture, Livestock and Forests: Anastase Nteziryayo.

Minister of Planning: Ambroise Mulindangabo.

Minister of Public Works and Energy: Joseph Nzirorera.

Minister of Transport and Communications: André Ntagerura.

Minister of Primary and Secondary Education: Col Aloys Nsekalije.

Minister of Higher Education and Scientific Research: Charles Nyandwi.

Minister of Youth and the Co-operative Movement: Augustin Ndindiliyimana.

Minister of Foreign Affairs and Co-operation: François Ngarukiyintwali.

Minister of Public Health and Social Affairs: François Muganza.

Confédération Syndicale des Travailleurs du Rwanda (COSTRAR): BP 295, Kigali.

Transport

ROADS

In 1983 there were 6,820 km of roads, of which 2,120 km were main roads. Rwanda is linked by road to the Tanzanian railways system.

INLAND WATERWAYS

There are services on Lake Kivu between Cyangugu, Gisenyi and Kibuye.

CIVIL AVIATION

There are four aerodromes for the internal service and two international airports, at Kigali-Kanombe and Kamembe.

Air Rwanda: BP 808, Kigali; telex 554; f. 1975; Chair. Denis Amri; Gen. Man. Thaddée Ntakaburimvano; fleet of 1 Boeing 707-320C, 1 Twin Otter, 2 Islanders, 1 Aztec.

Tourism

Office rwandais du tourisme et des parcs nationaux (ORTPN): BP 905, Kigali; f. 1973; Dir Laurent Habiyaremye.

SAINT CHRISTOPHER* AND NEVIS

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Federation of Saint Christopher and Nevis is situated at the northern end of the Leeward Islands chain of the West Indies, with Saba and St Eustatius (both in the Netherlands Antilles) to the north-west, Barbuda to the north-east and Antigua to the south-east. Nevis lies about 3 km (2 miles) to the south-east of Saint Christopher, separated by a narrow strait. The tropical heat, varying between 17°C (62°F) and 33°C (92°F), is tempered by constant sea winds, and annual rainfall averages 1,400 mm (55 in) on Saint Christopher and 1,220 mm (48 in) on Nevis. English is the official language. The majority of the population belong to the Anglican Communion, and other Christian denominations are represented. The national flag (proportions 5 by 3) comprises two triangles, one of green (with its base at the hoist and its apex in the upper fly) and the other of red (with its base in the fly and its apex in the lower hoist), separated by a broad, yellow-edged black diagonal stripe (from the lower hoist to the upper fly) bearing two five-pointed white stars. The capital is Basseterre, on Saint Christopher.

Recent History

Saint Christopher, settled in 1623, was Britain's first colony in the West Indies. The French settled part of the island a year later, and conflict over possession continued until 1783, when, after fierce battles, Saint Christopher was ceded to Britain under the Treaty of Versailles. Nevis was settled by the British in 1628 and, although it came under both French and Spanish attacks in the 17th and 18th centuries, remained one of the most prosperous of the Antilles until the middle of the 19th century. In 1816 Saint Christopher, Nevis, Anguilla and the British Virgin Islands were united to form one colony, under the administration of a Captain-General and a Governor-in-Chief. Under the Leeward Islands Federation, formed in 1871, the unit was reduced to Saint Christopher and Nevis, although Anguilla was shortly rejoined to the territory. A Labour Party was formed in 1932, and campaigned for independence for the islands. In 1958 Saint Christopher-Nevis-Anguilla became a member of the West Indies Federation and remained so until the Federation's dissolution in 1962. A new constitution, granted to each of the British territories in the Leeward Islands in 1960, provided for government through an Administrator and an enlarged Legislative Council.

After an abortive attempt to form a smaller East Caribbean Federation, five of the colonies involved became Associated States in an arrangement which gave them full internal autonomy, while the United Kingdom retained responsibility for defence and foreign relations. Saint Christopher-Nevis-Anguilla, led by the pro-independence Labour Party, attained Associated Statehood in February 1967. The Legislative Council was replaced by a House of Assembly, the Administrator became Governor, and the Chief Minister, Robert Bradshaw, leader of the Labour Party, became the state's first Premier. Three months later, Anguilla rebelled against government from Saint Christopher, and in 1971 reverted to being a *de facto* British dependency (see Anguilla, Vol. I, p. 1282), although this was strongly opposed by the Saint Christopher administration. Anguilla was formally separated from the other islands in December 1980.

General elections in 1971 returned Robert Bradshaw to the premiership, with the Labour Party gaining seven of the nine elective seats in the House of Assembly. The two seats for Nevis went to the opposition People's Action Movement (PAM) and the Nevis Reformation Party (NRP), formed in 1970, which advocated the separation of Nevis from Saint Christopher. In the 1975 elections the Labour Party again won seven seats, while the NRP took both the Nevis seats. Bradshaw died in May 1978 and was succeeded by Paul Southwell, the Deputy Premier and Minister for Trade, Industry and Tourism. Southwell had been Chief Minister until 1966, and pledged to lead the country towards independence. He died in May 1979, however, and was replaced by Lee L. Moore, the former Attorney-General.

Elections in February 1980 produced the first break in Labour government for nearly 30 years, with four seats going to Labour, three seats going to the PAM and the NRP retaining the two Nevis seats. Despite the fact that the Labour Party won 58% of the popular vote, a PAM/NRP coalition government was formed under Dr Kennedy A. Simmonds, leader of the PAM. The change of government led to the suspension of a timetable for independence, which had been scheduled for June 1980. In 1982 a White Paper, containing proposals for a greater degree of autonomy for Nevis and for independence for the whole state, received approval from the House of Assembly, conscious of the need to retain support from the NRP, which held the balance of power. The Labour Party was against these proposals, stating that the coalition government did not have a mandate for its independence policy, and demanded that elections should be held before independence. This was rejected by the Government, and disagreements concerning the proposed independence constitution led to civil disturbances, with outbreaks of arson in 1982 and industrial unrest in 1983. Nevertheless, the plans continued, and Saint Christopher and Nevis became an independent state, under a federal constitution, on 19 September 1983. The Labour Party boycotted most of the celebrations, condemning the special provisions for Nevis in the Constitution (see below) as giving the island a powerful role in government which was disproportionate to its size and population. Upon independence, Saint Christopher and Nevis became a full member of the Commonwealth. In 1984 Saint Christopher and Nevis became a member of the OAS (see p. 191).

Early elections to an enlarged National Assembly were held in June 1984, and the ruling PAM/NRP coalition was decisively returned to power. The Labour Party won only two seats on Saint Christopher, and did not contest the three Nevis seats, which were won by the NRP. The PAM won a clear majority of the popular vote on Saint Christopher, and the NRP no longer held the balance of power in terms of seats in the National Assembly.

Government

Saint Christopher and Nevis is a constitutional monarchy. Executive power is vested in the British monarch, as Head of State, and is exercised locally by the monarch's personal representative, the Governor-General, who acts in accordance with the advice of the Cabinet. Legislative power is vested in Parliament, comprising the monarch and a National Assembly composed of the Speaker, three (or, if a nominated member is Attorney-General, four) nominated members, known as Senators (two appointed on the advice of the Premier and one appointed on the advice of the Leader of the Opposition), and 11 elected members (Representatives), who are chosen from single-member constituencies for up to five years by universal adult suffrage. The Cabinet comprises the Prime Minister, who must be able to command the support of the majority of the members of the National Assembly, the Attorney-General (ex officio) and four other ministers. The Prime Minister and the Cabinet are responsible to Parliament.

The Nevis Island legislature comprises the Nevis Island Assembly and the Nevis Island Administration, led by the British monarch, represented on the island by the Deputy Governor-General. It operates similarly to the Saint Christopher and Nevis legislature but has power to secede from the

* While this island is officially named Saint Christopher as part of the state, it is often abbreviated to St Kitts.

Federation, subject to certain restrictions (see Constitution below).

Defence

The small army was disbanded by the Government in 1981, and its duties were absorbed by the Volunteer Defence Force and special tactical unit of the police. In 1984 the USA provided military equipment, including a coastguard patrol boat, worth US $1.5m.

Economic Affairs

The economy is based on agriculture, particularly the cultivation of sugar cane, and, more recently, tourism. The contribution of agriculture to the islands' gross domestic product (GDP) has fallen steadily, but still accounted for 24% of GDP in 1980. The sugar industry dominates the islands, accounting for about 60% of domestic exports and employing about 25% of the working population, but, with international sugar prices very low in recent years, it has been suffering financial deficits: losses totalled EC $18.4m. in 1981 and an estimated $13.5m. in 1983. The annual output of raw sugar has declined steadily from the 1960 peak of 50,000 tons, averaging about 32,000 tons in the 1970s and falling to 27,761 tons in 1983, mainly as a result of drought. Production increased, however, in 1984 to a total of 30,178 tons. The Government is attempting to halt a general economic decline by restructuring the industry, which was nationalized in 1975. The development and diversification of agriculture is geared to import substitution, to satisfy both local food markets and the tourist trade, and to provide raw materials for agro-industries. Traditional crops, such as sweet potatoes and yams, were to be grown in larger quantities, and the cultivation of groundnuts and coffee has also been encouraged. Sea-island cotton and coconuts have replaced the traditional sugar crop on the small-holdings of Nevis.

In 1983 only about 30% of domestic food requirements were met locally. However, it was believed that this proportion could be improved to 65%, thus reducing the massive bill for food imports, which in 1980 was EC $26m., equivalent to 41% of total earnings from domestic exports.

The main activities in the small industrial sector are sugar processing and the production of by-products, the manufacture of garments and footwear, the processing of beer and other beverages, and the assembly of electronic equipment. There are three industrial estates (two on Saint Christopher and one on Nevis). Under the Fiscal Incentives Act, the Government hopes to attract foreign investment in agro-industries which may qualify for tax concessions. The industries which were promoted in 1983 were mainly the processing and manufacturing of rum, confectionery, molasses, fruit, groundnuts, soap and oils from coconuts, and cottonseed processing.

Tourism is developing rapidly and receives considerable government support. Following the introduction of regular air services between Saint Christopher and the USA, the number of tourists arriving in the islands was estimated to have risen by 17% in 1981, to 39,367. A traditional Kittian village was opened in 1982 in the Frigate Bay area, and, despite set-backs due to fires, several hotels were under construction in 1983. New deep-water docking facilities at Basseterre have led to a dramatic increase in the number of cruise ships calling at Saint Christopher. The number of cruise passengers rose from 3,883 in 1981 to 19,195 in 1983. The Frigate Bay Development Scheme plans include condominiums and hotels, as well as recreational facilities, in the south-eastern peninsula of Saint Christopher.

In 1982 growth in the islands' GDP declined to 2% in real terms, and in 1983 GDP fell by 2.5% as a result of the drop in sugar production. The recovery in agriculture, tourism and construction during 1984 was expected to produce a rise of 3% in real terms. The 1984 budget, announced in November 1983, estimated recurrent revenue of EC $65.8m. and recurrent expenditure of $54.6m. Of total expenditure by the central administration, EC $11m. was to be allocated to Nevis. The Nevis budget was EC $39.9m., of which EC $2.4m. was for education, EC $1.7m. for health and EC 18.4m. for capital expenditure. A substantial part of the population has emigrated, especially from Nevis, and their remittances provide an important source of income, valued at about one-half of the total earnings from domestic exports.

Transport and Communications

There are 101 km (63 miles) of roads on Nevis and 97 km (60 miles) on Saint Christopher. A 58-km (36-mile) narrow-gauge light railway on Saint Christopher serves the sugar industry. A state-run motor boat service links the two islands. A new deep-water port was opened at Basseterre in 1981. Golden Rock Airport, 4 km (2½ miles) from Basseterre, is equipped to handle jet aircraft, and two regional airlines serve Newcastle airfield on Nevis, 11 km (7 miles) from Charlestown.

Social Welfare

In 1978 Saint Christopher and Nevis had seven hospital establishments, with a total of 380 beds. In 1980 there were 16 physicians working in the islands.

Education

Education is compulsory between five and 14 years of age, but no child is required to leave school until the age of 16. Primary education begins at five years of age and lasts for seven years. Secondary education, starting at the age of 12, comprises a first cycle of four or five years, followed by a second cycle of two years. There are 34 government, 14 private and 6 denominational schools.

Tourism

The introduction of regular air services to Miami and New York has opened up the islands as a tourist destination. Visitors are attracted by the excellent beaches on Saint Christopher and the spectacular mountain scenery of Nevis, the historical Brimstone Hill Fort on Saint Christopher and the islands' associations with Lord Nelson and Alexander Hamilton.

Public Holidays

1985: 6 May (Labour Day), 27 May (Whit Monday), 8 June (Queen's Official Birthday), 5 August (August Monday), 19 September (Independence Day), 14 November (Prince of Wales' Birthday), 25–27 December (Christmas), 30 December (Carnival Day).

1986: 1 January (New Year's Day), 28–31 March (Easter).

Weights and Measures

The imperial system is used.

Currency and Exchange Rates

100 cents = 1 East Caribbean dollar (EC $).

Exchange rates (31 December 1984):

£1 sterling = EC $3.129.

US $1 = EC $2.700.

Statistical Survey

AREA AND POPULATION

Area (sq km): 261.6 (St Christopher 168.4, Nevis 93.2).

Population: (Provisional result, census of 7 April 1970) 64,000*; (Provisional result, census of 12 May 1980) 44,404 (St Christopher 35,104, Nevis 9,300).

Density (1980): 169.7 per sq km.

Principal Town (1980 estimate): Basseterre (capital) 15,000.

Births and Deaths (1982): Registered live births 1,307 (birth rate 29.0 per 1,000); Registered deaths 503 (death rate 11.2 per 1,000).

* Includes Anguilla, which was part of the territory until December 1980.

AGRICULTURE, ETC.

Principal Crops ('000 metric tons, 1982): Sugar cane (unofficial estimate) 368; Coconuts 2; Fruit and vegetables 1. Source: FAO, *Production Yearbook.*

Livestock ('000 head, year ending September 1982): Cattle 8; Pigs 20; Sheep 24; Goats 15; Poultry 80. Source: FAO, *Production Yearbook.*

Fishing (metric tons, live weight): Total catch 1,850 in 1980; 1,880 in 1981; 1,880 in 1982. Source: FAO, *Yearbook of Fishery Statistics.*

FINANCE

Currency and Exchange Rates: 100 cents = 1 East Caribbean dollar (EC $). *Coins:* 1, 2, 5, 10, 25 and 50 cents. *Notes:* 1, 5, 20 and 100 dollars. *Sterling and US Dollar Equivalents* (31 December 1984): £1 sterling = EC $3.129; US $1 = $2.700; EC $100 = £31.96 = US $37.04. *Exchange Rate:* Fixed at US $1 = $2.70 since July 1976.

Budget (estimates, EC $ million, 1984): Recurrent revenue 65.8; Recurrent expenditure 54.6.

Cost of Living (consumer price index; base: 1978 = 100): 144.8 in 1981; 153.3 in 1982; 157.6 in 1983.

Gross Domestic Product by Economic Activity (EC$ million in current prices, 1978): Agriculture, hunting, forestry and fishing 14.6; Mining and quarrying 0.3; Manufacturing 11.7; Electricity, gas and water 0.9; Construction 4.9; Trade, restaurants and hotels 9.2; Transport, storage and communications 6.3; Other services 30.9; Total (at factor cost) 78.8; Indirect taxes (less subsidies) 16.7; Total (in purchasers' values) 95.5.

EXTERNAL TRADE

1981 (EC $ million): Imports 86.7; Exports 43.9; Re-exports 1.5.

TRANSPORT

Road Traffic (1978): 3,385 registered vehicles; 2,906 licensed vehicles.

Shipping (international sea-borne freight traffic, '000 metric tons, 1980): Goods loaded 44; Goods unloaded 56.

TOURISM

Visitors (1983): 57,108 (incl. 19,195 cruise-ship passengers).

EDUCATION

Primary: 28 state schools (1980); 331 teachers (1979); 8,320 pupils (1979).

Secondary: 6 state schools (1980); 254 teachers (1979); 4,496 pupils (1979).

Directory

The Constitution

The Constitution of the Federation of Saint Christopher and Nevis took effect from 19 September 1983, when the territory achieved independence. Its main provisions are summarized below:

FUNDAMENTAL RIGHTS AND FREEDOMS

Regardless of race, place of origin, political opinion, colour, creed or sex, but subject to respect for the rights and freedoms of others and for the public interest, every person in Saint Christopher and Nevis is entitled to the rights of life, liberty, security of person, equality before the law and the protection of the law. Freedom of conscience, of expression, of assembly and association is guaranteed, and the inviolability of personal privacy, family life and property is maintained. Protection is afforded from slavery, forced labour, torture and inhuman treatment.

THE GOVERNOR-GENERAL

The Governor-General is appointed by the British monarch, whom the Governor-General represents locally. The Governor-General must be a citizen of Saint Christopher and Nevis, and must appoint a Deputy Governor-General, in accordance with the wishes of the Premier of Nevis, to represent the Governor-General on that island.

PARLIAMENT

Parliament consists of the British monarch, represented by the Governor-General, and a National Assembly, which includes a Speaker, three (or, if a nominated member is Attorney-General, four) nominated members (Senators) and 11 elected members (Representatives). Senators are appointed by the Governor-General; one on the advice of the Leader of the Opposition, and the other two in accordance with the wishes of the Prime Minister. The Representatives are elected by universal suffrage, one from each of the 11 single-member constituencies.

Every citizen over the age of 18 years is eligible to vote. Parliament may alter any of the provisions of the Constitution.

THE EXECUTIVE

Executive authority is vested in the British monarch, as Head of State, and is exercised on the monarch's behalf by the Governor-General, either directly or through subordinate officers. The Governor-General appoints as Prime Minister that Representative who, in the Governor-General's opinion, appears to be best able to command the support of the majority of the Representatives. Other ministerial appointments are made by the Governor-General, in consultation with the Prime Minister, from among the members of the National Assembly. The Governor-General may remove the Prime Minister from office if a resolution of 'no confidence' in the Government is passed by the National Assembly and if the Prime Minister does not resign within three days or advise the Governor-General to dissolve Parliament.

The Cabinet consists of the Prime Minister and other Ministers. When the office of Attorney-General is a public office, the Attorney-General shall, by virtue of holding that office, be a member of the Cabinet in addition to the other Ministers. The Governor-General appoints as Leader of the Opposition in the National Assembly that Representative who, in the Governor-General's opinion, appears to be best able to command the support of the majority of the Representatives who do not support the Government.

CITIZENSHIP

All persons born in Saint Christopher and Nevis before independence who, immediately before independence, were citizens of the United Kingdom and Colonies automatically become citizens of Saint Christopher and Nevis. All persons born in Saint Christopher and Nevis after independence automatically acquire citizenship, as do those born outside Saint Christopher and Nevis after independ-

ence to a parent possessing citizenship. There are provisions for the acquisition of citizenship by those to whom it is not automatically granted.

THE ISLAND OF NEVIS

There is a Legislature for the island of Nevis which consists of the British monarch, represented by the Governor-General, and the Nevis Island Assembly. The Assembly consists of three nominated members (one appointed by the Governor-General in accordance with the advice of the Leader of the Opposition in the Assembly, and two appointed by the Governor-General in accordance with the advice of the Premier) and such number of elected members as corresponds directly with the number of electoral districts on the island.

There is a Nevis Island Administration, consisting of a Premier and two other members who are appointed by the Governor-General. The Governor-General appoints the Premier as the person who, in the Governor-General's opinion, is best able to command the support of the majority of the elected members of the Assembly. The other members of the Administration are appointed by the Governor-General, acting in accordance with the wishes of the Premier. The Administration has exclusive responsibility for administration within the island of Nevis, in accordance with the provisions of any relevant laws.

The Nevis Island Legislature may provide that the island of Nevis is to cease to belong to the Federation of Saint Christopher and Nevis, in which case this Constitution would cease to have effect in the island of Nevis. Provisions for the possible secession of the island contain the following requirements: that the island must give full and detailed proposals for the future Constitution of the island of Nevis, which must be laid before the Assembly for a period of at least six months prior to the proposed date of secession; that a two-thirds majority has been gained in a referendum which is to be held after the Assembly has passed the motion.

The Government

Head of State: HM Queen Elizabeth II.

Governor-General: Sir Clement Arrindell (took office 19 September 1983).

CABINET

(February 1985)

Prime Minister and Minister of Finance, Home and Foreign Affairs: Dr Kennedy Alphonse Simmonds.

Deputy Prime Minister and Minister of Labour and Tourism: Michael O. Powell.

Minister of Agriculture, Lands, Housing and Development: Hugh Heyliger.

Minister of Natural Resources and the Environment: Simeon Daniel.

Minister of Communications, Works and Public Utilities: Ivor A. Stevens.

Minister of Education, Health and Community Affairs: Sydney Morris.

Minister of Trade and Industry: Fitzroy Jones.

Minister of Women's Affairs: Constance Mitcham.

Minister in the Ministry of Finance: Richard Caines.

Attorney-General: Tapley Seaton.

Minister without Portfolio: Unral Swanston.

MINISTRIES

Government Headquarters is at Church St, Basseterre; tel. 465-2521.

NEVIS ISLAND ADMINISTRATION

Premier: Simeon Daniel.

There are also two appointed members.

Legislature

NATIONAL ASSEMBLY

Speaker: Herman Liburd.

Elected members: 11. Nominated members: 3.

Election, 21 June 1984

Party	Seats
People's Action Movement	6
Nevis Reformation Party	3
Labour Party	2

NEVIS ISLAND ASSEMBLY

Elected members: 5. Nominated members: 3.

The elections to the Nevis Island Assembly in August 1983 were contested by the Nevis Reformation Party (NRP) and the People's Democratic Party (PDP). The NRP won all five seats.

Political Organizations

Labour Party (Workers' League): Church St, POB 239, Basseterre; f. 1932; socialist party; Chair. Fitzroy Bryant; Leader Lee L. Moore; Sec. Jos N. France.

Nevis Reformation Party (NRP): POB 480, Charlestown, Nevis; f. 1970; campaigns for secession for Nevis from St Christopher; Leader Simeon Daniel; Sec. Levi Morton; 10,000 mems.

People's Action Movement (PAM): Basseterre; f. 1965; Leader Dr Kennedy Alphonse Simmonds.

People's Democratic Party (PDP): Nevis; Leader Theodore Hobson.

Diplomatic Representation

There are no resident envoys in Saint Christopher and Nevis, but diplomatic relations with many countries are maintained at consular level.

Judicial System

Justice is administered by the Eastern Caribbean Supreme Court, based in Saint Lucia and consisting of a Court of Appeal and a High Court. One of the seven puisne judges of the High Court is responsible for St Kitts and Nevis and presides over the Court of Summary Jurisdiction. The Magistrates' Courts deal with summary offences and civil offences involving sums of not more than EC $5,000.

Puisne Judge: Lloyd Williams.

Religion

There are Anglican, Methodist, Moravian, Roman Catholic, Seventh-day Adventist, Baptist, Pilgrim Holiness, Church of God, Apostolic Faith and Plymouth Brethren places of worship.

The Press

Democrat: POB 30, Cayon St, Basseterre; f. 1948; weekly on Saturdays; organ of PAM; Dir Capt. J. L. Wigley; Editor Fitzroy P. Jones; circ. 3,000.

The Labour Spokesman: Masses House, Church St, Basseterre; tel. 465-2229; f. 1957; Wednesdays and Saturdays; organ of St Kitts-Nevis Trades and Labour Union; Editor Jos N. France (acting); circ. 6,000.

Radio and Television

In 1983 there were an estimated 21,100 radio receivers and 8,100 television receivers in use.

Radio Paradise: POB 423, Basseterre; tel. 465-3321; religious; Dir R. A. Mayer.

ZIZ Radio and Television: POB 555, Springfield, Basseterre; tel. 465-2621; commercial; radio from 1961, television from 1972; government-owned; Gen. Man. E. JOHN; Tech. Dir Z. JOSEPH.

Finance

BANKING

Central Bank

Eastern Caribbean Central Bank (ECCB): POB 89, Basseterre; tel. 465-2537; telex 6828; f. 1965 as East Caribbean Currency Authority; name changed 1983; responsible for issue of currency in Anguilla, Antigua and Barbuda, Dominica, Grenada, Montserrat, Saint Christopher and Nevis, Saint Lucia, Saint Vincent and the Grenadines; Gov. CECIL A. JACOBS.

Local Banks

Nevis Co-operative Banking Co Ltd: Charlestown, Nevis; f. 1955; Man. Dir D. R. WALWYN.

St Kitts Bank of Commerce: POB 191, Basseterre; Man. Dir E. WALWYN.

St Kitts-Nevis-Anguilla National Bank Ltd: POB 343, Church St, Basseterre; tel. 465-2204; telex 6826; majority government-owned; total assets EC $129m. (Aug. 1984); Chair. WILLIAM LIBURD; Gen. Man. E. PISTANA; br. on Nevis.

Foreign Banks

Barclays Bank (UK): POB 42, Basseterre; tel. 465-2449; telex 6823; Man. A. SANFORD; br. on Nevis.

Bank of Nova Scotia: 5 Liverpool Row, Basseterre; tel. 465-4141; telex 6882.

Royal Bank of Canada: POB 91, Basseterre; tel. 465-2409; telex 6856; Man. F. V. BOWMAN.

Trade and Industry

Frigate Bay Development Corporation: POB 315, Basseterre; tel. 465-8339; promotes tourist and residential developments.

St Kitts-Nevis Chamber of Commerce (Inc.): South Sq. St, POB 332, Basseterre; tel. 465-2980; telex 6822; incorporated 1949; 85 mems; Pres. W. KELSICK; Exec. Dir RICHARD O. SKERRITT.

National Agricultural Corporation (NACO): Church St, Basseterre; tel. 465-2498; f. 1975; government-owned; responsible for agricultural side of sugar industry; promotes crop diversification; Chief Exec. L. JAMES.

Nevis Cotton Growers' Association Ltd: Charlestown, Nevis; Pres. IVOR STEVENS.

TRADE UNIONS

St Kitts-Nevis Trades and Labour Union: Masses House, Church St, Basseterre; tel. 465-2229 f. 1940; affiliated to Caribbean Maritime and Aviation Council, Caribbean Congress of Labour and ICFTU; associated with Labour Party; Pres. LEE L. MOORE; Gen. Sec. JOS N. FRANCE; about 4,000 mems.

United Workers' Union (UWU): Market St, Basseterre; tel. 465-4130; associated with PAM.

Transport

RAILWAYS

There are 58 km (36 miles) of light railway on Saint Christopher, serving the sugar plantations.

ROADS

There are 101 km (63 miles) of road in Nevis and approximately 97 km (60 miles) in Saint Christopher.

SHIPPING

The Government maintains a commercial motor boat service between the islands and the following shipping lines call at the islands: Saguenay, Caribbean Shipping, Harrison, Booth, Lamport and Holt, Royal Netherlands, Athel, Atlantic, Booker, Grimaldi Siosa and Lauro.

CIVIL AVIATION

The following airlines serve Golden Rock International Airport on Saint Christopher: Air BVI (British Virgin Islands), Air Mello, BWIA International (Trinidad and Tobago), Caribbean Airways (Barbados), LIAT (Antigua), Prinair (Puerto Rico), Sunjet International, Windward Islands Airways (Netherlands Antilles). Nevis is served by LIAT and Caribair.

Tourism

There were 57,108 visitors to Saint Christopher and Nevis in 1983.

St Kitts-Nevis Tourist Board: Treasury Pier, POB 132, Basseterre; tel. 465-4040; Main St, Nevis; Chair. COLIN PEREIRA.

St Kitts-Nevis Hotel Association: POB 67, Basseterre; tel. 452-8351; telex 6867.

SAINT LUCIA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

Saint Lucia is in the Windward Islands group of the West Indies, lying to the south of Martinique and to the north-east of Saint Vincent, in the Caribbean Sea. The island is volcanic, with spectacular mountain scenery. The average annual temperature is 26°C (79°F), with a dry season from January to April, followed by a rainy season from May to August. The average annual rainfall is 1,500 mm (60 in) in the low-lying areas, and 3,500 mm (138 in) in the mountains. The official language is English, although a large proportion of the population speak only a French-based patois. Almost all of the island's inhabitants profess Christianity, and between 85% and 90% are Roman Catholics. The national flag (proportions 8 by 5) is blue, bearing in its centre a white-edged black triangle partly covered by a gold triangle rising from a common base. The capital is Castries.

Recent History

British settlers made an unsuccessful attempt to colonize the island in 1605. A further party of Englishmen arrived in 1638 but were murdered by the indigenous Carib population. France claimed sovereignty in 1642, and battles between French and Caribs continued until 1660, when a peace treaty was signed. Saint Lucia changed hands 14 times before it became a British colony in 1814, ceded by the French under the Treaty of Paris. It remained under British rule for the next 165 years.

Representative government was introduced in 1924. The colony was a member of the Windward Islands, under a federal system, until December 1959. It joined the newly formed West Indies Federation in January 1958 and remained a member until the Federation's dissolution in May 1962. From January 1960 Saint Lucia, in common with other British territories in the Windward Islands, was given a new constitution, with its own Administrator and an enlarged Legislative Council.

In 1951 the first elections under adult suffrage were won by the St Lucia Labour Party (SLP), which held power until 1964, when John Compton of the newly-formed conservative United Workers' Party (UWP) became Chief Minister. In March 1967 Saint Lucia became one of the West Indies Associated States, gaining full autonomy in internal affairs, with the United Kingdom retaining responsibility for defence and foreign relations only. The Legislative Council was replaced by a House of Assembly, the Administrator became Governor and the Chief Minister was restyled Premier. The UWP retained power until 1979.

In 1975 the Associated States agreed that they would seek independence individually. After three years of negotiations, Saint Lucia became independent on 22 February 1979, remaining within the Commonwealth. Compton became the country's first Prime Minister.

A general election in July 1979 returned the SLP to government with a clear majority, and its leader Allan Louisy, succeeded Compton as Prime Minister. In February 1980 a new Governor-General, Boswell Williams, was appointed. This led to disputes within the Government and contributed to a split in the SLP. Louisy's resignation was called for by 12 SLP members of the House, who wanted George Odlum, the Deputy Prime Minister, to take his place. This dispute continued until April 1981, when Odlum and three other SLP members of the House voted with the opposition against the Government's budget, and Louisy was forced to resign. In May Winston Cenac, the Attorney-General in the Louisy Government, took office as Prime Minister, with a parliamentary majority of one. Odlum and two other SLP members had broken away to form the Progressive Labour Party (PLP). Cenac upheld his declared intention not to call fresh elections, despite large demonstrations in Castries throughout May and June by striking civil servants, UWP supporters and PLP supporters demanding a change of government. The Cenac Government succeeded in getting its budget approved in July, and in September survived by one vote a motion of 'no confidence' , tabled jointly by the UWP and PLP, who accused the Government of political and economic mismanagement. In January 1982 a government proposal to alter legislation on MPs' expenses produced widespread accusations of corruption and triggered off a series of strikes. Demands for the Government's resignation grew from all sectors of the community, culminating in a general strike. Cenac resigned and an all-party caretaker administration was formed, under Michael Pilgrim of the PLP, pending the election. In May 1982 the UWP was returned to power with a strong majority. John Compton became Prime Minister again, promising to restore economic growth, to stimulate private investment, to expand tourism and to diversify agriculture. In December 1982 Sir Allen Lewis was reappointed Governor-General, following the dismissal of Boswell Williams because of his previous close association with the SLP.

In 1984 the opposition parties, which had been in disarray after their 1982 defeat, began to reorganize in order to present a more effective opposition to the UWP Government. In September 1984 Julian Hunte was elected leader of the SLP, while former leader Peter Josie was considering joining the PLP.

In October 1983 Saint Lucia, as a member of OECS (see p. 113), participated in the US-led invasion of Grenada.

Government

Saint Lucia is a constitutional monarchy. Executive power is vested in the British monarch, as Head of State, and exercisable by the Governor-General, who represents the monarchy and is appointed on the advice of the Prime Minister. Legislative power is vested in Parliament, comprising the monarch, a 17-member House of Assembly, elected from single-member constituencies for up to five years by universal adult suffrage, and an 11-member Senate. The Senate is composed of six members appointed on the advice of the Prime Minister, three on the advice of the Leader of the Opposition and two appointed by the Governor-General acting on his own deliberate judgement. Government is effectively by the Cabinet. The Governor-General appoints the Prime Minister and, on the latter's recommendation, the other Ministers. The Prime Minister must have majority support in the House, to which the Cabinet is responsible.

Defence

The Royal Saint Lucia Police Force, which numbers 300 men, is to be expanded for purposes of defence. It has been agreed to establish a joint regional coastguard and fisheries protection service serving Barbados, Dominica, Saint Lucia and Saint Vincent and the Grenadines, with assistance from the United Kingdom and the USA.

Economic Affairs

Saint Lucia's economy is heavily dependent on agriculture, which employs about one-third of the working population and accounts for 40% of the country's gross domestic product (GDP). Bananas are the most important crop. Saint Lucia lies within the hurricane belt and, consequently, suffers frequent devastations of its crops and infrastructure. Hurricane Allen, in August 1980, wiped out the entire banana crop. The production of coconuts, cocoa and local food crops was also severely affected. Banana production, however, has made a good recovery, with exports increasing steadily in 1981 and 1982. Exports of bananas were considerably higher in 1983, with shipments of 54,320 metric tons, valued at EC $52.8m. This was the highest figure for 14 years, despite crop damage from strong winds in January and September 1983. Production in 1984 increased substantially to a total of 64,583 tons. However, the depreciation of sterling against the US dollar limited the value of export revenues. Coconuts and cocoa are the other major crops. The

coconut industry, slower to recover than that of bananas, recorded some considerable progress in 1983, when production reached 3,500 tons, 46% higher than 1982. The pre-hurricane level was an average of 6,500 tons per annum. A number of agricultural diversification projects were under way in 1983: an EC $18m. development in the fertile Roseau valley, near Castries, was devoted to smallholdings producing tropical fruits and vegetables for export to Europe. A tree-crop diversification project involved the planting of about 200 acres with mangoes, avocados and grapefruit. The Government is also devoting attention to infrastructural improvements, land registration, agricultural credit and marketing, and it aims to achieve self-sufficiency in food, to increase banana production, to rehabilitate the coconut industry, to develop export crops for foreign exchange, and to provide sufficient raw materials to supply a viable agro-industrial sector.

Since 1972 there has been considerable expansion in the industrial sector, and by 1979 the manufacture of plastics, garments, beer and industrial gases, and the assembly of electronic components, were established industries. An official industrial programme has aimed to reduce Saint Lucia's dependence on agriculture, notably by attracting foreign investment. By 1976 the effects of the programme were apparent; exports of manufactured goods represented 48% of total exports, compared with 25% in 1974. Four major development projects, seen as critical to the island's economic recovery, are the construction of a dam in Roseau, a geothermal project in Soufrière, a free port zone in Vieux Fort and the construction of a road along the west coast, to be financed by foreign aid. A huge petroleum transhipment terminal, opened in 1982, would, it was hoped, earn about EC$8m. per annum. An agreement was signed with a Saudi Arabian concern in 1981 to build a second transhipment facility. Several major industrial plants were destroyed in the 1980 hurricane, temporarily inhibiting Saint Lucia's industrial growth.

Foreign investment, unforthcoming because of political unrest during the 1979–82 period, recommenced in 1983. Canada agreed to help to investigate Saint Lucia's potential for onshore and offshore deposits of petroleum and natural gas. In early 1984 Prime Minister Compton led a mission to the Far East to seek investment in industry and technical assistance, and an agreement was signed with Taiwan for technical assistance with fishing, agriculture and horticulture. Five industrial firms announced their intention of building factories in Saint Lucia.

Tourism is the third most important economic activity. The industry expanded rapidly in the mid-1970s, reaching a peak in the record year of 1978, when there were 107,000 visitors, including cruise passengers. Since then the annual average has been about 90,000, but improved marketing and direct flights from the USA have helped to increase the number of arrivals. In the first six months of 1984 tourist arrivals were 19% higher than the same period of the previous year.

According to estimates by the World Bank, in 1982 gross national product (GNP) per head was US $720, and between 1960 and 1982 GNP per head rose by an annual average of 3.4% (at 1980–82 prices). Saint Lucia's GDP increased strongly, in real terms, by an average of more than 10% per annum between 1976 and 1979, but growth came to a halt in 1980, when GDP fell slightly (by 0.13%), recovering to a more steady growth of 3% in 1981 and of 2.1% in 1982. The unemployment rate, which was more than 30% in 1981, improved to 27% in 1982, and to an estimated 22% in 1983. Inflation dropped dramatically, from 19.5% in 1980 to 15.1% in 1981, to 4.6% in 1982, and to only 1.5% in 1983.

The 1984/85 budget of EC $216m. included a large increase in capital expenditure to EC $85.9m., to be financed by borrowing, in order to create jobs and to boost the construction industry in anticipation of economic growth during 1985. The 1982/83 trade balance was EC $119.5m. in deficit.

Transport and Communications

Saint Lucia has about 800 km (500 miles) of roads. The main highway passes through every town and village on the island, and a direct route from Castries to the southern coast is under construction. Saint Lucia is served by numerous foreign shipping lines. The island's port at Castries is being extensively modernized, and there are plans to construct a second port, to serve the industrial free zone at Cul-de-Sac. The international airport at Hewanorra, 64 km (40 miles) from Castries, has been equipped to handle large jet aircraft. There is also an airstrip at Vigie, in Castries, which is capable of handling medium-range jets.

Social Welfare

There is a hospital in Castries (with 235 general beds and a separate ward for tuberculosis patients), a mental hospital with 162 beds, and a private hospital with 110 beds in the south of the island, at Vieux Fort. There are also 24 health centres and 18 community centres. Saint Lucia had 40 physicians in 1977.

Education

Education is compulsory for 10 years between five and 15 years of age. Primary education begins at the age of five and lasts for seven years. Secondary education, beginning at 12 years of age, lasts for five years, comprising a first cycle of three years and a second cycle of two years. Free education is provided in more than 90 government-assisted schools. Facilities for industrial, technical and teacher training are available at an educational complex at Morne Fortune, which also houses an extra-mural branch of the University of the West Indies.

Tourism

Saint Lucia is promoted as one of the last truly unspoilt Caribbean islands. It possesses spectacular, lush, mountainous scenery, a tropical climate and white sandy beaches. The sulphur baths at Soufrière are another attraction. However, it is only since 1966 that the island's tourism potential has been developed. In 1984 Saint Lucia received 87,610 visitors. The majority of tourists come from Canada, the USA and Europe.

Public Holidays

1985: 1 May (Labour Day), 27 May (Whit Monday), 6 June (Corpus Christi), 10 June (Queen's Official Birthday), 5 August (August Bank Holiday), 6 October (Thanksgiving Day), 13 December (Saint Lucia Day), 25–27 December (Christmas).

1986: 1–2 January (New Year), 22 February (Independence Day), 28–31 March (Easter).

Weights and Measures

The imperial system is in use.

Currency and Exchange Rates

100 cents = 1 East Caribbean dollar (EC $).

Exchange rates (31 December 1984):
£1 sterling = EC $3.129;
US $1 = EC $2.700.

Statistical Survey

Source (unless otherwise stated): Ministries of Trade, Industry and Tourism, Castries.

AREA AND POPULATION

Area: 616 sq km (238 sq miles).

Population: 100,893 (census of 7 April 1970); 120,300 (males 56,818; females 63,482) at census of 12 May 1980; 126,000 (official estimate) at mid-1983.

Density (mid-1983): 205 per sq km.

Principal Towns: Castries (capital), estimated population 47,600 in 1978; other town Vieux Fort.

Births and Deaths (1983): Registered live births 3,914 (birth rate 31.0 per 1,000); Registered deaths 779 (death rate 6.2 per 1,000).

Economically Active Population (1980 census): 49,451 (males 22,152; females 27,299).

AGRICULTURE, ETC

Principal Crops (FAO estimates, '000 metric tons, 1982): Roots and tubers 11; Bananas 59; Mangoes 44; Coconuts 34; Copra 6. Source: FAO, *Production Yearbook.*

Livestock (FAO estimates, '000 head, year ending September 1982): Cattle 11; Pigs 10; Sheep 14; Goats 10; Poultry 200. Source: FAO, *Production Yearbook.*

Fishing (metric tons, 1981): Total catch 2,404 (fishes 2,104; crustaceans 300). Source: FAO, *Yearbook of Fishery Statistics.*

FINANCE

Currency and Exchange Rates: 100 cents = 1 East Caribbean dollar (EC $). *Coins:* 1, 2, 5, 10, 25 and 50 cents. *Notes:* 1, 5, 20 and 100 dollars. *Sterling and US Dollar Equivalents* (31 December 1984): £1 sterling = EC $3.129; US $2.700; EC $100 = £31.96 = US $37.04. *Exchange Rate:* Fixed at US $1 = EC $2.70 since July 1976.

Budget (EC $ million, year ending 31 March 1983): Revenue 116.2 (taxation 100.7); Expenditure 152.2.

TRANSPORT

Road Traffic (registered vehicles, 1980, estimates): Cars 5,500; Others 2,500.

Shipping (international sea-borne freight traffic, '000 metric tons, 1982): Goods loaded 100; Goods unloaded 188. Source: UN, *Monthly Bulletin of Statistics.*

TOURISM

Visitors (1984): 87,610 arrivals.

EDUCATION

Primary (1980): 957 teachers; 29,605 students.

Secondary (1980): 264 teachers; 4,607 students (general 4,306; teacher training 122; vocational 179).

Higher (1978): 51 teachers; 437 students.

Directory

The Constitution

The Constitution came into force at the independence of Saint Lucia on 22 February 1979. Its main provisions are summarized below:

FUNDAMENTAL RIGHTS AND FREEDOMS

Regardless of race, place of origin, political opinion, colour, creed or sex but subject to respect for the rights and freedoms of others and for the public interest, every person in Saint Lucia is entitled to the rights of life, liberty, security of the person, equality before the law and the protection of the law. Freedom of conscience, of expression, of assembly and association is guaranteed and the inviolability of personal privacy, family life and property is maintained. Protection is afforded from slavery, forced labour, torture and inhuman treatment.

THE GOVERNOR-GENERAL

The British monarch, as Head of State, is represented in Saint Lucia by a Governor-General.

PARLIAMENT

Parliament consists of the British monarch, represented by the Governor-General, an 11-member Senate and the House of Assembly, composed of 17 elected Representatives. Senators are appointed by the Governor-General: six on the advice of the Prime Minister, three on the advice of the Leader of the Opposition and two acting on his own deliberate judgement. The life of Parliament is five years.

Each constituency returns one Representative to the House who is directly elected in accordance with the Constitution.

At a time when the office of Attorney-General is a public office, the Attorney-General is an ex officio member of the House.

Every citizen over the age of 21 is eligible to vote.

Parliament may alter any of the provisions of the Constitution.

THE EXECUTIVE

Executive authority is vested in the British monarch and exercisable by the Governor-General. The Governor-General appoints as Prime Minister that member of the House who, in the Governor-General's view, is best able to command the support of the majority of the members of the House, and other Ministers on the advice of the Prime Minister. The Governor-General may remove the Prime Minister from office if the House approves a resolution expressing no confidence in the Government, and if the Prime Minister does not resign within three days or advise the Governor-General to dissolve Parliament.

The Cabinet consists of the Prime Minister and other Ministers, and the Attorney-General as an ex-officio member at a time when the office of Attorney-General is a public office.

The Leader of the Opposition is appointed by the Governor-General as that member of the House who, in the Governor-General's view, is best able to command the support of a majority of members of the house who do not support the Government.

CITIZENSHIP

All persons born in Saint Lucia before independence who immediately prior to independence were citizens of the United Kingdom and Colonies automatically become citizens of Saint Lucia. All persons born in Saint Lucia after independence automatically acquire Saint Lucian citizenship as do those born outside Saint Lucia after independence to a parent possessing Saint Lucian citizenship. Provision is made for the acquisition of citizenship by those to whom it is not automatically granted.

The Government

Head of State: HM Queen ELIZABETH II.

Governor-General: Sir ALLEN LEWIS (took office December 1982).

CABINET

(February 1985)

Prime Minister and Minister of Finance, Planning, Foreign Affairs and Information: JOHN G. M. COMPTON.

Deputy Prime Minister and Minister of Trade, Industry and Tourism: W. GEORGE MALLET.

Minister of Education and Culture: MARGUERITA ALEXANDER.

Minister of Health, Housing and Labour: CLENDON MASON.

Minister of Community Development, Youth, Sports Social Affairs, Information and Broadcasting: ROMANUS LANSIQUOT.

Minister of Agriculture, Land, Fisheries and Cooperatives: IRA D'AUVERGNE.

Attorney-General and Minister of Legal Affairs: LEONARD RIVIERE.

Minister of Communications, Works, and Transport: ALLEN BOUSQUET.

Minister without Portfolio: CLARENCE RAMBALLY.

MINISTRIES

Diplomatic Representation

EMBASSIES IN SAINT LUCIA

France: Castries; Ambassador: GILBERT BOCHET.

Venezuela: Vigie, Castries; tel. 24033; Ambassador: GONZALO SÁNCHEZ.

Judicial System

SUPREME COURT OF JUDICATURE

High St, Castries, tel. 22573.

The West Indies Associated States Supreme Court was established in 1967 and was known as the Supreme Court of Grenada and the West Indies Associated States from 1974 until 1979, when it became the Eastern Caribbean Supreme Court. Its jurisdiction extends to Anguilla, Antigua and Barbuda, the British Virgin Islands, Dominica, Montserrat, Saint Christopher and Nevis, Saint Lucia and Saint Vincent and the Grenadines. It is composed of a High Court of Justice and a Court of Appeal. The High Court is composed of the Chief Justice and seven Puisne Judges. The Court of Appeal is presided over by the Chief Justice and includes two other Justices of Appeal. Jurisdiction of the High Court includes fundamental rights and freedoms, membership of the parliaments, and matters concerning the interpretation of the constitutions of the Associated States. Appeals from the Court of Appeal lie to the Privy Council.

Chief Justice: Judge L. L. ROBOTHAM.

Religion

Roman Catholics form at least 85% of the population; there are also Anglican, Methodist, Baptist, Seventh-day Adventist, Pentecostal and Bethel Tabernacle Churches and other sects.

CHRISTIANITY

St Lucia Seamen and Waterfront Workers' Trade Union: Reclamation Grounds, POB 166, Castries; f. 1945; affiliated to ICFTU, IIF and CCL; Pres. PETER JOSIE; Sec. JULIA PHILLIPS; about 800 mems.

St Lucia Teachers' Union: POB 821, Castries; f. 1934; Pres. JEAN FRANÇOIS JOSEPH; Sec.-Gen. ALFRED BAPTISTE.

Vieux Fort General Dock Workers' Union: POB 224, Theodore St, Vieux Fort; tel. 6422; f. 1954; Pres. HADRIAN MONROSE; Gen. Sec. MARCUS ANDREWS; 700 mems.

CO-OPERATIVE SOCIETIES

There are 31 co-operative societies.

Transport

RAILWAYS

There are no railways in Saint Lucia.

ROADS

There is a total of approximately 800 km (500 miles) of roads, of which 260 km (162 miles) are main roads and the remainder principally feeder roads. Internal transport is handled by private concerns.

SHIPPING

The ports at Castries and Vieux Fort are being fully mechanized. Castries has six berths with a total length of 2,470 ft; Vieux Fort will have two berths available, each 535 ft long. The port of Soufrière has a deep water anchorage, but no alongside berth for ocean-going vessels.

In 1983, 93 cruise ships called at Saint Lucia. Regular services are provided by the following lines: Atlantic, Booker, Booth, Federal, French, Geest, Harrison, Italia, Lamport and Holt, Royal Dutch Line, Saguenay, Seaway, Trafalgar Lines and West Indies Shipping Co.

Total cargo handled in 1977 was 3,444,000 tons.

CIVIL AVIATION

There are two airports in use: Vigie, near Castries, served by LIAT (1974), Saint Lucia Airways and Air Martinique; and Hewanorra International (formerly Beane Field), near Vieux Fort, served by Alitalia (Italy), Balair (Switzerland), British Airways, BWIA International (Trinidad), Eastern Air Lines (USA), LTU (Federal Republic of Germany) and Pan American (USA).

Saint Lucia Airways: POB 253, Castries; tel. 22686; telex 6393; private cargo and charter services; scheduled service between Vigie and Hewanorra airports.

Tourism

Saint Lucia Tourist Board: John Compton Highway, POB 221, Castries; tel. 25968; telex 6380; Chair. Peter Bergasse; Dir Maria Laville.

Saint Lucia Hotels Association: John Compton Highway, POB 221, Castries; Pres. Bill Stewart; Sec. Eileen Paul.

In 1983 there were 79,637 stay-over visitors to Saint Lucia.

SAINT VINCENT AND THE GRENADINES

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

Saint Vincent and the Grenadines is situated in the Windward Islands group, approximately 160 km (100 miles) west of Barbados, in the West Indies. The nearest neighbouring countries are Saint Lucia, to the north, and Grenada, to the south. As well as the main volcanic island of Saint Vincent, the state includes the smaller islands known as the Saint Vincent Grenadines, the northerly part of an island chain stretching between Saint Vincent and Grenada. The principal islands in that part of the group are Bequia, Canouan, Mustique, Mayreau, Isle D'Quatre and Union Island. The climate is tropical, with average temperatures of between 18°C and 32°C (64°F–90°F). Annual rainfall ranges from 1,500 mm (60 inches) in the extreme south to 3,750 mm (150 inches) in the mountainous interior of the island. English is the official language. Most of the inhabitants are Christians, mainly of the Anglican, Methodist and Roman Catholic Churches. The national flag (proportions 7 by 4) has three vertical stripes, of blue, yellow and green, separated by narrow white stripes, with the coat of arms (a shield, showing two female figures, representing 'Peace' and 'Justice', attending an altar, with a cotton plant as a crest above the shield) superimposed on a breadfruit leaf, with the motto 'Pax et Justitia' below, on the broad central yellow stripe. The capital is Kingstown, on the island of Saint Vincent.

Recent History

The islands, under the collective name of St Vincent, became a British possession in the 18th century. With other nearby British territories, St Vincent was administered by the Governor of the Windward Islands, under a federal system, until December 1959. The first elections under universal adult suffrage were held in 1951. The islands participated in the West Indies Federation from its foundation in January 1958 until its dissolution in May 1962. From January 1960, St Vincent, in common with the other Windward Islands, had a new constitution, with its own Administrator and an enlarged Legislative Council.

After the failure of negotiations to form a smaller East Caribbean Federation, most of the British colonies in the Leeward and Windward Islands became Associated States, with full internal self-government, in 1967. This change of status was delayed in St Vincent because of local political differences. At controversial elections to the Legislative Council in 1966, the ruling People's Political Party (PPP) was returned with a majority of only one seat. Further elections were held in May 1967, when the St Vincent Labour Party (SVLP) won six of the nine seats in the Council. Milton Cato, leader of the SVLP, became Chief Minister in succession to Ebenezer Joshua of the PPP. On 27 October 1969, despite objections from the PPP, St Vincent became an Associated State, with the United Kingdom retaining responsibility for defence and foreign relations only. The Legislative Council was renamed the House of Assembly, the Administrator became Governor and the Chief Minister was restyled Premier.

Elections were held in April 1972 for a new House of Assembly, with a membership increased to 13. The PPP and the SVLP each won six seats, the remaining one going to James Mitchell, formerly a Minister in the SVLP Government, who stood as an independent. The PPP agreed to form a Government with Mitchell as Premier and Joshua as Deputy Premier and Minister of Finance. In September 1974 Joshua and his wife, Ivy (a Parliamentary Secretary), resigned after policy disagreements with the Premier. A motion expressing 'no confidence' in Mitchell's Government was approved, and the House dissolved. In the ensuing elections, held in December, the PPP and SVLP campaigned in a 'unity agreement'. The SVLP won 10 of the 13 seats, and the PPP two. Cato became Premier again, at the head of a coalition with the PPP, and committed his Government to attaining full independence from the United Kingdom.

After a constitutional conference in September 1978, the colony became fully independent, as Saint Vincent and the Grenadines, on 27 October 1979. The Governor became Governor-General, while Cato, hitherto the Premier, took office as the country's first Prime Minister. The new state became a 'special member' of the Commonwealth, not represented at meetings of Heads of Government.

Cato's position was reinforced in the general elections of December 1979, when the SVLP won 11 of the 13 elective seats in the 19-member House of Assembly. Three days later, the new Government was forced to quell an uprising on Union Island, organized by members of the Rastafarian cult.

In May 1981 Randolph Russell, the Minister of Health, resigned his post and left the SVLP, claiming that the Government was to blame for the country's economic and social decline. The Government's attempt to introduce repressive new legislation on public order and labour relations in the essential services sector aroused unprecedented popular opposition. The National Committee in Defence of Democracy, formed in May with the support of various opposition parties, trade unions and other representative bodies, organized large demonstrations and a partially successful general strike in June. These events obliged the Government to withdraw the proposed legislation, pending review. In July it was agreed that the Leader of the Opposition, Calder Williams, should step down to allow Randolph Russell, now an independent member of the House, to assume the position. Russell subsequently formed a new party, the Progressive Democratic Party (PDP).

Attempts by the fragmented opposition parties to form a united opposition to the Government repeatedly failed. During 1982 and 1983 a possible merger of the two leading opposition parties, the New Democratic Party (NDP) and the United People's Movement (UPM), was proposed, but the scheme finally collapsed over differing attitudes to the US-led intervention in Grenada in October 1983. In May 1982 the UPM's leader, Dr Ralph Gonsalves, had resigned in protest at the UPM's growing Marxist orientation, and founded his own party, the Movement for National Unity (MNU). In June 1984 Prime Minister Cato announced an early general election, hoping to take advantage of the divided opposition in order to secure his return to power. However, the repercussions of recent scandals surrounding the Cato Government, and the economic and taxation policies of the SVLP, helped to produce an unexpected victory for the centrist NDP in the election held in July 1984. The NDP won nine of the 13 elective seats in the House of Assembly, and the party's leader, James Mitchell (who had been Premier in 1972–74), became Prime Minister. Five SVLP ministers lost their seats, and Cato announced his intention of retiring from politics. The left-wing parties also fared badly, gaining only 7.2% of the popular vote between them. The NDP intended to follow a policy of strengthening and diversifying the economy, and reinforcing democratic institutions.

Government

Saint Vincent and the Grenadines is a constitutional monarchy. Executive power is vested in the British monarch, as Head of State, and exercisable by the Governor-General, who represents the British monarch locally and who is appointed on the advice of the Prime Minister. Legislative power is vested in Parliament, comprising the Governor-General and a House of Assembly composed of 19 members: six nominated Senators and 13 Representatives, elected for up to five years by universal adult suffrage. Senators are appointed by the Governor-General: four on the advice of the Prime Minister and two on the advice of the Leader of the Opposition. Government is effectively by the Cabinet. The Governor-General appoints the Prime Minister

and, on the latter's recommendation, selects the other Ministers. The Prime Minister must be able to command the support of the majority of the House, to which the Cabinet is responsible.

Defence

Saint Vincent and the Grenadines is part of the regional security system that was agreed with the other independent East Caribbean states in 1982. Saint Vincent has been developing a small contingent of its police force of 489 for the purposes of defence.

Economic Affairs

Agriculture is the mainstay of the economy, and bananas are the main crop. The damage caused by an eruption of the Soufrière volcano in 1979 reduced banana exports from 30,414 tons in 1978 to 22,692 tons in 1979, and in 1980 Hurricane Allen destroyed 95% of the crop. In 1981, 29,422 tons of bananas were harvested (about 10,000 tons more than in the previous year), and banana shipments earned EC $27.2m., more than 40% of total export earnings. In 1982 the value of banana exports declined to EC $24.3m. In 1984 production totalled 32,069 tons, a 15% increase over the previous year. The fall in the value of the pound sterling, however, reduced potential export earnings, which totalled EC $30m. The country is the world's leading producer of arrowroot, producing 2.1m. lb of starch in 1982 and 2.2m. lb in 1983. Exports of arrowroot totalled EC $1.6m. in 1983, most of which were to the United Kingdom. However, failure to sell sufficient arrowroot production in 1984 led to the stockpiling of 3m. lb. The sugar industry was revived in 1981 as a means of creating self-sufficiency in sugar and holding down imports. The first crop in 1981 produced only 500 metric tons of raw sugar. Output improved in 1982 to 1,762 metric tons, though fires destroyed 10,000 tons of cane, hindering throughput. In 1984 production had reached 2,746 metric tons, but the industry was still not economically viable, and was in debt by EC $42m. The NDP Government set up a consultative committee in late 1984 to investigate the future prospects of the industry. Carrots and plantains are also major cash crops, and the islands are an important regional producer of spices and exotic fruits. Tobacco has also been introduced with some success. The Government has pursued a policy of land reform, and attempted to revitalize the agricultural sector by improving techniques and marketing. Agriculture remains the principal employer, although its share of total GDP contracted from 40.3% in 1961 to 18.1% in 1978. Foodstuffs accounted for 80% of exports in 1983.

The small manufacturing sector has expanded slowly, and in 1983 accounted for 7.4% of the labour force. The main products include concrete, flour and furniture. To encourage growth in this sector, two industrial estates have been established, and the Government is offering incentives, such as tax exemption, to foreign concerns which establish operations on the islands. A national development corporation was founded in 1970 to promote joint ventures with foreign investors. One of these, a flour mill serving all four countries in the Windward Islands, opened in 1978 with 40% Canadian, 40% local and 20% government capital. A sugar factory was built at Mount Bentinck, and opened in 1981, financed with the help of the Caribbean Development Bank. Allegations of fraud have surrounded the country's small offshore banking industry, which has suffered from the lack of sufficient regulation and control.

Tourism, though little developed by regional standards, is growing in importance. Tourist arrivals increased by almost 50% in 1980, although figures fell in both 1981 and 1982. World-wide recession and inadequate air services were blamed, and serious attempts were being made to cultivate new markets in Latin America, as well as expanding existing ones. Priority has been given by the NDP Government to the construction of an international airport, to aid both trade and tourism. A feasibility study of the project was to be undertaken by the World Bank.

The loss of exports, owing to volcano and hurricane damage, led to a record trade deficit of EC $111.6m. in 1980. By 1982, however, this had been reduced to EC $77.1m. The recurrent budget deficit increased to EC $6.9m. in 1983, while borrowing to finance the Government's capital expenditure programme had increased the public debt to EC $190m. Unpopular taxes were introduced in 1983 to help to meet the deficit. The islands' gross domestic product (GDP) grew by 2% in real terms in 1980, and by 11.5% in 1981, owing to the recovery in agricultural production. GDP fell, however, by 2.5% in 1982. Unemployment was estimated at over 30% of the work-force in 1984, and the Government was planning development projects to create jobs. The new Government also hoped to improve the development of the Grenadine islands, which were estimated to receive less than 1% of the country's total budget.

Transport and Communications

There are 286 km (178 miles) of all-weather roads, 378 km (235 miles) of rough roads and 386 km (240 miles) of tracks and byways. The main port, at Kingstown, contains a deep-water wharf with accommodation for two ocean-going ships. A motor vessel service plies between the Grenadines and Saint Vincent three times a week. In 1978 the Government acquired two new cargo boats to improve shipping between the main island and the Grenadines. Exports are flown to Barbados to link up with international shipping lines. The airport at Arnos Vale was modernized in 1978 and can now handle night traffic. There are also three airstrips, on Mustique, Union Island and Canouan.

Social Welfare

There are 34 government-run clinics and dispensaries located throughout the islands, with more than 350 hospital beds, of which 211 are in the Central General Hospital. Expenditure on health services in 1982 was EC $8.4m.

Education

Free primary education, beginning at five years of age and lasting for seven years, is available to all children in government schools, although it is not compulsory and attendance is low. At secondary standard, government facilities are limited, with only one girls' high school and one co-educational school. Otherwise, secondary education is provided in 13 schools run by religious organizations with government assistance. There are six junior secondary schools. There is one teacher training college and one technical college. Adult literacy was about 85% in 1983.

Tourism

The country's greatest tourist asset is the island chain of the Grenadines, which offer superior yachting facilities. Tourism has been relatively slow in developing, owing mainly to the fact that the airport on Saint Vincent has not been served by international airlines. In 1983 Saint Vincent and the Grenadines received 86,350 tourists (including cruise ship passengers). Visitors are mainly from other Caribbean countries, the USA and the United Kingdom.

Public Holidays

1985: 1 May (Labour Day), 27 May (Whit Monday), 2 July (Caricom Day), 3 July (Carnival), 6 August (Emancipation Day), 27 October (National Day), 25–26 December (Christmas).

1986: 1 January (New Year's Day), 22 January (Discovery Day), 28–31 March (Easter).

Weights and Measures

The imperial system is used.

Currency and Exchange Rates

100 cents = 1 East Caribbean dollar (EC $).

Exchange rates (31 December 1984):
£1 sterling = EC $3.129;
US $1 = EC $2.700.

Statistical Survey

Source (unless otherwise stated): Statistical Unit, Ministry of Finance, Kingstown.

AREA, POPULATION AND DENSITY

Area: 389.3 sq km (150.3 sq miles). The island of Saint Vincent covers 344 sq km (133 sq miles).

Population: (at census of 7 April 1960) 79,948; (at census of 7 April 1970) 87,305; (males 41,325; females 45,980); (estimate at 31 December 1982) 127,883.

Density (31 December 1982): 328.5. per sq km.

Principal Town: Kingstown (capital), population 24,764 (1982 estimate).

Births, Marriages and Deaths (registrations in 1982): Live births 3,352; Marriages 380; Deaths 745.

AGRICULTURE, ETC.

Principal Crops ('000 lb, 1982): Bananas 70,000, Nutmeg and mace 142, Carrots 350, Plantains 4,383, Sweet potatoes 3,197, Arrowroot 2,106, Ginger 286, Groundnuts 400, Yams and other roots and tubers 18,603.

Livestock (FAO estimates, '000 head, year ending September 1983): Cattle 8, Pigs 7, Sheep 13, Goats 4, Poultry 153. Source: FAO, *Production Yearbook.*

Fishing (metric tons, live weight): Total catch 581 in 1977; 698 in 1978; 547 in 1979 (Source: FAO, *Yearbook of Fishery Statistics*).

FINANCE

Currency and Exchange Rates: 100 cents = 1 East Caribbean dollar (EC $). *Coins:* 1, 2, 5, 10, 25 and 50 cents. *Notes:* 1, 5, 20 and 100 dollars. *Sterling and US Dollar Equivalents* (31 December 1984): £1 sterling = EC $3.129; US $1 = EC $2.700; EC $100 = £31.96 = US $37.04. *Exchange rate:* Fixed at US $1 = EC $2.70 since July 1976.

Budget (EC $'000, 1982): Revenue 65,954 (Import duties 11,768, Income tax 16,938); Recurrent expenditure 72,486 (Public works 11,013, Education 12,407, Health 8,413).

International Reserves (US $ million at 31 December 1983): IMF special drawing rights 0.01; Reserve position in IMF 0.37; Foreign exchange 5.32; Total 5.70. Source: IMF, *International Financial Statistics.*

Money Supply (EC $ million at 31 December 1983): Currency outside banks 20.14; Demand deposits at deposit money banks 20.81; Total money 40.95. Source: IMF, *International Financial Statistics.*

Cost of Living (retail price index; base: March 1964 = 100): 511.7 in 1980; 556.8 in 1981; 606.0 in 1982.

Gross Domestic Product (EC $ million in current purchasers' values): 197.0 in 1981; 223.8 in 1982; 248.2 in 1983.

Balance of Payments (US $ million, 1983): Merchandise exports f.o.b. 42.0; Merchandise imports f.o.b. −64.9; *Trade balance* −22.9; Exports of services 21.7; Imports of services −21.2; *Balance on goods and services* −22.4; Private unrequited transfers (net) 16.0; Government unrequited transfers (net) 3.4; *Current balance* −3.0; Long-term capital (net) 5.6; Short-term capital (net) −1.3; Net errors and omissions −0.5; *Total* (net monetary movements) 0.8; Valuation changes (net) 0.1; Official financing (net) 0.3; *Changes in reserves* 1.2. Source: IMF, *International Financial Statistics.*

EXTERNAL TRADE

Principal Commodities (EC $'000, 1982): *Imports:* Food and live animals 48,100 (Wheat 16,105); Beverages and tobacco 7,552; Crude materials (inedible) except fuels 5,922; Mineral fuels, lubricants, etc. 6,376; Chemicals 17,561; Basic manufactures 34,829; Machinery and transport equipment 28,352; Miscellaneous manufactured articles 15,442 (Clothing 5,024); Total (incl. others) 164,526. *Exports:* Food and live animals 60,761 (Bananas 24,299, Flour 15,108, Tubers 7,432); Basic manufactures 8,169; Machinery and transport equipment 4,894; Miscellaneous manufactured articles 7,058; Total (incl. others) 84,826.

Principal Trading Partners (EC $'000, 1982): *Imports:* Barbados 6,014; Canada 10,831; Trinidad and Tobago 14,645; United Kingdom 27,967; USA 59,589; Total (incl. others) 164,526. *Exports:* Barbados 4,161; Saint Lucia 5,575; Trinidad and Tobago 25,865; United Kingdom 26,337; USA 7,778; Total (incl. others) 84,826.

TRANSPORT

Road Traffic ('000 vehicles registered 1982): Passenger cars 4.1; Commercial vehicles 2.4, Motor Cycles 1.0.

Shipping ('000 tons, 1982): Cargo landed 74; Cargo loaded 46.

TOURISM

1983: 86,350 arrivals (incl. cruise ship passengers).

EDUCATION

Pre-primary (1981): 30 schools; 967 pupils.

Primary (1982): 62 schools; 1,208 teachers; 24,569 pupils.

Secondary (1982): 19 schools; 320 teachers; 5,123 pupils.

Teacher-Training College (1982): 1 institution; 105 students.

Technical College (1982): 1 institution; 1,229 students.

Directory

The Constitution

The Constitution came into force at the independence of Saint Vincent and the Grenadines on 27 October 1979. The following is a summary of its main provisions:

FUNDAMENTAL RIGHTS AND FREEDOMS

Regardless of race, place of origin, political opinion, colour, creed or sex, but subject to respect for the rights and freedoms of others and for the public interest, every person in Saint Vincent and the Grenadines is entitled to the rights of life, liberty, security of the person and the protection of the law. Freedom of conscience, of expression, of assembly and association is guaranteed and the inviolability of a person's home and other property is maintained. Protection is afforded from slavery, forced labour, torture and inhuman treatment.

THE GOVERNOR-GENERAL

The British Monarch is represented in Saint Vincent and the Grenadines by a Governor-General.

PARLIAMENT

Parliament consists of the British Monarch, represented by the Governor-General, and a House of Assembly comprising 13 elected Representatives and six Senators. Senators are appointed by the Governor-General—four on the advice of the Prime Minister and two on the advice of the Leader of the Opposition. The life of Parliament is five years. Each constituency returns one Representative to the House who is directly elected in accordance with the Constitution. At a time when the office of Attorney-General is a public office, the Attorney-General is an ex-officio member of the House. Every citizen over the age of 18 is eligible to vote. Parliament may alter any of the provisions of the Constitution.

THE EXECUTIVE

Executive authority is vested in the British Monarch and exercisable by the Governor-General. The Governor-General appoints as Prime Minister that member of the House who, in the Governor-General's view, is the best able to command the support of the majority of the members of the House, and other Ministers on the advice of

the Prime Minister. The Governor-General may remove the Prime Minister from office if a resolution of no confidence in the Government is passed by the House and the Prime Minister does not either resign within three days or advise the Governor-General to dissolve Parliament.

The Cabinet consists of the Prime Minister and other Ministers and the Attorney-General as an ex-officio member at a time when the office of Attorney-General is a public office. The Leader of the Opposition is appointed by the Governor-General as that member of the House who, in the Governor-General's view, is best able to command the support of a majority of members of the House who do not support the Government.

CITIZENSHIP

All persons born in Saint Vincent and the Grenadines before independence who, immediately prior to independence, were citizens of the United Kingdom and Colonies automatically become citizens of Saint Vincent and the Grenadines. All persons born outside the country after independence to a parent possessing citizenship of Saint Vincent and the Grenadines automatically acquire citizenship as do those born in the country after independence. Provision is made for the acquisition of citizenship by those to whom it would not automatically be granted.

The Government

Head of State: HM Queen ELIZABETH II.

Governor-General: JOSEPH LAMBERT EUSTACE (took office 28 February 1985).

CABINET

(March 1985)

Prime Minister and Minister of Foreign Affairs and Finance: JAMES MITCHELL.

Deputy Prime Minister and Minister of Trade, Industry and Agriculture: EDWARD GRIFFITH.

Minister of Tourism, Information and Culture: JOHN HORNE.

Minister of Housing, Labour and Community Development: DAVID JACK.

Minister of Education and Health: ALLAN CRUICKSHANK.

Minister of Communications and Works: BURTON WILLIAMS.

Attorney-General and Minister of Legal Affairs: EMERY ROBERTSON.

Ministers of State: HERBERT YOUNG, JEREMIAH SCOTT, MARCUS DE FREITAS.

MINISTRIES

Office of the Prime Minister: Kingstown; tel. 61703.

All other Ministries are also in Kingstown.

Legislature

HOUSE OF ASSEMBLY

Speaker: DENNIS WILSON.

Senators: 6.

Elected Members: 13.

Clerk: J. CLEMENT NOEL.

Election, 25 July 1984

Party	% of votes	Seats*
New Democratic Party (NDP)	51.4	9
St Vincent Labour Party (SVLP)	41.4	4
United People's Movement (UPM)	3.2	—
Movement for National Unity (MNU)	2.0	—
Progressive Democratic Party (PDP)	1.92	—

* At a by-election on 14 February 1985 the NDP gained a seat previously held by the SVLP, thereby increasing its representation in the House of Assembly to 10 elected members.

Political Organizations

Movement for National Unity (MNU): Kingstown; f. 1982 after split from UPM (see below); moderate, left-wing party; Leader Dr RALPH GONSALVES..

New Democratic Party (NDP): POB 619, Kingstown; f. 1975; democratic party supporting political unity in the Caribbean, social development and free enterprise; Pres. JAMES F. MITCHELL; Sec.-Gen. GEORGE OWEN WALKER; 7,000 mems.

Progressive Democratic Party (PDP): Kingstown; f. 1981; Leader RANDOLPH RUSSELL.

St Vincent Labour Party (SVLP): Kingstown; f. 1955; moderate socialist party advocating mixed economy, follows a conservative foreign policy; Leader HUDSON TANNIS.

St Vincent National Movement (SVNM): Kingstown; Leader Dr GIDEON CORDICE.

United People's Movement (UPM): Kingstown; f. 1979; formed from an alliance of the Democratic Freedom Movement, the leftist extra-parliamentary Youlou United Liberation Movement (Yulimu) and the rural leftist group Arwee; radical left-wing party (denounced as Communist by SVLP); Leader RENWICK ROSE.

Diplomatic Representation

There are no resident envoys in Saint Vincent and the Grenadines, but diplomatic relations are maintained at consular level with many countries.

Judicial System

Justice is administered by the Eastern Caribbean Supreme Court, based in Saint Lucia and consisting of a Court of Appeal and a High Court. A puisne judge is resident in Saint Vincent. There are three Magistrates, one of whom acts as the Registrar of the Supreme Court.

Puisne Judge: J. B. RENWICK.

Religion

CHRISTIANITY

The Anglican Communion

Bishop of the Windward Islands and Archbishop of the West Indies: Most Rev. Sir GEORGE CUTHBERT MANNING WOODROFFE, Bishop's House, POB 128, Kingstown; tel. 61895.

Other Christian Churches

The Methodist, the Roman Catholic Church, Seventh-day Adventist, Baptist and other denominations also have places of worship.

The Press

PERIODICALS

Government Bulletin: Government Information Service, Kingstown; periodically; Chief Information Officer J. DURRANT LIVERPOOL; circ. 300.

Government Gazette: POB 12, Kingstown; f. 1868; Government Printer O. BENTINCK; circ. 370.

The New Times: Kingstown; f. 1984; Thursdays; organ of NDP.

The Star: POB 854, Kingstown; fortnightly; organ of the St Vincent Labour Party; Editor HUDSON K. TANNIS.

The Vincentian: St George's Place, POB 592, Kingstown; tel. 61123; f. 1919; weekly; independent; Man. Dir E. M. RICHARDS; Editor N. PEACOCKE; circ. 3,000.

Publisher

The Vincentian Publishing: POB 592, Kingstown; tel. 71479.

Radio and Television

In 1983 there were 55,000 radio receivers and 8,000 television sets in use.

Radio Saint Vincent and the Grenadines: POB 705, Kingstown; tel. 61516; commercial, government-owned; Man. Jeanette Duncan.

Finance

(cap. = capital; dep. = deposits; m. = million; br. = branch)

BANKING

Principal Banks

Co-operative Investment Bank: Egmont St, POB 839, Kingstown; tel. 71469; telex 7518; f. 1978; offshore banking; Man. J. A. McDowall.

National Commercial Bank of St Vincent: corner of Halifax and Egmont Sts, POB 880, Kingstown; tel. 71844; telex 7522; f. 1977; government-owned; cap. EC $10.4m.; dep. EC $67.1m.; Chair. Noel Venner; Man. Claude Samuel; 3 brs.

Saint Vincent Agricultural and Co-operative Bank: Bay St, Kingstown; government-owned; merged with Saint Vincent Development Corporation in 1982; finances agriculture, fisheries and related industries, and provides technical assistance; Chair. Oswald George.

Saint Vincent Agricultural and Credit Loan Bank: Kingstown; tel. 61873; Gen. Man. F. Jack.

Foreign Banks

Bank of Nova Scotia: 108 Halifax St, POB 237, Kingstown; tel. 71601; Man. Everette Christian.

Barclays Bank: Halifax St, POB 604, Kingstown; tel. 61708; telex 7520; Man. I. C. Layne; 5 brs.

Canadian Imperial Bank of Commerce: POB 212, Kingstown; Man. C. F. Davis.

Royal Bank of Canada: POB 118, Kingstown; tel. 61502; Man. M. E. P. Camacho; (assets acquired by Royal Bank of Trinidad and Tobago and Neal and Massey Holding Ltd in February 1985).

INSURANCE

A number of foreign insurance companies have offices in Kingstown.

Trade and Industry

CHAMBER OF COMMERCE

Saint Vincent Chamber of Commerce (Inc): Egmont St, POB 134, Kingstown; tel. 71464; Pres. Arthur R. Connell.

DEVELOPMENT ORGANIZATIONS

Saint Vincent Agricultural Development Corporation: Upper Bay St, Kingstown; tel. 71574; f. 1975 to stimulate agricultural development and to manage government estates; Chair. Edward Griffith.

Saint Vincent Development Corporation: POB 841, Kingstown; tel. 71358; telex 7522; f. 1970; finances industry, agriculture, fisheries and tourism; Chair. Oswald George.

EMPLOYERS' ASSOCIATIONS

Saint Vincent Arrowroot Industry Association: Kingstown; tel. 71511; f. 1930; producers, manufacturers and sellers; 186 mems; Chair. K. Browne; Gen. Man. Frederick Ollivierre.

Saint Vincent Banana Growers' Association: Lot 10, Sharpe St, Kingstown; tel. 716056; f. 1955; over 7,000 mems.; Chair. Errol Davis.

Saint Vincent Employers' Federation: POB 348, Kingstown; tel. 61853; Dir C. G. Huggins.

TRADE UNIONS

Commercial, Technical and Allied Workers' Union (CTUAW): POB 245, Kingstown; f. 1962; affiliated to Caribbean Congress of Labour (CCL), ICFTU, FIET, PTTI, ITF and IUF; Pres. Cyril C. Roberts; Gen. Sec. J. Burns Bonadie; 3,100 mems.

Federated Industrial and Agricultural Workers' Union: Kingstown; f 1952; affiliated to ICFTU; Pres. E. T. Joshua; Sec. Alma Johnson; about 3,000 mems.

Public Services Union of Saint Vincent and the Grenadines: McKies Hill, Kingstown; tel. 71801; f. 1943; Pres. Cadman Lewis; Gen. Sec. Ellsworth John; Exec. Sec. R. I. Samuel; 738 mems.

The Teachers' Union: POB 304, Kingstown; members of Caribbean Union of Teachers affiliated to WCOTP and FISE; 1,000 mems.

CO-OPERATIVE AND MARKETING ORGANIZATIONS

There are 26 Agricultural Credit Societies who receive loans from the Government and five Registered Co-operative Societies.

Transport

ROADS

There are 1,019 km (633 miles) of roads, of which 435 km (270 miles) are oiled, 310 km (193 miles) rough motorable and 273 km (170 miles) tracks and byways.

SHIPPING

The deep-water harbour at Kingstown can accommodate two ocean-going vessels and about five motor vessels. A weekly service to the United Kingdom is operated by Geest Industries. Monthly services are provided by the Royal Netherlands Steamship Co, James Nourse Line, Harrison Line, Atlantic Line, West Indies Shipping Co, Saguenay Shipping Ltd, Cacena Line and Blue Ribbon Line.

CIVIL AVIATION

There is a civilian airport at Arnos Vale, situated about 3 km (2 miles) south-east of Kingstown, served by Caribbean Airways (Barbados), LIAT (Antigua), and Air Martinique. The islands of Mustique, Canouan and Union have landing strips for light aircraft only.

Tourism

There were 86,350 visitors (including cruise ship passengers) in 1983.

Department of Tourism: Ministry of Tourism, Information and Culture, Kingstown; tel. 71502; telex 7531; Dir of Tourism (vacant).

SÃO TOMÉ AND PRÍNCIPE

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Democratic Republic of São Tomé and Príncipe lies in the Gulf of Guinea, off the west coast of Africa. There are two main islands, São Tomé and Príncipe, and the rocky islets of Cabras, Gago Coutinho, Pedras Tinhosas and Rolas. The climate is warm and humid, with an average annual temperature of about 25°C (77°F). Portuguese is the official language, and native dialects are widely spoken. Almost all of the inhabitants profess Christianity, and the overwhelming majority are Roman Catholics. The national flag (proportions 2 by 1) has three horizontal stripes, of green, yellow (one-half of the depth) and green, with a red triangle at the hoist and two five-pointed black stars on the yellow stripe. The capital is the town of São Tomé.

Recent History

A former colony, São Tomé and Príncipe became an overseas province of Portugal in 1951 and received local autonomy in 1973. A nationalist group, the Comissão de Libertação de São Tomé e Príncipe (CLSTP), was formed in 1960 and became the Movimento de Libertação de São Tomé e Príncipe (MLSTP) in 1972, under the leadership of Dr Manuel Pinto da Costa. Based in Libreville, Gabon, the MLSTP was recognized by the Organization of African Unity in 1973. After the military coup in Portugal in April 1974, the Portuguese Government recognized the right of the islands to independence, although negotiations did not take place until November 1974. Portugal then recognized the MLSTP as the sole representative of the people, and it was agreed that the islands should become independent. On 12 July 1975 independence was achieved, with Dr da Costa as the country's first President and Miguel Trouvoada as Prime Minister. In December 1975 a National People's Assembly was elected. In March 1978 the Prime Minister stated that an attempted coup by foreign mercenaries, supervised from Gabon by Carlos de Graça, the exiled former Minister of Health, and supported by opponents of agrarian reform, had been suppressed. Angolan troops were called in to support the Government, and in March 1979 the alleged conspirators were sentenced to terms of imprisonment. President da Costa took over the post of Prime Minister, and Trouvoada (regarded as one of the 'moderates' of the MLSTP) was arrested in September on charges of connivance in the attempted coups. He was released in 1981. Another alleged coup attempt was forestalled in November 1980. There were riots on Príncipe in December 1981, following distribution of pamphlets calling for that island's independence.

São Tomé and Príncipe maintains close links with the other former Portuguese African colonies, particularly Angola, and also with Portugal.

Government

The 1982 constitution proclaimed the MLSTP as the leading political force of the nation. The supreme organ of state is the National People's Assembly, a legislative body of 40 members (all nominees of the MLSTP) who are elected by People's District Assemblies and hold office for five years. Executive power is held by the President, assisted by an appointed Cabinet. The President is elected for a five-year term by the National People's Assembly on the proposal of the MLSTP.

Defence

About 1,500 Angolan troops are reported to have been stationed on the islands since 1977, and some 2,000 Cuban and Soviet troops are also reported to have been based on São Tomé since 1984.

Economic Affairs

The economy is based on the export crops of cocoa, oil palm, bananas, coffee and coconuts. The islands' output of cocoa beans reached its peak at the beginning of the century, but production subsequently fell to about 10,000 metric tons per year, owing to poor soil, archaic techniques, plant disease and labour problems. Output fell drastically when plantation owners left the country after independence and the 28 main plantations were nationalized. Rehabilitation schemes, begun in 1978, enabled production to rise steadily to 8,000 tons in 1981, and cocoa still provides 80%–90% of export earnings. However, severe drought reduced production in 1982 and 1983 to 4,081 and 4,451 tons respectively. The concentration of agriculture on export commodities has forced São Tomé to import about 90% of its food requirements. Government plans include the replenishment of cocoa plantations, the creation of agricultural co-operatives, increased crop diversification, to reduce the economy's dependence on the fluctuating world cocoa market and imported foodstuffs, and cultivation of more bananas and cassava for local consumption. Incentives are provided to encourage foreign capital to establish small-scale industries and to develop tourism.

There is virtually no manufacturing industry except small processing factories producing soap, soft drinks, textiles and beer, which together account for only 4% of GDP. There are plans to develop a fishing and fish-processing industry to exploit the rich resources of tuna in nearby waters. A deep-water harbour, a cold-storage plant and extra boats are to be constructed. In June 1978 the Government established a fishing zone of 200 nautical miles (370 km) around the coasts. The total catch increased from 1,618 tons in 1979 to 3,600 tons in 1983. In 1983 the Government signed a fishing agreement with the EEC, which permitted French ships to operate off the islands in return for $154,000 annually in compensation. Similar agreements have also been signed with Portugal, Angola and the USSR.

GDP grew at an average annual rate of 1.2%, in real terms, between 1970 and 1980. GDP rose by 7.6% in 1979, and by 7.3% in 1980, but fell by 10.6% in 1981. São Tomé's trade balance was in surplus until 1979, but has since been in deficit, owing to a fall in the world price of cocoa and to drought. The trade deficit totalled Db 414m. in 1980. The overall balance-of-payments deficit declined from SDR 9.5m. in 1980 to SDR 5.9m. in 1981.

Portugal and the Netherlands are the islands' principal trading partners, and São Tomé has close relations with Angola. São Tomé receives foreign assistance, and became a member of the IMF in 1977, when the link with Portuguese currency was broken by the establishment of the dobra, whose value is tied to the IMF special drawing right.

Transport and Communications

There are no railways. In 1973 there were 287 km of roads, and a tarred highway circling the island of São Tomé is being constructed. São Tomé airport has regular services to Príncipe, Angola and Cameroon, and work on an extension of the runway, to take long-range aircraft, was completed in 1984. The main port is at São Tomé, but it is not a deep-water harbour and large freighters have to be unloaded from their anchorage by barge. In 1978 Algeria agreed to build a telecommunications station and to train staff, while a ground satellite station was established in 1980.

Social Welfare

In 1978 São Tomé had 43 physicians, one dental surgeon, two pharmacists and 163 nurses and midwives. There were 16 health care institutions, with a total of 665 beds.

Education

Primary education is compulsory for children over six years of age, and there were 18,000 pupils in primary schools in 1979.

There are three secondary schools and a technical school on São Tomé, staffed mainly by foreign teachers. In 1980 the adult literacy rate was estimated at 5%–10%.

Tourism

São Tomé is a port of call for some cruise liners, and tourism is being gradually developed. Following the modernization of São Tomé airport, long-haul aircraft are now able to land, and this was expected to increase the number of tourists visiting the islands. In October 1984 the Government launched a new plan for the tourist sector, aimed at increasing hotel capacity to accommodate up to 400 tourists per week. A tourist centre is being developed at Praia das Concas.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 cêntimos = 1 dobra (Db).

Exchange rates (31 December 1984):
£1 sterling = 53.504 dobras;
US $1 = 46.164 dobras.

Statistical Survey

AREA AND POPULATION

Area: 964 sq km (372 sq miles).

Population: 73,811 at census of 30 September 1970; 96,611 (males 48,031; females 48,580) at census of 1 August 1981.

Density (1981): 100.2 per sq km.

Births and Deaths (1982): Live births 3,326; Deaths 878.

Economically Active Population (1981 census): Agriculture, hunting, forestry and fishing 16,482; Mining, quarrying and manufacturing 1,622; Construction 1,802; Trade, restaurants and hotels 2,039; Community, social and personal services 5,888; *Total* (incl. others) 29,337 (males 20,131; females 9,206). Figures exclude persons seeking work for the first time, totalling 1,248 (males 532; females 716).

AGRICULTURE, ETC.

Principal Crops (FAO estimates, '000 metric tons, 1981): Cocoa beans 8, Coconuts 42, Copra 5, Palm kernels 5, Bananas 3.

Livestock (FAO estimates, '000 head, year ending September 1982): Cattle 3, Sheep 2, Goats 4, Pigs 3, Chickens 100, Ducks 20.

Forestry: Roundwood removals 5,000 cubic metres per year (FAO estimates, 1974-82).

Fishing ('000 metric tons, live weight): Total catch 1.8 in 1980; 2.2 in 1981; 2.7 in 1982.

INDUSTRY

Production (metric tons, 1975): Bread and biscuits 1,831, Wood 1,965 sq m, Soap 470, Palm oil 250 (estimate, 1981), Ice 191, Lime 22, Beverages 2,371, Maize flour 18.

FINANCE

Currency and Exchange Rates: 100 cêntimos = 1 dobra (Db). *Coins:* 50 cêntimos; 1, 2, 5, 10, 20 and 50 dobras. *Notes:* 50, 100, 500 and 1,000 dobras. *Sterling and Dollar Equivalents* (31 December 1984): £1 sterling = 53.504 dobras; US $1 = 46.164 dobras; 1,000 dobras = £18.69 = $21.66. *Average Exchange Rate* (dobras per US $): 38.85 (1981), 41.49 (1982), 42.86 (1983).

Budget (estimates, '000 dobras, 1983): Revenue 949,600, Expenditure 1,010,400.

Currency in Circulation ('000 dobras, 1983): Notes 368,271, Coins 12,029, Total 380,300.

Cost of Living (Base: 1974 = 100): 126.0 (1977), 139.0 (1978), 146.7 (1979).

Balance of Payments (SDR million, 1983): Merchandise exports f.o.b. 8.1, Merchandise imports f.o.b. −14.1, *Trade Balance* −6.0; Services and transfers (net) −5.1, *Current Balance* −11.1; Long-term capital (net) −3.0, Short-term capital (including net errors and omissions) 9.2, *Total* (net monetary movements) −4.9. *Source:* Banco Nacional de São Tomé e Príncipe.

EXTERNAL TRADE

Principal Commodities (metric tons, 1983): *Imports:* Wines 182, Rice 860, Wheat flour 2,000, Sugar 440, Beer 100. *Exports:* Cocoa 3,188, Copra 3,761, Palm kernels 250.

Principal Trading Partners ('000 dobras, 1983): *Imports:* Angola 89,443, Belgium and Luxembourg 124,184, German Democratic Republic 186,858, Federal Republic of Germany 31,565, Netherlands 33,583, Portugal 214,072, United Kingdom 26,110, USSR 19,315; Total (incl. others) 779,864. *Exports:* Cameroon 11,739, German Democratic Republic 184,739, Federal Republic of Germany 10,356, Netherlands 109,407, Portugal 48,809; Total (incl. others) 365,550. *Source:* Banco Nacional de São Tomé e Príncipe.

TRANSPORT

Road Traffic (vehicles in use, 1975): Passenger cars 1,774, Lorries and buses 265, Motor cycles 418.

Shipping (1975): Vessels entered 70, Freight loaded 9,880 metric tons, Freight unloaded 26,693 metric tons, Passengers embarked 958, Passengers disembarked 1,605.

Civil Aviation (1975): Passenger arrivals 10,050, Passenger departures 9,240, Freight loaded 27,715 kg, Freight unloaded 163,515 kg.

EDUCATION

Nursery (1972/73): 3 schools; 5 teachers; 1,318 pupils (1977).

Primary (1977): 46 schools (1972/73); 527 teachers; 14,162 pupils.

Secondary (1977): 3 schools (1972/73); 111 teachers; 3,145 pupils.

Directory

The Constitution

The Constitution was approved by the National People's Assembly on 15 December 1982. The following is a summary of its main provisions:

The Democratic Republic of São Tomé and Príncipe is a sovereign, independent, unitary and democratic state. There shall be complete separation between Church and State. The MLSTP (Movimento de Libertação de São Tomé e Príncipe) is the leading political force of the nation.

The 40-member National People's Assembly is the supreme organ of the State. Candidates are proposed by a Candidature Commission, and are elected by the People's District Assemblies. The Assembly is elected for five years and meets in ordinary session twice a year. It may meet in extraordinary session on the proposal of the President, the Council of Ministers or of two-thirds of its members. The Assembly elects its own President. In the period between ordinary sessions of the Assembly its functions are assumed by a Permanent Commission elected from among its members.

Executive power is vested in the President of the Republic, who is elected for a period of five years by the National People's Assembly on the proposal of the MLSTP. He is the Supreme Commander of the Armed Forces and is responsible before the National People's Assembly. In the case of the President's death, permanent incapacity or resignation, his functions shall be assumed by the President of the National People's Assembly until a new President is elected.

Judicial power is exercised by the Supreme Court and all other competent tribunals and courts. The Supreme Court is the supreme judicial authority and is only accountable to the National People's Assembly. Its members are appointed by the Assembly on the proposal of the MLSTP. The right to a defence is guaranteed.

The Constitution may be revised only by the National People's Assembly on the proposal of at least one-third of its members. Any amendment must be approved by a two-thirds majority of the Assembly.

The Government

HEAD OF STATE

President and Commander-in-Chief of the Armed Forces: Dr Manuel Pinto da Costa (took office 12 July 1975).

CABINET

(March 1985)

President, Prime Minister, Minister of Foreign Affairs, Minister of Planning and Minister of Defence and National Security: Dr Manuel Pinto da Costa.

Minister of National Defence: Óscar Aguiar Sacramento e Sousa.

Minister of Agriculture: Tomé Dias da Costa.

Minister of Co-operation: Carlos Alberto Pires Tiny.

Minister of Industry, Works and Housing: José Fret Lau Chong.

Minister of Commerce: Celestino Rocha da Costa.

Minister of Labour and Social Security: Armindo Vaz de Almeida.

Minister of Information: Manuel Vaz Afonso Fernandes.

Minister of Justice: Francisco Fortunato Pires.

Minister of Transport and Communications: Fernando José Paquete da Costa.

Minister of Fishing: Aurélio do Espírito Santo.

Minister of Education and Culture: Lígia Silva do Espírito Santo Costa.

Minister of Health and Sport: Frederico José H. Sequeira.

MINISTRIES

Ministry of Agriculture and Fishing: São Tomé; tel. 22714.

Ministry of Commerce: São Tomé; tel. 22372.

Ministry of Foreign Affairs and Co-operation: São Tomé; tel. 21446.

Ministry of Health and Sport: São Tomé; tel. 22182.

Ministry of Information: São Tomé; tel. 21592.

Ministry of Justice: São Tomé; tel. 22020.

Ministry of Labour and Social Security: São Tomé; tel. 21571.

Ministry of National Defence: São Tomé; tel. 21092.

Ministry of Planning: São Tomé; tel. 22142.

Ministry of Works, Housing, Transport and Industry: São Tomé; tel. 21571.

Legislature

ASSEMBLÉIA POPULAR NACIONAL

The National People's Assembly has 40 members who serve for a term of five years. Candidates, who are all nominees of the MLSTP, are elected by People's District Assemblies.

President: Alda Neves Graça do Espírito Santo.

Vice-President: Maj. Raúl Bragança Neto.

Secretary: Pedro Gamboa Bragança Gomes.

Political Organization

Movimento de Libertação de São Tomé e Príncipe (MLSTP) (Movement for the Liberation of São Tomé and Príncipe): São Tomé; f. 1972; Pres. Dr Manuel Pinto da Costa.

Political Bureau

Dr Manuel Pinto da Costa, Alda Neves Graça do Espírito Santo, Leonal Mario d'Alva, Evaristo do Espírito Santo, Daniel Lima dos S. Daio, Maria de Nascimento da Graça Amorim, Maj. Raúl Bragança Neto, Tomé Dias da Costa, António A. Vaz, Osório U. Prazeres.

Diplomatic Representation

EMBASSIES IN SÃO TOMÉ AND PRÍNCIPE

Angola: Avda Kwame Nkruma 45, São Tomé.

China, People's Republic: São Tomé; Ambassador: Liu Yufeng.

Cuba: São Tomé; Ambassador: Andrés Silva Díaz.

Gabon: 4 Avda das Nações Unidas, BP 157, São Tomé; tel. 143; telex 222; Ambassador: Cyprien Mounguengui.

Korea, Democratic People's Republic: São Tomé; Ambassador: Kim Chung-Nam.

Portugal: Avda Marginal 12 de Julho, CP 173, São Tomé; tel. 21130; telex 201; Ambassador: Francisco Pessanho Quevedo Crespo.

USSR: São Tomé; Ambassador: Pyotr Nikitovitch Yevsyukov.

Judicial System

Judicial power is exercised by the Supreme Court and all other competent tribunals and courts. The Supreme Court is the supreme judicial authority.

Religion

CHRISTIANITY

The Roman Catholic Church

Bishop of São Tomé e Príncipe: (vacant); Diocesan Administrator Alberto Rosado Fileno, Centro Diocesano, CP 104, São Tomé; tel. 21408; c. 90,000 adherents.

The Press

Diário da República: Imprensa Nacional, CP 28, São Tomé; f. 1836; weekly; Dir (vacant).

Revolução: São Tomé; weekly; publ. by Ministry of Information.

Radio

In 1984 there were an estimated 25,000 radio receivers in use. There is no television service.

Rádio Nacional de São Tomé e Príncipe: avda Marginal de 12 de Julho, CP 44, São Tomé; tel. 530; f. 1958; state-controlled; home service in Portuguese; Dir JOÃO FERNANDO BARBOSA NETO.

Finance

BANKING

Banco Nacional de São Tomé e Príncipe: São Tomé; f. 1975; central bank.

Caixa Popular: São Tomé; f. 1980; govt savings and loans institution for housing.

There is also a post office savings institution.

INSURANCE

Caixa de Previdência dos Funcionários Públicos: São Tomé; insurance fund for civil servants.

Empresa Nacional de Seguros e Resseguros 'A Compensadora': São Tomé; f. 1980.

Transport

RAILWAYS

There are no railways in São Tomé and Príncipe.

ROADS

In 1973 there were 287 km of roads, of which 199 km were asphalted.

CIVIL AVIATION

Linhas Aéreas de São Tomé: avda Marginal de 12 de Julho, CP 45, São Tomé; telex 216; f. 1949; scheduled passenger and cargo services to Príncipe and internal service; international services to Libreville, Malabo and Luanda; CEO ALEXANDRE QUIÑIAS; fleet: 1 Fokker F-27, 1 BN-2A Islander.

SAUDI ARABIA

Introductory Survey

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Saudi Arabia occupies about four-fifths of the Arabian peninsula, in south-western Asia. It is bordered by Jordan, Iraq and Kuwait to the north, by the Yemen Arab Republic to the south-west, by the People's Democratic Republic of Yemen to the south, by Oman to the south and east, and by Qatar and the United Arab Emirates to the north-east. Saudi Arabia has a long western coastline on the Red Sea, facing Egypt, Sudan and Ethiopia, and a shorter coastline (between Kuwait and Qatar) on the Persian (Arabian) Gulf, with the Bahrain archipelago just offshore and Iran on the opposite coast. Much of the country is arid desert, and some places are without rain for years. In summer, average temperatures in coastal regions range from 38°C to 49°C (100°F–120°F), and humidity is high. Temperatures sometimes reach 54°C (129°F) in the interior. Winters are mild, except in the mountains. Annual rainfall averages between 100 mm (4 in) and 200 mm (8 in) in the north, but is even lower in the south. The official language is Arabic, which is spoken by almost all of the population. Except for some expatriates, virtually all of the inhabitants are adherents of Islam, the official religion, which originated in Arabia. About 85% of the population are Sunni Muslims, including the strictly orthodox Wahhabi sect, to which the indigenous inhabitants mainly belong. About 15% are Shi'a Muslims, principally in the east of the country. The national flag (proportions 3 by 2) is green and bears, in white, an Arabic inscription ('There is no God but God and Muhammad is the prophet of God') above a white sword. The royal capital is Riyadh and the administrative capital is Jeddah.

Recent History

The whole of the Arabian peninsula became part of Turkey's Ottoman Empire in the 16th century. During the period of Turkish rule, the local tribal rulers enjoyed varying degrees of autonomy, although nominally under the suzerainty of the Ottoman Sultan. The puritanical Wahhabi movement, dedicated to the reform of Islam, was launched in the Najd (Nejd) region of central Arabia in the 18th century. A Wahhabi kingdom, ruled by the House of Sa'ud from its capital in Riyadh, quickly expanded to include the Hijaz (Hejaz) region on the west coast of Arabia. This first Sa'udi kingdom reached its zenith in c. 1800 but subsequently declined, although it survived in the interior until 1890, when the rival Rashidi family seized control of Riyadh.

In 1901 a member of the deposed Sa'udi family, Abdul Aziz ibn Abdur Rahman, set out from Kuwait, where he had been living in exile, to regain the family's former domains. In 1902, with only about 200 followers, Abdul Aziz captured Riyadh, expelled the Rashidi dynasty and proclaimed himself ruler of Najd. During subsequent years he recovered and consolidated the outlying provinces of the kingdom, defeating Turkish attempts to subjugate him. Having restored the House of Sa'ud as a ruling dynasty, Abdul Aziz became known as Ibn Saud. To strengthen his position, Ibn Saud instituted the formation of Wahhabi colonies, known as Ikhwan ('Brethren'), throughout the territory under his control. The first Ikhwan settlement was made in 1912, and about 100 more were established, carrying Wahhabi doctrines to scattered communities in remote desert areas, over the next 15 years.

During the First World War (1914–18), in which Turkey was allied with Germany, the Arabs under Ottoman rule rebelled. In 1915 the United Kingdom signed a treaty of friendship with Ibn Saud, who was then master of central Arabia, securing his co-operation against Turkey. Relations subsequently deteriorated as a result of the British Government's decision to support Hussein ibn Ali, who proclaimed himself King of the Hijaz in 1916, as its principal ally in Arabia. Hussein was also Sharif of Mecca (the holiest city of Islam), which had been governed since the 11th century by his Hashimi (Hashemite) family, rivals of the Sa'udis. Bitterness between the two groups intensified as the war progressed, and the rivalry was exacerbated by the post-war decision to nominate Hashemites to the thrones of Iraq and Transjordan (later renamed Jordan).

At the end of the war, following Turkey's defeat, the Ottoman Empire was dissolved. Continuing his conquests, Ibn Saud successfully campaigned against the rulers of four Arabian states (the Hijaz, Asir, Hayil and Jauf) between 1919 and 1925. His forces captured Mecca in September 1924, forcing Hussein to abdicate, and overran the whole of the Hijaz in 1925. In January 1926 Ibn Saud was proclaimed King of the Hijaz and Sultan of Najd. On 23 September 1932 the dual monarchy ended when the two areas were merged as the unified Kingdom of Saudi Arabia.

Exploration for petroleum, the basis of Saudi Arabia's modern prosperity, began in 1933, and commercially exploitable deposits were discovered in the Eastern Province in 1938. Saudi Arabia remained neutral during most of the Second World War (1939–45) but declared war on Germany and Japan in February 1945. After the war, the exploitation of the kingdom's huge reserves of petroleum was begun on a large scale. A consortium of American companies pioneered exploration, establishing close ties between Saudi Arabia and the USA. With the growing wealth from petroleum royalties, Ibn Saud developed and modernized Saudi Arabia's infrastructure and services.

Ibn Saud opposed the creation of the State of Israel, and a small Saudi Arabian force joined the armies of other Arab states in the war which followed. Generally acknowledged as an outstanding leader and the creator of modern Arabia, Ibn Saud remained in power until his death in November 1953. He fathered many children, including 43 sons, by his numerous wives, and all subsequent rulers of Saudi Arabia have been sons of Ibn Saud. The kingdom has remained an absolute monarchy, with no legislature or political parties, and has generally adopted conservative policies. Despite its great wealth, Saudi Arabia continues as a traditional Islamic society. The King is the supreme religious leader as well as the Head of State, and governs by royal decree. In foreign affairs, Saudi Arabia is strongly anti-communist and has historically been allied with the USA and other Western countries.

Ibn Saud's immediate successor was Sa'ud ibn Abdul Aziz, hitherto the Crown Prince, who had been appointed Prime Minister in October 1953. Another of the late King's sons, Faisal ibn Abdul Aziz, replaced Sa'ud as Crown Prince and Prime Minister. In March 1958, bowing to pressure from the royal family, King Sa'ud conferred on Crown Prince Faisal full powers over foreign, internal and economic affairs. Faisal adopted sound fiscal policies and curbed the extravagance of the royal family. The Crown Prince resigned as Prime Minister in December 1960, when King Sa'ud assumed the premiership himself. Faisal resumed office in October 1962, following the revolution in the neighbouring Yemen Arab Republic (YAR). The ensuing civil war in the YAR, in which Saudi Arabia supplied military equipment to the royalist forces of the deposed Imam, led to strained relations with the United Arab Republic (Egypt), whose troops supported the victorious republicans.

In November 1962 the Council of Ministers approved a series of social and administrative reforms, including the abolition of slavery and the freeing of all slaves. King Sa'ud relinquished power to Crown Prince Faisal in March 1964 and was forced by the royal family to abdicate in his favour in November. The new King Faisal retained the post of Prime Minister, and appointed his half-brother, Khalid ibn Abdul Aziz, to be Crown Prince in March 1965. In the Six-Day War of June 1967, Saudi Arabian forces collaborated with Iraqi and Jordanian troops in action against Israel. During his reign, King Faisal was the target of abortive coups, notably in September 1969, when a revolutionary group attempted to overthrow him. As a result

of the Arab–Israeli war of October 1973, Saudi Arabia led a movement by Arab petroleum-producers to exert pressure on Western countries by reducing supplies of crude oil. In subsequent years, however, Saudi Arabia has generally urged moderation in the pricing of petroleum as a means of attaining political objectives.

In March 1975 King Faisal was assassinated by one of his nephews, and was immediately succeeded by Khalid, hitherto Crown Prince. The new King Khalid also became Prime Minister, and appointed another brother, Fahd ibn Abdul Aziz (Minister of the Interior since 1962), to be Crown Prince and First Deputy Prime Minister. Owing to Khalid's poor health, much executive responsibility was assumed by Crown Prince Fahd. The surge of religious fervour which was prevalent throughout the Middle East from the late 1970s affected Saudi Arabia in November 1979, when an armed group of about 250 Sunni Muslim extremists attacked and occupied the Grand Mosque in Mecca, the most important centre of pilgrimage for Muslims. The attack occurred on the eve of the Islamic year 1400, and it was reported that the insurgents intended to proclaim their leader as the Mahdi, a messianic figure whose return to earth is awaited by Muslims. The extremists were dislodged after a siege, which lasted two weeks, but the successful assault by Saudi Arabian troops resulted in many casualties, including about 200 deaths, among the insurgents, their hostages and the security forces. At the same time, but separately, there was a riot by members of the Shi'ite Muslim community in the Eastern Province. Partly as a result of the unease revealed by these disturbances, Prince Fahd announced in January 1980 that a consultative assembly would be formed to act as an advisory body. By early 1985, however, the proposed assembly had still not been established.

As a result of its dominant position as the world's leading exporter of petroleum, Saudi Arabia has emerged as the most influential country in the Arab world. Since the outbreak of the Iran–Iraq war in September 1980, Saudi Arabia has consistently provided Iraq with financial support. In May 1981 the kingdom joined five neighbouring states in establishing the Gulf Co-operation Council (GCC, see page 127). In August 1981 Prince Fahd announced an eight-point plan for the settlement of the Arab–Israeli dispute. His proposals, by implication, recognized Israel as a legitimate state in the region.

King Khalid died suddenly in June 1982 and was succeeded by Fahd. Following precedent, King Fahd became Prime Minister and appointed a half-brother, Abdullah ibn Abdul Aziz (Commander of the National Guard since 1962), to be Crown Prince and First Deputy Prime Minister. At a summit conference of Arab states in September 1982, the 'Fahd plan' formed the basis of an agreed proposal for the achievement of peace in the Middle East. During 1983 Saudi Arabia made repeated diplomatic missions within the region: the kingdom was instrumental in achieving a cease-fire between disputing factions of the Palestine Liberation Organization in Syria in November, and helped to construct the 'Comprehensive Security Agreement' which was considered in Lebanon in January 1984.

Mounting concern about the threat to Saudi Arabia from Iran, angered by the kingdom's support of Iraq in the Gulf war, was exacerbated in April and May 1984 by a series of attacks by warring Iraqi and Iranian aircraft on three Saudi Arabian tankers which were transporting petroleum through the Gulf. Saudi Arabia responded by urgently commissioning improved defence systems from the USA, by extending its air defence zone, and by mobilizing defences to patrol the region. An Iranian fighter aircraft which penetrated Saudi Arabia's airspace was shot down in June, but Saudi Arabia was unwilling to become militarily involved unless there was a serious threat, either to its territory or to the Strait of Hormuz, its major export outlet. The issue was complicated by Western countries, particularly the USA, which offered to intervene if the closure of the Strait threatened oil supplies. GCC policy countenances the intervention of a superpower only in urgent need, and the Gulf states have retained clear reservations in their otherwise good relations with the USA concerning, for example, US policy in Lebanon. Therefore, Saudi Arabia refused to grant the USA access to its onshore military facilities in the event of a major escalation of the war. Saudi Arabia's commitment to the policy of working towards a defence system independent of existing superpowers was ratified by an agreement, formalized at a GCC summit conference in November, to establish the Gulf's own 'rapid deployment force'.

Concern for the improvement of Saudi Arabia's defence systems was evident in agreements to purchase armaments and to co-operate on military training, signed with France, Brazil and the USA, during 1984. The most important of these was a plan to involve American companies in the establishment of a 'Peace Shield' air defence system, which was initiated in early 1985, at a cost of US $3,900m. A condition of participation in the scheme was that companies should invest a proportion of the value of their contracts in the establishment of high-technology industries within Saudi Arabia.

In April 1984 the Minister of Health, Dr Ghazi al-Ghosaibi, who had become popular and powerful, largely for his attacks on alleged corruption and greed within the royal family, was dismissed from the Council of Ministers, following a series of disagreements with various members of the royal family. In August the annual 'Hajj', or pilgrimage, to the mosque at Mecca, was disrupted by demonstrations by Iranian pilgrims, and a plot by armed Libyans to occupy the mosque was thwarted. In September a Saudi Arabian merchant vessel was among many ships damaged by mines planted in the Red Sea, for which a fundamentalist Islamic organization, Al-Jihad (Holy War), claimed responsibility. In what was seen as partly an attempt to reduce mounting tension in Saudi Arabia, further discussion concerning the introduction of a consultative assembly took place at the end of 1984.

Government

Saudi Arabia is an absolute monarchy, with no legislature or political parties, although a consultative council, with between 50 and 70 members, has been under active consideration since 1980. Constitutionally, the King rules in accordance with the Sharia, the sacred law of Islam. He appoints and leads a Council of Ministers, which serves as the instrument of royal authority in both legislative and executive matters. Decisions of the Council are reached by majority vote but require royal sanction.

Defence

In July 1984 military forces totalled 51,500 men: army 35,000, air force 14,000, navy 2,500. Military service is compulsory. There is a 25,000-man National Guard and an 8,500-man Frontier Force and Coastguard. The defence budget for 1984/85 was 79,900m. Saudi riyals.

Economic Affairs

Saudi Arabia consists largely of arid desert, although there is a relatively fertile fringe along the coast of the Persian (Arabian) Gulf. Climatic conditions are generally harsh and allow only limited cultivation. In the past, economic life depended, to a great extent, on the occurrence of oases, used both for settled agriculture and for the watering of livestock herds by nomadic desert-dwellers (bedouin). However, the exploitation of extensive reserves of petroleum, both onshore and offshore, has transformed Saudi Arabia and brought the country a high level of material prosperity. According to estimates by the World Bank, Saudi Arabia's gross national product (GNP) per head (at average 1980–82 prices) was US $16,000 in 1982, having increased at an average rate of 7.5% annually, in real terms, since the 1960s. This level of average income is comparable with that of the most developed industrial countries, although below that of some smaller Gulf states; and the growth rate is one of the highest in the world. Between 1970 and 1982 the average annual growth of overall gross domestic product (GDP), in constant prices, was 9.8%.

This outstandingly rapid economic development has taken place despite a sharp rise in the country's population, owing partly to an influx of foreign workers who, by the early 1980s, were estimated to total 1.5m., outnumbering the native labour force. The growing wealth of Saudi Arabia, and the demands for labour to carry out development projects, attracted much expatriate labour, mainly from the poorer Arab states, the Indian sub-continent and the Far East.

The production of petroleum is, by far, the most important economic activity in Saudi Arabia. Between 1979 and 1984 the petroleum sector contributed nearly all export revenues, almost 85% of budget revenues, and about 60% of GDP. The extraction

of crude petroleum dominates the mining sector, and petroleum refining is the leading branch of the manufacturing sector.

Saudi Arabia possesses the world's largest known reserves of crude petroleum and, in recent years, has ranked second or third among producing countries, exceeded only by the USSR and, in some years, by the USA. However, Saudi Arabia is the world's leading exporter of petroleum and plays a major role in the Organization of the Petroleum Exporting Countries (OPEC, see p. 197). Between 1978 and 1982 Saudi Arabia's production of crude petroleum was more than one-third of the total output of all OPEC countries, and about 14% of the world total. In 1981 the value of Saudi Arabia's total exports, almost all in the form of petroleum, reached a record US $120,000m. In that year Saudi Arabia ranked fourth in the world among exporting countries, behind only the USA, the Federal Republic of Germany and Japan. At the beginning of 1984 Saudi Arabia's proven reserves of crude petroleum were estimated to be 166,000m. barrels, or about 25% of the world total. At 1983 levels of production, the country's petroleum reserves will not be exhausted for a further 93 years.

Saudi Arabia's petroleum is produced from 14 major oilfields, all in the eastern region of the country, principally Ghawar (the world's largest oilfield), Abqaiq, Safaniya (the world's largest offshore field) and Berri. Exploration for petroleum in Saudi Arabia began in 1933, and commercially exploitable deposits were discovered in 1938. Further development was delayed by the Second World War (1939–45) but large-scale production began in the later 1940s. About 96% of the country's output is by the Arabian American Oil Co (Aramco). Through the General Petroleum and Mineral Organization (PETROMIN), founded in 1962, the Saudi Arabian Government took a 25% share in Aramco in January 1973. This was increased to 60% by an agreement made in June 1974, retroactive to January. As a result of further protracted negotiations, completed in September 1980, the Government acquired a 100% interest in Aramco's concession rights, facilities and production, back-dated to January 1976. However, the four original Aramco partners, all US oil companies, retain control of Saudi Arabia's principal petroleum refinery, at Ras Tanura, which is also the site of the main terminal for petroleum exports.

Saudi Arabia's annual output of crude petroleum increased rapidly in the early 1970s, rising from 1,386.7m. barrels in 1970 to 3,095.1m. barrels, equivalent to 8.5m. barrels per day (b/d), in 1974. As this increase in production was accompanied by rising world prices for petroleum, the Government's revenue from royalties and taxes on the industry increased dramatically, from US $1,214m. in 1970 to $22,573.5m. in 1974. Depressed markets led to a fall in output, to 2,582.5m. barrels (7.1m. b/d) in 1975. It then recovered, fluctuating between 1976 and 1979, although it exceeded 3,000m. barrels in each year. Production reached a peak level of 3,623.8m. barrels (9.9m. b/d) in 1980. In the final quarter of the year, owing to the outbreak of the Gulf War between Iran and Iraq, Saudi Arabia's output averaged 10.3m. b/d. Production declined slightly in 1981, to 3,585.8m. barrels (9.8m. b/d), but government revenues rose to a record $101,813m., compared with $84,466m. in 1980.

Owing to world recession and the glut of petroleum on world markets, demand was sharply reduced in 1982, when Saudi Arabia's production of crude petroleum fell to 2,367m. barrels (6.5m. b/d), with government revenues of only $70,479m. Output fell even further in early 1983, when the price of crude petroleum was reduced from $34 to $29 per barrel. Although Saudi Arabia's position within OPEC is that of a 'swing producer', which will adjust output levels according to demand, the country's notional production 'ceiling' was 5m. b/d in March. Average output for the year was estimated at 5.0m. b/d, with revenues estimated at only $35,758m. Falling prices on the 'spot' market (outside OPEC control) further inhibited production during 1984. Output was estimated by the OECD's International Energy Agency to average 4.9m. b/d in the second quarter, falling in the third quarter, to 4.1m. b/d. In August the Government made a barter deal with Rolls-Royce, whereby jet aircraft and engines would be exchanged for barrels of crude petroleum, equivalent to their monetary value. A stockpile of petroleum was being built up, as a safeguard against any closure of the Strait of Hormuz, which could prevent exports, following an intensification of fighting in the Gulf War. Although these projects offered incentives for production, world demand and prices failed to improve. In October Saudi Arabia changed the composition of its blend of petroleum ('Arabian Light'), adding more of the cheaper 'heavy' crudes, in an attempt to increase sales. However, the price crisis deepened at the end of the month, and OPEC was forced to lower its overall production quota. Saudi Arabia agreed to limit production to between 4.1m. b/d and 4.353m. b/d. Average production was thought to be 3.8m. b/d in November, falling to 3.2m. b/d in December, and recovering to 3.8m. b/d by mid-January 1985. Revenues for the first half of 1984 reached only $16,420m. Finally, in February 1985, OPEC agreed to reduce the differential in the pricing of lighter and heavier crudes, and the cost of Arabian Light was reduced to $28 per barrel.

Since 1970 the development of Saudi Arabia's economy has been guided by a series of Five-Year Development Plans. The first Plan (1970–75) involved total investment of SR56,223m. Financed mainly by revenues from the petroleum industry, the early plans emphasized the provision of adequate infrastructure, health and education facilities. The second and third Development Plans (1975–80 and 1980–85) aimed to achieve major industrial development, in order to shift the balance of the economy away from a heavy dependence on sales of crude petroleum. The foundation of the industrialization programme lay in the construction of refineries and processing industries, to exploit reserves of petroleum and natural gas. (Proven reserves of gas in 1984 were about 3,200,000m. cu m.) It was hoped that Saudi Arabia's total refining capacity would increase to over 2m. b/d by 1990, compared with about 900,000 b/d in 1980. Other heavy industry, notably the manufacture of iron and steel, fertilizers, methanol, industrial gases and petrochemicals, was under rapid development during 1983 and 1984. These projects were controlled by the Saudi Arabian Basic Industries Corporation (SABIC, see p. 2499), and most were established as joint ventures with foreign companies. Plans for the future included the development of a petrochemical manufacturing concern with Italy and Finland, and the establishment of a pharmaceuticals company. There were also plans to develop other mineral deposits. Minerals in production by 1984 included limestone (for the cement industry), gypsum, marble, clay and salt. Reserves of other minerals, including substantial deposits of bauxite, iron ore, copper, gold, lead, zinc, silver and some uranium, are known to exist. A new mine, thought to hold 1.2m. tons of ore (including gold), was inaugurated in 1983.

A primary objective of the 1985–90 Development Plan was to encourage the involvement of the private sector in industry; initial steps towards this end included the sale, in 1984, of 30% of SABIC's capital to the public. In order to sustain and encourage local and secondary industries, a 1984 law stipulated that at least 30% of work undertaken on major projects by foreign compaies should be sub-contracted, where possible, to local firms. The manufacturing sector (excluding petroleum refining) expanded by 15.9%, in real terms, in 1982/83.

The agricultural sector employed 30% of the working population in 1982/83, but contributed only 4.6% of GDP. Cultivation is hampered by a shortage of water, and improvements in farming and irrigation methods were a principal feature of the third Development Plan, under which SR7,975m. was allocated to agricultural improvement, together with SR52,979m. to develop water supplies. The eventual aim of the development programme was to attain near self-sufficiency in all foods. Determined efforts were made to increase wheat production in 1983, including a system of large subsidies, whereby the Government was prepared to pay up to 10 times the price of imported grain for locally produced wheat. As a result of these efforts, the 1984 wheat harvest reached 1.3m. metric tons, exceeding domestic demand. By 1983 Saudi Arabia was self-sufficient in milk (which it exported to neighbouring countries in 1984), and had reached near self-sufficiency in eggs and broiler chickens. Sorghum, maize, millet, barley and lucerne, and many species of fruit, grow in oases. Sheep and goats are bred for milk and wool. Further improvements were planned in the 1985–90 Development Plan, partly as an incentive to the development of rural areas, which would curb the drift of the population to the urban regions.

Following the rapid economic growth of the years leading up to 1981/82, lower revenues from petroleum resulted in an economic decline in 1982/83, when GDP declined by 10.7%, in real terms. Although a large budget surplus was recorded in the

fiscal year 1981/82, a deficit of SR23,766m. was projected in the 1983/84 budget, and some major development projects were suspended or cancelled. In the event, although actual expenditure was 14.2% less than originally estimated, revenues also fell 26.6% short of the first projected figure of SR260,000m., and an actual deficit of SR32,200m. was recorded. In the hope of reviving growth, the 1984/85 budget projected increased public expenditure, with the deficit rising to SR45,900m. Steps were also taken to increase government revenue, such as an increased tax on domestic sales of petroleum products. The deficit would be financed from reserves.

In 1982 Saudi Arabia's major trading partners were the USA, which supplied 17.8% of imports and took 7.8% of exports, and Japan, from which it received 19.1% of imports and which took 23.7% of exports. The Federal Republic of Germany supplied 10.9% of imports, and France took 8.9% of exports. A decline of 2.4% was recorded in imports in 1983, when they totalled SR136,000m. About 19.7% of trade was conducted with the USA, followed by Japan (19.5%), and the Federal Republic of Germany (9.9%). The current account of Saudi Arabia's balance of payments, which recorded a substantial surplus in 1981, showed a deficit of US $1,100m. in 1982, widening to $18,433m. in 1983.

Despite falling revenues from petroleum, Saudi Arabia continued to provide generous international aid, usually in the form of low-interest loans and grants. The value of Saudi Arabian aid reached an annual average of about US $5,000m. between 1979 and 1983.

Transport and Communications

There is a railway between Dammam, on the Persian (Arabian) Gulf, and Riyadh, via Dhahran, Hufuf and al-Kharj. Paved roads were extended under the 1975–80 Plan, and by 1983 there were 64,644 km (40,168 miles) of roads in Saudi Arabia. Saudia (Saudi Arabian Airlines) operates internal and external air services. The principal ports are Jeddah, on the Red Sea, and Ras Tanura and Dammam, on the Gulf.

Social Welfare

Revenues from the petroleum industry have enabled the Saudi Arabian Government to provide free medicine and medical care for all citizens and foreign residents. In 1978 there were 5,029 physicians working in the country. In 1983 Saudi Arabia had 78 hospitals (with a total of 16,990 beds) and 1,092 health centres (providing 8,057 beds). The King Faisal Medical City, on the outskirts of Riyadh, is claimed to be the most technically advanced unit in the world.

Education

According to estimates by UNESCO, adult illiteracy declined from 97.5% in 1962 to 75.4% (males 65.5%; females 87.8%) in 1980. Elementary, secondary and higher education is free but not compulsory. Primary education begins at six years of age and lasts for six years. Secondary education begins at the age of 12 and also lasts for six years, divided into two equal stages. Enrolment of children in the primary age-group increased from 32% in 1970 to 51% (boys 63%; girls 38%) in 1980. Over the same period, secondary enrolment rose from 9% to 22% (boys 27%; girls 17%). Government expenditure on education increased from SR12,941m. in 1975/76 to SR25,823m. in 1981/82. There were more than 13,400 schools in 1982/83. Enrolment at universities was estimated at 64,000 in 1981/82.

Tourism

All devout Muslims try to make at least one visit to the holy cities of Medina, the burial place of Mohammad, and Mecca, his birthplace. More than 900,000 pilgrims visited Saudi Arabia in the Islamic year 1404 (1983/84).

Public Holidays

1985: 20 June and subsequent six to eight days (Id ul Fitr, end of Ramadan), 27 August and subsequent five days (Id ul Adha, Feast of the Sacrifice), 16 September (Islamic New Year), 25 September (Ashoura), 25 November (Mouloud, Birth of the Prophet).

1986: 7 April (Leilat al Meiraj, Ascension of the Prophet).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 halalah = 20 qurush = 1 Saudi riyal.

Exchange rates (31 December 1984):
£1 sterling = 4.143 Saudi riyals;
US $1 = 3.575 Saudi riyals.

SAUDI ARABIA-IRAQ NEUTRAL ZONE

The Najdi (Saudi Arabian) frontier with Iraq was defined in the Treaty of Mohammara in May 1922. Later a Neutral Zone of 7,044 sq km was established adjacent to the western tip of the Kuwait frontier. No military or permanent buildings were to be erected in the zone and the nomads of both countries were to have unimpeded access to its pastures and wells. A further agreement concerning the administration of this zone was signed between Iraq and Saudi Arabia in May 1938. In July 1975 Iraq and Saudi Arabia signed an agreement providing for an equal division of the diamond-shaped zone between the two countries, with the border following a straight line through the zone.

SAUDI ARABIA-KUWAIT NEUTRAL ZONE

A Convention signed at Uqair in December 1922 fixed the Najdi (Saudi Arabian) boundary with Kuwait. The Convention also established a Neutral Zone of 5,770 sq km immediately to the south of Kuwait in which Saudi Arabia and Kuwait held equal rights. The final agreement on this matter was signed in 1963. Since 1966 the Neutral Zone, or Partitioned Zone as it is sometimes known, has been divided between the two countries and each administers its own half, in practice as an integral part of the state. However, the oil wealth of the whole Zone remains undivided and production from the onshore oil concessions in the Zone is shared equally between the two states' concessionaires (Aminoil and Getty).

Directory

The Constitution

An eight-man committee under the Chairmanship of Prince Nayef, Minister of the Interior, was formed in March 1980 to draw up a 200-article basic 'system of rule', based entirely on Islamic principles. Plans, to which King Fahd has pledged his support, are also being made for the establishment of a Consultative Council, whose 50–70 members would be nominated.

Meanwhile, there is no written constitution for Saudi Arabia. The country is an absolute monarchy, with no legislature or political parties. The King rules in accordance with the Sharia, the sacred law of Islam. He appoints and leads the Council of Ministers, which serves as the instrument of royal authority in both legislative and executive matters. The King is also assisted by advisory councils, nominated or approved by him.

The organs of local government are the General Municipal Councils, the District Councils and the tribal and village councils. A General Municipal Council is established in the towns of Mecca, Medina and Jeddah. Its members are proposed by the inhabitants and must be approved by the King. Functioning concurrently with each General Municipal Council is a General Administration Committee, which investigates ways and means of executing resolutions passed by the Council. There are also elected district councils under the presidency of local chiefs, consisting of his assistant, the principal local officials and other important persons of the district. Every village and tribe has a council composed of the sheikh, who presides, his legal advisers and two other prominent personages. These councils have power to enforce regulations.

The Government

HEAD OF STATE

HM King Fahd ibn Abdul Aziz (acceded to the throne 13 June 1982).

Crown Prince: Abdullah ibn Abdul Aziz.

COUNCIL OF MINISTERS

(February 1985)

Prime Minister: HM King Fahd ibn Abdul Aziz.

First Deputy Prime Minister and Commander of the National Guard: HRH Prince Abdullah ibn Abdul Aziz.

Second Deputy Prime Minister and Minister of Defence and Civil Aviation: HRH Prince Sultan ibn Abdul Aziz.

Adviser to the Minister of Defence and Civil Aviation (with Ministerial rank): Gen. Othman al-Humaid.

Minister of Public Works and Housing: HRH Prince Mutaib ibn Abdul Aziz.

Governor of Mecca (with Ministerial rank): HRH Prince Majed ibn Abdul Aziz.

Minister of the Interior: HRH Prince Nayef ibn Abdul Aziz.

Minister of Foreign Affairs: HRH Prince Saud al-Faisal.

Minister of Petroleum and Mineral Resources: Sheikh Ahmed Zaki Yamani.

Minister of Labour and Social Affairs: Muhammad al-Ali al-Fayiz.

Minister of Higher Education: Sheikh Hassan ibn Abdullah al-Sheikh.

Minister of Communications: Sheikh Hussein Ibrahim al-Mansouri.

Minister of Finance and National Economy: Muhammad Ali Abdul-Khail.

Minister of Information: Ali Hassan al-Shaer.

Minister of Industry and Electricity: Abdul Aziz al-Zamil.

Minister of Commerce: Dr Sulaiman Abdul Aziz al-Sulaim.

Minister of Justice: Sheikh Ibrahim ibn Muhammad ibn Ibrahim al-Sheikh.

Minister of Education: Dr Abdul Aziz al-Abdullah al-Khuwaiter.

Minister of Planning: Sheikh Hisham Nazer.

Minister of Pilgrimage (Hajj) Affairs and Waqfs (Religious Endowments): Sheikh Abdul Wahhab Ahmad Abdul Wasi.

Minister of Municipal and Rural Affairs: Ibrahim bin Abdullah al-Anqari.

Minister of Agriculture and Water: Dr Abdul-Rahman ibn Abdul Aziz ibn Hasan al-Sheikh.

Minister of Health: Faisal ibn Abdul-Aziz al-Husailan.

Minister of Posts, Telegraphs and Telecommunications: Dr Alawi Darwish Kayyal.

Ministers of State: Sheikh Muhammad Ibrahim Masoud, Dr Muhammad Abdel Latif Milham, Abdullah Mohammad al-Omran, Omar Abdul-Qader Faqih.

President of Youth Welfare: HRH Prince Faisal ibn Fahd.

Ministers without Portfolio: Fayez Badr, Abdel-Hadi Taher.

Adviser to the Court with rank of Minister: Rashid bin Salih bin Khinayn.

Head of Girls' Education with rank of Minister: Muhammad bin Abdullah bin Awdah.

Deputy Minister of the Interior: HRH Prince Ahmad ibn Abdul Aziz.

MINISTRIES

Ministries in Saudi Arabia do not have full postal addresses. It is sufficient to indicate the city, followed by the postal code, which

carries the same suffix for all government departments; for Riyadh the postal code is 11151; for Jeddah it is 21151.

Judicial System

Judges are independent and governed by the rules of Islamic Sharia. The following courts operate:

Supreme Council of Justice: consists of 11 members and supervises work of the courts; reviews legal questions referred to it by the Minister of Justice and expresses opinions on judicial questions; reviews sentences of death, cutting and stoning.

Court of Cassation: consists of Chief Justice and an adequate number of judges; includes department for penal suits, department for personal status and department for other suits.

General (Public) Courts: consist of one or more Judges; sentences of public courts are issued by a single judge, with the exception of death, stoning and cutting, which require the decision of three judges.

Summary Courts: consist of a single judge or more; sentences are issued by a single judge.

Specialized Courts: Article 26 of the judicial system stipulates that the setting up of specialized courts is permissible by Royal Decree on a proposal from the Supreme Council of Justice.

Religion

ISLAM

Arabia is the centre of the Islamic faith, and Saudi Arabia includes the holy cities of Mecca and Medina. Except in the Eastern Province, where a large number of people follow Shi'a rites, the majority of the population are Sunni Muslims, including the strictly orthodox Wahhabi sect, to which most of the indigenous inhabitants belong. The Wahhabis originated in the 18th century but first became unified and influential under Abdul Aziz (Ibn Saud), who became the first King of Saudi Arabia. They are now the keepers of the holy places and control the pilgrimage to Mecca.

Mecca: Birthplace of the Prophet Muhammad, seat of the Great Mosque and Shrine of Ka'ba, visited by about 1m. Muslims annually.

Medina: Burial place of Muhammad, second sacred city of Islam.

The Press

Since 1964 most newspapers and periodicals have been published by press organizations administered by boards of directors with full autonomous powers, in accordance with the provisions of the Press Law. These organizations, which took over from small private firms, are privately owned by groups of individuals widely experienced in newspaper publishing and administration (see Publishers).

There are also a number of popular periodicals published by the government and by the Arabian American Oil Co and distributed free of charge. The press is subject to no legal restriction affecting freedom of expression or the coverage of news.

Finance

(cap. = capital; p.u. = paid up; dep. = deposits; res = reserves; m. = million; brs = branches; amounts in Saudi riyals unless otherwise stated)

BANKING

The Saudi Arabian banking system consists of: the Saudi Arabian Monetary Agency, as central note-issuing and regulatory body; 12 commercial banks (two national and 10 foreign banks); and three specialist banks. There is a policy of 'Saudization' of the foreign banks.

The rising volume of oil revenues imposed a need for a central monetary authority and in 1952 the Saudi Arabian Monetary Agency (SAMA) was established in Jeddah. SAMA's functions include: bankers to the government; stabilization of the value of the currency; administration of monetary reserves; issue of coin and notes; and regulation of banking.

Central Bank

Saudi Arabian Monetary Agency (SAMA): POB 1169, Riyadh; tel. (1) 478-7400; telex 201734 (English), 201466 (Arabic); f. 1952; total assets and liabilities 519,678m. (1982); Gov. Hamad Saud al-Sayyari; 10 brs.
